## REPORT ON VITAL STATISTICS FOR THE YEAR 1973

This Report has been prepared by the Central Statistics Office for the Minister for Health in accordance with the provisions of Section 2 of the Vital Statistics and Births, Deaths and Marriages Registration Act, 1952.

The statistics relate to the area in Ireland exclusive of Northern Ireland.

Births are classified according to the area of residence of the mother and deaths according to the area of residence of the deceased.

The number of births for each of the years 1943 to 1973 is exclusive of late registrations, and the number of deaths for each of the years 1940 to 1967 is exclusive of non-residents. From 1968 however the number of deaths includes non-residents.

The important statistics contained in this Report have already been published, and the Report consists mainly of a breakdown and analysis of these statistics.

**NOTE:** Prior to 1970 births and deaths were classified according to year of registration. In order to comply with United Nations regulation it was decided to classify births and deaths by year of occurrence from 1970 onwards.

Because of this change in the basis of classification, those births and deaths which occurred in 1969 but were registered in 1970 have been recorded neither in the 1969 nor in the 1970 Report on Vital Statistics. The number of births excluded on this account was 2,545 and the number of deaths, 2,279. Appendix tables to the 1971 Report show these births classified by age of mother at maternity and number of previous children, while deaths are classified by cause, sex and age group.

### GENERAL SUMMARY

**Marriages.**—There were 22,816 marriages registered during the year 1973 compared with 22,302 in 1972. The marriage rate per 1,000 population was 7.48 compared with 7.40 in 1972.

**Births.**—The number of births occurring during 1973 was 68,713 and the birth rate was 22.52 per 1,000 population, compared with 22.74 per 1,000 population in 1972. The number of illegitimate births registered in 1973 was 2,167 or 3.15 per cent of all births.

**Deaths.**—The number of deaths occurring during 1973 was 34,192 and the death rate was 11.21 per 1,000 population. In 1972 deaths numbered 34,381 and the rate was 11.41.

Of the deaths occurring in 1973, 30.67 per cent were stated to be due to ischaemic and other forms of heart disease, 16.97 per cent to malignant neoplasms, 13.91 per cent to cerebrovascular disease and 0.51 per cent to tuberculosis (all forms).

The number of deaths in 1973 from tuberculosis of all forms was 173 and the rate was 0.06 per 1,000 population, thus remaining at the same level as in 1972.

There were 5,583 deaths from malignant neoplasms and neoplasms of lymphatic and haematopoietic tissues (excluding Hodgkin's disease and leukaemia and aleukaemia). This total is comparable with that for "cancer" in the 1949 and earlier Reports. The rate in 1973 was 1.83 per 1,000 population, showing a slight decrease compared with 1972.

During 1973 the number of deaths occurring of infants under one year was 1,234 compared with 1,236 in 1972 giving rates of 17.96 and 18.04 respectively per 1,000 live births.

The total number of deaths from accidents and other external causes in 1973 was 1,583 of which road vehicle accidents accounted for 624.

