 <b>ABSTRACTS:—</b>	
Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1877, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks, . . . . .	36-45
Ages of 14,410 Persons married in 1877, distinguishing those of Bachelors, Spinsters, Widowers, and Widows, . . . . .	46-47
Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1877; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births, . . . . .	48-72
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1877, . . . . .	74-83
Deaths registered in each of the Four Quarters of 1877 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, . . . . .	84-93
Deaths of Males and Females at different Ages registered in 1877, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, . . . . .	94-101
Causes of Death of Males and Females in Ireland, at different periods of life, in 1877, . . . . .	102-109
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1877, . . . . .	110-113
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1877, . . . . .	114-121
Deaths from several Zymotic and other Causes in 1877, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, . . . . .	122-125
 Index to Superintendent Registrars' Districts, and Registrars' Districts, . . . . .	 126-133

# REPORT

TO

His Grace, JOHN WINSTON DUKE OF MARLBOROUGH, K.G.,  
&c., &c., &c.,  
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

I have the honour to submit my Report on the Marriages, Births, and Deaths registered in Ireland during the year 1877, together with the General Abstracts in which the number, season, locality, and special nature of these events are set forth in detail.

Returns prepared from data supplied for the purpose by the Registrars, and containing approximate information on some of the more salient features of the Registration records, in so far as they relate to the Public Health, were issued after the close of each Quarter; and a preliminary Annual Abstract, compiled from the same sources, was presented to Parliament early last year.

The information given in those Returns, necessarily imperfect, has since been carefully revised, and in the Abstracts now submitted the corrected results will be found incorporated with many additional features of general interest and utility.

## GENERAL SUMMARY.

The Marriages registered during the year number 24,722; the Births 139,659; and the Deaths 93,543. Both absolutely and in proportion to the estimated population, the marriages and births are under, and the deaths over the annual average for the preceding ten years.

TABLE I.—Showing for each of the years 1867–77, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1867–76.

YEARS.	Estimated Population.*	Numbers Registered.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.			
		Marriages.	Births.	Deaths.		Marriages.	Births.	Deaths.	Emigrants.
1867, . . . . .	5,486,509	29,742	144,388	93,503	80,624	5.42	26.3	17.0	14.7

Yearly Average, } 1867–76.	5,387,045	26,992	145,103	92,532	68,479	5.01	26.9	17.2	12.7
1877, . . . . .	5,338,906	24,722	139,659	93,543	38,503	4.63	26.2	17.5	7.2

\* See page 34.

The recorded natural increase of population, or excess of births over deaths was 46,116, the loss by emigration, 38,503; there was thus a net increase of 7,613 persons, exclusive of the gain by immigration. The estimated population in the middle of the year was 5,338,906.

#### MARRIAGES.

The number of marriages registered during the year was 24,722, being 1 in every 216, or 4·63 per 1,000 of the estimated population.

This rate is under that for the preceding year, and is also less than the low rate yielded by the average annual number of marriages registered during the ten years 1867-76, which was much under the marriage-rates in other countries, the statistics of which are available.

As the subject is of considerable importance, I beg to repeat the observations respecting it which I submitted in my Report on the Registration for the year 1875:—

“There is no doubt that a portion of this disparity [between the marriage-rate in Ireland and that in many other countries,] is due to defective registration; but the loss to be set down to this cause is not so great as might at first sight appear and the actual marriage-rate in Ireland, in proportion to the total population is, unquestionably, low.

“This is, in part, accounted for by the abnormal conditions arising from a large annual emigration of unmarried persons of what may be called the marrying ages. The consequent reduction of the sources from which the marriage ranks are recruited is accompanied by an undue increase in the proportion of the population embraced in the other age-periods, and the result tends to produce a low rate compared with the number of inhabitants at all ages.

“Again, amongst the actual population, the marriage-rate is evidently low. Thus, from the last Census Reports it appears that, while in England the per-centage of men aged 20 years and upwards who were unmarried was only 27·1, in Ireland the unmarried formed 38·3 per cent. of the total at the same ages.

“But the returns now under notice in themselves contain proof of the comparative paucity of marriages in Ireland.

“The provisions of the law respecting the registration of Protestant marriages are such that it is all but impossible any should remain unaccounted for; yet, compared, say, with the general marriage-rate for England, the result appears very unfavourable. Thus the average annual rate in England is 1 in every 119 persons, or 8·4 per 1,000 of the population, while the Protestant marriages in Ireland in 1875 only equal 1 in 168, or 5·97 per 1,000 of the estimated Protestant population. [In 1877 the rate was 5·79 per 1,000].

“There are no grounds for assuming that marriages are proportionately more numerous among the Roman Catholic than among the Protestant inhabitants; so that marriages of the latter, if, indeed, not much over the general rate, are certainly not under it, and the extent to which the registered Roman Catholic marriages fall short of the rate yielded by marriages of Protestants is the maximum possible loss by non-registration.

“The Roman Catholic marriages registered in 1875 only afford a rate of 1 in 245, or 4·08 per 1,000 of the estimated Roman Catholic population,

which, as may be seen, is much under the rate for Protestant marriages. [In 1877 the rate was 4.27 per 1,000].

“There are no precise data for determining how far this can be satisfactorily accounted for; but, as the Roman Catholic inhabitants constitute the great majority of the people, and include the large mass of the humbler classes, there seems but little doubt that the depression in the marriage-rate, referred to above as resulting from emigration, would be most apparent amongst them, and also that any economic reason leading to a low rate would be likely to affect them to a greater extent than it would their Protestant fellow countrymen.

“It is, however, to be feared that, after making all due allowances, the unregistered marriages, which, as may be gathered from what has been stated above, are confined to those of Roman Catholics, are still numerous.

“There is no valid reason why they should be so. The trouble involved in complying with the law regarding the registration of Roman Catholic marriages is reduced to a minimum, while the individual and the national value of a perfect record is manifest, and ought to secure the willing co-operation of all concerned.”

Of the 24,722 marriages registered during the year 1877, 17,458 were between Roman Catholics, 3,912 were celebrated according to the rites and ceremonies of the late Established Church; 2,493 were in Presbyterian Meeting-houses; 344 in “Registered Buildings” belonging to various religious denominations; only 506 by civil contract in the Registrars’ offices; 8 were according to the usages of the Society of Friends, and one was according to the Jewish rite. The small number of marriages in the Registrars’ offices (only 2 per cent. of the total) is in striking contrast to the proportion of civil marriages in many other countries.

