Topographical Description of the Eight Registration Divisions of Ireland,	33
Estimated Population of Ireland in each of the years 1801-76,	34
 ABSTRACTS:—	
Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1876, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks;	36-45
Ages of Persons married in 1876, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	46-47
Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1876; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births,	48-72
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1876,	74-83
Deaths registered in each of the Four Quarters of 1876 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	84-93
Deaths of Males and Females at different Ages registered in 1876, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	94-101
Causes of Death of Males and Females in Ireland, at different periods of life, in 1876,	102-109
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1876,	110-113
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1876,	114-121
Deaths from several Zymotic and other Causes in 1876, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties,	122-125
Index to Superintendent Registrars' Districts, and Registrars' Districts,	126-133

R E P O R T

TO

His Grace, JOHN WINSTON, DUKE OF MARLBOROUGH, K.G.,
&c., &c., &c.,

Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

I have the honour to submit my Report on the Marriages, Births, and Deaths registered in Ireland during the year 1876, together with the General Abstracts in which the number, season, locality, and special nature of these events are set forth in detail.

Returns prepared from data supplied for the purpose by the Registrars, and containing approximate information on some of the more salient features of the Registration records, in so far as they relate to the Public Health, were issued after the close of each Quarter; and a preliminary Annual Abstract, compiled from the same sources, was presented to Parliament early last year.

The information given in those Returns, necessarily imperfect, has since been carefully revised, and in the Abstracts now submitted the corrected results will be found incorporated with many additional features of general interest and utility.

GENERAL SUMMARY.

The Marriages registered during the year number 26,338; the Births 140,469; and the Deaths 92,324. Both absolutely and in proportion to the estimated population, the marriages and births are under the annual average for the preceding ten years. The death-rate, though slightly over the average, is considerably under that for the year 1875.

TABLE I.— Showing for each of the years 1866–76, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1866–75.

YEARS.	Estimated Population.	Numbers Registered.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.			
		Marriages.	Births.	Deaths.		Marriages.	Births.	Deaths.	Emigrants.
1866	5,625,307	30,802	144,970	93,154	99,467	109·5·46	25·7	16·51	
1867	5,522,942	30,121	146,090	93,027	80,624	109·5·45	26·5	16·8	18·0

1870	5,449,094	27,277	145,659	89,593	74,855	107·5·01	26·7	16·4	12·2
1871	5,418,512	28,667	149,846	90,462	71,240	107·5·29	27·7	16·7	13·8
1872	5,395,007	28,960	151,355	88,348	78,102	107·5·37	28·1	16·4	13·2
1873	5,372,199	26,943	149,278	97,294	90,149	107·5·02	27·8	18·1	14·5
1874	5,337,261	25,730	144,377	97,537	73,184	106·4·82	27·1	18·3	16·9
1875	5,314,844	24,481	141,288	91,961	51,462	107·4·61	26·6	17·3	13·8
Yearly Average, 1866–75.	5,407,178	27,366	145,685	92,602	74,667	107·4·53	26·1	18·5	9·7
1876	5,321,618	26,388	140,469	92,324	87,587	107·4·96	26·4	17·3	7·1

The recorded natural increase of population, or excess of births over deaths was 48,145, the loss by emigration, 37,587; there was thus a net increase of 10,558 persons, and the year is remarkable as being the first since 1845, which did not exhibit a decline in the population. The estimated population in the middle of the year was 5,321,618.

MARRIAGES.

The number of marriages registered during the year was 26,388, being 1 in every 202, or 4·96 per 1,000 of the estimated population.

This rate, although somewhat more favourable than that for any of the preceding three years, is less than the low rate yielded by the average annual number of marriages registered during the ten years 1866-75, which rate is much under the marriage-rates in other countries, the statistics of which are available.

As the subject is of considerable importance, I beg to repeat the observations respecting it which I submitted in my Report on the Registration for the year 1875:—

"There is no doubt that a portion of this disparity [between the marriage-rate in Ireland and that in many other countries,] is due to defective registration; but the loss to be set down to this cause is not so great as might at first sight appear and the actual marriage-rate in Ireland, in proportion to the total population is, unquestionably, low.

"This is, in part, accounted for by the abnormal conditions arising from a large annual emigration of unmarried persons of what may be called the marrying ages. The consequent reduction of the sources from which the marriage ranks are recruited is accompanied by an undue increase in the proportion of the population embraced in the other age-periods, and the result tends to produce a low rate compared with the number of inhabitants at all ages.

"Again, amongst the actual population, the marriage-rate is evidently low. Thus, from the last Census Reports it appears that, while in England the per-cent-age of men aged 20 years and upwards who were unmarried was only 27·1, in Ireland the unmarried formed 38·3 per cent. of the total at the same ages.

"But the returns now under notice in themselves contain proof of the comparative paucity of marriages in Ireland.

"The provisions of the law respecting the registration of Protestant marriages are such that it is all but impossible any should remain unaccounted for; yet, compared, say, with the general marriage-rate for England, the result appears very unfavourable. Thus the average annual rate in England is 1 in every 119 persons, or 8·4 per 1,000 of the population, while the Protestant marriages in Ireland last year only equal 1 in 168, or 5·97 per 1,000 of the estimated Protestant population.

"There are no grounds for assuming that marriages are proportionately more numerous among the Roman Catholic than among the Protestant inhabitants; so that marriages of the latter, if, indeed, not much over the general rate, are certainly not under it, and the extent to which the registered Roman Catholic marriages fall short of the rate yielded by marriages of Protestants is the maximum possible loss by non-registration.

"The Roman Catholic marriages registered last year only afford a rate of 1 in 245, or 4·08 per 1,000 of the estimated Roman Catholic population, which, as may be seen, is much under the rate for Protestant marriages.

"There are no precise data for determining how far this can be satisfactorily accounted for; but, as the Roman Catholic inhabitants constitute the great majority of the people and include the large mass of the humbler classes, there seems but little doubt that the depression in the marriage-rate, referred to above as resulting from emigration, would be most apparent amongst them, and also that any economic reason leading to a low rate would be likely to affect them to a greater extent than it would their Protestant fellow countrymen.

"It is, however, to be feared that, after making all due allowances, the unregistered marriages, which, as may be gathered from what has been stated above, are confined to those of Roman Catholics, are still numerous.

"There is no valid reason why they should be so. The trouble involved in complying with the law regarding the registration of Roman Catholic marriages is reduced to a minimum, while the individual and the national value of a perfect record is manifest, and ought to secure the willing co-operation of all concerned."

