Estimated Population of Ireland in each of the years 1801-83,	24
ABSTRACTS :—	
Marriages registered in Ireland in each of the Registration Provinces, Registration Counties, and Superintendent Registrars' Districts, in 1883, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks,	26-37
Ages of 10,468 Persons married in 1883, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	38-39

	Page
Marriages, Births, and Deaths registered in each of the Registration Provinces, Registration Counties, and Superintendent Registrars' Districts, in 1883; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births,	40-66
Births registered in the Provinces, Counties, and Superintendent Registrars' Districts, (distinguishing Males and Females) in each of the Four Quarters of 1883,	68-77
Deaths registered in each of the Four Quarters of 1883 (distinguishing Males and Females), in Provinces, Counties, and Superintendent Registrars' Districts,	78-87
Deaths of Males and Females at different Ages registered in 1883, in Provinces, Counties, and Superintendent Registrars' Districts,	88-97
Causes of Death of Males and Females in Ireland, at different periods of life in 1883,	98-112
Causes of Death of Males and Females in Ireland, and in each of the Registration Provinces, in 1883,	113-117
Deaths from several Zymotic and other Causes in 1883, in the Provinces, Counties, and Superintendent Registrars' Districts, showing the circumstances as to residence at time of death,	118-129
Deaths from several Zymotic and other Causes in 1883, in those Registrars' Districts in which the principal Urban Sanitary Districts in Ireland are situate,	130-131
Index to Superintendent Registrars' Districts, and Registrars' Districts,	132-135

REPORT

TO

HIS EXCELLENCY, JOHN POYNTZ, EARL SPENCER, K.G.

&c., &c., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit to your Excellency my report on Marriages, Births, and Deaths for the year 1883. This report is framed on the same principles as those presented in recent years, and will be found in all parts strictly comparable with that which I had the honour of presenting to your Excellency for the year 1882. There were not any changes of importance in the mode of working the department during the year, and it gives me great pleasure to inform your Excellency that my staff have discharged their duties with great efficiency, and that, with a few slight exceptions, all the work of the department, both throughout Ireland generally and in the General Register Office itself, has been punctually accomplished.

The usual Quarterly Returns, prepared from data periodically furnished by the Registrars, were published during the year, and afford information upon some of the more important subjects dealt with in this report. These returns, though they only give unrevised details respecting some special points, nevertheless, include particulars of the most important items for the Urban Sanitary Districts in Ireland containing a total population of upwards of one million, and are of great value, providing as they do reliable data by which both urban and rural sanitary authorities can estimate the state of the public health in their respective districts.

In addition to these, the returns for the sixteen principal town districts in Ireland, containing a population of about 850,000, commenced in 1880, have been regularly issued from week to week, and quarterly and annual summaries of these weekly reports have also been published. The Weekly Returns are of especial value to the urban sanitary authorities of the larger town districts, to whom they form an index of the health of the areas under their charge.

GENERAL SUMMARY.

The Marriages registered in Ireland during the year 1883 number 21,368; the Births 118,163; and the Deaths 96,228. Both absolutely and in proportion to the estimated population, the marriages and births are under the annual average for the preceding ten years; the mortality is somewhat in excess of the average.

The recorded natural increase of population, or excess of births over deaths, was 21,935, the loss by emigration amounting to 108,724; there would thus appear to have been a decrease of 86,789 in the population during the year, but against a portion of this decrease there is a set-off in immigration of which no official record has been obtained. The estimated population in the middle of the year was 5,015,282.

[TABLE.]

TABLE I.—Showing for each of the years 1873–83, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1873–82.

YEARS.	* Estimated Population in the middle of each year.	Numbers Registered.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.

MARRIAGES.

The number of Marriages registered during the year was 21,368, being 1 in every 235, or 4.26 per 1,000, of the estimated population.

This rate is slightly under that for the preceding year, and is below the low rate yielded by the average annual number of marriages registered during the ten years 1873–82, which was much under the marriage-rates in other countries, the statistics of which are available. The low marriage-rate in Ireland, as compared with other countries, must be largely attributed to the extensive emigration which takes place among persons of marriageable ages. No doubt there is some defect in the registration of Roman Catholic marriages, owing to causes referred to in the following paragraph, but a comparison of the birth-rate from year to year confirms the opinion that the marriage-rate is low. This subject has been more fully dealt with in the Reports for the year 1879 and previous years.

In dealing with the question of Marriages, I regret to state that the arrangements for the recording of marriages among the Roman Catholic portion of the community are still of a cumbrous and unsatisfactory character. While the Roman Catholic clergy give valuable aid in carrying out, and the Registrars do their best to administer, the Act in their localities, yet so much depends upon the manner in which the "husband" discharges his duty as conveyer of the certificate of marriage to the Registrar, and, in fact, his action as informant of his own marriage, that in spite of the desire of the clergy and the care of the Registrar, many marriages are imperfectly registered, and, I fear, a considerable number even escape registration altogether through the ignorance or carelessness of the parties married. It is much to be regretted that public records of Roman Catholic marriages in Ireland are liable to these defects, while the marriages of the members of all other denominations are carefully and accurately recorded. In order to remedy these defects a considerable revision of the existing statute (26 & 27 Vic., cap. 90) would be necessary.

Of the 21,368 Marriages registered during the year 1883, 14,616 were between Roman Catholics, 3,649 were celebrated according to the rites and ceremonies of the late Established Church; 2,233 were in Presbyterian Meeting-houses; 359 in "Registered Buildings" belonging to various religious denominations; only 499 by civil contract in the Registrars' offices; 9 were according to the usages of the Society of Friends; and 3 according to the Jewish rite.