TABLE II.—Marriages registered in Ireland in 1877 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:—

Years.	Marriages registered under 7 & 8 Vic., cap. 1.							Roman Catholic Marriages	Total Marriages Registered.	Rate per 1,000 of estimated corresponding Population represented by

1875,	4,088	2,495	326	522	4	3	7,448	16,589	24,037	5.97	4.08	4.53
1876,	4,033	2,528	347	540	9	1	7,458	18,930	26,388	5.96	4.65	4.96
Average 1867-76,	4,394	2,562	280	662	12	2	7,912	19,081	26,993	6.35	4.59	5.01
1877,	3,912	2,493	344	506	8	1	7,264	17,458	24,722	5.79	4.27	4.63

Of the 3,912 marriages according to the rites of the late Established Church, 94 were by special licence, 3,239 by licence, 400 after the publication of banns, 12 on Registrar’s certificate, and in 167 instances

there was no information afforded as to which of the foregoing methods was adopted.

During the year 1877 there were issued by the Registrars 675 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1877.	Number of Registered Meeting-houses on 31st December, 1877.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland, . . . . .	122	557	2,629
2. Remonstrant Synod of Ulster, . . . . .	9	19	50
3. Presbytery of Antrim, . . . . .	4	10	15
4. United Presbytery or Synod of Munster, . . . . .	3	3	—
5. Northern Presbytery of Antrim, . . . . .	1	6	11
Total, . . . . .	139	595	2,705

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1877, there were 1,502 churches and chapels of the late Established Church, 595 registered Presbyterian Meeting-houses, and 301 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show no change as regards the late Established Church, a decrease of 1 Presbyterian Meeting-house, and an increase of 9 "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1877:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists, . . . . .	161	Covenanters, . . . . .	1
Reformed Presbyterians, . . . . .	37	United Original Seceders, . . . . .	1
Independents, . . . . .	22	"Protestant Dissenters," . . . . .	1
Baptists, . . . . .	18	"Christians," . . . . .	1
Seceders, . . . . .	11	Non Subscribing Christians, . . . . .	1
Primitive Wesleyan Methodists, . . . . .	11	Non Subscribing Unitarians, . . . . .	1
United Presbyterians, . . . . .	9	"The Catholic Apostolic Church," . . . . .	1
Methodists, New Connexion, . . . . .	7	Christian Brethren, . . . . .	1
Moravians, or United Brethren, . . . . .	5	Independent Protestants, . . . . .	1
Primitive Methodists, . . . . .	5	Jews, . . . . .	1
Evangelical Union, . . . . .	2		
Unitarians, . . . . .	2		
Church Methodists, . . . . .	1	Total, . . . . .	301

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between

Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. Thus, in 1877 the numbers recorded were—in the first quarter, 8,906; in the second, 5,092; in the third, 5,188; and in the last, 5,536.

TABLE III.—The Number of Roman Catholic and of Protestant Marriages registered in each Quarter during the four years, 1874-77 :—

QUARTER ENDING THE LAST DAY OF	Years and Number of Marriages Registered.							
	1874.		1875.		1876.		1877.

June, . . .	3,359	1,764	3,386	1,736	3,074	1,709	3,471	1,621
September, .	3,136	1,785	3,259	1,861	3,415	1,916	3,398	1,790
December, .	3,245	1,883	3,367	2,025	3,759	2,070	3,515	2,021
Total, . . .	17,348	7,133	16,589	7,448	18,930	7,458	17,458	7,264
General Total,	24,481		24,037		26,388		24,722	

The marriages of bachelors and spinsters constitute 84·8 per cent. of the total; those of widowers and spinsters 9·4 per cent.; of bachelors and widows 3·4 per cent; and of widowers and widows 2·4 per cent. Thus, 12 in every 100 of the men married were widowers, and 6 per cent. of the women were widows; and in 15 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or "of full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1877 the ages of both parties were specified in only 7,205 instances, being much less than one-third of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 24,722 men married during the year, 775, or 3·13 per cent. were minors; and of the women married, 3,353, or 13·56 per cent. were under age. In each case the per-centage is slightly over the average for the preceding ten years.

The highest proportion of husbands married under age in 1877, 3·99 per cent., was in the North-Eastern Division, which includes Belfast and nearly all the northern manufacturing districts; and the highest per centage of wives, 19·38, was in the Western Division. These results coincide with those in the preceding ten years.

It may be added, that the per-centage of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1877, 17,217, or 69·6 per cent. of the husbands, and 15,816, or 64·0 per cent., of the wives, wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results twelve years since, the per-centage of persons married in 1867 who wrote their names being—men 62·7, and women 52·2.

As usual, the most favourable results appear in the Eastern or Metropolitan Division, and the least satisfactory in the Western Division, the number who wrote their names varying from 78 in every 100 men and 74 in every 100 women in the former, to 57 per cent. of the men and 53 per cent. of the women married in the latter division.

The number of marriages registered in each of the eleven years 1867-77; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE IV.—The Number of Marriages in the Eight Registration Divisions of Ireland\* during the years 1867-77, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Divisions.*		Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

		1871	4,497	60·8	51·4	2·45	14·81	11·41	6·85
		1872	4,097	61·9	57·1	1·88	14·91	10·96	7·05
		1873	3,867	67·8	58·3	2·64	13·71	11·40	7·63
		1874	3,637	70·1	62·6	2·20	13·45	9·73	6·79
		1875	3,484	67·9	59·6	3·24	14·67	12·00	6·92
		1876	3,961	68·0	62·3	2·25	13·33	12·07	7·09
1877	3,606	69·9	63·6	2·97	14·34	11·59	6·46		

In the province of Leinster, 74·3 per cent. of the men, and 71·9 per cent. of the women married wrote their names; in Munster, 70·3 per cent. of the men, and 64·5 per cent. of the women; in Ulster, 70 in every 100 men, and 61 in every 100 women; and in Connaught, only 57·0 per cent. of the men, and 52·5 per cent. of the women.

In 5,446 instances, both of the parties married signed the register by "mark," and in 5,519 cases the register was thus signed by either the husband or the wife, so that in 10,965 instances, or 44·4 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 13,757 instances, or 55·6 per cent., *both* parties wrote their names.