Of the 26,388 marriages registered during the year 1876, 18,930 were between Roman Catholics, 4,033 were celebrated according to the rites and ceremonies of the late Established Church; 2,528 were in Presbyterian Meeting-houses; 347 in "Registered Buildings" belonging to various religious denominations; only 540 by civil contract in the Registrars' offices; 9 were according to the usages of the Society of Friends, and one was according to the Jewish rite. The small number of marriages in the Registrars' offices is in striking contrast to the proportion of civil marriages in many other countries.

TABLE II.—**Marriages registered in Ireland in 1876 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:**—

1875,	4,088	2,495	326	522	14	3	7,448	16,589	24,087	5·97	4·08	4·53
Average 1866-75,	4,491	2,579	269	703	13	2	8,057	19,309	27,366	6·45	4·60	5·06
1876,	4,033	2,528	347	540	9	1	7,458	18,980	26,388	5·96	4·65	4·96

Of the 4,033 marriages according to the rites of the late Established Church, 65 were by special licence, 3,301 by licence, 461 after the publication of banns, 15 on Registrar's certificate, and in 191 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1876 there were issued by the Registrars 707 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1876.	Number of Registered Meeting-houses on 31st December, 1876.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	121	558	2,449
2. Remonstrant Synod of Ulster,	9	19	60
3. Presbytery of Antrim,	4	10	16
4. United Presbytery or Synod of Munster,	3	3	—
5. Northern Presbytery of Antrim,	1	6	13
Total,	138	596	2,538

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1876, there were 1,502 churches and chapels of the late Established Church, 596 registered Presbyterian Meeting-houses, and 292 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show a decrease of 7 as regards the late Established Church, an increase of 2 Presbyterian Meeting-houses, and an increase of 7 "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1876 :—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	157	Church Methodists,	1
Reformed Presbyterians,	37	Covenanters,	1
Independents,	21	United Original Seceders,	1
Baptists,	17	" Protestant Dissenters,"	1
Seceders,	11	" Christians,"	1
United Presbyterians,	9	Non Subscribing Unitarians,	1
Primitive Wesleyan Methodists,	9	"The Catholic Apostolic Church,"	1
Methodists, New Connexion,	7	Christian Brethren,	1
Moravians, or United Brethren,	5	Independent Protestants,	1
Primitive Methodists,	5	Jews,	1
Evangelical Union,	2	Total,	292
Unitarians,	2		

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other

quarters. Thus, in 1876 the numbers recorded were—in the first quarter, 10,445; in the second, 4,783; in the third, 5,331; and in the last, 5,829.

TABLE III.—The Number of Roman Catholic and of Protestant Marriages registered in each Quarter during the four years, 1873–6:—

QUARTER ENDING THE LAST DAY OF	Years and Number of Marriages Registered.							
	1873.		1874.		1875.		1876.

December, .	3,407	2,034	3,245	1,883	3,367	2,025	3,759	2,070
Total, .	18,129	7,601	17,348	7,133	16,589	7,448	18,930	7,458
General Total,	25,730		24,481		24,037		26,388	

The marriages of bachelors and spinsters constitute 84·9 per cent. of the total; those of widowers and spinsters 9·2 per cent.; of bachelors and widows 3·2 per cent.; and of widowers and widows 2·7 per cent. Thus, 12 in every 100 of the men married were widowers, and 6 per cent. of the women were widows; and in 15 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or "of full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1876 the ages of both parties were specified in only 8,009 instances, being considerably less than one-third of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 26,388 men married during the year, 765, or 2·90 per cent. were minors; and of the women married, 3,455, or 13·09 per cent. were under age. The per-cent-age of husbands married under age is slightly over the average for the preceding ten years, while, as regards the wives, the proportion under age, though somewhat greater than in any of the preceding three years, is still under the average for the ten years, 1866–75.

The highest proportion of husbands married under age in 1876, 4·32 per cent., was in the North-Eastern Division, which includes Belfast and nearly all the northern manufacturing districts; and the highest per cent-age of wives, 20·44, was in the Western Division. These results coincide with those in the preceding ten years.

It may be added, that the per-cent-age of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1876, 17,983, or 68·1 per cent. of the husbands, and 16,536, or 62·7 per cent., of the wives, wrote their names, and the remainder signed by marks.

These figures, though slightly less favourable than those for either of the two preceding years, and still leaving much to be desired, contrast hopefully with the corresponding results twelve years since, the percentage of persons married in 1866 who wrote their names being—men 61·4, and women 50·3.

As usual, the most favourable results appear in the Eastern or Metropolitan Division, and the least satisfactory in the Western Division, the number who wrote their names varying from 77 in every 100 men and 73 in every 100 women in the former, to 56 per cent. of the men and 52 per cent. of the women married in the latter division.

The number of marriages registered in each of the eleven years 1866–76; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE IV.—The Number of Marriages in the Eight Registration Divisions of Ireland* during the years 1866–76, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Divisions.*		Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

	1870	4,730	59·4	47·6	2·28	15·62	9·60
	1871	4,497	60·8	51·4	2·45	14·81	11·41
	1872	4,097	64·9	57·1	1·88	14·91	10·96
	1873	3,867	67·8	58·3	2·64	13·71	11·40
	1874	3,637	70·1	62·6	2·20	13·45	9·73
	1875	3,484	67·9	59·6	2·24	14·67	12·00
	1876	2,961	68·0	62·3	2·25	13·33	12·07

In the province of Leinster, 73·8 per cent. of the men, and 70·8 per cent. of the women married wrote their names; in Munster, 68·6 per cent. of the men, and 63·1 per cent. of the women; in Ulster, 68 in every 100 men, and 60 in every 100 women; and in Connaught, only 56·5 per cent. of the men, and 52·4 per cent. of the women.

In 6,235 instances, both of the parties married signed the register by "mark," and in 5,787 cases the register was thus signed by either the husband or the wife, so that in 12,022 instances, or 45·6 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 14,366 instances, or 54·4 per cent., both parties wrote their names.

In proportion to the estimated population at all ages the registered marriages were most numerous in the province of Leinster in which, however, the rate was only 5·5 per 1,000 persons; Ulster comes next, with 5·0 per 1,000; Munster third, with 4·8 per 1,000; and Connaught last, the rate being 4·3 per 1,000.

The highest rate in any county was 7·8 per 1,000, which was the marriage rate for Dublin; and the lowest 3·6 per 1,000 for Meath and Cavan. Between these, the most favourable were 6·0 for Antrim, 5·5 in Armagh and Londonderry, and 5·1 in Kerry and Limerick; and the least so, 3·7 in Leitrim, and 3·9 in Sligo.

BIRTHS.

The number of births registered during the year 1876 is 140,469—72,160 boys, and 68,309 girls, or 105·6 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 37·9, or 26·4 per 1,000, which is slightly under the average rate for the ten years, 1866–75.