* See page 24.

TABLE II.—Marriages registered in Ireland in 1883 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:—

Average 1873-82, . . .	3,879	2,406	337	523	11	2	7,158	16,653	23,311	5·80	4·13	4·51
1883, . . .	3,649	2,233	359	499	9	3	6,752	14,616	21,368	5·74	3·81	4·26

Of the 3,649 Marriages according to the rites of the late Established Church, 73 were by special licence, 3,096 by licence, 391 after the publication of banns, 22 on Registrar's certificate, and in 67 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1883 there were issued by the Registrars 704 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1883.	Number of Registered Meeting-houses on 31st December, 1883.	Number of Licences issued
1. General Assembly of the Presbyterian Church in Ireland,	137	559	2,087
2. Remonstrant Synod of Ulster,	8	19	37
3. Presbytery of Antrim,	4	8	28
4. United Presbytery or Synod of Munster,	2	2	—
5. Northern Presbytery of Antrim,	2	5	6
Total,	153	593	2,158

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1883, there were 1,503 churches and chapels of the late Established Church, 593 registered Presbyterian Meeting-houses, and 323 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show a decrease of 3 as regards the late Established Church, an increase of 1 Presbyterian Meeting-house, and an increase of 9 "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1883 :—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Methodists,	195	Covenanters,	1
Reformed Presbyterians,	37	United Original Seceders,	1
Independents,	25	"Protestant Dissenters,"	1
Baptists,	18	"Christians,"	1
Seceders,	11	Non-Subscribing Christians,	1
United Presbyterians,	11	"The Catholic Apostolic Church,"	1
Methodists, New Connexion,	6	Christian Brethren,	1
Moravians, or United Brethren,	6	Independent Protestants,	1
Evangelical Union,	2	Jews,	1
Non-Subscribing Unitarians,	2		
Unitarians,	1	Total,	323

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. In 1883, owing, in part, to the early Lent, the difference was not as marked as usual, but still it was considerable; the numbers recorded were—in the first quarter 6,752; in the second, 4,953; in the third, 4,694; and in the last 4,969.

The marriages of bachelors and spinsters constitute 85·5 per cent. of the total; those of widowers and spinsters 8·8 per cent.; of bachelors and widows 3·1 per cent.; and of widowers and widows 2·6 per cent. Thus, 11 in every 100 of the men married were widowers, and 5·7 per cent. of the women were widows; and in 14 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

TABLE III.—The Number of Roman Catholic and of Other Marriages registered in each Quarter during the four years, 1880–83 :—

QUARTER ENDING THE LAST DAY OF	Years and Number of Marriages Registered.							
	1880.		1881.		1882.		1883.	
	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.
March,	4,515	1,717	6,123	1,520	6,188	1,576	5,123	1,629
June,	3,239	1,480	3,021	1,569	3,184	1,724	3,392	1,561
September,	2,876	1,717	2,936	1,798	2,926	1,782	2,967	1,727
December,	2,864	1,955	2,901	1,958	2,933	1,766	3,134	1,835
Total,	13,494	6,869	14,981	6,845	15,181	6,848	14,616	6,752
General Total,	20,363		21,826		22,029		21,368	

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or of "full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1883 the ages of both parties were specified in only 5,234 instances, being less than one-fourth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 21,368 men married during the year, 519, or 2·43 per cent., were minors; and of the women married, 2,338, or 10·94 per cent., were under age. These proportions differ but slightly from the averages for the preceding ten years.

The highest proportion of husbands (2·97 per cent.) married under age in 1883, was in the province of Ulster, and the highest per centage of wives (14·42), in Connaught.

It may be added that the per-centage of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1883, 16,015, or 74·9 per cent., of the husbands, and 15,359, or 71·9 per cent., of the wives wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results eleven years since, the per-centage of persons married in 1873 who wrote their names being—men 68·3, and women 61·3.

As usual, the most favourable results appear in Leinster, and the least satisfactory in Connaught, the number of those married who wrote their names varying from 78 in every 100 men and 78 in every 100 women, in the former province, to 65 per cent. of the men and 63 per cent. of the women in the latter.

The number of marriages registered in each of the eleven years 1873-83; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows are given in the following Table for Ireland, and for each of the four registration provinces.

TABLE IV.—The Number of Marriages in Ireland and in each of the Four Registration Provinces during the years 1873-83, with the proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Provinces.	Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

In 3,452 instances, both of the parties married signed the register by "mark," and in 4,458 cases the register was thus signed by either the husband or the wife, so that in 7,910 instances, or 37·0 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 13,458 instances, or 63·0 per cent., *both* parties wrote their names.

In proportion to the estimated population at all ages, the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 5·0 per 1,000 persons; Ulster comes next, with 4·4 per 1,000; Munster third, with 3·7 per 1,000; and Connaught last, the rate being 2·9 per 1,000.

The highest rate in any county was 7·3 per 1,000, which was the marriage rate for Dublin; and the lowest 2·5 per 1,000, for Galway and Leitrim. Between these, the most favourable were 6·0 for Antrim, 5·0 in Armagh, and 4·9 in Down; and the least so 2·8 in Cavan and Longford, and 3·0 in Clare and Donegal.

BIRTHS.