In proportion to the estimated population at all ages the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 5·3 per 1,000 persons; Ulster comes next, with 4·8 per 1,000; Munster third, with 4·4 per 1,000; and Connaught last, the rate being 3·6 per 1,000.

The highest rate in any county was 7·5 per 1,000, which was the marriage rate for Dublin; and the lowest 3·4 per 1,000 for Queen's County and Galway. Between these, the most favourable were 6·1 for Antrim, 5·0 in Armagh, and 4·8 in Limerick, Waterford, Down, and Londonderry; and the least so, 3·5 in Cavan, and 3·6 in Fermanagh, Leitrim, and Mayo.

---

#### BIRTHS.

The number of births registered during the year 1877 is 139,659—71,704 boys, and 67,955 girls, or 105·5 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 38·2, or 26·2 per 1,000, which is somewhat under the low average rate (26·9 per 1,000) for the ten years, 1867–76, and less than the rate in any of those years except 1875, in which the rate was only 26·1 per 1,000.

In my report for the year 1875, I glanced at the causes of the comparatively low birth-rate in Ireland, and the following observations, which I then made, are almost equally applicable to the year now under review:—

"It has been seen that the marriages *registered* in Ireland, when compared with the total population, fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking, but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination this proves to be, in great part, erroneous.

“ In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the childbearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

“ Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

“ This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcilable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

“ There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place.”

Of the 139,659 children whose births were registered in Ireland during the year 1877, 136,334, or 97·6 per cent., were legitimate, and 3,325, or 2·4 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·6.

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 69,907 were males, and 66,427 females, being 105 of the former to every 100 of the latter; and of the illegitimate children 1,797 were males, and 1,528 females, or 118 boys to 100 girls.

TABLE V.—The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years 1873–77, by Divisions.

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1873.	1874.	1875.	1876.	1877.	1873.	1874.	1875.	1876.	1877.
IRELAND, . . .	97·6	97·7	97·7	97·7	97·6	2·4	2·3	2·3	2·3	2·4

Eastern, . . .	97·8	97·9	98·1	98·0	97·9	2·2	2·1	1·9	2·0	2·1
North Midland, . . .	98·5	98·6	98·6	98·5	98·4	1·5	1·4	1·4	1·5	1·6
South Midland, . . .	98·1	97·7	98·1	98·0	98·2	1·9	2·3	1·9	2·0	1·8
Western, . . .	99·2	99·2	99·2	99·2	99·2	0·8	0·8	0·8	0·8	0·8
South-Eastern, . . .	97·0	97·4	97·3	97·5	96·9	3·0	2·6	2·7	2·5	3·1
South-Western, . . .	98·7	98·7	98·7	98·7	98·7	1·3	1·3	1·3	1·3	1·3

As in previous years, the lowest per-centage of children born out of wedlock was in the Western Division, and the highest in the North-Eastern division. The order of the several divisions is as follows:—Western 0·8 per cent. of total births; South-Western, 1·3; North Midland 1·6; South Midland, 1·8; Eastern, 2·1; North-Western, 2·2; South-Eastern, 3·1; and North-Eastern, 4·8.

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 3·9; in Leinster, 2·2; in Munster, 1·6; and in Connaught, 0·7.

The extremes of the county rates are found in Down and Mayo. In the former of 6,091 births registered, 374, or 6·1, per cent. were illegitimate, and in the latter, out of 6,747 births recorded, only 30, or 0·4 per cent., were so classed.

The respective total birth-rates for the provinces in 1877 were—Munster, 27·5 per 1,000 of the population; Connaught, 26·3, Ulster, 25·7 per 1,000; and Leinster, 25·4.

The four counties having the highest rates were—Kerry, 32·3 per 1,000 inhabitants; Antrim, 29·6; Dublin, 28·6; and Limerick, 28·1. Those with the lowest rates were—Meath, 22·3; Wicklow, 22·9; Westmeath, 23·1, and Monaghan, 23·2 per 1,000 persons.

Of the total births, 53·4 per cent. were registered in the first six months of the year (181 days), and 46·6 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 37,167; in the second, 37,356; in the third, 32,826; and in the fourth, 32,310.

TABLE VI.—Showing, by **Quarterly Periods**, the number of **Births** registered in Ireland in each of the five years 1872–76, and the average number for that period; also the number registered during each quarter of the year 1877:—

QUARTER ENDING	Years and Number of Births Registered.							Equivalent Annual Rate per 1,000 of Estimated Population.	
	1872.	1873.	1874.	1875.	1876.	Average Number, 1872-76.	1877.	1872-76.	1877.

Annual Rate per 1,000 of the estimated population, )	27·8	27·1	26·6	6·1	26·4	26·8	26·2	-	-

#### DEATHS.

The deaths registered during the year amount to 93,543, being equal to 1 in 57·1, or 17·5 per 1,000, of the estimated population. The deaths of males number 47,182, and those of females 46,361, the former being equal to 18·2 in every 1,000 males living, and the latter representing 16·9 per 1,000 females.

The deaths are somewhat over the average for the ten years 1867-76, but they are less than the average annual number in the latter half of that period.

The returns again show a decline in the mortality from zymotic diseases, the deaths from which are not only much under the average, but are less than in any year since the establishment of registration in Ireland in 1864. There was a further material subsidence of scarlet fever, which disease had proved so fatal in the years 1874 and 1875, while small-pox caused only 71 deaths.

Diseases of the Respiratory Organs were prevalent, and the mortality from these causes was in excess of that in the year 1876, in which year, and in 1875, deaths from diseases of this order were much over the average.

The deaths from the eight principal zymotic diseases registered during 1877 form 9·8 per cent. of the deaths from all causes, and are equal to 172 in every 100,000 persons living; the average annual mortality from the same diseases in the preceding 10 years represents 12·6 per cent. of the average number of deaths from all causes, and is equal to 216 deaths in every 100,000 of the estimated mean population.

Sanitary improvements have been effected in many districts, and the Registrars thereof testify to the gratifying results which have ensued upon a judicious administration of the Public Health Act. It is, therefore, to be regretted that there are still many districts in which but little attention is devoted to this important subject.

As the principal notes on the public health furnished by the various Registrars were published in the quarterly returns at a time when they should have proved most likely to secure an abatement of then existing evils, it is unnecessary to reproduce them; but I regret to have to state that, according to the Registrars' reports, some palpable defects were long left unremedied.