In my report for the year 1875, I glanced at the causes of the comparatively low birth-rate in Ireland, and the following observations, which I then made, are almost equally applicable to the year now under review:—

"It has been seen that the marriages registered in Ireland, when compared with the total population, fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking, but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the childbearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in

England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter."

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcileable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 140,469 children whose births were registered in Ireland during the year, 1876, 137,209, or 97·7 per cent., were legitimate, and 3,260, or 2·3 per cent., were illegitimate. The average per-cent-age of illegitimate births in the preceding 10 years was 2·7.

It is needless to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 70,495 were males, and 66,714 females, being 106 of the former to every 100 of the latter; and of the illegitimate children 1,665 were males, and 1,595 females, or 104 boys to 100 girls.

TABLE V.—The Per-cent-age of Legitimate and Illegitimate Births registered in Ireland during the years 1872–76, by Divisions.

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1872.	1873.	1874.	1875.	1876.	1872.	1873.	1874.	1875.	1876.

Western, . .	99·2	99·2	99·2	99·2	99·2	0·8	0·8	0·8	0·8	0·8
South-Eastern, .	97·3	97·0	97·4	97·3	97·5	2·7	3·0	2·6	2·7	2·5
South-Western, .	98·6	98·7	98·7	98·7	98·7	1·4	1·3	1·3	1·3	1·3

As in previous years, the lowest per-cent-age of children born out of wedlock was in the Western Division, and the highest in the North-Eastern division. The order of the several divisions is as follows:—Western 0·8 per cent. of total births; South-Western, 1·3; North Midland

1·5; Eastern, 2·0; South Midland, 2·0; North-Western, 2·2; South-Eastern, 2·5; and North-Eastern, 4·8.

Comparing the provinces, we find that the per-cent-age of children born in Ulster, who were illegitimate, was 3·9; in Leinster, 2·0; in Munster, 1·5; and in Connaught, 0·7.

The extremes of the county rates are found in Down and Mayo. In the former of 6,222 births registered, 383, or 6·2, per cent. were illegitimate, and in the latter, out of 6,736 births recorded, only 26, or 0·4 per cent., were so classed.

The respective total birth-rates for the provinces in 1876 were—Munster, 27·7 per 1,000 of the population; Connaught, 26·8; Ulster, 26·0 per 1,000; and Leinster, 25·4.

The four counties having the highest rates were—Kerry, 31·9 per 1,000 inhabitants; Antrim, 30·5; Mayo, 27·8; and Dublin, 27·7. Those with the lowest rates were—Monaghan, 22·7; Meath, 22·8; Wicklow, 23·0, and Queen's, 23·4 per 1,000 persons.

Of the total births, 53·5 per cent. were registered in the first six months of the year (182 days), and 46·5 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 37,755; in the second, 37,387; in the third, 33,144; and in the fourth, 32,183.

TABLE VI.—Showing, by **Quarterly Periods**, the number of **Births** registered in Ireland in each of the five years 1871-75, and the average number for that period; also the number registered during each quarter of the year 1876:—

DEATHS.

The deaths registered during the year amount to 92,324, being equal to 1 in 57·6, or 17·3 per 1,000, of the estimated population. The deaths of males number 46,108, and those of females 46,216, the former being equal to 17·9 in every 1,000 males living, and the latter representing 16·9 per 1,000 females.

The deaths are about the average, and compare very favourably with the number in the preceding year.

The returns show an important decline in the mortality from zymotic diseases, the deaths from which are not only much under the average, but

are less than in any year since the establishment of registration in Ireland in 1864. There was a material subsidence of scarlet fever, which disease had proved so fatal in the two preceding years, and small-pox which caused upwards of 500 deaths in each of the three years following the epidemic of 1872, proved fatal in only 24 instances.

Diseases of the Respiratory Organs were prevalent, and the mortality from these causes is very nearly equal to that in the year 1875, which was much over the average. The harshness of the weather during a portion of the year accounts for the large number of deaths from this group of diseases, and in this connection it may be mentioned that in both 1875 and 1876 the rainfall was considerably over the average, and easterly winds were much more frequent than they usually are in Ireland.

The deaths from the eight principal zymotic diseases registered during 1876 form 10·2 per cent. of the deaths from all causes, and are equal to 176 in every 100,000 persons living; the average annual mortality from the same diseases in the preceding 10 years represents 13·2 per cent. of the average number of deaths from all causes, and is equal to 226 deaths in every 100,000 of the estimated population.

Sanitary improvements have been effected in many districts, and the Registrars thereof testify to the gratifying results which have ensued upon a judicious administration of the Public Health Act. It is, therefore, to be regretted that there are still many districts in which but little attention is devoted to this important subject.

As the principal notes on the public health furnished by the various Registrars were published in the quarterly returns at a time when they should have proved most likely to secure an abatement of then existing evils, it is unnecessary to reproduce them; but I regret to be again obliged to state that, according to the Registrars' reports, in several instances the Local Authorities evinced an unaccountable reluctance to remedy some glaring defects in the system of sanitation.

The death-rates in the eight divisions range from 13·7 per 1,000 persons in the Western to 21·0 in the Eastern. The following is the order of the several divisions (as usual those along the Eastern coast have the highest mortality):—Western, 13·7 per 1,000 persons; North Western, 15·4; North Midland, 15·5; South Western, 17·6; South Midland, 17·6; North Eastern, 17·9; South Eastern, 19·3; and Eastern, 21·0.

With respect to the four provinces, the rate for Connaught is only 13·8; that for Munster is 17·0; for Ulster, 17·3, and for Leinster, 20·1.

Of the thirty-two counties, the four having the lowest registered mortality are—Sligo, only 12·7 per 1,000; Mayo, 12·9; Roscommon, 13·1; and Leitrim, 13·4.

Those in which the rate was highest are—Dublin, 24·1; Wexford, 20·1; Kilkenny, 20·0; and Waterford, 19·6.

The deaths registered in the first half of the year always largely outnumber those in the second. In 1876 the excess was very marked, 58·0 per cent. of the total deaths having been registered from January to June inclusive, and only 42·0 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 21·2 per 1,000 of the population; second, 19·2; third, 14·0; and fourth, 15·0.

TABLE VII.—Showing, by **Quarterly Periods**, the number of **Deaths** registered in Ireland in each of the five years, 1871-75, and the average number for that period; also the number registered during each quarter of the year 1876:—

CAUSES OF DEATH.

I.—ZYMOTIC DISEASES.