The number of births registered during the year 1883 was 118,163—60,695 boys, and 57,468 girls, or 105·6 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 42·4, or 23·6 per thousand, which is considerably under the low average rate (25·6 per 1,000) for the ten years, 1873–82, and less than the rate in any of those years.

In the report for the year 1875, the causes of the comparatively low birth-rate in Ireland were considered, and the observations then made are almost equally applicable to the year now under review:—

"It has been seen that the marriages *registered* in Ireland, when compared with the total population fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination, this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the child-bearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcilable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 118,163 children whose births were registered in Ireland during the year 1883, 115,114, or 97·4 per cent. were legitimate, and 3,049, or 2·6 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·4.

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 59,157 were males, and 55,957 females, being 105·7 of the former to every 100 of the latter, and of the illegitimate children 1,538 were males, and 1,511 females, or 101·8 boys to 100 girls.

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 4·1 ; in Leinster, 2·1 ; in Munster, 2·1 ; and in Connaught, 0·7.

TABLE V.—The Per-centage of Legitimate and of Illegitimate Births registered in Ireland during the years 1879–83, by Registration Provinces.

Registration Provinces.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1879.	1880.	1881.	1882.	1883.	1879.	1880.	1881.	1882.	1883.
IRELAND,	97·5	97·5	97·5	97·3	97·4	2·5	2·5	2·5	2·7	2·6
LEINSTER,	97·9	97·8	97·8	97·8	97·9	2·1	2·2	2·2	2·2	2·1
MUNSTER,	98·1	98·2	98·2	98·0	97·9	1·9	1·8	1·8	2·0	2·1

CONNAUGHT,	99·3	99·0	99·2	99·1	99·3	0·7	1·0	0·8	0·9	0·7

The respective total birth-rates for the provinces in 1883 were—Leinster, 23·5 per 1,000 of the population ; Munster, 22·9 ; Ulster, 22·6, and Connaught, 22·2.

The four counties having the highest rates were Dublin, 28·2 per 1,000 inhabitants ; Antrim, 27·9 ; Kerry, 25·2 ; and Mayo, 23·9. Those with the lowest rates were—Tyrone, 18·7 ; Monaghan, 18·8 ; Fermanagh, 19·2 ; and Meath, 19·5.

Of the total births, 54·1 per cent. were registered in the first six months of the year (181 days), and 45·9 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 32,010 ; in the second, 31,881 ; in the third, 27,658 ; and in the fourth, 26,614.

TABLE VI.—Showing, by Quarterly Periods, the number of Births registered in Ireland in each of the five years 1878–82, and the average number for that period ; also the number registered during each quarter of the year 1883 :—

DEATHS.

The deaths registered during the year amount to 96,228, being equal to 1 in 52·1 or 19·2 per 1,000 of the estimated population. The deaths of males number 47,567, and those of females 48,661, the former being equal to 19·4 in every 1,000 males living, and the latter representing 19·0 per 1,000 females.

The death-rate (19·2) is somewhat over the average rate (18·2) for the preceding ten years, being above the rate for any of those years except 1879 and 1880.

As heretofore, very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this department, and emanating as they did, from gentlemen qualified to speak decisively on the subject, it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts.

With respect to the death-rates for the four provinces, the rate for Connaught is only 15·1 ; that for Munster is 17·0 ; for Ulster, 19·1, and for Leinster, 21·8.

Of the thirty-two counties, the four having the lowest registered mortality are—Mayo, 14·1 ; Kerry, 14·6 ; Galway, 14·8 ; and Clare, 15·2.

Those in which the rate was highest are—Dublin, 27·5 ; Antrim, 21·9 ; Down, 21·0 ; and Armagh, 20·8.

The deaths registered in the first half of the year always outnumber those in the second. In 1883, 59·0 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 41·0 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follow :—First quarter, 23·5 per 1,000 of the population ; second, 21·8 ; third, 15·2 ; and fourth, 16·2.

From Table on pp. 118–129, it will be seen that, of the 96,228 deaths registered during the year, 1,935 took place in *Infirmaries and General Hospitals* ; 919 in *Public Lunatic Asylums* ; 12,417 in *Workhouses and Workhouse Hospitals* ; and 80,957 were of persons who died “ *At their Own Homes, &c.* ” An additional Table (see page 130–31) is given showing like information for those *Registrars' Districts in which the principal Urban Sanitary Districts in Ireland are situated.*

TABLE VII.—Showing, by **Quarterly Periods**, the number of **Deaths** registered in Ireland in each of the five years, 1878–82, and the average number for that period ; also the number registered during each quarter of the year 1883 :—

CAUSES OF DEATH.*

I.—FEBRILE OR ZYMOTIC DISEASES.

The deaths from Febrile or Zymotic diseases registered during the year 1883, amounted to 9,628, or 192 in every 100,000 of the estimated population, being somewhat in excess of the mortality from these causes in the preceding year, but under the average for the ten years, 1873–82.

Of the 9,628 deaths from zymotic diseases 5,755, or 59·8 per cent., were amongst children under 10 years of age.

The deaths from the eight principal zymotic diseases† registered during 1883 form 9·0 per cent. of the deaths from all causes, and are equal to 173 in every 100,000 persons living ; the average annual mortality from the same diseases in the preceding 10 years represents 11·0 per cent. of the average number of deaths from all causes, and is equal to 201 deaths in every 100,000 of the estimated mean population.