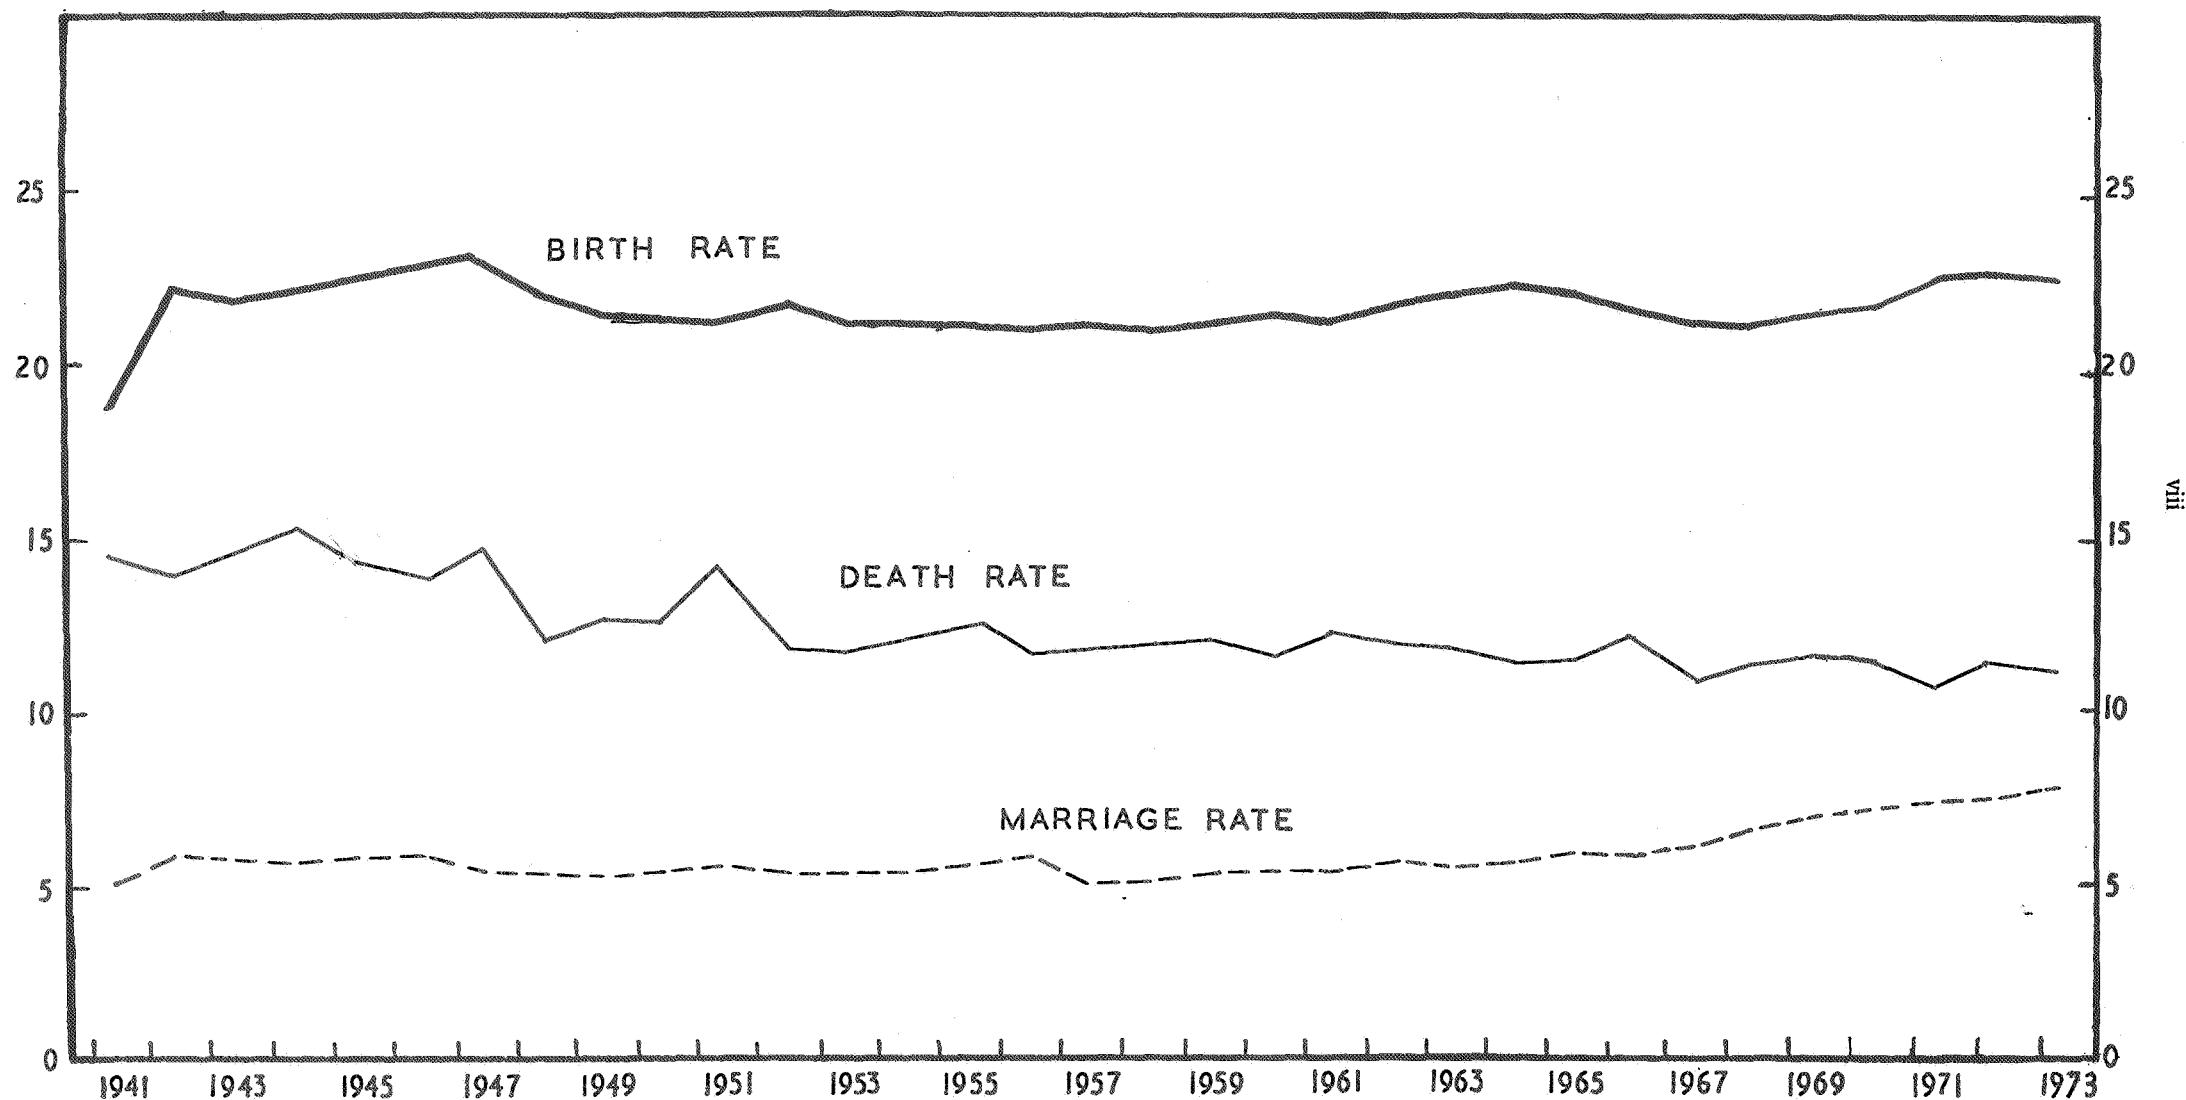

Marriage, birth and death rates per 1,000 population for the years 1941 to 1973 are illustrated in Diagram 1.

**Issue of Authority for Registration.**—Births and deaths which have not been registered within one year of their occurrence can be registered only on the authority of An tArd Chlaraitheoir. The number of births registered on the authority of An tArd Chlaraitheoir in 1973 was 815 and the number of deaths registered was 183. Throughout the tables in this Report these births and deaths have been excluded.

**Population.**—The estimated population in April 1973 was 3,051,000.

Diagram I

BIRTH, MARRIAGE AND DEATH RATES, (PER 1,000 POPULATION) 1941-1973

## MARRIAGES

The number of marriages registered in 1973 was 22,816, an increase of 514 on the previous year; the rate was 7.5 per 1,000 population, being the highest rate ever recorded. TABLES 4 and 5 of this Report show the average numbers of marriages registered and marriage rates for ten-year periods since 1864 and by single years since 1971. The following table compares the marriage rate in Ireland in the years 1941 to 1973 with those in Northern Ireland, England and Wales and Scotland.

TABLE I

**NUMBER OF MARRIAGES PER 1,000 POPULATION IN IRELAND\* AND NEIGHBOURING COUNTRIES, 1941-1960  
AND IN EACH YEAR 1964-1973**

| Year       | Ireland* | Northern Ireland | England and Wales | Scotland |
|------------|----------|------------------|-------------------|----------|
| 1941-1950† | 5.6      | 7.6              | 8.6               | 8.5      |
| 1951-1960† | 5.4      | 6.8              | 7.8               | 8.1      |
| 1964       | 5.6      | 7.3              | 7.5               | 7.7      |
| 1965       | 5.9      | 7.1              | 7.8               | 7.8      |
| 1966       | 5.8      | 7.3              | 8.0               | 8.1      |
| 1967       | 6.1      | 7.3              | 8.0               | 8.1      |
| 1968       | 6.5      | 7.5              | 8.4               | 8.4      |
| 1969       | 7.0      | 7.7              | 8.1               | 8.3      |
| 1970       | 7.1      | 8.1              | 8.5               | 8.3      |

\*Exclusive of Northern Ireland.

†Average annual number of marriages per 1,000 population for decennial periods from 1941-1960.

From this table it will be seen that over the period under review, while the marriage rate in this country has been consistently lower than the rates in the other areas, the difference has been decreasing due to the rate in this country rising faster than in the other areas. In 1973, however, it will be noted that the marriage rate was 0.2 above that for Northern Ireland.

### AGE AT MARRIAGE

Particulars of the ages of persons marrying in this country were obtained at the 1946 Census of Population. At that Census persons were asked to state their date of marriage and a special analysis was made of 14,338 marriages which had taken place in the preceding twelve months and in the case of which the husband and wife were enumerated on the same census schedule. Corresponding data have been available since 1957 from marriage registrations and the results obtained since have made possible an examination of the trends in age at marriage over the intervening period, which are summarised in the following table.

TABLE II

**PERCENTAGE DISTRIBUTION OF MARRIAGES ACCORDING TO AGE OF GROOM AND AGE OF BRIDE AND  
AVERAGE AGE AT MARRIAGE IN 1945-1946 AND IN EACH YEAR 1970 TO 1973**

| Age group          | Distribution according to age of groom |              |              |              |              | Distribution according to age of bride |              |              |              |              |

Whereas, in 1945-46, 59.0 per cent of the men who married were aged 30 years and over, the proportion over this age had fallen to 20.9 in 1973, the average age of men at marriage declining from 33.1 years in 1945-46 to 27.2 years in 1973. In 1945-46, 32.9 per cent of women marrying were aged 30 years and over compared with 12.0 per cent in 1973 while the average age at marriage declined from 28.0 years in 1945-46 to 24.8 in 1973. In TABLE 43 the marriages registered in 1973 are shown cross classified by age of groom and age of bride in single years while in TABLE 44 similar particulars are shown for marriages between bachelors and spinsters. From the latter table it may be calculated that the average ages of bachelors and spinsters marrying in 1973 were 26.9 and 24.5 respectively.

A comparison of first marriage rates per 1,000 single population in each age group in Ireland and in England and Wales in 1973 is made in Table III. The figures were obtained by dividing the number of single males marrying in each group by the total number of single males in that age group and similarly for females.

TABLE III

## FIRST MARRIAGE RATES PER 1,000 SINGLE POPULATION IN EACH AGE GROUP IN IRELAND\* AND ENGLAND AND WALES 1973

| Age groups               | Bachelors     |                        | Spinsters     |                        |

\*Exclusive of Northern Ireland.

†16-19 years for England and Wales.

For each sex the marriage rates in Ireland were considerably below those in England and Wales in the younger age groups. In the 15-19 age groups the marriage rate in England and Wales was almost four times that in Ireland in the case of both males and females. In the 20-24 age group the England and Wales rate for males was one and a half times the Irish rate and for females was more than one and a third times the Irish rate. There was very little difference between the rates in the age groups between 30-49 for males and between 25-44 for females. In the age groups above 45 the rate for England and Wales were significantly higher than the Irish rates.

## MODE OF CELEBRATION

The number of marriages celebrated in accordance with the rites and ceremonies of the Catholic Church registered in 1973 amounted to 21,993 (equal to 96 per cent of the total) and other marriages numbered 823, of which 491 were according to the rites and ceremonies of the Church of Ireland, 113 in Presbyterian Churches, 25 in Methodist Churches, 12 according to Jewish Rites, 3 in registered buildings belonging to other religious denominations and 179 by civil contract in Registrar's Office.