The deaths from Zymotic diseases registered during the year 1876 amounted to 13,317, or 250·24 in every 100,000 of the estimated population. This mortality is considerably under the average annual number for the years 1866-75, which was 16,295, or 301·36 in every 100,000 of the estimated mean population for that period. In the Eastern Division the rate for the decade 1866-75 was 414·28 per 100,000 persons; in 1876 it was only 329·15; in the South-Eastern Division the rate for 1876 was 217·98 per 100,000 persons, against an average rate of 295·88 for the preceding ten years; in the South-Western the rate fell from an annual average of 322·10 to 248·67 for 1876; and in the North-Eastern the annual average rate for the ten years 1866-75 was 336·42 per 100,000 persons; while in 1876 the rate was only 270·25. In the remaining divisions also, the North-Western excepted, there was a decrease; and in the North-Western the rate, although over the average, was lower than that for the year 1875.

The highest rate in 1876 was 329·15 (in the Eastern division), and the lowest 196·62 (in the North-Midland). Taking the average for the preceding 10 years also, the highest rate was in the Eastern Division (414·28), and the lowest in the North-Midland (215·02).

Zymotic diseases proved most fatal in the first quarter of the year, in which 3,883 deaths or 29·2 per cent. of the total number, were registered; the number in the second quarter was 3,328, or 25·0 per cent. of the total; in the third, 2,934, or 22·0 per cent.; and in the fourth, 3,172, or 23·8 per cent.

Of the 13,317 deaths from these diseases, 7,638 or 57·4, per cent. were amongst children under 10 years of age, being equal to a mortality of 6 in every 1,000 children living at that age.

Marriages, Births, and Deaths in Ireland—1876.

17

TABLE VIII.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class registered in Ireland during the Ten Years 1866–75; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the Number registered in 1876, and the Rate represented thereby.

Small-pox.—There was a remarkable decline in the number of deaths from this cause, as compared with any year since 1870; the deaths registered in the year 1875 amounted to 535, and the average annual mortality for the ten years 1866–75, to 581, while the number for the year 1876 was but 24. Of this number 10 were in the Eastern Division, 8 in the Western, 5 in the North-Eastern, and 1 in the South-Eastern. In the preceding year 487 deaths from this cause were registered in the Western Division.

In the province of Leinster the deaths numbered 11, in Connaught 8, and in Ulster 5. There were no deaths from small-pox registered in the province of Munster during the year.

Three deaths were registered in the first quarter, 3 in the second, 4 in the third, and 14 in the fourth.

Measles.—The deaths from measles amounted to 664, or 234 less than in the preceding year; they are equal to an annual mortality of 12·48 per 100,000 persons. Measles was most fatal in the Eastern, North-Western and Western Divisions, the annual rate per 100,000 persons for these divisions being respectively 26·76, 22·56, and 16·35.

Scarlet Fever.—The deaths from this disease were considerably less than in the preceding year; they amount to 2,112 or 39·69 per 100,000 persons; the average annual number for the preceding ten years was 2,963 or 54·80 in every 100,000 of the estimated mean population. In the North-Eastern Division where the rate in 1875 equalled 146·24 per 100,000 persons, it amounted in 1876 to only 50·04; and in the North-Western Division the rate in 1875 was nearly double what it was in 1876.

The deaths from scarlet fever in 1876 were distributed through each of the four provinces as follows:—Ulster, 1,038; Leinster, 628; Connaught, 248; and Munster, 203 (of which 110 occurred in the county of Cork).

The disease proved most fatal in the earlier part of the year, the deaths for the first quarter being 686, for the second 519, for the third 436, and for the fourth 471.

Diphtheria.—This disease proved fatal in 368 instances, being 75 less than the number in the previous year. In proportion to the population the highest mortality (10·51 per 100,000 persons), was in the North-Eastern Division, and the lowest (1·86) in the Western.

Quinsy.—This disease caused 228 deaths against 273 in the year 1875.

Croup.—The deaths from croup registered during the year 1876 numbered 1,374—743 males, and 631 females; in the preceding year this disease was the cause of 1,731 deaths.

The numbers registered in each quarter of the year were:—First, 495; second, 355; third, 209; and fourth, 315.

Whooping-cough.—The deaths (1,548) from whooping-cough are under the average for the ten years, 1866–75, but 172 over the number for the year 1875; they afford an annual rate of 29·09 per 100,000 of the estimated population, the average annual rate for the previous ten years having been 32·77. In proportion to the population the mortality was highest in the North-Eastern and North-Western Divisions, the rates being 41·06 and 38·12 per 100,000 persons respectively.

Deaths from whooping-cough were most numerous in the last quarter

of the year, when 434 deaths were recorded; the number for the first quarter was 433, for the second 376, and for the third 305.

Fever.—The number of deaths from the several forms of continued fever amounted to 2,763 (1,453 males and 1,310 females), equal to a mortality of 51·92 per 100,000 of the population. The average annual number for the previous ten years was 3,355, affording an annual death-rate of 62·05 per 100,000 persons. The highest divisional rate per 100,000 persons in 1876 was 62·25 for the Eastern Division, which had also the highest average rate (80·57) for the ten years 1866–75, and the lowest was 44·16 for the North Midland Division. The rates for the North-Eastern and South Midland Divisions show a remarkable decrease compared with the average for the previous decade; the rate for the former being 48·07 against an average of 65·61; and for the latter 52·80 against 69·43.

There were only 5 Superintendent Registrars' Districts in which the deaths from fever equalled 1 per 1,000 of the population, viz.:—Newtownards, in the North-Eastern Division; Glenties and Millford, in the North-Western; Westport, in the Western; and Skull, in the South-Western Division.

In Leinster there were 762 deaths, or 0·59 per 1,000 inhabitants; in Munster 786, or 0·57 per 1,000; in Ulster 861, or 0·47; and in Connaught 354, or 0·43 per 1,000.

Fever proved most fatal in the second quarter of the year, during which 723 deaths were recorded; the number in the first quarter was 700; in the fourth 688; and in the third 652.

Of the deaths registered from fever 619 were ascribed to typhus, 961 to typhoid or enteric, and 1,183 to simple continued fever, or vaguely as to "fever." The age periods 20 and under 25 years, and 65 to 75, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate 72·56 per 100,000, and the latter 72·01; in the year 1875 the rates for the same age periods were 65·21 and 76·09 per 100,000 persons respectively.

The lowest rate for the year 1876 was 38·20 for the period "5 and under 10 years" of age, which was also the lowest for the year 1875.

TABLE IX.—Showing for the year 1876 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 377, against an annual average of 299 for the preceding decade. The deaths from this disease in the year 1875 amounted to 392. The highest mortality in 1876 in proportion to the population was in the Eastern Division, and the lowest in the Western.

Metria or Puerperal Fever.—The deaths from this disease in 1876 amounted to 414, being 28 less than the number registered in the preceding year. The annual average number for the ten years 1866-75 was 331.