* In the year 1881, some modifications were introduced into the classification of the causes of death, so as to bring it into accord with alterations in Nosology necessitated by the advance of Medical Science. These modifications are given in detail in the Eighteenth Report of the Registrar-General for Ireland, Page 6, *et seq.*, 1881.

† Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Fever, Diarrhoea (and Dysentery), and Cholera.

TABLE VIII.—Showing, by PROVINCES, the Number of Deaths from the principal Febrile or Zymotic Diseases registered in Ireland during the Ten Years 1873–82; the Average Annual Number for that period; with the Number registered in 1883, and the Rate represented thereby.

Small-pox.—There were but 16 deaths from small-pox registered, against 129 in 1882, and 72 in 1881. The average annual number for the ten years 1873–82 was 384. Of the 16 deaths from this disease in 1883, 13 were in the province of Ulster (including 12 in the union of Belfast), and 3 (all in Glennamaddy union) in Connaught.

Measles.—Deaths from measles, which had risen from 402 in 1881 to 1,518 in 1882, fell to 801 last year; viz., 146 in Leinster (47 of which were in the county of Longford); 199 in Munster (including 54 in Cork union, and 50 in the county of Limerick); 347 in Ulster (including 109 in the county of Armagh, and 50 in the county of Monaghan); and 109 in Connaught. The total number of deaths from this cause during last year is equal to 16·0 per 100,000 of the population.

Scarlet Fever.—The deaths from this disease, amount to 1,765, being 535 in excess of the number for the preceding year, but 333 under the average for the ten years 1873–82.

The deaths from scarlet fever in 1883 were distributed through the four provinces as follows:—Leinster, 319 (including 179 in the two Dublin unions, and 25 in Rathdrum union); Munster, 381 (252 of which occurred in Kerry County—including 41 in Killarney union, 112 in Listowel union, and 83 in Tralee union, 34 in Cork union—and 31 in Limerick union); Ulster, 968 (409 of which occurred in Belfast union, 114 in Lisburn union, 105 in Londonderry union, 84 in Lurgan union, 61 in Newtownards union, 52 in Banbridge union, and 39 in Antrim union); and Connaught, 97 (69 of which occurred in Athlone union).

In Ulster, deaths from scarlet fever were equal to 55·1 per 100,000 of the population; in Munster, the rate was 28·3 per 100,000; in Leinster, 25·4; and in Connaught, 11·9.

Diphtheria.—This disease proved fatal in 239 instances, being 146 under the number in the previous year, and 124 under the average annual number for the ten years 1873–82. In proportion to population the highest mortality (6·3 per 100,000 persons), was in the province of Ulster.

Whooping-cough.—The deaths (2,041) from whooping-cough are 310 over the average for the ten years 1873–82, and 1,209 over the exceptional number registered in the year 1882; they afford an annual rate of 40·7 per 100,000 of the estimated population. In proportion to population the mortality was highest in Connaught and lowest in Munster, the rates for these provinces being 66·4 and 14·2 per 100,000 persons respectively.

Fever.—The number of deaths from the several forms of continued fever amounted to 2,256 (1,133 males and 1,123 females), equal to a mortality of 45·0 per 100,000 of the population; the average annual number for the previous ten years was 2,839; the number in 1882 was 2,245. The respective rates for the provinces, in 1883, were Leinster, 52·2 per 100,000 inhabitants; Munster, 45·4; Ulster, 34·9; and Connaught, 46·2.

Of the registered deaths from fever, 810 were ascribed to typhus, 853 to typhoid or enteric, and 593 to simple continued fever, or vaguely as to “fever.” The age periods, 45 and under 55 years, and 15 to 20, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 57·75 per 100,000, and the latter 57·04. The lowest rate was 26·15 for the period “under 5 years old.”

TABLE IX.—Showing for the year 1883 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the number of the living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 264 only, being 31 under the annual average for the preceding decade, and 46 under the number in the year 1882. The highest mortality in 1883, in proportion to the population, was in Leinster, and the lowest in Connaught.

Puerperal Fever.—The number of deaths from this disease registered in 1883 was 307, being 53 below the average for the ten years, 1873–82, and 100 under the number in the year 1882.

Influenza.—Eighty-seven deaths were ascribed to this disease; the number in 1882 was 39, and the annual average for the ten years, 1873–82, was 83.

Diarrhœa and Dysentery.—For the last three years the deaths from diarrhœa and dysentery have been considerably below the average, the respective numbers being, for 1881, 1,526; for the following year, 1,564; and for last year, 1,522: the number for last year, which is equal to 30·3 per 100,000 of the population, is 454 under the average annual number for the ten years, 1873–82.

The rates for the provinces in 1883 were as follow:—Leinster, 33·6 per 100,000 persons; Munster, 29·6; Ulster, 31·4; and Connaught 18·5.

Simple Cholera.—Forty-two deaths were ascribed to this disease.

Ten males and 1 female died from *Hydrophobia*.

II.—PARASITIC DISEASES.

There were 118 deaths caused by diseases of this class.

III.—DIETIC DISEASES.

The deaths in this class number 178; they comprise 170 from intemperance, 123 of which (100 males and 23 females) come under the head of chronic alcoholism, and 47 (42 males and 5 females) were caused by delirium tremens.

IV.—CONSTITUTIONAL DISEASES.

From diseases termed “constitutional” there resulted 16,864 deaths (7,953 males and 8,911 females), affording a rate of 1 in 5·7 of all the deaths, and equal to 336 in every 100,000 of the population.