The death-rates in the eight divisions range from 14·0 per 1,000 persons in the Western to 21·7 in the Eastern. The following is the order of the several divisions (as usual those along the Eastern coast have the highest mortality):—Western, 14·0 per 1,000 persons; North Western, 14·7; North Midland, 15·6; South Western, 17·1; South Midland, 18·0; South Eastern, 18·6; North Eastern, 18·9; and Eastern, 21·7.

With respect to the four provinces, the rate for Connaught is only 14·0; that for Munster is 17·2; for Ulster, 17·3, and for Leinster, 20·5.

Of the thirty-two counties, the four having the lowest registered mortality are—Mayo, only 12·8 per 1,000; Leitrim, 13·4; Roscommon, 13·8; and Donegal, 14·0.

Those in which the rate was highest are—Dublin, 26·0; Antrim, 20·2; Kilkenny, 19·7; and Waterford, 19·3.

The deaths registered in the first half of the year always largely outnumber those in the second. In 1877 56·4 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 43·6 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 20·2 per 1,000 of the population; second, 19·3; third, 14·2; and fourth, 16·3.

TABLE VII.—Showing, by Quarterly Periods, the number of Deaths registered in Ireland in each of the five years, 1872–76, and the average number for that period; also the number registered during each quarter of the year 1877:—

### CAUSES OF DEATH.

#### I.—ZYMOTIC DISEASES.

The deaths from Zymotic diseases registered during the year 1877 amounted to 12,758, or 238·96 in every 100,000 of the estimated population. This mortality is considerably under the average annual number for the ten years 1867-76, which was 15,664, or 290·77 in every 100,000 of the estimated mean population for that period. There was a decrease in each of the Eight Divisions except the South Midland, in which the rate was 268·88 per 100,000 persons, against an average rate of 265·50. In the Eastern Division the rate for the decade 1867-76 was 386·17 per 100,000 persons; in 1877 it was 322·18; in the North-Eastern Division the rate for 1877 was 271·07 per 100,000, against an average rate of 326·94; in the South-Western the average rate was 317·02, and that for 1877 only 242·19; in the Western the rate for 1877 was 222·77, average rate 236·39; in the South-Eastern the rate was only 212·67, against an average of 283·11; in the North-Western 155·59, against an average of 219·19; and in the North Midland only 139·21, against an average of 206·80 in every 100,000 persons.

The highest rate in 1877 was 322·18 (in the Eastern division), and the lowest 139·21 (in the North-Midland). Taking the average for the preceding 10 years also, the highest rate was in the Eastern Division (386·17), and the lowest in the North-Midland (206·80).

Of the 12,758 deaths from zymotic diseases, 7,443 or 58·3 per cent. were amongst children under 10 years of age, being equal to a mortality of 6 in every 1,000 children living at that age.

TABLE VIII.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class registered in Ireland during the Ten Years 1867-76; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the Number registered in 1877, and the Rate represented thereby.

*Small-pox.*—There were only 71 deaths from small-pox registered, including 6 returned as from varicella (chicken-pox). Of these deaths 52 were in the Eastern Division, 11 in the North-Eastern, 4 in the North-Midland, 2 in the South-Western, and 1 each in the Western and North-Western Divisions. In the year 1876 only 24 deaths from this cause were recorded, but the average annual number for the ten years 1867-76 was 564.

In the province of Leinster the deaths numbered 53, in Ulster 13, in Munster 3, and in Connaught 2.

*Measles.*—The deaths from measles amounted to 1,562, being 572 over the average annual number for the preceding ten years, and higher than in any year during that period; they are equal to an annual mortality of 29·26 per 100,000 persons. Measles was most fatal in the Eastern and North-Eastern Divisions, the annual rate per 100,000 persons for these divisions being respectively 75·57 and 36·61.

*Scarlet Fever.*—The deaths from this disease number only 1,117, or 20·92 per 100,000 persons, against an average for the preceding ten years of 2,824 deaths, or 52·42 in every 100,000 of the estimated mean population. In the Western Division, where, however, the deaths were not numerous, the rate was somewhat over the average for that Division for the ten years; but in all the other Divisions the deaths were far below the average.

The deaths from scarlet fever in 1877 were distributed through the four provinces as follows:—Ulster, 410; Leinster, 373; Connaught, 225; and Munster, 109.

*Diphtheria.*—This disease proved fatal in 288 instances, being 80 less than the number in the previous year. In proportion to population, the highest mortality (9·64 per 100,000 persons), was in the North-Eastern Division, and the lowest (1·06) in the Western.

*Quinsy.*—This disease caused 189 deaths against 228 in the year 1876.

*Croup.*—The deaths from croup registered during the year 1877 numbered 1,275—691 males, and 584 females; in the preceding year this disease was the cause of 1,374 deaths.

*Whooping-cough.*—The deaths (1,689) from whooping-cough are a little under the average for the ten years, 1867-76, but 141 over the number for the year 1876; they afford an annual rate of 31·64 per 100,000 of the estimated population, the average annual rate for the previous ten years having been 32·56. In proportion to the population the mortality was highest in the Western and South Midland Divisions, the rates being 47·34 and 46·66 per 100,000 persons respectively.

*Fever.*—The number of deaths from the several forms of continued fever amounted to 2,785 (1,414 males and 1,371 females), equal to a mortality of 52·16 per 100,000 of the population. The average annual number for the previous ten years was 3,209, affording an average annual death-rate of 59·57 per 100,000 persons. The highest divisional rate per 100,000 persons in 1877 was 65·82 for the Eastern Division, which had also the highest average rate (75·07) for the ten years 1867-76, and the lowest was 29·77 for the North Midland Division, in which the lowest average mortality for the ten years 1867-76 (43·33 per 100,000) occurred,

There were only 4 Superintendent Registrars' Districts in which the deaths from fever equalled 1 per 1,000 of the population, viz.:—Ballyvaghan and Westport, in the Western, and Dingle and Tralee, in the South-Western Division.

In Leinster there were 753 deaths, or 0·58 per 1,000 inhabitants; in Munster 785, or 0·57 per 1,000; in Ulster 884, or 0·48; and in Connaught 363, or 0·44 per 1,000.

Of the deaths registered from fever, 724 were ascribed to typhus, 974 to typhoid or enteric, and 1,037 to simple continued fever, or vaguely as to "fever." The age periods 15 and under 20 years, and 65 to 75, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 75·78 per 100,000, and the latter 75·66; in the year 1876 the rates for the same age periods were 62·30 and 72·01 per 100,000 persons respectively.