Influenza.—One hundred and twenty-one deaths were ascribed to this disease; the number in 1875 was 124, and the annual average for the ten years 1866-75, 136.

Dysentery.—To this disease 204 deaths were attributed, being 27 less than in the previous year, and 159 less than the annual average for the ten years 1866-75.

Diarrhea.—This disease proved fatal in 1,828 instances, equal to a mortality of 34·35 per 100,000 of the estimated population; the deaths in 1875 numbered 1,824, and the annual average number for the ten years 1866-75 was 1,876, or 34·69 per 100,000 persons. The highest Divisional rate in 1876 was 47·59 for the Eastern Division, and the lowest 13·51 for the North Midland, which had also the lowest rate for the year 1875. In only 3 of the 163 Superintendent Registrars' Districts did the mortality from this disease equal 1 per 1,000 of the estimated population, viz:—Castlecomer, in the South Midland Division; and Clonmel and Dungarvan in the South-Eastern Division.

The rates for the provinces were as follows:—Leinster, 38·8 per 100,000 persons; Munster, 43·2; Ulster, 32·4; and Connaught only 17·0.

Of the 1,828 deaths from diarrhea, 399 were registered in the first quarter, 397 in the second, 613 in the third, and 419 in the fourth.

Simple Cholera.—Seventy deaths occurred from this disease, of which 34 were registered in the third quarter.

One man died from hydrophobia, and 3 men from glanders.

II.—CONSTITUTIONAL DISEASES.

From diseases termed "constitutional" there resulted 16,302 deaths (7,802 males, and 8,500 females), affording a rate of 1 in 5·7 of all the deaths, and equal to 306 in every 100,000 of the population. This mortality is under that for the previous year, and also under the average for the ten years 1866-75.

Phthisis or Pulmonary Consumption proved fatal in 10,092 instances—4,841 males, and 5,251 females—being equal to 189·64 in every 100,000 persons, against an average rate of 186·36 for the previous ten years.

The three Eastern Divisions as heretofore yield the highest rates, that for the North-Eastern being 254·07 in every 100,000 living, for the Eastern 248·12, and for the South-Eastern 203·40. In the union of Belfast the deaths from phthisis were equivalent to the high rate of 4 per 1,000 persons.

The Western Division had the lowest rate, but the deaths were above the average for that division; the rate for 1876 being 110·86 per 100,000, while the average rate for the ten years 1866-75 was only 97·60.

The rates for the four provinces are as follows:—Leinster, 230 per 100,000 of the population; Ulster, 215; Munster, 160; and Connaught 122. Of the total deaths from phthisis, 6,981, or 69 per cent, were of persons between 15 and 45 years of age.

In the first quarter there were 2,809 deaths registered; in the second 3,028; in the third 2,197; and in the fourth, 2,058.

TABLE X.—Showing, by DIVISIONS, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1866–75; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1876, and the Rate represented thereby.

Mesenteric Disease.—The deaths from Mesenteric disease numbered 1,249—597 males, and 652 females.

Hydrocephalus or Water on the Brain.—The deaths from this disease amounted to 1,118—631 males, and 487 females.

Scrofula.—To this disease 854 deaths were ascribed, (459 males and 395 females).

Gout.—Only 15 deaths from Gout were registered (13 males and 2 females).

Cancer.—This disease caused 1,700 deaths, of which 756 were those of males, and 944 of females.

Dropsy.—Under this heading 1,075 deaths were recorded (407 males and 668 females).

III.—LOCAL DISEASES.

The number of deaths registered from "local diseases" amounted to 32,817 (17,588 males and 15,229 females), or 1 in 2·8 of the deaths from all causes; in 1875 the number was 33,032 (17,742 males and 15,290 females).

Diseases of the Nervous System.—From this group of diseases there resulted 8,349 deaths (4,513 males and 3,836 females), differing by only 13 from the number in the year 1875. They include 3,750 from convulsions (nearly all children), 1,649 from paralysis, 1,005 from apoplexy, 521 from cephalitis or inflammation of the brain and its membranes, 324 from epilepsy, 176 from insanity, 5 (females) from chorea or St. Vitus's dance, and 919 deaths entered under "brain disease, &c."

Diseases of the Organs of Circulation.—Diseases of the Circulatory Organs caused 4,085 deaths (2,187 males and 1,898 females); in the previous year the number was 4,096. "Heart disease" caused 3,897 deaths, aneurism 103, and pericarditis or inflammation of the heart's covering, 85.

*Diseases of the Respiratory Organs.**—The deaths from these diseases, amounted to 14,250 (7,411 males and 6,839 females), being equal to 286 in every 100,000 of the population. The average number for the preceding ten years was 12,757, or 236 in every 100,000 of the estimated mean population; but the number for the year 1875 was 14,568.

As in 1875 the Eastern Division had the highest rate, and the Western the lowest; the rate for the former division was 389.22 per 100,000 persons, and for the latter 151.67. Diseases of the respiratory organs were most fatal in the first quarter of the year, during which 5,215 deaths from these causes were registered; the number for the second was 4,111; for the third 2,154; and for the fourth 2,770. As many as 10,594 (5,281 males and 5,313 females) resulted from bronchitis; 1,930 (1,199 males and 731 females) were from pneumonia or inflammation of the lungs; 458 from asthma; 329 from pleurisy; 107 from laryngitis, and 382 were returned as from "lung disease," &c.

TABLE XI.—Showing, by Divisions, the Number of Deaths from Diseases of the Respiratory Organs* registered in Ireland during the Ten Years 1866-75; the Average Annual Number for that period, and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1876, and the Rate represented thereby.

Diseases of the Digestive Organs.—These diseases contributed 4,387 deaths (2,317 males, and 2,070 females). They include 343 from inflammation of the stomach; 501 from enteritis or inflammation of the bowels; 348 from peritonitis or inflammation of the covering of the bowels; 365 from ileus or obstruction of the bowels; 169 from ulceration of the intestines; 142 from hernia; 15 (10 males and 5 females) from fistula; 765 entered under "stomach disease &c."; 230 (129 males and 101 females) from inflammation of the liver; 166 from jaundice; 995 entered under "liver disease &c."; 19 from spleen disease, and 5 (3 males and 2 females) from disease of the pancreas.

* Exclusive of Phthisis or Pulmonary Consumption, for which see "Constitutional Diseases."

Diseases of the Urinary Organs.—To the various affections of this order of diseases 1,252 deaths (956 males and 296 females) were ascribed. Of these deaths, 305 (201 males and 104 females) were from nephria or Bright's disease, 121 from diabetes, 113 from cystitis or inflammation of the bladder; 64 from inflammation of the kidneys; 46 from ischuria or suppression of the secretion of urine; 21 from stone in the bladder; and 582 from kidney disease, &c.