Phthisis or Pulmonary Consumption proved fatal in 10,775 instances (4,970 males and 5,805 females) being equal to 214·8 in every 100,000 persons; the average annual number for the previous ten years was 10,296.

As heretofore, Leinster and Ulster yield the highest rates, and Connaught the lowest. The rates for the four provinces are as follow:—Leinster, 258 per 100,000 of the population; Ulster, 235; Munster, 166; and Connaught, 143.

Of the total deaths from phthisis, 7,674, or 71·2 per cent., were of persons between 15 and 45 years of age.

TABLE X.—Showing, by PROVINCES, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1873–82; the Average Annual Number for that period; with the number registered in 1883, and the Rate represented thereby.

DISEASE.	PROVINCES.				TOTAL, IRELAND.	
	Leinster.	Munster.	Ulster.	Connaught.

Mesenteric Disease.—The deaths from mesenteric disease numbered 1,120—549 males and 571 females.

Gout.—Only 31 deaths from gout were registered (17 males and 14 females).

Cancer, Malignant Disease.—There were 1,995 deaths tabulated under this heading, of which 917 were those of males and 1,078 of females.

V.—DEVELOPMENTAL DISEASES.

The deaths in this class amount to 20,322, of which 19,899 (9,059 males and 10,840 females) were ascribed to “old age.” Of the remaining 423 deaths, 333 are tabulated under the head of “premature birth,” 17 were caused by cyanosis, 42 by spina bifida, &c.

VI.—LOCAL DISEASES.

The number of deaths from “local diseases” registered amounted to 38,231 (19,927 males and 18,304 females), or 1 in 2·5 of the deaths from all causes.

Diseases of the Nervous System.—From this group of diseases there resulted 8,609 deaths—4,654 males and 3,955 females. They include 3,240 from convulsions, (nearly all children), 1,508 from paralysis, 1,081 from apoplexy, 781 from inflammation of the brain, 385 from epilepsy, 339 from insanity (general paralysis of the insane), 3 (2 males and 1 female) from chorea or St. Vitus’s dance, 285 from softening of the brain, &c.

Diseases of the Circulating System.—Diseases of the circulating system caused 5,209 deaths—2,690 males and 2,519 females.

*Diseases of the Respiratory System.**—The deaths from these diseases, omitting those from croup, which disease was not included in this group prior to the year 1881, amounted to 16,042 (8,201 males and 7,841 females), being equal to 319·9 in every 100,000 of the population. The average number for the preceding ten years was 14,773, the annual numbers varying from 11,419 in 1874 to 18,441 in 1879. The respective rates for the Provinces, in 1883, are Leinster, 392·7 per 100,000 persons; Munster, 294·1; Ulster, 311·8; and Connaught, 205·0.

As many as 11,805 of the deaths from these causes (5,655 males and 6,150 females) resulted from bronchitis; 2,577 (1,679 males and 898 females) were from pneumonia or inflammation of the lungs; 388 from asthma and emphysema; 255 from pleurisy; 98 from laryngitis, &c.

TABLE XI.—Showing, by PROVINCES, the Number of Deaths from Diseases of the Respiratory System* registered in Ireland during the Ten Years 1873–82; the Average Annual Number for that period; with the number registered in 1883, and the Rate represented thereby.

Rate per 100,000 Inhabitants, 1883,	392·7	294·1	311·8	205·0	319·9	

Diseases of the Digestive System.—These diseases contributed 4,743 deaths (2,433 males and 2,310 females). They include 464 from enteritis or inflammation of the bowels; 349 from peritonitis or inflammation of the covering of the bowels; 378 from ileus or obstruction of the bowels; 204 from ulceration of the intestines; 138 from hernia; 8 (2 males and 6 females) from fistula; 204—131 males and 73 females— from cirrhosis of liver, &c.

Diseases of the Urinary System.—To the various affections of this order of diseases

* Exclusive of Phthisis, or Pulmonary Consumption, for which see “Constitutional Diseases,” and of Croup, which, previous to the year 1881, was not included in this group of diseases.

1,528 deaths (1,116 males and 412 females) were ascribed. Of these deaths, 520 (314 males and 206 females) were from Bright's disease, 126 from nephritis or inflammation of the kidneys; 9 from ischuria or suppression of urine; 18 from stone in the bladder; 51 from uræmia, &c.

The remaining deaths from Local Diseases comprise 50 from *Diseases of the Lymphatic System and of Ductless Glands*; 639 from *Diseases of the Reproductive System*, (including 160 from diseases of the Organs of Generation, and 479 from the Accidents of Childbirth); 283 from *Diseases of the Locomotive System*; and 258 from *Diseases of the Integumentary System*.

VII.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 1,945 (1,367 males and 578 females), or 38·8 in every 100,000 of the population, being slightly under the average for the ten years 1873–82. Accidents or negligence caused 1,702 of these deaths (including 692 from fractures and contusions, 379 from burns or scalds, and 364 from drowning); there were 107 cases of homicide (murder and manslaughter), and 124 of suicide, and 12 men were executed; 6 in Leinster, 3 in Munster, and 3 in Connaught.

TABLE XII.—Showing, by PROVINCES, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths), registered during the Ten Years 1873–82; the Average Annual Number for that period, with the number registered in 1883, and the Rate represented thereby.

Inquests.—There were 2,157 inquests reported to the Registrars during the year 1883, being 1 inquest to every 45 deaths registered.

AGES.

Deaths of infants under 1 year old numbered 11,598, being equal to 9·8 per cent. of the number of births registered.