The rate for Catholic marriages in 1973 was 7.59 per 1,000 of the Catholic population, an increase of 0.11 on the corresponding rate for 1972. The rate for all other marriages combined was 5.39 per 1,000 of the population other than Catholic, a decrease of 0.51 on the 1972 rate.

TABLE IV

## MARRIAGES REGISTERED IN THE YEARS 1941 TO 1960 AND IN EACH YEAR 1964-1973 ACCORDING TO THE MODE OF CELEBRATION, AND THE RATES PER 1,000 CORRESPONDING POPULATION FOR CATHOLIC AND ALL OTHER MARRIAGES.

†Average annual number of marriages and rates for decennial periods 1941-1960.

Whereas, in 1945-46, 59.0 per cent of the men who married were aged 30 years and over, the proportion over this age had fallen to 20.9 in 1973, the average age of men at marriage declining from 33.1 years in 1945-46 to 27.2 years in 1973. In 1945-46, 32.9 per cent of women marrying were aged 30 years and over compared with 12.0 per cent in 1973 while the average age at marriage declined from 28.0 years in 1945-46 to 24.8 in 1973. In TABLE 43 the marriages registered in 1973 are shown cross classified by age of groom and age of bride in single years while in TABLE 44 similar particulars are shown for marriages between bachelors and spinsters. From the latter table it may be calculated that the average ages of bachelors and spinsters marrying in 1973 were 26.9 and 24.5 respectively.

A comparison of first marriage rates per 1,000 single population in each age group in Ireland and in England and Wales in 1973 is made in Table III. The figures were obtained by dividing the number of single males marrying in each group by the total number of single males in that age group and similarly for females.

TABLE III

## FIRST MARRIAGE RATES PER 1,000 SINGLE POPULATION IN EACH AGE GROUP IN IRELAND\* AND ENGLAND AND WALES 1973

| Age groups               | Bachelors     |                        | Spinsters     |                        |

| 35-39 "                  | 45.0          | 45.7                   | 44.8          | 42.7                   |
| 40-44 "                  | 25.8          | 25.3                   | 19.2          | 23.9                   |
| 45-49 "                  | 11.2          | 16.8                   | 8.5           | 16.1                   |
| 50-54 "                  | 6.3           | 11.5                   | 3.9           | 11.4                   |
| 55 and over              | 1.3           | 4.4                    | 0.3           | 2.4                    |
| Total, 15 years and over | 48.2          | 76.6                   | 59.8          | 91.8                   |

\*Exclusive of Northern Ireland.

†16-19 years for England and Wales.

For each sex the marriage rates in Ireland were considerably below those in England and Wales in the younger age groups. In the 15-19 age groups the marriage rate in England and Wales was almost four times that in Ireland in the case of both males and females. In the 20-24 age group the England and Wales rate for males was one and a half times the Irish rate and for females was more than one and a third times the Irish rate. There was very little difference between the rates in the age groups between 30-49 for males and between 25-44 for females. In the age groups above 45 the rate for England and Wales were significantly higher than the Irish rates.

## MODE OF CELEBRATION

The number of marriages celebrated in accordance with the rites and ceremonies of the Catholic Church registered in 1973 amounted to 21,993 (equal to 96 per cent of the total) and other marriages numbered 823, of which 491 were according to the rites and ceremonies of the Church of Ireland, 113 in Presbyterian Churches, 25 in Methodist Churches, 12 according to Jewish Rites, 3 in registered buildings belonging to other religious denominations and 179 by civil contract in Registrar's Office.

The rate for Catholic marriages in 1973 was 7.59 per 1,000 of the Catholic population, an increase of 0.11 on the corresponding rate for 1972. The rate for all other marriages combined was 5.39 per 1,000 of the population other than Catholic, a decrease of 0.51 on the 1972 rate.

TABLE IV

## MARRIAGES REGISTERED IN THE YEARS 1941 TO 1960 AND IN EACH YEAR 1964-1973 ACCORDING TO THE MODE OF CELEBRATION, AND THE RATES PER 1,000 CORRESPONDING POPULATION FOR CATHOLIC AND ALL OTHER MARRIAGES.

| Year     | Marriages registered other than Catholic |              |           |        |                               |                 |       | Catholic marriages registered | Total marriages registered | Rate per 1,000 corresponding population |                     |                 |

| 1973     | 491                                      | 113          | 25        | 12     | 3                             | 179             | 823   | 21,993                        | 22,816                     | 7.59                                    | 5.39                | 7.48            |

†Average annual number of marriages and rates for decennial periods 1941-1960.

Marriages are classified according to form of ceremony, age of groom and age of bride in TABLES 45 and 46. For Catholic marriages the average age of the groom was 27.1 years compared with 29.6 years for other marriages (including Civil marriages). The average age of bride for Catholic marriages was 24.7 years and for other marriages, 26.3 years.

#### SOCIAL GROUP

A classification which has been widely used in recent years in census of population statistics is that by Social Group. This classification, when applied to a person at work, is determined by his or her occupation although status (i.e. whether the person is an employer, own account worker or employee) is also taken into account. The social group of a person not at work is considered to be that of the gainfully occupied person on whom he or she is dependent. The men and women married in 1973 were classified by social group on the basis of the information as to occupation given in the marriage register, and the results obtained are given in TABLES 47 to 49.

In TABLES 47 and 48 grooms and brides are classified by social group and age at marriage in each group. In the case of grooms and brides the average marriage age in 1973 was higher in the social group "Farmers, relatives assisting and farm managers" than in any other group. The lowest average age was in the "Skilled and other manual workers" for grooms and in the group "Other agricultural occupations and fishermen" for brides.

TABLE 49 shows marriages registered in 1973 cross-classified by the social groups of groom and bride. Of the women marrying men in the "Skilled manual workers" group, in the case of whom occupation was stated, 59 per cent were in the "Intermediate and other non-manual workers" group, 27 per cent were other manual workers and 10 per cent were in the lower professional group, there being smaller percentages in each of the other groups. The distribution by social group of women marrying men in each of the remaining social groups may be considered in the same way. The table may also be examined by considering the social groups of the men marrying the women in each particular social group. Thus it will be seen that only 23 per cent of the women stated to be in the social group "Farmers, relatives assisting and farm managers" married men in social groups other than their own. A substantial number of women in the "Intermediate and other non-manual workers" groups married men in each of the other social groups. In the case of the majority of women in the "manual workers" groups the husbands belonged to the same groups.

#### AREA OF RESIDENCE

Four districts may be considered in relation to each marriage, namely that in which the marriage took place, the areas of residence of the bride and groom prior to marriage, and the intended future residence. In TABLE 42 figures for marriages according to place of occurrence are given for 1973. A comparison between the area of residence of the bride before the ceremony and the area in which the marriage took place is made in TABLE V.

In TABLES 50 and 51 marriages are shown classified by area of residence prior to marriage and age group of groom and bride. Confining attention to the marriages in the case of which the area of residence was within the State, it will be seen that the average age at marriage is lower in predominantly urban than in rural areas. Thus in the four county boroughs the average age of grooms was not over 27 years, whereas in the counties Clare, Mayo and Monaghan the average age was 28.7 years, Roscommon 29.3 years and Leitrim 30.4 years. The average age of brides was not over 25 years in the four county boroughs. The lowest average age in the counties for brides is in Wexford 24.1, and the highest in Mayo 26.1.

In TABLE 52 marriages are cross-classified by area of residence before marriage of groom and bride. As is to be expected, in the great majority of cases the groom and bride were from the same or neighbouring counties. A feature of the table is the large number of cases in which the address of the groom or bride or both groom and bride was outside the State. Thus 835 of the men married in the State in 1973 were returned as residing in England, Wales or Scotland, 380 in the Six Counties and 254 in other countries. The number of brides who were resident before marriage in England, Wales or Scotland was 518, the number from Northern Ireland was 162 and the number from other countries was 89. In 637 cases both the groom and bride were from outside the State. In the past it has been the practice to compute marriage rates for counties and county boroughs by relating the marriages registered in each area to the resident population of that area.