Diseases of the Organs of Generation.—Deaths from diseases of the organs of generation numbered 137, including 67 from ovarian dropsy, a like number from diseases of the uterus, and 3 from hydrocele.

Diseases of the Organs of Locomotion proved fatal in 181 instances, and *Diseases of the Integumentary System* in 176; of the latter 8 were caused by phlegmon, 74 (32 males and 42 females) by ulcer, and 94 by various skin diseases.

IV.—DEVELOPMENTAL DISEASES.

The number of deaths from this class of diseases in 1876 amounted to 25,399 (11,494 males and 13,905 females). Of the 518 deaths from the first order of these causes, 245 were ascribed to premature birth, 239 to teething, 2 to cyanosis, 16 to spina bifida, and 16 to other malformations.

The deaths registered from the accidents of childbirth amounted to 591; the average annual number for the previous ten years was 619. If to these 591 deaths registered in the year 1876, the deaths from metria (414) be added, we have a total of 1,005 deaths of parturient women, or the death of one mother to every 140 births registered during the year; the annual average number for the ten years 1866-75 was 950. Twenty-three death were tabulated under the head of paramenia.

The remaining deaths in this class are 19,062 (8,590 males, and 10,472 females) from old age, and 5,205 from atrophy and debility.

V.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 2,086 (1,451 males and 635 females) being slightly under the average for the ten years 1866-75; the rate for the former was 39·20, in every 100,000 of the population, and for the latter 39·24. Accidents or negligence caused 1,852 deaths (including 643 from fractures and contusions, 448 from burns or scalds, and 437 from drowning), there were 88 cases of homicide (murder and manslaughter), 111 of suicide, 3 executions, and 32 violent deaths which being vaguely returned were not classed.

TABLE XII.—Showing, by DIVISIONS, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths,) registered during the Ten Years 1866–75; the Average Annual Number for that period, and the Average Rate per 100,000 of the Estimated Population; with the number registered in 1876, and the Rate represented thereby.

CLASS.	DIVISIONS.								TOTAL, IRELAND.

Inquests.—There were 2,624 inquests reported to the Registrars during the year 1876, being 1 inquest to every 35 deaths registered.

In 307 instances of sudden death the cause was not ascertained.

In 1865 there was 1 death in every 19 registered which could not be classed, owing to the cause of death having been either ill defined or unspecified; the registration has so far improved that in 1876 the number of such deaths only equalled 1 in every 44 of the total. There was a considerable advance in this respect in 1876 compared with the preceding year, which is doubtless, in a great part, owing to the adoption of the new form of "Medical Certificate of the Cause of Death," which is not open to the objections entertained by the medical profession to several features in the Form of Certificate previously in use.

AGES.

Deaths of infants under 1 year old numbered 13,252, being equal to 9·4 per cent. of the number of births registered.

Amongst children under 5 years of age 22,328 deaths occurred—a mortality equal to 34·8 in every 1,000 of the living at that age. Of these, 11,944 were boys and 10,384 girls; the former number representing 36·8 in every 1,000 boys, and the latter 32·8 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 9 per cent. of the persons living at that age.

Amongst the deaths registered are 748 of persons stated to have been aged 95 years and upwards—324 males and 424 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1876 amounted to 37,587; of these, 20,077 were males and 17,510 females. Of the whole number, 4,427 were from Leinster; 13,275 from Munster; 16,870 from Ulster; and 2,973 from Connaught: 42 persons did not state the county or province to which they belonged.

Of the emigrants in 1876, 15·6 per cent. were under 15 years of age; 66·2 per cent. were between 15 and 35 years old; and 18·2 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The Dublin prices of the principal necessities of life in 1876 differ but slightly from those for the preceding year. The average price of Messrs. Manders and Co.'s 4-lb. loaf was 7d., which was also the average price in the year 1875; oatmeal averaged 16s. 7d. per cwt., being 6d. under the mean price for 1875. The average prices of potatoes ranged from 3s. 8d. to 5s. 8d. per cwt., against 2s. 11d. to 4s. 7d. in 1875; and those of beef from 58s. to 76s. 6d. per cwt., against 57s. to 79s.

TABLE XIII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the years 1866–76, and the AVERAGE NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1876.

YEAR.	Average Prices of Provisions.						Pauperism.	
	BREAD (Messrs. R. Manders & Co.'s 4-lb. Loaf).	OATMEAL (Corn Exchange), per Cwt.	POTATOES (at Potato Market), per Cwt.	BEEF (at the Dublin Cattle Market), per Cwt.		Average Number of Persons Relieved.		
				s. d.	s. d.	In-door.	Out-door.

2nd " "	7	16 2	3 4 " 4 11	56 6 " 76 6	48,486	32,722		
3rd " "	7	16 4	3 9 " 5 4	59 6 " 79 0	44,171	32,546		
4th " "	7	17 0	5 0 " 8 1	58 6 " 78 0	40,113	30,497		
	7½	17 0	2 8 " 4 4	58 0 " 73 0	42,974	30,112		

Surveying the period covered by the several Tables in this Report, i.e., 1876, and the ten years preceding, it is found that beef was lowest in the year 1868, when the average prices ranged from 5*ls.* to 6*5s.* per cwt.; bread in 1866, 1869, and 1870, for each of which the average price of Messrs. Manders' 4lb. loaf was 6*1¼d.*; oatmeal in 1871, when the average price was 1*5s.* 1*d.* per cwt., and potatoes in 1866, when the average range of prices was from 3*s.* 1*d.* to 4*s.* 4*d.* per cwt. The highest average price of bread was 8*1¼d.* in 1867 and 1868, of oatmeal, 1*8s.* 8*d.* in 1874; the highest range for potatoes, 4*s.* 6*d.* to 8*s.* per cwt. in 1873, and for beef, 6*4s.* to 8*2s.* 6*d.* per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates on Saturdays during the year 1876 was 43,936, being 1,873 under the average for the preceding year; and that the average number of persons receiving out-door relief was 31,469, or 1,228 over the corresponding number for 1875.

THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken at the Ordnance Survey Office, Phoenix Park, Dublin, during the years 1866-76, furnished by Major C. W. Wilson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean height of the barometer at 9.30 A.M. during the year 1876 was 29.863 inches, against an average of 29.932 inches for the preceding ten years. The highest reading during the year (30.626) was on the 15th January at 9.30 A.M., air calm, and the lowest (28.451 inches) was on the 4th December at 3.30 P.M., wind S.W.

The mean temperature for the year was 49.5°; the highest registered was 92.3° on the 16th July, and the lowest was 21.3° on the 21st January. The average mean temperature for the years 1866-75 was 49.4°.