Amongst children under 5 years of age 20,121 deaths occurred—a mortality equal to 36·0 in every 1,000 of the living at that age. Of these, 10,692 were boys and 9,429 girls; the former number representing 37·8 in every 1,000 boys, and the latter 34·3 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 10·6 per cent. of the living at that age.

Amongst the deaths registered are 731 of persons stated to have been aged 95 years and upwards—291 males and 440 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1883 amounted to 108,724; of these 55,264 were males and 53,460 were females. Of the whole number, 20,708 were from Leinster; 29,279 from Munster; 29,918 from Ulster; and 28,819 from Connaught.

Of the total emigrants from Ireland in 1883, 20·0 per cent. were under 15 years of age; 67·9 per cent. were between 15 and 35 years old; and 12·0 per cent. were 35 or upwards; and in 155 cases, or 0·1 per cent, the ages were unspecified.

PRICES OF PROVISIONS, AND PAUPERISM.

The average prices, in Dublin, of oatmeal, potatoes, and beef in 1883 were over those for the preceding year, but as regards beef the advance was very slight; the average price of Messrs. Manders and Co.'s 4-lb. loaf was 7*d.*, being $\frac{1}{4}$ *d.* under the average price for 1882. Oatmeal averaged 17*s.* 2*d.* per cwt., being 1*s.* 8*d.* over the mean price for 1882; the average prices of potatoes ranged from 3*s.* 9*d.* to 4*s.* 10*d.* per cwt., against 2*s.* 9*d.* to 3*s.* 9*d.* in 1882; and those of beef from 66*s.* 6*d.* to 77*s.* per cwt., against 64*s.* to 76*s.* 6*d.*

TABLE XIII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the years 1873–83, and the AVERAGE NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1883.

* Compiled from Returns furnished by the Local Government Board.

Surveying the period covered by the several Tables in this Report, *i.e.*, 1883, and the ten years preceding, it is found that beef was lowest in the year 1879, when the average prices ranged from 57*s.* to 68*s.* per cwt.; bread in 1875, 1876, 1879, and 1883, in each of which the average price of Messrs. Manders' 4-lb. loaf was 7*d.*; oatmeal in 1881, when the average price was 14*s.* 1*d.* per cwt.; and potatoes in 1881, when the average range of prices was from 2*s.* 5*d.* to 3*s.* 8*d.* per cwt. The highest average price of bread was 8*d.* in the years 1873–4–7; of oatmeal, 18*s.* 8*d.* in 1874; the highest range for potatoes, 4*s.* 6*d.* to 8*s.* per cwt. in 1873, and for beef, 64*s.* to 82*s.* 6*d.* per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1883 was 50,385, being 877 under the average for the preceding year; and that the average number of persons receiving out-door relief was 60,721, or 2,179 over the corresponding number for 1882.

THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken during the years 1870-83, at 40, Fitzwilliam-square, West, Dublin, by J.W. MOORE, M.D., UNIV. DUB., F.K.Q.C.P., F.M.S., Observer at Dublin for the Meteorological Office, London:—

The mean Atmospheric Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's Formula, viz., $min. + \{max. - min. \times .41\} = \text{Mean Temperature}$. The per-centage Amount of Cloud has been deduced from observations made three times daily—at 9 A.M., 3 P.M., and 9 P.M.—for the years 1870-1874 inclusive, and from observations made twice daily—at 9 A.M. and 9 P.M.—for the years 1875-1883 inclusive. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least one-hundredth (.01) of an inch of rain falls within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1883 was 29.923 inches. The highest observed reading was 30.802 inches, at 9 A.M., on February 23rd. The lowest observed reading was 28.573 inches, at 9.50 P.M., on January 25th. The extreme range of atmospherical pressure was 2.229 inches.

The *Mean Temperature* of the year, deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's formula, was 48.2°. The highest reading was 71.4° on August 26th; the lowest reading was 25.4° on March 24th. The average mean temperature for the years 1870-82 calculated in the same way, was 48.6°. The mean temperature, deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M., was 48.8°.

Rain fell on 188 days, including snow or sleet on 23 days, and hail on 30 days. The average number of rainy days in the years 1870-82 was 199.9. The total rainfall measured 29.351 inches, compared with an average of 29.031 inches in the years 1870-82. Of this amount 13.649 inches fell in the first six months of the year, on 90 days.

As regards the *Direction of the Wind* 730 observations were made during the year, with this result—N., 38; N.E., 38; E., 53; S.E., 67; S., 86; S.W., 88; W., 223; N.W., 83; Calms 54.

A general review of the year 1883 shows that the annual mean temperature was about half a degree below the average; the rainfall (29.351 inches) was slightly above the average of the thirteen years 1870-82 (29.031 inches) and decidedly above that of the longer period of eighteen years, 1865-82 (28.359 inches). The rainy days, on the contrary, were below the average both of the thirteen years, 1870-82 (199.9 days) and of the eighteen years, 1865-82 (195.4 days). The excess of the rainfall was caused by the occurrence of several heavy falls within 24 hours—thus, 1.007 inches fell on February 1, 1.389 inches on April 26, 1.387 inches on May 8, 1.037 inches on August 6, and 1.380 inches on September 1—that is, 6.200 inches, or about 21 per cent. of the total precipitation in the year—were measured on five days.

The amount of cloud was 2 per cent. below the average, namely, 58.8 per cent. against 60.8 per cent.

Appended are some more detailed remarks upon the different months of the year 1883.