The lowest rate for the year 1877 was 36·85 for the period "10 and under 15 years" of age. In 1876 the lowest was 38·20 for the period "5 years and under 10."

TABLE IX.—Showing for the year 1877 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

AGE-PERIODS.	DEATHS FROM FEVER.												No. of Deaths to 100,000 of the Living at same age.

*Erysipelas.*—The deaths from erysipelas numbered 312, against an annual average of 305 for the preceding decade. The deaths from this disease in the year 1876 amounted to 377. The highest mortality in 1877 in proportion to the population was in the North-Eastern Division, and the lowest in the North-Western.

*Metria or Puerperal Fever.*—The deaths from this disease in 1877 amounted to 377, being 37 less than the number registered in the preceding year. The average annual number for the ten years 1867–76 was 340.

*Influenza.*—Ninety-three deaths were ascribed to this disease; the number in 1876 was 121, and the annual average for the ten years 1867–76 was 129.

*Dysentery*.—To this disease 190 deaths were attributed, being 14 less than in the previous year, and 139 under the annual average for the ten years 1867-76.

*Diarrhœa*.—The deaths from diarrhœa were below the average. The disease proved fatal in 1,604 instances, equal to a mortality of 30·04 per 100,000 of the estimated population; the deaths in 1876 numbered 1,828, and the annual average number for the ten years 1867-76 was 1,868, or 34·68 per 100,000 persons. The highest Divisional rate in 1877 was 42·59 for the North-Eastern Division, and the lowest 14·94 for the North-Western. In none of the 163 Superintendent Registrars' Districts did the mortality from this disease equal 1 per 1,000 of the population.

The rates for the provinces were as follows:—Leinster, 29·1 per 100,000 persons; Munster, 37·5; Ulster, 31·2; and Connaught only 16·5.

Of the 1,604 deaths from diarrhœa, 440 were registered in the first quarter, 381 in the second, 388 in the third, and 395 in the fourth; the number in the third quarter was much less than usual.

*Simple Cholera*.—Forty-six deaths occurred from this disease.

A boy, aged 7 years, died from *Hydrophobia*, and 3 persons (2 men and one woman) from *Glanders*.

## II.—CONSTITUTIONAL DISEASES.

From diseases termed "constitutional" there resulted 16,757 deaths (8,058 males, and 8,699 females), affording a rate of 1 in 5·6 of all the deaths, and equal to 314 in every 100,000 of the population. This mortality differs but little from that for the previous year, or the average for the ten years, 1867-76.

*Phthisis or Pulmonary Consumption* proved fatal in 10,433 instances—5,006 males, and 5,427 females—being equal to 195·41 in every 100,000 persons, against an average rate of 187·00 for the previous ten years.

The three Eastern Divisions as heretofore yield the highest rates, that for the North-Eastern being 266·78 in every 100,000 living, for the Eastern 260·85, and for the South-Eastern 192·45. In the union of Belfast the deaths from phthisis were again equivalent to the high rate of 4 per 1,000 persons.

The Western Division had the lowest rate, but the deaths were above the average for that division; the rate for 1877 being 114·43 per 100,000, while the average rate for the ten years 1867-76 was only 100·62.

The rates for the four provinces are as follows:—Leinster, 239 per 100,000 of the population; Ulster, 224; Munster, 159; and Connaught, 124. Of the total deaths from phthisis, 7,207, or 69 per cent, were of persons between 15 and 45 years of age.

In the first quarter there were 2,910 deaths registered; in the second 3,039; in the third 2,291; and in the fourth, 2,193.

TABLE X.—Showing, by DIVISIONS, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1867-76; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1877, and the Rate represented thereby.

*Mesenteric Disease.*—The deaths from Mesenteric disease numbered 1,244—618 males, and 626 females.

*Hydrocephalus or Water on the Brain.*—The deaths from this disease amounted to 1,121—630 males, and 491 females.

*Scrofula.*—To this disease 965 deaths were ascribed, (527 males and 438 females).

*Gout.*—Only 23 deaths from Gout were registered (21 males and 2 females).

*Cancer.*—This disease caused 1,873 deaths, of which 799 were those of males, and 1,074 of females.

*Dropsy.*—Under this heading 949 deaths were tabulated (380 males, and 569 females).

### III.—LOCAL DISEASES.

The number of deaths from “local diseases” registered amounted to 33,305 (18,086 males and 15,219 females), or 1 in 2.8 of the deaths from all causes; in 1876 the number was 32,817 (17,588 males and 15,229 females).

*Diseases of the Nervous System.*—From this group of diseases there resulted 8,184 deaths (4,510 males and 3,674 females), being 165 under the number in the year 1876. They include 3,567 from convulsions (nearly all children), 1,558 from paralysis, 1,003 from apoplexy, 600 from cephalitis or inflammation of the brain and its membranes, 340 from epilepsy, 173 from insanity, 7 (1 male and 6 females) from chorea or St. Vitus’s dance, and 936 deaths entered under “brain disease, &c.”

*Diseases of the Organs of Circulation.*—Diseases of the Circulatory Organs caused 4,386 deaths (2,332 males and 2,054 females); in the previous year the number was 4,085. "Heart disease" caused 4,192 deaths, aneurism 118, and pericarditis or inflammation of the heart's covering, 76.

*Diseases of the Respiratory Organs.\**—The deaths from these diseases amounted to 14,565 (7,677 males and 6,888 females), being equal to 273 in every 100,000 of the population. The average number for the preceding ten years was 12,897, or 239 in every 100,000 of the estimated mean population; but the number for the year 1875 was 14,568, and for 1876, 14,250.

As in 1876 the Eastern Division had the highest rate, and the Western the lowest; the rate for the former division was 399·81 per 100,000 persons, and for the latter 163·76. Diseases of the respiratory organs were most fatal in the first quarter of the year, during which 4,643 deaths from these causes were registered; the number for the second quarter was 4,448; for the third 2,234; and for the fourth 3,240. As many as 10,735 of the deaths from these causes (5,360 males and 5,375 females) resulted from bronchitis; 2,107 (1,386 males and 721 females) were from pneumonia or inflammation of the lungs; 447 from asthma; 274 from pleurisy; 98 from laryngitis, and 904 were returned as from "lung disease," &c.