TABLE V  
COMPARISON OF AREA IN WHICH MARRIAGE TOOK PLACE WITH AREA OF RESIDENCE OF BRIDE, 1973

| Area in which registered<br>(1) | Total<br>Marriages<br>(2) | Marriages in the case of which<br>bride was resident in |                     | Col. (3)<br>as percentage<br>of col. (2)<br>(5) |

\*Includes 45 cases in which residence was not stated and 769 cases in which residence was outside the country.

In Table VI the rates calculated are compared with rates obtained by relating marriages classified by area of residence of groom before marriage to total resident population.

TABLE VI

MARRIAGE RATES PER 1,000 POPULATION IN EACH COUNTY AND COUNTY BOROUGH CALCULATED USING  
(a) TOTAL MARRIAGES REGISTERED IN EACH AREA AND (b) MARRIAGES OF MEN FROM THAT AREA, IN 1973

| Area                      | Rate<br>(a) | Rate<br>(b) |
|---------------------------|-------------|-------------|
| Carlow                    | 7.0         | 7.3         |
| Dublin County Borough     | 10.3        | 10.1        |
| Dun Laoghaire Borough     | 7.9         | 7.1         |
| Dublin County (remainder) | 5.1         | 4.4         |
| Kildare                   | 6.7         | 7.3         |
| Kilkenny                  | 8.1         | 6.8         |
| Laois                     | 6.9         | 5.8         |
| Longford                  | 6.5         | 6.1         |
| Louth                     | 7.5         | 7.5         |
| Meath                     | 7.3         | 6.6         |
| Offaly                    | 6.9         | 6.3         |
| Westmeath                 | 7.9         | 7.1         |
| Wexford                   | 7.7         | 7.6         |
| Wicklow                   | 7.7         | 7.0         |
| LEINSTER                  | 8.1         | 7.7         |
| Clare                     | 5.9         | 5.5         |
| Cork County Borough       | 8.0         | 6.8         |
| Cork County               | 6.4         | 6.7         |
| Kerry                     | 6.4         | 5.9         |
| Limerick County Borough   | 11.1        | 7.9         |
| Limerick County           | 6.0         | 7.0         |
| Tipperary, N.R.           | 7.1         | 8.0         |
| Tipperary, S.R.           | 7.4         | 6.6         |
| Waterford County Borough  | 8.2         | 7.4         |
| Waterford County          | 6.8         | 6.4         |
| MUNSTER                   | 7.1         | 6.7         |
| Galway                    | 6.7         | 6.0         |
| Leitrim                   | 6.1         | 5.4         |
| Mayo                      | 5.8         | 4.9         |
| Roscommon                 | 5.0         | 4.7         |
| Sligo                     | 6.4         | 5.2         |
| CONNACHT                  | 6.1         | 5.4         |
| Cavan                     | 6.4         | 5.8         |
| Donegal                   | 8.0         | 5.9         |
| Monaghan                  | 7.4         | 5.9         |
| ULSTER (part of)          | 7.4         | 5.9         |
| TOTAL                     | 7.5         | 7.0         |

It will be observed that rates (a) and (b) differ on account of the fact the marriages of men whose area of residence was outside the country were included in the calculation of rate (a) and excluded from rate (b). The main difference between rate (a) and (b) is in the much lower figures for the county boroughs. In the case of the question on intended future permanent residence the accuracy of many of the entries was not as high as for the other information supplied. There were 747 marriages registered in which no information on future residence was provided. Nevertheless the answers to this question revealed that, in a proportion of cases, i.e. 8.1 per cent, the intended future residence was outside the State.

TABLE VII  
PERCENTAGE OF MARRIAGES WITH FUTURE INTENDED RESIDENCE  
OUTSIDE THE STATE 1964-1973

| Year<br>(1) | Total Marriages<br>(2) | Marriages with intended<br>future residence abroad<br>(3) | Col. (3) as percentage<br>of col. (2)<br>(4) |
|-------------|------------------------|---|--|
| 1964        | 16,128                 | 1,995   | 12.4   |
| 1965        | 16,946                 | 2,004   | 11.8   |
| 1966        | 16,849                 | 2,272   | 13.5   |
| 1967        | 17,788                 | 2,242   | 12.6   |
| 1968        | 18,993                 | 2,293   | 12.1   |
| 1969        | 20,304                 | 2,396   | 11.8   |
| 1970        | 20,778                 | 2,224   | 10.7   |
| 1971        | 22,014                 | 2,090   | 9.5  |
| 1972        | 22,302                 | 1,986   | 8.9  |
| 1973        | 22,816                 | 1,841   | 8.1  |

Since 1962 the proportion of marriages with intended future residence outside the State has shown a decline with the exception of 1966 when there was a big increase. Since 1966, however, there has been a continuous downward trend and as can be seen from Table VII the proportion of these marriages has now dropped more than a third below the 1965 level. In the case of 1,031 marriages the future residence was in England and Wales, 315 in Northern Ireland, 40 in Scotland, 107 in other parts of Europe, 144 in the United States of America, 87 in Canada, 61 in Australia and New Zealand and 29 elsewhere. The age distributions and average ages of the grooms and brides going to the various countries are shown in TABLES 53 and 54 respectively. It will be seen that the average age of the men marrying and then going abroad was the same as that for all marriages in the State while the average age of the women marrying and then going abroad was slightly above the level of that for all marriages. The marriages of persons going abroad are shown classified by social groups of groom and bride in TABLES 55 and 56 respectively. By comparing TABLES 47 and 55 it is possible to examine the proportions of men marrying in each social group who intended to reside outside the country, and it is found that this proportion varied considerably between the different groups. Table VII contains the results obtained.

TABLE VIII

PERCENTAGE OF MEN MARRYING IN EACH SOCIAL GROUP WHOSE INTENDED FUTURE RESIDENCE WAS OUTSIDE THE STATE IN 1972 AND 1973

| Social group of groom                          | Percentage with intended future residence outside the State |          |
|--|---|----------|
|  | 1972  | 1973     |
|  | Per cent  |          |
| Farmers, relatives assisting and farm managers | 2   | 2        |
| Other agricultural occupations and fishermen   | 3   | 2        |
| Higher professionals                           | 18  | 20       |
| Lower professionals                            | 15  | 14       |
| Employers and managers                         | 14  | 11       |
| Salaried employees                             | 12  | 11       |
| Intermediate non-manual workers                | 9   | 7        |
| Other non-manual workers                       | 7   | 6        |
| Skilled manual workers                         | 10  | 10       |
| Other manual workers                           | 6   | 6        |
| <b>TOTAL ALL GROUPS COMBINED</b>               | <b>9</b>  | <b>8</b> |

A classification of marriages of persons going abroad, by form of marriage ceremony, is made in TABLE 57. With the aid of this Table it may be calculated that in 1973 in the case of Catholic marriages the percentage with intended future residence outside the State was 8 per cent maintaining the same level as in 1972. The corresponding figures for all other marriages was 17 per cent in 1973 and 23 per cent in 1972.

Finally, in TABLES 58 and 59 the marriages in the case of which the intended future residence was outside the State are shown classified by area of residence before marriage of groom and bride. The proportions which these marriages represent of the total when classified according to area of residence of groom are shown in Table IX.

TABLE IX

PERCENTAGE OF MARRIAGES IN 1972 AND 1973 IN THE CASE OF WHICH THE INTENDED FUTURE RESIDENCE WAS OUTSIDE THE STATE, ACCORDING TO AREA OF RESIDENCE OF GROOM BEFORE MARRIAGE

| Area of residence of groom before marriage | Percentage with intended future residence outside the State |      |
|--|---|------|
|  | 1972  | 1973 |
|  | Per cent  |      |
| Dublin County Borough and Dun Laoghaire    | 4   | 3    |
| Remainder of Leinster                      | 2   | 2    |
| Munster                                    | 2   | 2    |
| Connacht                                   | 4   | 3    |
| Ulster (part of)                           | 5   | 5    |
| Outside the State                          | 88  | 85   |

## BIRTHS

The number of births occurring during the year 1973 was 68,713, comprised of 35,304 males and 33,409 females. The corresponding figures for 1972 were 68,527, 35,375 and 33,152 respectively. The birth rate in 1973 was 22.5 per 1,000 population, compared with 22.7 in 1972.