Yearly Average, 1866-75.	29.932	57.6	41.1	49.4	'810	'810	194	27.606	19	19	32	26	29	84	86	37	34			
1876, . . .	29.863	57.8	41.2	49.5	'804	'804	201	31.526	24	19	47	38	30	74	85	28	21			

Rain or snow fell on 201 days during the year, against an average of 194 days for the preceding ten years, the amount being 31.526 inches, or 3,920 inches over the average annual rain-fall for the ten years 1866-75.

The prevailing wind was W., it having blown from that point on 85 days at 9.30 A.M., with an average pressure of 2.51 lbs. per square foot. The wind blew from S.W. on 74 days; from E. on 47 days; from S.E. on 38 days; from S. on 30 days; from N.W. on 28 days; from N. on 24 days; from N.E. on 19 days, and the air was calm on 21 days, at 9.30 A.M. It will be noticed that, as was also the case in 1875, easterly winds were more frequent than usual, the number of days on which it blew from one of the three points N.E., E., and S.E. at 9.30 A.M. being 104, against an average of 77 in the ten years 1866-75. The strongest winds (S.W.) were on the 22nd January, 23rd February, and 31st December, the pressure being 16 lbs. per square foot.

To recapitulate the results afforded by the Vital Statistics for the year 1876: the registered marriages were more numerous than in any of the three years preceding, but were under even the low average rate yielded by the number recorded in the ten years 1866-75; the birth-rate also, although somewhat more favourable than in 1875, was less than the average. Deaths from preventable diseases show a gratifying decline, and notwithstanding the prevalence of diseases of the respiratory organs, the general death-rate was only about the average. Sanitary measures received more attention in many places, though it must be admitted that the field for operations in this direction is still extensive. Emigration was comparatively small, and the population showed a net increase for the first time during a period of thirty years.

I have already referred to deficiencies in registration as in part accounting for the low rates of marriages, births, and deaths in Ireland; this deficiency is most marked in Roman Catholic marriages, many of which, I fear, remain unregistered. Any defects there are in the registration of deaths would be removed by a provision requiring notice of the death to be sent to the Registrar, previous to interment, and as regards births, I beg to repeat the suggestions which I submitted in my Report for the year 1875:—

“In the case of Births, many instances having been reported to this department in which births have not come to the knowledge of the Registrars until after the expiration of six months from the date of birth, and consequently too late for registration, I consider that an extension of the time for registration, would, under all the circumstances, be advisable. With this change, and the aid to be derived from the effective working of the Compulsory Vaccination Act, the registration of births should approach very near to absolute completeness. Referring to the Vaccination Act, I would suggest that section 3 of that Act be so far altered that

all certificates of vaccinations should be sent, not to the Registrar of the district in which the vaccination has been performed, but to the Registrar of the district in which the birth occurred, so that in case the birth has not been registered, the proper officer may have cognizance of the omission."

I have the honour to be

Your Grace's faithful servant,

W. M. BURKE, F.C.P.I.,

Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 31st July, 1878.

Topographical Description of the Eight Divisions into which Ireland has been divided for Statistical purposes.

No. I., THE NORTH-EASTERN DIVISION.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II., THE NORTH-WESTERN DIVISION, is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., THE EASTERN DIVISION, is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., THE NORTH MIDLAND DIVISION, is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., THE SOUTH MIDLAND DIVISION, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., THE WESTERN DIVISION.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glensamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII., THE SOUTH-EASTERN DIVISION.—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

No. VIII., THE SOUTH-WESTERN DIVISION, extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

Thirteenth Annual Report of the Registrar-General, &c.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1876, inclusive:

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841.—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-6.—By assuming the average annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1876.

Abstract of Marriages, 1876.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*	AREA in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Popula- tion, 1871.	TOTAL MARRIAGES. Special Licence. Licence. Banns. Registrar's Certificate. Not stated by which of the foregoing forms.	MARRIAGES													
				Registered under the Act 7 & 8 Vic., c. 81.													
				According to the Rites of the late Established Church.					In Registered Presbyterian Meeting-Houses.								
				Total.	In Registered Buildings.	In the Registrar's Office.	Society of Friends.	Jews.	Total.	In Registered Buildings.	In the Registrar's Office.	Society of Friends.	Jews.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

*Abstract of Births and Deaths, 1876.***I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1876—REGISTRARS' DISTRICTS—*continued.***

Supplementary Table of Causes of Death, pp. 110-113

Causes of Death in Ireland, 1876.

IRELAND.—CAUSES of DEATH at different Periods of Life in the Year 1876—MALES—continued.