TABLE XI.—Showing, by DIVISIONS, the Number of Deaths from Diseases of the Respiratory Organs\* registered in Ireland during the Ten Years 1867–76; the Average Annual Number for that period, and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1877, and the Rate represented thereby.

under "stomach disease, &c."; 228 (135 males and 93 females) from inflammation of the liver; 156 from jaundice; 990 entered under "liver disease, &c."; and 19 from spleen disease.

*Diseases of the Urinary Organs.*—To the various affections of this order of diseases 1,436 deaths (1,074 males and 362 females) were ascribed. Of these deaths, 377 (232 males and 145 females) were from nephria or Bright's disease, 122 from diabetes, 119 from cystitis or inflammation of the bladder; 88 from inflammation of the kidneys; 49 from ischuria or suppression of the secretion of urine; 16 from stone in the bladder; and 665 from "kidney disease," &c.

*Diseases of the Organs of Generation.*—Deaths from diseases of the organs of generation numbered 169, including 81 from ovarian dropsy, 82 from diseases of the uterus, 3 from hydrocele, &c.

*Diseases of the Organs of Locomotion* proved fatal in 195 instances, and *Diseases of the Integumentary System* in 167; of the latter number of deaths, 4 were caused by phlegmon, 81 (53 males and 28 females) by ulcer, and 82 by various skin diseases.

#### IV.—DEVELOPMENTAL DISEASES.

The number of deaths from this class of diseases in 1877 amounted to 25,999 (11,970 males and 14,029 females). Of the 543 deaths from the first order of these causes, 244 were ascribed to premature birth, 267 to teething, 6 to cyanosis, 15 to spina bifida, and 11 to other malformations.

The deaths registered from the accidents of childbirth amounted to 581; the average annual number for the previous ten years was 611. If to these 581 deaths registered in the year 1877, the deaths from metria (377) be added, we have a total of 958 deaths of parturient women, or the death of one mother to every 146 births registered during the year; the annual average number for the ten years 1867-76 was 951. Twenty-one deaths were tabulated under the head of paramenia.

The remaining deaths in this class are 19,737 (9,104 males, and 10,633 females) from "old age," and 5,117 from atrophy and debility.

#### V.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 2,051 (1,442 males and 609 females), being slightly under the average for the ten years 1867-76; the rate for the former was 38.42, in every 100,000 of the population, and for the latter 39.24. Accidents or negligence caused 1,838 deaths (including 666 from fractures and contusions, 395 from burns or scalds, and 466 from drowning), there were 95 cases of homicide (murder and manslaughter), 90 of suicide, and 28 violent deaths which being vaguely returned were not classed.

TABLE XII.—Showing, by DIVISIONS, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths,) registered during the Ten Years 1867-76; the Average Annual Number for that period, and the Average Rate per 100,000 of the Estimated Population; with the number registered in 1877, and the Rate represented thereby.

CLASS.	DIVISIONS.								TOTAL, IRELAND.

Inhabitants,		1877, .	39.64	33.95	55.56	25.55	38.58	28.11	41.81	38.63

*Inquests.*—There were 2,787 inquests reported to the Registrars during the year 1877, being 1 inquest to every 34 deaths registered.

In 229 instances of sudden death the cause was not ascertained.

In 1865 there was 1 death in every 19 registered which could not be classed, owing to the cause of death having been either ill defined or unspecified; in 1877 such deaths only equalled 1 in every 38, but this proportion is not as favourable as in the year 1876, when this class of deaths represented only 1 in every 44 of the total.

#### AGES.

Deaths of infants under 1 year old numbered 12,850, being equal to 9.2 per cent. of the number of births registered.

Amongst children under 5 years of age 22,045 deaths occurred—a mortality equal to 34.2 in every 1,000 of the living at that age. Of these, 11,752 were boys and 10,293 girls; the former number representing 36.0 in every 1,000 boys, and the latter 32.4 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 10 per cent. of the persons living at that age.

Amongst the deaths registered are 806 of persons stated to have been aged 95 years and upwards—370 males and 436 females.

#### EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1877

amounted to 38,503; of these, 20,847 were males and 17,656 females. Of the whole number, 5,142 were from Leinster; 13,602 from Munster; 16,723 from Ulster; and 3,036 from Connaught.

Of the emigrants in 1877, 15.9 per cent. were under 15 years of age; 67.2 per cent. were between 15 and 35 years old; and 16.9 per cent. were 35 or upwards.

**PRICES OF PROVISIONS, AND PAUPERISM.**

The average prices, in Dublin, of bread, oatmeal, and potatoes in 1877 were in advance of those for the preceding year; there was no appreciable change in the average prices of beef, but the tendency in the latter part of the year was in favour of the consumer. The average price of Messrs. Manders and Co.'s 4-lb. loaf was 8*d.*; being 1*d.* over the average price in the year 1876; oatmeal averaged 17*s.* 10*d.* per cwt., being 1*s.* 3*d.* over the mean price for 1876. The average prices of potatoes ranged from 4*s.* 7*d.* to 6*s.* 6*d.* per cwt., against 3*s.* 8*d.* to 5*s.* 8*d.* in 1876; and those of beef from 58*s.* to 76*s.* per cwt., against 58*s.* to 76*s.* 6*d.*

TABLE XIII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the years 1867-77, and the AVERAGE NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1877.

YEAR.	Average PRICES OF PROVISIONS.						PAUPERISM.	
	BREAD (Messrs. R. Manders & Co.'s 4-lb. Loaf).	OATMEAL (Corn Exchange), per Cwt.	POTATOES (at Potato Market), per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		Average NUMBER OF PERSONS RELIEVED.	
			In-door.	Out-door.				
1867, . . . . .	8½	17 9	4 3 to 5 5	50 6 to 67 6	53,147	14,803		
1868, . . . . .	8½	16 11	4 2 " 5 5	51 0 " 65 0	54,484	16,711

1874, . . . . .	8	18 8	3 10 " 5 7	54 6 " 79 0	47,699	30,292		
1875, . . . . .	7	17 1	2 11 " 4 7	57 0 " 79 0	45,809	30,241		
1876, . . . . .	7	16 7	3 8 " 5 8	58 0 " 76 6	43,936	31,469		
<b>1877, . . . . .</b>	<b>8</b>	<b>17 10</b>	<b>4 8 " 6 6</b>	<b>58 0 " 76 0</b>	<b>44,888</b>	<b>33,165</b>		
1st Quarter, 1877, . . . . .	7½	17 0	4 6 " 5 10	56 6 " 76 0	47,689	33,807		
2nd " " " . . . . .	8	18 7	5 6 " 6 9	61 0 " 80 6	44,800	33,725		
3rd " " " . . . . .	8	17 8	4 4 " 7 0	58 6 " 76 0	41,531	32,453		
4th " " " . . . . .	8	18 0	4 3 " 6 4	56 6 " 72 0	45,530	32,673		

