## General Details

### Introduction

A Census of Population was taken on the night of Sunday, 28 April 2002<sup>1</sup>, in accordance with the Statistics (Census of Population) Order 2001 (S.I. No. 491 of 2001)<sup>2</sup>. A copy of the census questionnaire, including the explanatory notes which accompanied it, is reproduced in Appendix 1.

This seventh volume of the detail report contains results relating to the population aged 15 years and over classified by age at which full time education ceased, highest level of education completed and third level qualifications held.

Subsequent census volumes will analyse the population by such characteristics as travel to work, disability, religion, etc.

### Coverage of the Census

The census figures relate to the *de facto* population, i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 28 April 2002, together with all persons who arrived in that area on the morning of Monday, 29 April 2002, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on census night as well as those in residence, while usual residents temporarily absent from the area are excluded from the census count.

A limited number of questions, relating mainly to demographic characteristics, were asked in respect of usual residents who were temporarily absent from their households on census night. The responses to these questions enables a more precise picture to be built up on families and households by excluding visitors present on census night and including residents who were temporarily absent.

### Conduct of the Census

A temporary field force consisting of 5 Census Liaison Officers, 35 Regional Supervisors, 350 Field Supervisors and some 4,000 part-time enumerators carried out the census enumeration. Blank census questionnaires were distributed to every household and communal establishment in the State during the four weeks immediately preceding census night. Collection of completed questionnaires commenced on Monday, 29 April. The enumerators examined the questionnaires at the time of collection to ensure that they were correctly completed and, where necessary, they assisted householders in their completion.

### Production of Results

Each enumerator first prepared and returned to the Central Statistics Office (CSO) a summary of the population in his/her enumeration area. These summaries formed the basis for the preliminary 2002 population results<sup>3</sup>. The completed questionnaires for the individual households were subsequently transmitted to the CSO for processing.

The population summaries, dwelling listings and enumeration maps for individual enumeration areas were checked for consistency and used to determine the boundaries of census towns and suburbs/environs of towns with legal boundaries. The capture and processing of the responses to questions on the census questionnaire proceeded concurrently.

<sup>1</sup> The census originally planned for 29 April 2001 was postponed because of the Foot and Mouth disease situation pertaining at the time.

<sup>2</sup> The Statistics (Census of Population) Order, 2001 was made by the Minister of State at the Department of the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act, 1993 (No. 21 of 1993) and the Statistics (Delegation of Ministerial Functions) Order, 1997 (S.I. No. 327 of 1997).

## Publication of Results

The planned publication schedule is set out in Appendix 9. The schedule consists of the Principal Demographic Results and Principal Socio-economic Results, which provide the main census results, primarily at national level. More detailed data is provided in 13 subject matter reports. All of the tables published in these reports will be made available on the Central Statistics Office web site ([www.cso.ie](http://www.cso.ie)) using Beyond 20/20 interactive software. This software gives Internet users the ability to select and view data online and then download the same data to their computers.

### **2002 Census questionnaire**

The attached extract is taken from the household form used in the 2002 Census. The household form covers 6 persons and consists of 24 pages. The attached extract covers persons 1 and 2 only. The layouts for persons 4 to 6 are identical to that for person 2.

#### Regional Authorities

The geographical sub-divisions used in Tables 2, 10 and 22 are based on Regional Authorities. These eight regions were established under the Local Government Act, 1991, Regional Authorities Establishment Order, 1993 which came into operation on 1 January 1994.

Name of region	Constituent counties	Type of area
Border	Cavan	Administrative county
	Donegal	Administrative county
	Leitrim	Administrative county
	Louth	Administrative county
	Monaghan	Administrative county
	Sligo	Administrative county
Dublin	Dublin	City
	Dún Laoghaire-Rathdown	Administrative county
	Fingal	Administrative county

Mid-East	Kildare	Administrative county
	Meath	Administrative county
	Wicklow	Administrative county
Midland	Laoighis	Administrative county
	Longford	Administrative county
	Offaly	Administrative county
	Westmeath	Administrative county
Mid-West	Clare	Administrative county
	Limerick	City
	Limerick	Administrative county
	Tipperary North	Administrative county
South-East	Carlow	Administrative county
	Kilkenny	Administrative county
	Tipperary South	Administrative county
	Waterford	City
	Waterford	Administrative county
	Wexford	Administrative county
South-West	Cork	City
	Cork	Administrative county
	Kerry	Administrative county
West	Galway	City
	Galway	Administrative county
	Mayo	Administrative county
	Roscommon	Administrative county

For the 1991 and previous censuses, the geographical sub-divisions used were Planning Regions.