TABLE X  
NUMBER OF BIRTHS IN IRELAND\* AND BIRTH RATES PER 1,000 POPULATION IN IRELAND AND NEIGHBOURING COUNTRIES, 1941-1960 AND IN EACH YEAR 1964-1973

| Period     | Numbers of births<br>(in thousands)<br>Ireland* | Birth rate per 1,000 population |                  |                   |          |
|------------|---|---------------------------------|------------------|-------------------|----------|
|            |   | Ireland*                        | Northern Ireland | England and Wales | Scotland |

†Average annual number of births and birth rates for decennial periods from 1941-1960.

## CLASSIFICATION BY AGE AT MATERNITY, PARITY AND DURATION OF MARRIAGE

In TABLE 39 is shown the total number of births registered in 1973 classified by age of mother at maternity and number of previous liveborn children. The number of births in the case of which the mother's age was not stated was 221 or 0.3 per cent of the total. In 1972 the corresponding figure was 309 or 0.5 per cent of the total. The results contained in TABLE 39 are summarised in Table XI.

TABLE XI  
BIRTHS OCCURRING IN 1973 CLASSIFIED BY AGE OF MOTHER AT MATERNITY AND NUMBER OF PREVIOUS CHILDREN.

| Age at maternity  | Number of previous children |               |               |               |              |              |              |            |             |            |

| Not stated        | 221                         | 219           | 2             | -             | -            | -            | -            | -          | -           | -          |
| <b>TOTAL</b>      | <b>68,713</b>               | <b>20,567</b> | <b>16,071</b> | <b>11,531</b> | <b>7,630</b> | <b>4,796</b> | <b>7,290</b> | <b>776</b> | <b>52</b>   | <b>-</b>   |

In preparing this table the procedure in the case of multiple births was to count each child as an individual birth. For instance if a fifth pregnancy produced twins the children would be classified as a fifth and sixth child in parity order.

Continuing the trend observed since 1967 and 1968 there is in 1973 a shift towards the younger age groups in the distribution of births according to the age of mother at maternity. As may be calculated from Table XII, in 1973 mothers aged under 30 years at maternity accounted for 60.6 per cent of the births compared with 59.6 per cent in 1972, corresponding figures for England and Wales and Scotland for 1973 being 79.9 per cent and 79.1 per cent respectively, illustrating the difference between the countries.

\*Exclusive of Northern Ireland.

The difference between this country and England and Wales and Scotland shown in Table XII is due to the facts that (a) women in Ireland marry at a later age and (b) married women in Ireland have on the average more children, as may be seen from Table XV. When attention is confined to legitimate first births, in order to eliminate the effect of factor (b), the difference is still pronounced in the under 20 age group and in the age groups above 30 as may be seen from Table XIII..

\*Exclusive of Northern Ireland.

In each age group the number of legitimate births per 1,000 married women was considerably higher in Ireland than in England and Wales. In the 15-19 year group the Irish rate was 132.6 per cent above that in England and Wales, in the 20-24 year group 133.7 per cent greater, while the excess in the Irish rate rose steadily with increasing age. The number of illegitimate births per 1,000 single, widowed and divorced women was appreciably lower at all ages in Ireland than in England and Wales. On account of the much higher proportion of women married at the younger ages in England and Wales the fertility rates for all women combined were higher in England and Wales than in Ireland in the 15-19 year group, but at the later ages the Irish rate was considerably higher.

The total number of illegitimate births was 2,167 being 162 more than in 1972. This was equivalent to an annual rate of 7.4 per 1,000 unmarried females and was 3.2 per cent of total births. The number of illegitimate births has shown an increase every year since 1959 when the lowest ever number was recorded.

The percentage distribution of births according to the number of previous children in 1973 and 1972 is shown in Table XV and a comparison made with the corresponding distributions in England and Wales in 1972 and Scotland in 1973.

\*Exclusive of Northern Ireland.

The difference between the years 1972 and 1973 in respect of the percentage distribution according to number of previous children was slight. The percentage of women with large families was considerably higher in Ireland than in England and Wales or Scotland. In Ireland in 1973, 11.8 per cent of the mothers had 5 or more previous children, the corresponding percentages being only 1.9 in England and Wales in 1972 and 2.1 in Scotland in 1973.

#### MULTIPLE BIRTHS

The number of maternities in 1973 which resulted in multiple live births was 845 consisting of 838 sets of twins and 7 of triplets. This is equivalent to a "twinning rate" (number of live twins per 1,000 maternities which resulted in live births) of 12.4. Table XVI summarises the number of multiple births and the "twinning rate" for the years 1964-1973.

TABLE XVI

NUMBER OF MULTIPLE BIRTHS AND THE NUMBER OF TWINS PER 1,000 MATERNITIES, 1964-1973.

| Year | Live Births | Maternities which resulted in live issue | Twins | Triplets | Quadruplets | Twinning rate |
|------|-------------|--|-------|----------|-------------|---------------|
| 1964 | 64,072      | 63,177                                   | 873   | 11       | -           | 13.8          |
| 1965 | 63,525      | 62,648                                   | 850   | 12       | 1           | 13.6          |
| 1966 | 62,215      | 61,339                                   | 858   | 9        | -           | 14.0          |
| 1967 | 61,307      | 60,457                                   | 836   | 7        | -           | 13.8          |
| 1968 | 61,004      | 60,165                                   | 821   | 9        | -           | 13.6          |
| 1969 | 62,912      | 62,033                                   | 849   | 15       | -           | 13.7          |
| 1970 | 64,382      | 63,528                                   | 834   | 10       | -           | 13.1          |
| 1971 | 67,551      | 66,688                                   | 839   | 12       | -           | 12.6          |
| 1972 | 68,527      | 67,657                                   | 854   | 8        | -           | 12.6          |
| 1973 | 68,713      | 67,861                                   | 838   | 7        | -           | 12.4          |

## DEATHS

The number of deaths occurring during the year 1973 was 34,192 of which 18,689 were those of males and 15,503 those of females equivalent to a rate of 11.21 deaths per 1,000 total population, compared with 11.41 in the previous year, and 10.71 in 1971.

In Table 9 are shown the average annual death rates, by age group, for decennial periods from 1864 to 1970 and the death rates for each year 1971 to 1973.

While the crude death rate per 1,000 population has shown a gradual downward trend since the beginning of the century, striking falls occurred in the death rates at the younger ages.

Table XVII compares the death rates in the years 1941-1973 with those in Northern Ireland, England and Wales and Scotland. The death rate in this country in 1973 was lower than in Northern Ireland, England and Wales and Scotland. Over the period covered in the table the decrease in this country has been greater than that in any of the other areas.

Attention should be drawn to the fact that these comparisons are based on crude death rates, which are to some extent affected by differences in the age-sex structures of the population in the different countries, while comparisons over a period of years are also affected by changes in the age-sex structures of the populations.

TABLE XVII  
DEATH RATES PER 1,000 POPULATION IN IRELAND\* AND NEIGHBOURING COUNTRIES, 1941-1960  
AND IN EACH YEAR 1964-1973

| Period     | Number of deaths (thousands)<br>Ireland* | Death rate per 1,000 population |                  |                   |          |

†Average annual number of deaths and death rates for decennial periods from 1941-1960.

## COMPARISON BETWEEN COUNTIES

A difficulty arises when comparisons are made between the death rates in different regions of the country, due to the fact that the age distribution of the population varies considerably from one county to another. Thus, if a particular county contains a large proportion of elderly persons the crude death rate per 1,000 population will be relatively high even if the health conditions in that county are better than the general average. To overcome this difficulty standardised rates are prepared. For a particular county this is done by calculating the death rate in each age group of the population in that county and then multiplying the death rate in each age group by the population in the whole country in that age group and summing the resulting products. This sum is then divided by the total population in the country at all ages to decide the standardised rate for the county.