Surveying the period covered by the several Tables in this Report, *i.e.*, 1877, and the ten years preceding, it is found that beef was lowest in the year 1868, when the average prices ranged from 51*s.* to 65*s.* per cwt.;

bread in 1869, and 1870, for each of which the average price of Messrs. Manders' 4lb. loaf was 6½d.; oatmeal in 1871, when the average price was 15s. 1d. per cwt., and potatoes in 1875, when the average range of prices was from 2s. 11d. to 4s. 7d. per cwt. The highest average price of bread was 8½d. in 1867 and 1868, of oatmeal, 18s. 8d. in 1874; the highest range for potatoes, 4s. 6d. to 8s. per cwt. in 1873, and for beef, 64s. to 82s. 6d. per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1877 was 48,888, being 4,952 over the average for the preceding year; and that the average number of persons receiving out-door relief was 33,165, or 1,696 over the corresponding number for 1876.

**THE WEATHER.**

The following particulars have been extracted from Returns of Meteorological Observations taken at the Ordnance Survey Office, Phoenix Park, Dublin, during the years 1867-77, furnished by Major C. W. Wilson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean height of the barometer at 9.30 A.M. during the year 1877 was 29.856 inches, against an average of 29.933 inches for the preceding ten years. The highest reading during the year (30.689) was on the 19th December at 9.30 P.M., air calm, and the lowest (28.345 inches) was on the 11th November at 3.30 P.M., wind S.W.

The mean temperature for the year was 49.4°; the highest registered was 81.1° on the 20th June, and the lowest was 23.5° on the 19th March. The average mean temperature for the ten years 1867-76 was 49.5°.

TABLE XIV.—METEOROLOGICAL OBSERVATIONS at Ordnance Survey Office, Phoenix Park, Dublin, 1867-77.

[For detailed Table for 1877 see page 32.]

Yearly Average 1867-76.	29.933	57.6	41.1	49.5	.810	193	28.072	20	19	33	28	83	84	37	33		
<b>1877,</b> . . .	29.856	57.5	41.3	49.4	.809	241	30.105	5	10	33	56	34	73	120	29	5	

Rain or snow fell on 241 days during the year, against an average of 193 days for the preceding ten years, the amount being 30·105 inches, or 2,033 inches over the average annual rain-fall for the ten years 1867-76.

The prevailing wind was W., it having blown from that point on 120 days at 9.30 A.M., with an average pressure of 1·68 lbs. per square foot. The wind blew from S.W. on 73 days; from S.E. on 56 days; from S. on 34 days; from E. on 33 days; from N.W. on 29 days; from N.E. on 10 days; from N. on 5 days, and the air was calm on 5 days, at 9.30 A.M. The strongest wind (W.) was on the 28th January, the pressure being 16 lbs. per square foot.

From the remarks in the foregoing pages it will be seen that the marriages registered during the year 1877 were under even the low average rate yielded by the number recorded in the ten years 1867-76; that the birth-rate also was less than the average; that deaths from preventable diseases show a gratifying decline, and that notwithstanding the prevalence of diseases of the respiratory organs, the general death-rate was but little over the average. Sanitary measures received more attention in many places, though it must be admitted that the field for operations in this direction is still extensive. Emigration was again comparatively small.

I have already referred to deficiencies in registration as in part accounting for the low rates of marriages, births, and deaths in Ireland; this deficiency is most marked in Roman Catholic marriages, many of which, I fear, remain unregistered. Any defects there are in the registration of deaths would be removed by a provision requiring notice of the death to be sent to the Registrar, previous to interment, and as regards births, I beg to repeat the suggestions which I submitted in my Report for the year 1875:—

“In the case of Births, many instances having been reported to this department in which births have not come to the knowledge of the Registrars until after the expiration of six months from the date of birth, and consequently too late for registration, I consider that an extension of the time for registration, would, under all the circumstances, be advisable. With this change, and the aid to be derived from the effective working of the Compulsory Vaccination Act, the registration of births should approach very near to absolute completeness. Referring to the Vaccination Act, I would suggest that section 3 of that Act be so far altered that *all* certificates of vaccinations should be sent, not to the Registrar of the district in which the vaccination has been performed, but to the Registrar of *the district in which the birth occurred*, so that in case the birth has not been registered, the proper officer may have cognizance of the omission.”

I have the honour to be

Your Grace's faithful servant,

W. M. BURKE, F.C.P.I.,

*Registrar-General.*

GENERAL REGISTER OFFICE,  
CHARLEMONT HOUSE,  
Dublin, 6th March, 1879.

METEOROLOGICAL OBSERVATIONS

TAKEN AT THE

ORDNANCE SURVEY OFFICE, PHENIX PARK, DUBLIN,

IN 1877.

## Topographical Description of the Eight Divisions into which Ireland has been divided for Statistical purposes.

**No. I., THE NORTH-EASTERN DIVISION.**—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

**No. II., THE NORTH-WESTERN DIVISION,** is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

**No. III., THE EASTERN DIVISION,** is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenpoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

**No. IV., THE NORTH MIDLAND DIVISION,** is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

**No. V., THE SOUTH MIDLAND DIVISION,** situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

**No. VI., THE WESTERN DIVISION.**—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

**No. VII., THE SOUTH-EASTERN DIVISION.**—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

**No. VIII., THE SOUTH-WESTERN DIVISION,** extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)  
estimated to the middle of each of the Years 1801 to 1877, inclusive:—

Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.		
	Persons.	Males.	Females.		Persons.	Males.	Females.		Persons.	Males.	Females.
1801	5,216,329	2,591,758	2,624,571	1827	7,365,700	3,606,763	3,758,937	1853	6,198,984	3,031,226	3,167,758

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-7—By assuming the average annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

## IRELAND.—SUPPLEMENTARY TABLE of the

[In the Tables of Causes of Deaths, pp. 102-109, all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired

CAUSES OF DEATH at different Periods of Life, in the Year 1877.

partial correction, however, can now be made by means of the following Supplementary Table, containing many of the deaths from distinct diseases, such as mumps, epistaxis, polyypus, rickets, bronchocele, &c., &c., which in the preceding Tables have no separate classification, and also many of the deaths from various forms of Disease (such as softening of the brain, *necrencephalus*, deaths from which are included under "*Brain Disease, &c.*") which in some cases are returned under other heads.]