## Appendix 2 (contd.)

### Education

The results from the 1996 and 2002 Censuses in relation to the age at which full-time education ceased are not strictly comparable due to changes in the way the question was asked.

In 1996, the following question was asked of all persons aged 15 years and over other than those whose Present Principal Status was recorded as *student*:

State age at which full-time education ceased (to be completed only for persons whose full-time education has ceased).

In 2002, the question below was asked of all persons aged 15 years of age and over irrespective of their response to Question 24 on Present Principal Status:

Have you ceased your full-time education?  
(tick boxes)  
1 Yes  
2 No

If 'Yes', write in AGE at which it ceased.

In 2002, there were 116,543 persons who stated that their education had not ceased and whose Present Principal Status was other than *student*. There was no comparable category in the 1996 Census, because if a person's Present Principal Status in the 1996 Census was other than student, then it was assumed that the person had ceased their full-time education. In addition, in the 2002 Census a much higher proportion of persons did not indicate the actual age at which they finished their full-time education.

### Labour Force

The results of the Quarterly National Household Survey (QNHS) provide the basis for the official series of quarterly labour force estimates. The labour force and its constituent figures shown in this report are directly based on the census. Users should be aware that information derived from identical questions in the census and QNHS for the relevant quarter of the same year may show appreciable differences. The main categories affected are the constituents of the question on principal economic status, the International Labour Organisation (ILO) definition of employment and the employment estimates classified by industry and occupation. The main reasons for the differences are:

- the census form is completed by a responsible adult in each household throughout the State in respect of everyone present in the household on census night while the QNHS is by face to face interview
- the census relates to all persons present in the State (including visitors from abroad) at the time of the census while the QNHS covers persons usually resident in Ireland
- the census is a complete enumeration while the QNHS is a sample survey
- the QNHS has a much wider range of questions on the labour force which may have a bearing on the responses received to individual questions.

### Occupation

The Occupation classification (set out in Appendix 3) used in the census, is based on the UK Standard Occupational Classification<sup>4</sup>, with modifications to reflect Irish labour market conditions. The classification was first used in the 1996 Census. This classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). The hierarchical structure provided within this classification is suited to accurate automatic coding.

<sup>4</sup> Standard Occupational Classification, Second edition, HMSO, London, 1995.

## Appendix 2 (contd.)

The code to which a person's occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.

The intermediate level of occupational groups is given in Appendix 4 while the most detailed level of occupations for which information from the 2002 Census is published is given in Appendix 3.

### Industry

The 2002 Census is the first Census in which industry has been coded using NACE - the General Industrial Classification of Economic Activities within the European Communities. NACE Rev.1 is a 4-digit activity classification that was drawn up in 1990 and is a revision of the version originally published by Eurostat in 1970. This legislation imposes the use of the new classification uniformly within all the Member States.

NACE is a hierarchical classification, with 60 2-digit codes, 222 codes at 3-digit level and 503 at 4-digit level. The most detailed level of industry distinguished in the present report is given in Appendix 7 while the intermediate level of industrial groups is given in Appendix 8.

The industry in which a person is engaged is determined (whatever the occupation) by the main economic activity carried out in the local unit in which he or she works. If, however, the local unit provides an ancillary service to another unit in the business (e.g. administration, storage, etc.) then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual.

A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular

occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term "sector of economic activity". The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons, the nature of their own business or profession.

### Socio-economic Group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition a residual group entitled "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status. The detailed classification used for determining the socio-economic group of all persons at work, unemployed or retired is given in Appendix 5.

Persons on home duties or at school/college, who are members of a family unit, were classified to the socio-economic group of the person in the family on whom they were deemed to be dependent. Thus, if the head of a family was at work, unemployed or retired, dependent persons were assigned to his/her socio-economic group. If the head was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.) or if his/her occupation was not known, they were assigned to the socio-economic group of the principal earner in

## Appendix 2 (contd.)

the family - if there was no such earner, they were assigned to the **unknown** socio-economic group. Other persons engaged in home duties or at school/college who were not members of a family unit, such as persons living alone or relatives of a head of household who were not members of the family unit (e.g. widowed grandparents, etc.), were assigned to the **unknown** group.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

### Social Class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation:

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible. The detailed classification used for determining the social class group of all persons at work, unemployed or retired is given in Appendix 6.