Class.	CAUSES OF DEATH.	MALES.																		
		AGES AT DEATH.																		
		ALL AGES.	Under 1 year.	1	2	3	4	Total under 5 years.	5-	10-	15-	20-	25-	35-	45-	55-	65-	75-	85-	95 and upwards. Unspecified
III. con.	ORDER 2.																			
	1. Pericarditis,	45	2	3	4	4	2	12	7	6	3	2	.	.
	2. Aneurism,	81	3	3	1	12	21	23	13	11	2	.	.	.
	3. Heart Disease, &c.,	2,058	5	4	2	1	1	13	21	38	48	44	116	244	438	556	244	26	1	1
	ORDER 3.																			
	1. Laryngitis,	69	11	8	5	1	.	25	4	1	2	2	5	6	6	11	4	2	1	.
	2. Bronchitis,	5,241	1024	423	179	70	54	1,750	82	41	31	45	95	251	455	1040	905	523	53	10
	3. Pleurisy,	223	2	1	.	1	.	4	11	8	12	13	16	21	36	49	38	14	1	.
	4. Pneumonia,	1,109	92	54	12	8	7	173	29	18	41	51	106	139	149	226	193	66	8	.
	5. Asthma,	200	2	1	1	1	.	5	1	1	5	23	33	74	38	18	1	.	.	.
	6. Lung Disease, &c.,	439	56	20	8	1	5	90	13	8	10	17	82	59	55	87	42	23	3	.
	ORDER 4.																			
	1. Gastritis,	171	12	10	4	2	2	30	9	3	4	2	10	18	8	40	35	10	2	.
	2. Enteritis,	267	46	10	7	4	2	69	10	3	12	10	18	29	33	43	26	12	2	.
	3. Peritonitis,	158	10	1	1	1	1	14	9	3	14	8	17	15	18	22	27	11	.	.
	4. Ascites,	103	1	3	.	.	.	4	3	3	5	4	6	16	19	19	15	8	1	.
	5. Ulceration of Intests.	89	1	.	5	7	15	10	29	16	6	.	.	.
	6. Hernia,	79	6	1	7	1	1	2	3	5	10	11	25	14	.	.
	7. Ileus,	214	17	2	2	2	1	24	8	3	4	7	7	27	25	53	46	13	2	.
	8. Intussusception,	26	.	1	.	.	.	1	.	1	2	2	5	4	6	4	1	.	.	.
	9. Stricture of Intestines,	30	1	1	2	3	3	3	12	8	1	.	.
	10. Fistula,	10	1	.	1	5	1	1	1	1	1	1	.	.
	11. Stomach Disease, &c.,	401	84	6	6	4	3	53	9	9	7	3	25	32	55	116	69	22	1	.
	12. Pancreas Disease, &c.,	3	1	4	.	1	3	4	11	14	28	27	25	12	1
	13. Hepatitis,	129	2	1	.	.	.	1	4	.	1	3	4	11	14	14	13	15	4	1
	14. Jaundice,	80	18	.	.	5	4	27	3	1	1	6	6	6	9	13	15	4	1	.
	15. Liver Disease, &c.,	547	5	1	3	1	.	10	6	4	6	17	37	72	105	151	107	30	2	.
	16. Spleen Disease, &c.,	10	2	2	2	2	2	3	1
	ORDER 5.																			
	1. Nephritis,	44	1	1	.	3	1	6	3	2	2	3	1	3	12	6	5	1	.	.
	2. Ischuria,	36	1	.	1	2	1	5	4	11	10	2	.	.	.
	3. Bright's Disease (Nephritis),	201	1	2	.	2	2	7	2	4	3	9	21	34	29	44	31	17	.	.
	4. Diabetes,	88	1	1	4	5	13	6	14	19	13	11	1	.	.
	5. Calculus (Stone),	21	1	.	.	1	5	3	8	26	27	25	6	2	.
	6. Cystitis,	103	13	5	3	9	4	18	23	35	78	150	102	19	4
	7. Kidney Disease, &c.,	463	9	2	1	1
	ORDER 6.																			
	1. Ovarian Dropsy,	3	1	1	.	1	.
	2. Uterus Disease, &c.,
	ORDER 7.																			
	1. Synovitis (Arthritis),	13	1	1	1	1	1	1	1	4	2	2	.	1	.
	2. Joint Disease, &c.,	98	.	1	1	1	1	3	6	7	8	15	13	7	9	17	10	2	.	.
	ORDER 8.																			
	1. Phlegmon,	5	3	1	1	2	1	1	1	2	2	2	2	.	.
	2. Ulcer,	32	1	.	1	1	1	1	1	1	2	1	1	1	3	4	13	3	2	.
	3. Skin Disease, &c.,	53	31	4	2	1	2	40	1	.	2	1	2	1	1	3	2	1	2	.
IV.	ORDER 1.																			
	1. Premature Birth,	140	140	140
	2. Cyanosis,	1	1	1	.	.	.	1
	3. Spina Bifida,	10	10	10	1
	4. Other Malformations,	11	9	.	1	.	.	10
	5. Teething,	125	52	66	7	.	.	125
	ORDER 2.																			
	1. Paramenia,
	2. Childbirth,

IRELAND.—SUPPLEMENTARY TABLE of the

[In the Tables of Causes of Deaths, pp. 102–109, all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired

INDEX TO SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the Number of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 163.*]

A.	Dublin North,	45	Millstreet,	158
Abbeyleix,	Dublin South,	46	Mitchelstown,	133
Antrim,	Dundalk,	47	Mohill,	69
Ardee,	Dunfanaghy,	24	Monaghan,	70
Armagh,	Dungannon,	12	Mountbellew,	113
Athlone,	Dungarvan,	127	Mountmellick,	84
Atly,	Dunmanway,	147	Mullingar,	71
B.	Dunshaughlin,	48	N.	
Bailieborough,	E.		Naas,	51
Ballina,	Edenderry,	82	Navan,	52
Ballinasloe,	Ennis,	104	Nenagh,	85
Ballinrobe,	Enniscorthy,	128	Newcastle,	159
Ballycastle,	Enniskillen,	25	Newport,	114
Ballymahon,	Ennistimon,	105	New Ross,	134
Ballymena,	F.		Newry,	19
Ballymoney,	Fermoy,	129	Newtownards,	20
Ballyshannon,	G.		O.	
Ballyvaghan,	Galway,	106	Oldcastle,	72
Balrothery,	Glennamaddy,	107	Omagh,	34
Baltinglass,	Glenieties,	26	Oughterard,	115
Banbridge,	Glin,	148	P.	
Bandon,	Gorey,	49	Parsonstown,	86
Bantry,	Gort,	108	Portumna,	116
Bawnboy,	Granard,	66	R.	
Belfast,	I.		Rathdown,	53
Belmullet,	Inishowen,	28	Rathdrum,	54
Borrisokane,	Irvinstown,	29	Rathkeale,	160
Boyle,	K.		Roscommon,	73
C.	Kanturk,	149	Roscrea,	87
Cahersiveen,	Kells,	50	S.	
Callan,	Kenmare,	150	Scarriff,	117
Carlow,	Kilkel,	13	Shillelagh,	55
Carrickmacross,	Kilkenny,	83	Skibbereen,	161
Carrick-on-Shannon,	Killadysert,	109	Skull,	162
Carrick-on-Suir,	Killala,	110	Sligo,	35
Cashel,	Killarney,	161	Strabane,	36
Castlebar,	Kilmachthomas,	130	Stranorlar,	37
Castleblayney,	Kilmallock,	152	Strokestown	74
Castlecomer,	Kilrush,	111	Swineford,	118
Castlederg,	Kinsale,	153	T.	
Castlereagh,	I.		Thomastown,	135
Castletown,	Larne,	14	Thurles,	88
Cavan,	Letterkenny,	30	Tipperary,	89
Celbridge,	Limavady,	15	Tobercurry,	119
Claremorris,	Limerick,	154	Tralee,	163
Clifden,	Lisburn,	16	Trim,	56
Clogheen,	Lismore,	131	Tuam,	120
Cloher,	Lisnaskea,	67	Tulla,	121
Clonakilty,	Listowel,	155	Tullamore,	90
Clones,	Londonderry,	31	U.	
Clonmel,	Longford,	68	Urilingford,	91
Coleraine,	Loughrea,	112	W.	
Cookstown,	Lurgan,	17	Waterford,	136
Cooteshill,	M.		Westport,	122
Cork,	Macroon,	156	Wexford,	137
Corrofin,	Magherafelt,	18	Y.	
Croom,	Mallow,	157	Youghal,	138
D.	Manorhamilton,	32		
Delvin,	Middleton,	132		
Dingle,	Millford,	33		
Donaghmore,				
Donegal,				
Downpatrick,				
Drogheda,				
Dromore West,				

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 75 (see page 38), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX TO REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