## INDEX TO SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the Number of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 163.\*]

A.					
Abbeyleix, . . . . .	75	Dublin, North, . . . . .	45	Millstreet, . . . . .	158
Antrim, . . . . .	1	Dublin, South, . . . . .	46	Mitchelstown, . . . . .	133
Ardee, . . . . .	38	Dundalk, . . . . .	47	Mohill, . . . . .	69
Armagh, . . . . .	2	Dunfanaghy, . . . . .	24	Monaghan, . . . . .	70
Atflone, . . . . .	57	Dungannon, . . . . .	12	Mountbellew, . . . . .	113
Athy, . . . . .	76	Dungarvan, . . . . .	127	Mountmellick, . . . . .	84
		Dunmanway, . . . . .	147	Mullingar, . . . . .	71
		Dunshaughlin, . . . . .	48		
B.				N.	
Bailieborough, . . . . .	39			Naas, . . . . .	51
Ballina, . . . . .	92	E.		Navan, . . . . .	52
Ballinasloe, . . . . .	93	Edenderry, . . . . .	82	Nenagh, . . . . .	85
Ballinrobe, . . . . .	94	Ennis, . . . . .	104	Newcastle, . . . . .	159
Ballycastle, . . . . .	3	Enniscorthy, . . . . .	128	Newport, . . . . .	114
Ballymahon, . . . . .	58	Enniskillen, . . . . .	25	New Ross, . . . . .	134
Ballymena, . . . . .	4	Ennistimon, . . . . .	105	Newry, . . . . .	19
Ballymoney, . . . . .	5			Newtownards, . . . . .	20
Ballyshannon, . . . . .	21	F.			
Ballyvaghan, . . . . .	95	Fermoy, . . . . .	129		
Balrothery, . . . . .	40	G.		O.	
Baltinaglass, . . . . .	41	Galway, . . . . .	106	Oldcastle, . . . . .	72
Banbridge, . . . . .	6	Glenamaddy, . . . . .	107	Omagh, . . . . .	34
Bandon, . . . . .	139	Genties, . . . . .	26	Oughterard, . . . . .	115
Bantry, . . . . .	140	Glin, . . . . .	148		
Bawnboy, . . . . .	59	Gorey, . . . . .	49	P.	
Belfast, . . . . .	7	Gort, . . . . .	108	Parsonstown, . . . . .	86
Belmullet, . . . . .	96	Gortin, . . . . .	27	Portumna, . . . . .	116
Borrisokane, . . . . .	77	Granard, . . . . .	66		
Boyle, . . . . .	97			R.	
				Rathdown, . . . . .	53
C.				Rathdrum, . . . . .	54
Cahersiveen, . . . . .	141	I.		Rathkeale, . . . . .	160
Callan, . . . . .	123	Inishowen, . . . . .	28	Roscommon, . . . . .	73
Carlow, . . . . .	78	Irvinestown, . . . . .	29	Roscrea, . . . . .	87
Carrickmacross, . . . . .	42			S.	
Carrick-on-Shannon, . . . . .	60	K.		Scarriff, . . . . .	117
Carrick-on-Suir, . . . . .	124	Kanturk, . . . . .	149	Shillelagh, . . . . .	55
Cashel, . . . . .	79	Kells, . . . . .	50	Skibbereen, . . . . .	161
Castlebar, . . . . .	98	Kenmare, . . . . .	150	Skull, . . . . .	162
Castleblayney, . . . . .	8	Kilkeel, . . . . .	18	Sligo, . . . . .	35
Castlecomer, . . . . .	80	Kilkenny, . . . . .	83	Strabane, . . . . .	36
Castlederg, . . . . .	22	Killadysert, . . . . .	109	Stranorlar, . . . . .	37
Castlereagh, . . . . .	99	Killala, . . . . .	110	Strokestown, . . . . .	74
Castletown, . . . . .	142	Killarney, . . . . .	151	Swineford, . . . . .	118
Cavan, . . . . .	61	Kilmacthomas, . . . . .	130		
Celbridge, . . . . .	43	Kilmallock, . . . . .	152	T.	
Claremorris, . . . . .	100	Kilrush, . . . . .	111	Thomastown, . . . . .	135
Clifden, . . . . .	101	Kinsale, . . . . .	153	Thurles, . . . . .	88
Clogheen, . . . . .	125			Tipperary, . . . . .	39
Clogher, . . . . .	62	J.		Tobercurry, . . . . .	119
Clonakilty, . . . . .	143	Larne, . . . . .	14	Tralee, . . . . .	163
Clones, . . . . .	63	Letterkenny, . . . . .	30	Trim, . . . . .	56
Clonmel, . . . . .	126	Linavady, . . . . .	15	Tuan, . . . . .	120
Coleraine, . . . . .	9	Limerick, . . . . .	154	Tulla, . . . . .	121
Cookstown, . . . . .	10	Lisburn, . . . . .	16	Tullamore, . . . . .	90
Cootehill, . . . . .	64	Lismore, . . . . .	131		
Cork, . . . . .	144	Lisnaskea, . . . . .	67	U.	
Corrofin, . . . . .	102	Listowel, . . . . .	155	Urlingford, . . . . .	91
Croom, . . . . .	145	Londonderry, . . . . .	31		
		Longford, . . . . .	68	W.	
		Loughrea, . . . . .	112	Waterford, . . . . .	138
		Lurgan, . . . . .	17	Westport, . . . . .	122
				Wexford, . . . . .	137
D.				Y.	
Delvin, . . . . .	65	M.		Youghal, . . . . .	138
Dingle, . . . . .	146	Macroom, . . . . .	156		
Donaghmore, . . . . .	81	Magherafelt, . . . . .	18		
Donegal, . . . . .	23	Mallow, . . . . .	157		
Downpatrick, . . . . .	11	Manorhamilton, . . . . .	32		
Drogheda, . . . . .	44	Middleton, . . . . .	132		
Dromore West, . . . . .	103	Millford, . . . . .	33		

\* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 75 (see page 38), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX TO REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
