1 Census 2006

A Census of Population of Ireland was taken on the night of Sunday, 23 April 2006, in accordance with the Statistics (Census of Population) Order 2005 (S.I. No. 786 of 2005)¹. An extract from the census questionnaire is reproduced in Appendix 1.

1.1 Coverage of the Census

The census figures relate to the *de facto* population, i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 23 April 2006, together with all persons who arrived in that area on the morning of Monday, 24 April 2006, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on census night as well as those in residence, while usual residents temporarily absent from the area are excluded from the census count.

A limited number of questions, relating mainly to demographic characteristics, were asked in respect of usual residents who were temporarily absent from their households on census night. The responses to these questions enables a more precise picture to be built up on families and households by excluding visitors present on census night and including residents who were temporarily absent.

1.2 Conduct of the Census

A temporary field force consisting of 6 Census Liaison Officers, 40 Regional Supervisors, 400 Field Supervisors and some 4,400 part-time Enumerators carried out the census enumeration. During the four weeks before Census Day the enumerators entered details in respect of 1.77 million private residences and communal establishments in their enumerator record books. They simultaneously delivered blank census questionnaires to 1.5 million of these dwellings that were expected to be occupied on census night. Approximately 266,000 residences were vacant at the time of the census while in a further 30,000 cases the household was either enumerated elsewhere or temporarily absent from the State. The collection of completed questionnaires took place between Monday 24 April and Monday 22 May 2006.

1.3 Production of Results

Each enumerator first prepared and returned to the CSO a summary of the population in his/her enumeration area. These summaries formed the basis for the preliminary 2006 population results². The completed questionnaires for individual households were subsequently transported to the CSO for processing.

The population summaries, dwelling listings and enumeration maps for individual enumeration areas were checked for consistency and used to determine the boundaries of census towns and suburbs/environs of towns with legal boundaries. The capture and processing of the responses to questions on the census questionnaire proceeded concurrently.

¹ The Statistics (Census of Population) Order 2005 was made by the Minister of State at the Department of the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act 1993 (No. 21 of 1993) and the Statistics (Delegation of Ministerial Functions) Order 2004 (S.I. No. 664 of 2004).

² Census of Population of Ireland, 2006: Preliminary Report (Prn. A6/0988), July 2006.

1.4 Publication of Results

The planned publication schedule is set out in Appendix 2. The schedule consists of the Principal Demographic Results and Principal Socio-economic Results, which provide the main census results, primarily at national level. More detailed data is provided in 13 subject matter reports. All of the tables published in these reports will be made available on the Central Statistics Office web site (www.cso.ie) using Beyond 20/20 interactive software. This software gives Internet users the ability to select and view data online and then download the same data to their computers.

1.5 Place of Work Census of Anonymised Records (POWCAR)

Anonymised Census records relating to persons at work who were enumerated where they are usually resident are available to bona fide researchers for the purposes of research on commuting patterns etc. Where the application is granted the researcher will be signed up as an Officer of Statistics. The POWCAR is described in the Sections 2 and 3.

1.6 Application to use 2006 POWCAR

POWCAR data is only available to bona fide researchers who are approved by CSO and signed up as Officers of Statistics for the duration of the research they propose to undertake. **All material published from the POWCAR must be approved in advance by CSO.** CSO Ireland POWCAR must be acknowledged as source of data.

Application to use the POWCAR must be made in writing to *Director of Census, Central Statistics Office, Swords Business Campus, Balheary Road, Swords, Co. Dublin* using the form in Appendix 3. Where the application is approved all researchers accessing the data will be required to sign a declaration making them Officers of Statistics under the Statistics Act 1993 and agreed to be bound by the confidentiality provisions of the act. There are severe penalties under the act for divulging confidential data. See <http://www.cso.ie/census/documents/statsact93.pdf>.

Any person who uses information furnished under this Act or the repealed enactments in contravention of Section 32 of this Act or wilfully discloses information relating to any identifiable person or undertaking in contravention of Section 33 of this Act shall be guilty of an offence.