In certain areas the standardised death rates differ appreciably from the crude rates, the extremes being in Dublin County (Remainder) which had a crude death rate of 4.93 and a standardised rate of 9.28, reflecting the very young age structure in Dublin County and in Leitrim where standardisation has the effect of lowering the death rate from 16.58 to 10.89 because of the comparatively old age structure in that county. The standardised rates in 1973 were lowest in Dublin County and Mayo and highest in the County Borough of Limerick.

## CAUSES OF DEATH

The tables in this Report showing causes of death are based on the Eighth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death prepared by the World Health Organisation. The Eighth Revision was used for the first time in classifying deaths by causes in the 1968 Report. The Reports from 1958 to 1967 were based on the Seventh Revision.

TABLE XIX

AVERAGE ANNUAL NUMBER OF DEATHS AND DEATH RATES FROM SOME OF THE PRINCIPAL CAUSES  
IN EACH PERIOD 1955-57, 1960-62, 1965-67, 1970-72 AND 1973

In Table XIX the number of deaths in the various disease groups in the years prior to 1968 have been adjusted to conform to the structure of the groups under the 8th Revision of the International Classification of Diseases.

From Table XIX it can be seen that the major difference between the periods 1955-57 and the year 1973 has been the drop in deaths from tuberculosis. The rate for 1973 was less than one-quarter of the rate in 1955-57. In the case of other infective and parasitic diseases the rate dropped to less than one-half of the 1955-57 rate. There were also significant falls in death rates from influenza and senility; in the case of senility the drop can be attributed to a decrease in the number of uncertified deaths and better certification of cause of death. Heart diseases remained the single biggest cause of death, almost twice as many people dying from heart disease as from the next biggest cause of death, i.e. cancer, the rate for which showed an increase of 17 per cent.

TABLE  
AGE-SEX SPECIFIC DEATH RATES FOR THE

| I.D.L. Nos.    | Cause of Death  | Death rates per 100,000 corresponding population |         |       |       |      |      |       |      |       |      |

## **PRINCIPAL CAUSES OF DEATH IN 1973**

Of the deaths occurring in 1973, 75 per cent were due to four main causes, i.e. ischaemic and other forms of heart disease, malignant neoplasms, cerebrovascular disease and respiratory diseases. Diseases of the heart were responsible for the highest rates, 403.1 per 100,000 population for males and 283.9 per 100,000 females. Most of these deaths occurred at ages over 55. Malignant neoplasms were the next major cause, the rates for which were 205.5 and 174.6 for males and females respectively per 100,000 population. The rates for cerebrovascular disease were 141.7 and 170.1 respectively for males and females per 100,000 population; as in the case of heart diseases the greater number of these deaths occurred at ages over 55. The deaths from respiratory diseases were due mainly to pneumonia and bronchitis. Between the ages 5 to 34 years accidents were the greatest single cause.

Some of the principal causes of deaths are considered in greater detail in the following sections.

## TUBERCULOSIS

In 1973 there were 173 deaths from tuberculosis, of which 140 were caused by the respiratory form and 33 by other forms of the disease. Between the period 1941-1950 and the year 1973 death rates from tuberculosis, particularly in the younger age groups, fell to a fraction of their former level. Of the 173 deaths in 1973 91 per cent were in the age groups 45 and over.

The mortality from tuberculosis in the counties and county boroughs in 1973 is compared in Table 12 of this Report. The highest death rates from all forms per 1,000 population were in Leitrim (0.18), and Kilkenny (0.13), while the lowest rates were in Counties Wexford and Limerick (0.01).

TABLE XXI

NUMBER OF DEATHS AND DEATH RATES PER 1,000 POPULATION FROM TUBERCULOSIS OF THE RESPIRATORY SYSTEM AND FROM ALL OTHER FORMS OF TUBERCULOSIS, 1941-1960 AND IN EACH YEAR 1964-1973.

| Period     | Tuberculosis of the respiratory system |                           | Other forms of tuberculosis |                           | Ratio of male to female mortality  |                             |

## CANCER

Prior to 1950 under the Fifth Revision of the International List of causes of death, cancer deaths were those classified under 045-055. With the introduction of the Sixth Revision in 1950 the World Health Organisation recommended that total cancer deaths should be based upon Nos. 140-205 (Nos. 140-209 in Eight Revision) of the International Statistical classification which now included Hodgkins disease and leukaemia, but for comparability with the years prior to 1950 the total cancer figures less Hodgkins disease and leukaemia should also be shown.

In 1973 there were 5,803 deaths from cancer (Nos. 140 to 209). Of this number, 52 deaths were caused by Hodgkins disease and 168 by leukaemia and aleukaemia.

Table XXII shows the death rate from cancer in certain age groups in the years 1964 to 1973.

TABLE XXII

DEATHS FROM CANCER (Nos. 140-209) CLASSIFIED BY SEX AND AGE PER 100,000 POPULATION AT THE SAME AGES, 1964 TO 1973.

| Year    | Age group (years) |       |       |       |       |       |             |       |
|---------|-------------------|-------|-------|-------|-------|-------|-------------|-------|
|         | Under 25          | 25-34 | 35-44 | 45-54 | 55-64 | 65-74 | 75 and over | Total |
| Males   |                   |       |       |       |       |       |             |       |
| 1964    | 10                | 20    | 59    | 158   | 451   | 901   | 1,404       | 187   |

|                                  | TOTAL                                    | 9.0  | 20.3  | 58.5  | 173.0 | 471.8 | 1,022.7 | 1,798.3     | 205.5    | 5.6     | 17.4  | 72.2  | 238.5 | 402.1 | 642.2 | 1,112.9     | 174.6    |

The crude death rate from cancer in 1973 varied from 3.03 per 1,000 population in Leitrim to 0.89 in Dublin County (remainder). In certain areas, however, the standardised rates were considerably different from the crude rates and when comparing the relative seriousness of mortality in different counties it is, of course, the standardised rates which should be used. In the counties of the west and north-west standardisation had the effect of lowering the death rates considerably. The standardised rates varied from 2.62 per 1,000 population in Cork County Borough to 1.20 in Monaghan. The proportion of deaths not medically certified varies widely between the different areas (see Table 23), thus, the possibility that some cancer deaths in the areas with low medical certification may escape detection should be borne in mind in comparing the death rates between counties.

Full details of deaths due to cancer occurring in 1973, classified by site of the disease and age group are contained in TABLE 19. The number of deaths and death rates from cancer per 100,000 in each age group for the main groups of sites are shown in Table XXV and it will be observed that there is in general a rapid rise in the death rate with increasing age. Deaths due to malignant neoplasms of the digestive system represented nearly half the total cancer deaths for each sex, the death rate for males being 13 per cent higher than that for females. The death rate from malignant neoplasms of the respiratory system was nearly three times greater for males than for females.

#### CANCER OF THE BRONCHUS, TRACHEA AND LUNG

The number of deaths and death rates from cancer of the bronchus, trachea and lung in each year 1964 to 1973, classified by sex and age group, are shown in Table XXVI.

TABLE XXVI

DEATHS AND DEATH RATES PER 100,000 CORRESPONDING POPULATION IN EACH YEAR 1964 TO 1973 FROM CANCER OF THE BRONCHUS, TRACHEA AND LUNG, CLASSIFIED BY SEX AND AGE GROUP.

| Year   | Males          |             |             |             |                   |       | Females        |             |             |             |                   |       |
|--|----------------|-------------|-------------|-------------|-------------------|-------|----------------|-------------|-------------|-------------|-------------------|-------|
|  | Under 35 years | 35-44 years | 45-54 years | 55-64 years | 65 years and over | Total | Under 35 years | 35-44 years | 45-54 years | 55-64 years | 65 years and over | Total |
| Number of deaths                                 |                |             |             |             |                   |       |                |             |             |             |                   |       |

| 1971   | 0.3            | 10.5        | 60.2        | 167.9       | 269.5             | 51.3  | -              | 2.7         | 19.4        | 47.1        | 75.3              | 16.0  |
| 1972   | 0.3            | 9.9         | 50.0        | 167.8       | 279.1             | 50.8  | 0.1            | 3.3         | 19.5        | 53.0        | 77.1              | 16.9  |
| 1973   | 0.5            | 12.5        | 51.7        | 180.0       | 303.0             | 54.7  | 0.3            | 3.3         | 23.5        | 47.0        | 59.7              | 14.7  |

The main point that emerges from this table is that deaths from cancer of the bronchus, trachea and lung are much more common among males than among females. In 1964 the death rate in the case of males was 36.4 compared with 8.6 in the case of females. In 1973 the corresponding rates were 54.7 and 14.7 respectively. However, it should be noted that in the period under review deaths of women from cancer of the bronchus, trachea and lung have shown a remarkable increase. In the years 1971, 1972 and 1973 the death rate has been almost double that in 1964.