JANUARY.—An open, rainy, stormy, month. The mean temperature (42.7°) was 2.0° above the average of the preceding eighteen years, while the rainfall (2.679 inches) and rainy days (20) were also both above the average—2.255 inches and 16.9 days.

In Dublin an aurora was seen on the 3rd; solar halos were seen on the 28th, 29th, and 31st; lunar halos on the 18th and 21st. Hail fell on the 24th, 26th, and 29th; sleet or snow on the 25th, 26th, 29th, and 30th. There was more or less fog on the 6th, 7th, 20th, 22nd, and 31st.

FEBRUARY.—During the first three weeks stormy weather with heavy rains prevailed. From the 20th an anticyclone lay over the British Islands and France, so that the weather became fine and quiet, meanwhile continuing for the most part mild and open. The mean temperature (43.4°) was slightly above the average (42.8°) of the previous eighteen years. The rainfall (3.752 inches) was considerably in excess of the average (2.089 inches); the rainy days (17) were about the average (17.5).

In Dublin the range of atmospherical pressure amounted to two inches. Solar halos were observed on the 1st, 8th, and 19th. Snow or sleet fell on the 1st, 11th, and 15th; hail on the 1st, 10th, 12th, and 15th. A thunderstorm occurred on the 15th. The atmosphere was foggy on the 18th, 19th, and 25th.

MARCH.—An intensely cold and dry month, with constant polar winds and frequent showers of hail, sleet, and snow. The mean temperature was slightly below that (38.2°) of the memorably inclement March of 1867, and nearly 5° below the average mean temperature of the preceding eighteen years. It was also about 5° below the mean of January and February, 1883. The rainfall (1.056 inches) was less than one-half the average (2.151 inches), and the rainy days were only 12 compared with an average of 16.8.

In Dublin thunder was heard on the 15th, lightning was seen on the 27th. The air was foggy on the 4th, 10th, 14th, and 20th. A solar halo was seen on the 28th. Snow or sleet fell on the 7th, 8th, 10th, 14th, 15th, 16th, 17th, 18th, 22nd, and 26th; hail was noted on the 7th, 8th, 12th, 14th, 15th, 16th, 17th, 18th, 26th, 27th, 28th, and 30th.

APRIL.—This was a cold, dry month—easterly and south-easterly winds prevailing, although not to such an extent as during March. The mean temperature was 1.6° below the average of the previous eighteen years; but the extremes were not great, the thermometer rising only to 60.0°, and not falling lower than 34.3° in the city of Dublin. The rainfall (2.207 inches) was in excess of the average of the years 1865-82 inclusive (2.047 inches), but nevertheless the month is fittingly described as "dry," because the rainy days were only 10, compared with an average of 15.5, and of the total rainfall 1.868 inches, or nearly 85 per cent., fell within thirty-six hours on the 26th and 27th. The amount of cloud was very moderate, and much sunshine was enjoyed.

In Dublin solar halos were observed on the 1st, 7th, and 14th; a lunar halo with paraselenæ appeared on the 16th. Auroræ were seen on the 3rd, 9th, and 24th. Hail fell on the 19th and 23rd. The atmosphere was foggy on the 3rd, 5th, 7th, 8th, and 12th. On the morning of the last named day a cold and thick vapour fog prevailed.

MAY.—Although a spell of severe cold for the time of year occurred early in the month, May may be considered to have been favourable from every point of view. There was an average mean temperature and rainfall, while the rainy days (13) fell slightly short of the average (15).

In Dublin lightning was seen on the night of the 5th; solar halos appeared on the 4th, 18th, and 22nd; sleet and snow fell on the 8th, hail on the 3rd, 4th, and 5th. The atmosphere was foggy on the 16th, 17th, and 22nd. A thick vapour fog occurred on the morning of the 16th.

JUNE.—The earlier portion of the month was fine and often bright. After the 13th the weather was cloudy, showery, and generally changeable and cool. The last three days were warm. The mean height of the barometer (29·970 inches) was almost identical with that of May (29·967 inches). The mean temperature was about one degree below that of June in the previous eighteen years. The rainfall (1·932 inches) was nearly the average (2·004 inches), while the rainy days (18) were four in excess. In Dublin thunder was heard on the 8th, and a thunderstorm occurred on the 9th. Hail fell on the 15th. A solar halo was seen on the 13th. Vapour fogs prevailed on the 7th and 8th.

JULY.—A changeable, cool, and very showery month, with but little sunshine. At the beginning southerly winds prevailed, but after the 12th it blew most frequently from the north-westward. The mean temperature was nearly 3° below the average of the previous eighteen years. The rainfall (2·222 inches) was less than the average (2·523 inches), but the rainy days (22) were considerably in excess (average=16·9). In Great Britain the month was remarkable for the frequency and severity of the thunderstorms which occurred.

In Dublin distant thunder was heard on the 5th, 13th, and 21st, but no severe thunderstorm occurred. Hail fell on the 21st. No solar or lunar halos were observed.

AUGUST.—The first half of the month was unsettled, with heavy rains and high winds. After the 14th there was a decided and permanent improvement, and the second half of the month was dry, comparatively bright, and warm. The mean temperature (58·6°) was as nearly as possible equal to the average temperature of August in Dublin during the eighteen years, 1865–1882, inclusive. The rainfall (3·307 inches) was in excess of the average (2·969 inches), but the rainy days were only 14 compared with an average of 16·1. After the 14th only ·066 inch of rain fell on four days; whereas ten out of the first fourteen days were rainy—the registered rainfall amounting to 3·241 inches.