A person guilty of an offence under any provision of this Act shall be liable

- a) on summary conviction to a fine not exceeding €1,250, or
- b) on conviction on indictment, to a fine not exceeding €25,000.

2 POWCAR Scope

The Place of Work Census of Anonymised records ONLY cover persons who at the time of the census:

- were enumerated in a private household (persons enumerated in Communal Establishments are not included)
- were 15 years old or over
- were enumerated at home (Question 7 = Here at this address)
- indicated that their Present Principal Status was working for payment or profit (Question 26 = box 1).

In 2002 a Place of Work Sample of anonymised records was released covering a 15% random sample of persons satisfying the above criteria. In 2006 all records falling within the scope above were coded to place of work.

2.1 Place of Work coding

The location of the place of work was coded for each person in the sample on the basis of the reply to Questions 31 and Question 32.

31 What is (was) the full name of the Organisation you work(ed) for in your main job?
If you have (had) your own business, write in the NAME of the business.

32 What is (was) the full address at which you actually work(ed)?

1 Work mainly at or from home 2 No fixed place of work

Where the person ticked box 1 or 2 on Question 32 the place of work was automatically defaulted to W/M (W=Works mainly at or from home; M=No fixed place of work). Otherwise the employer name and address was matched against addresses on the An Post GeoDirectory. Where the coder could not find an exact match they coded to a near match if they could find a GeoDirectory address on the same street or in the same town as the address stated on the form. The Irish National Grids matched from the geo directory were linked back to the place of work Electoral District (ED) and Town by superimposing the digital boundaries of the ED, Towns and 2006 Enumeration Areas in the case of the 5 Cities Dublin, Cork, Limerick, Galway and Waterford and their suburbs.

In 2006 places of work with and address in Northern Ireland were coded to the county in Northern Ireland. Where the person indicated a work place address abroad these records were coded to a specific code to indicate that the person was working abroad i.e. outside Ireland or Northern Ireland. The following table give a summary of the coding.

	Persons	%
Total persons in private households enumerated where they are usually resident and at work	1,834,472	100
Q31/Q32 address was matched exactly to a GeoDirectory address point	1,097,896	60
Q31/Q32 address was matched to a GeoDirectory address point in the same street or town (includes addresses coded to Northern Ireland and Overseas)	282,953	15
POW Address blank in Q31/Q32 (includes uncodable)	136,853	7
POW address was uncodable	1,020	0
Works from home indicated in Q32	107,202	6
No fixed place of work indicated at Q32	208,548	11

2.2 Anonymisation and recoding

The coded records relating to persons within households were anonymised by stripping off all identifiable information such as household number, person number within household and by recoding variables where the number of categories could lead to the identification of an individual when combined with other information on the record.

3 POWCAR Structure and content

Table 1 below gives details of the variables in micro data data file and how they are classified.

The Place of Work Census data file IECOPPlaceOfWork2006.txt is a TAB delimited text file in the format outlined in Table 1. Note that the first record of this file contains the variable headings as indicated

Research Microdata File (RMF) - Application Form

The following questions are only relevant in the context of RMF's where access is to be facilitated "Off-site". Note in general access to enterprise/entity based RMFs will not be facilitated "off-site".

The information provided will be used to assess the feasibility of providing access to the RMF "off-site".

29. If the RMF is provided "off-site" will the RMF be held on a stand-alone PC or on a network?

- Stand-alone PC
- Networked PC

30. If it is proposed to hold the RMF on a networked PC please provide details of the proposed location on the network where the RMF will be stored

31. Please detail physical security measures in place to prevent unauthorised access to the RMF

32. Please detail logical security measures in place to prevent unauthorised access (e.g. ACLs, logon procedures encryption)

33. Please detail measures in place to prevent copies of the RMF being taken

34. Please detail method of ensuring how the RMF will be removed from the network on completion of the research project (or period for which access has been granted elapses)