The following table shows deaths and death rates from cancer of the bronchus, trachea and lung in Ireland and neighbouring countries during the years 1968 to 1973.

TABLE XXVII  
DEATHS AND DEATH RATES IN IRELAND\* AND NEIGHBOURING COUNTRIES FROM CANCER OF THE BRONCHUS, TRACHEA AND LUNG IN EACH YEAR 1968 TO 1973

| Area              | 1968                         | 1969   | 1970   | 1971   | 1972   | 1973   |
|-------------------|------------------------------|--------|--------|--------|--------|--------|
|                   | Number of deaths             |        |        |        |        |        |
| Ireland*          | 908                          | 852    | 957    | 1,004  | 1,022  | 1,061  |
| Northern Ireland  | 525                          | 544    | 524    | 582    | 542    | 611    |

| England and Wales | 28,836                       | 29,763 | 30,284 | 30,754 | 31,659 | 32,176 |
|                   | Rates per 100,000 population |        |        |        |        |        |
| Ireland*          | 31                           | 29     | 33     | 34     | 34     | 35     |
| Northern Ireland  | 35                           | 36     | 34     | 38     | 35     | 39     |
| Scotland          | 62                           | 63     | 66     | 65     | 69     | 70     |
| England and Wales | 59                           | 61     | 62     | 63     | 65     | 65     |

\*Exclusive of Northern Ireland.

The most significant feature of this table is the low rate in Ireland in each year compared with those in the other areas. Throughout the period under review the yearly rates for England and Wales were, in some years, more than double the Irish rates.

#### DISEASES OF THE CIRCULATORY SYSTEM

There were 17,452 deaths ascribed to diseases of the circulatory system (Nos. 390-458) in 1973 of which 9,401 were deaths of males and 8,051 of females. Details of these deaths, classified by cause and age may be obtained from TABLE 19 of this Report while the numbers assigned to each county and county borough are shown in TABLE 20. Deaths and death rates from certain groups of causes are given in Table XXIX.

The excess of male over female deaths in the case of diseases of the circulatory system is largely accounted for by the greater number of deaths of males from ischaemic heart disease (5,263 males compared with 3,313 females); in respect of the remaining groups of causes the difference between the male and female death rates is not nearly so pronounced.

TABLE XXVIII  
DEATHS FROM DISEASES OF THE CIRCULATORY SYSTEM IN 1973 SHOWING THE NUMBERS AND PERCENTAGES NOT MEDICALLY CERTIFIED

| Cause of death   | Males        |             |            | Females      |             |            |
|--|--------------|-------------|------------|--------------|-------------|------------|
|  | Total        | Uncertified | Per cent   | Total        | Uncertified | Per cent   |
| Active rheumatic fever   | -            | -           | -          | 1            | -           | -          |

**RESPIRATORY DISEASES**

Deaths from respiratory diseases (Nos. 460-519) in the International List) in 1973 numbered 4,757. These included 262 deaths caused by influenza, 2,219 by pneumonia, 1,438 by bronchitis and 838 due to other respiratory diseases.

**PREGNANCY, CHILDBIRTH AND PUERPERIUM**

The number of maternal deaths in 1973 was 8 compared with 28 in 1972. The death rate was 0.12 per thousand maternities. TABLE XXX shows the maternal deaths in 1973 classified by age of mother and cause and also deaths associated with pregnancy, childbirth and puerperium, but not classified as maternal, for the same year.

**TABLE XXX**

### INFANT AND LATE FOETAL MORTALITY

The terms used in relation to infant and late foetal mortality are defined as follows:—

*Infant death:* Death at ages under 1 year of live born infant.

*Early neo-natal death:* Death at ages under 1 week of live born infant.

*Neo-natal death:* Death at ages under 4 weeks of live born infant.

*Post-neo-natal death:* Death between the ages of 4 weeks and 1 year of live born infant.

*Late foetal death (stillbirth):* Foetal death at or over 28 weeks gestation.

*Perinatal deaths:* Late foetal plus early neo-natal deaths.

*Infant mortality rate:* Infant deaths divided by total live births, multiplied by 1,000.

*Neo-natal mortality rate:* Neo-natal deaths divided by total live births, multiplied by 1,000.

*Early neo-natal mortality rate:* Early neo-natal deaths divided by total live births, multiplied by 1,000.

*Late foetal mortality rate:* Late foetal deaths divided by total live births plus late foetal deaths, multiplied by 1,000.

*Perinatal mortality rate:* Perinatal deaths divided by total live births plus late foetal deaths, multiplied by 1,000.

While statistics of infant mortality are obtained in the course of the usual procedure for registration of deaths, which has been in operation since the year 1863, particulars of late foetal mortality are obtained through a scheme of notification to the County Medical Officer of Health. The scheme of notifying late foetal deaths was introduced in 1957, but comparisons between different areas of the country showed marked differences in the coverage of the scheme in the early years. Consequently the number of late foetal deaths in the early years of the scheme is believed to be understated.

It will be seen from Table XXXII that the highest individual rate for infant mortality was in Cavan and the lowest in Leitrim. The rate for perinatal mortality was highest in Longford and lowest in Wexford while for late foetal mortality the highest rate was in Leitrim and the lowest in Wexford.

TABLE XXXII  
INFANT AND LATE FOETAL MORTALITY\*, 1973

| Area                             | Infant mortality |      | Neo-natal mortality |      | Late foetal mortality |      | Perinatal mortality |      |
|----------------------------------|------------------|------|---------------------|------|-----------------------|------|---------------------|------|
|                                  | Number           | Rate | Number              | Rate | Number                | Rate | Number              | Rate |
| TOTAL                            | 1,234            | 18.0 | 873                 | 12.7 | 829                   | 11.9 | 1,590               | 22.9 |

## INFANT MORTALITY

During the year 1973 there were 1,234 deaths of infants under one year, a decrease of 2 on 1972. The rate of 18.0 per 1,000 live births in 1973 has remained at the same level since 1971 which was the lowest rate ever recorded.<sup>1</sup>

TABLE XXXIII  
INFANT MORTALITY BY AGE, 1941-1960 AND 1964-1973.

| Period  | Deaths per 1,000 births at ages |          |           |            |                           |                     |                            |                             |                             |                              |                         |                    |
|---------|---------------------------------|----------|-----------|------------|---------------------------|---------------------|----------------------------|-----------------------------|-----------------------------|------------------------------|-------------------------|--------------------|
|         | Under 24 hours                  | 1-6 days | 7-13 days | 14-20 days | 21 days and under 4 weeks | Total under 4 weeks | 4 weeks and under 2 months | 2 months and under 3 months | 3 months and under 6 months | 6 months and under 12 months | Total 4 weeks to 1 year | Total under 1 year |
| 1941-50 | 7.0                             | 8.7      | 4.3       | 4.2        | 4.3                       | 28.5                | 8.7                        | 6.9                         | 12.3                        | 9.4                          | 37.3                    | 65.8               |

| 1971    | 5.8                             | 4.2      | 1.1       | 0.7        | 0.4                       | 12.2                | 1.4                        | 1.0                         | 1.8                         | 1.6                          | 5.8                     | 18.0               |
| 1972    | 5.7                             | 4.6      | 1.0       | 0.4        | 0.4                       | 12.1                | 1.4                        | 1.2                         | 1.7                         | 1.6                          | 6.0                     | 18.0               |
| 1973    | 6.2                             | 4.9      | 0.9       | 0.3        | 0.5                       | 12.7                | 1.3                        | 0.8                         | 1.7                         | 1.4                          | 5.3                     | 18.0               |

Infant mortality has shown a considerable decrease in the period covered by the Table, the greatest reductions being in ages between 14 days and under 4 weeks, where the 1968 rates were about one-seventh of those at the start of the period, and in ages over 4 weeks, where the 1968 rate was less than one-fifth of that in the period 1941-50. No significant changes were shown at ages 1-6 days until 1963, since then, apart from an increase in 1964 and again in 1969 and 1973 there has been a downward trend. No significant changes were shown at ages under 24 hours until 1968 when there was a drop of about 10 per cent in the rate with a further drop of 11 per cent in 1969, the rate rising again in 1970 by 3 per cent. In 1971 and 1972 there was a further decline, the rate then rising once again in 1973 by 9 per cent.