Except in a very violent thunderstorm on the 6th, there were no electrical disturbances in Dublin; on the 9th, however, forked lightning was seen over the sea at Ballybrack, co. Dublin. A lunar halo was seen on the 18th. The air was foggy on the evening of the 16th.

SEPTEMBER.—Rough and unsettled at the beginning and close, this was in general a favourable month—a period of quiet, fine weather lasting from the 9th to the 19th inclusive. The mean temperature was slightly below the average (54·7° compared with 55·5°). The rainfall (3·637 inches) was in excess—the average for September in the previous eighteen years being 2·274 inches. Of the total amount more than one-third (1·380 inches) fell on the 1st. The rainy days were 14, or nearly the average (14·5). Very violent storms occurred on the 1st and 26th, and the wind blew strongly on many days, both at the commencement and towards the end of the month.

A solar halo was seen on the 18th. An aurora showed on the night of the 5th. The air was foggy on the 13th and three following days, as well as on the 20th. At Greystones, co. Wicklow, the rainfall for the month was 4·469 inches on sixteen days.

OCTOBER.—Changeable as October generally is, this month proved no exception to the rule. The mean temperature was as nearly as possible equal to the average of the previous eighteen years, but it is noteworthy that the first week was decidedly colder than the last week, and that a remarkable increase of temperature occurred on the 7th, lasting for several days. The rainfall was considerably below the average (2·205 inches compared with 3·192 inches), and the rainy days (16) also fell short of the average (17·5).

In Dublin lightning was seen on the 3rd and 15th. Solar halos were observed on the 5th, 12th, 19th, and 22nd; lunar halos on the 11th and 15th. The atmosphere was foggy on the 8th, 12th, and 29th. A partial lunar eclipse was uncommonly well seen on the morning of Tuesday, the 16th.

NOVEMBER.—A very unsettled, rather cold month, notwithstanding the occurrence of many bright sunny days. The mean temperature was, it is true, only slightly below the average of the previous eighteen years (43·8°), but this was owing in great measure to a remarkable excess of temperature from the 27th to the 30th, and to the absence of any extreme cold. The rainfall was decidedly in excess (3·074 inches compared with an eighteen years' average of 2·319 inches), and the rainy days were 19, compared with a similar average of 16·8. A noteworthy feature of the month was the unwonted splendour of the dawn and sunset, and of the twilight "fore-glow" and "after-glow," on several occasions during the last week.

In Dublin lightning was seen on the 25th. Solar halos appeared on the 5th and 23rd. Hail and sleet fell on the 19th and 20th. The atmosphere was foggy on the 1st, 7th, 11th, 12th, 13th, 14th, and 15th.

DECEMBER.—An open, breezy, comparatively fine month. The mean temperature (42·5°) was 1·5° above the average of the previous eighteen years; whereas the rainfall (1·257 inches) and rainy days (13) were considerably below the average (2·614 inches and 17·0 days). Fresh to strong westerly winds were very prevalent during the first three weeks, but a calm foggy period commenced on the 23rd. There was very little frost. Snow was completely absent, but hail fell on the 14th and 15th. More or less fog was observed on the 23rd, 25th, and three following days. Lunar coronæ appeared on the 7th and 9th, and a lunar halo at 10·20 P.M. of the 14th. Glowing skies were again noticed before sunrise and after sunset on the relatively few occasions when the lower strata of the atmosphere were tolerably free of clouds.

TABLE Showing the average Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches and Number of RAINY DAYS for the Thirteen Years 1870-1882, inclusive; and the Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the year 1883.

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-83—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, to allow for the discrepancy between the number thus arrived at for 1881 and the estimate based on the Census taken on the 3rd of April in that year.

ANNUAL ABSTRACTS
OF
MARRIAGES, BIRTHS, AND DEATHS.

1883.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

REGISTRATION PROVINCES AND COUNTIES.*	AREA in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Popula- tion, 1881.	TOTAL MARRIAGES.	MARRIAGES													
				Registered under the Act 7 & 8 Vic., c. 81.													
				According to the Rites of the late Established Church.						In Registered Presbyterian Meeting Houses.	In Registered Buildings.	In the Registrar's Office.	Society of Friends.	Jews.	TOTAL Registered under the Act 7 & 8 Vic., c. 81.	Roman Catholic Marriages Registered under the 26 & 27 Vic., c. 90.	
				Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	TOTAL.

MARRIAGES, BIRTHS, and DEATHS registered in the Year 1883.

Wherever the minus sign (—) is prefixed to the number given in the column headed "Excess of Births over Deaths," it denotes that the births in the district, instead of exceeding the deaths, were, in fact, less than the Deaths to the extent stated.

NOTE.—The Registrars' Districts are subdivisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.
The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.
Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths to the extent stated.

I.—PROVINCE OF LEINSTER.—BIRTHS AND DEATHS, 1883—REGISTRARS' DISTRICTS—con.

Castletown	49	Granard	18	Naas	8		
Cavan	100			Navan	25	W.	
Celbridge	7	I.		Nenagh	80	Waterford	88
Claremorris	151	Inishowen	107	Newcastle	74	Westport	155
Clifden	135	Irvinestown	117	Newport	153	Wexford	35
Clogheen	78			New Ross	34		
Clogher	128					Y.	
Clonakilty	50					Youghal	63

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 27 (see page 28), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX TO REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