INFANT AND NEO-NATAL MORTALITY (PER 1,000 LIVE BIRTHS) 1943—1973

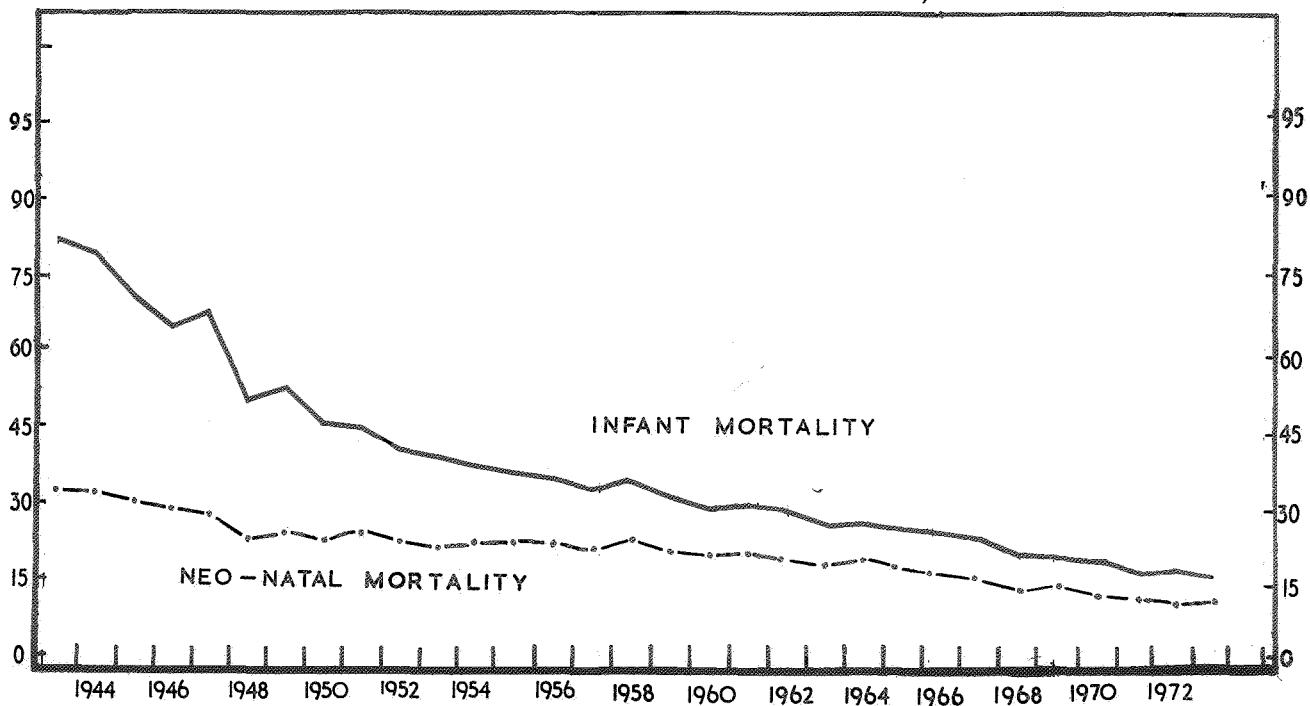

TABLE XXXIV  
INFANT MORTALITY RATES IN IRELAND\* AND NEIGHBOURING COUNTRIES, 1941-1960 AND 1964-1973

| Period  | Deaths of infants under 1 year per 1,000 live births |                  |                   |          |
|---------|--|------------------|-------------------|----------|
|         | Ireland*   | Northern Ireland | England and Wales | Scotland |
| 1941-50 | 66   | 60               | 43                | 57       |
| 1951-60 | 37   | 32               | 25                | 30       |
| 1964    | 27   | 26               | 20                | 24       |
| 1965    | 25   | 25               | 19                | 25       |
| 1966    | 25   | 26               | 19                | 23       |
| 1967    | 24   | 23               | 18                | 21       |
| 1968    | 21   | 24               | 18                | 21       |
| 1969    | 21   | 24               | 18                | 21       |
| 1970    | 19   | 23               | 18                | 20       |
| 1971    | 18   | 23               | 18                | 20       |
| 1972    | 18   | 21               | 18                | 19       |
| 1973    | 18   | 21               | 18                | 19       |

\*Exclusive of Northern Ireland.

As can be seen from Table XXXIV the decline in infant mortality has been greater in Ireland than in any of the other areas.

The causes of deaths of infants under one year, classified according to the Detailed International List, are shown in TABLE 19. In TABLE 26 infant deaths are again classified by cause and a more detailed age classification shown. These results are summarised in Table XXXV.

TABLE XXXV  
LATE FOETAL DEATHS AND DEATHS OF INFANTS UNDER 1 YEAR REGISTERED IN 1973 CLASSIFIED BY CAUSE AND AGE.

| International List Numbers | Cause   | Late foetal deaths | Deaths of infants under 1 year |                 |                   |                   |                    |
|----------------------------|---|--------------------|--------------------------------|-----------------|-------------------|-------------------|--------------------|
|                            |   |                    | Under 1 day                    | 1 day to 1 week | 1 week to 4 weeks | 4 weeks to 1 year | Total under 1 year |
| 008, 009                   | Enteritis and other diarrhoeal diseases   | -                  | -                              | 5               | 5                 | 23                | 33                 |
| Rem. 000-136               | Other infective and parasitic diseases  | -                  | 1                              | 1               | 3                 | 13                | 18                 |
| 320                        | Meningitis  | -                  | 1                              | 1               | 7                 | 10                | 19                 |
| 460-519                    | Influenza, pneumonia, bronchitis, emphysema, asthma and other respiratory diseases          | -                  | 2                              | 3               | 6                 | 61                | 72                 |
| 520-577                    | Diseases of the digestive system  | -                  | -                              | -               | -                 | 3                 | 3                  |
| 740-759                    | Congenital anomalies  | 197                | 108                            | 96              | 57                | 109               | 370                |
| 764-768, 772               | Birth injuries  | 19                 | 26                             | 35              | 2                 | 3                 | 66                 |
| 774, 775                   | Haemolytic disease of newborn   | 45                 | 15                             | 5               | -                 | -                 | 20                 |
| 776                        | Anoxic and hypoxic conditions not elsewhere classified (including asphyxia and atelectasis) | 110                | 131                            | 112             | 6                 | 2                 | 251                |
| 777                        | Immaturity, unqualified   | 14                 | 108                            | 44              | 4                 | -                 | 156                |
| 778                        | Other conditions of foetus or newborn (including haemorrhagic disease)                      | 6                  | 6                              | 11              | 2                 | 2                 | 21                 |
|                            | Other causes  | 438                | 28                             | 22              | 20                | 135               | 205                |
|                            | TOTAL   | 829                | 426                            | 335             | 112               | 361               | 1,234              |

It will be seen that the relative importance of the various groups of causes differ appreciably between deaths at ages under one week and deaths at ages 4 weeks to one year. Of all deaths at ages under one week, 13 per cent were ascribed to immaturity, congenital anomalies accounted for 29 per cent, anoxic, and hypoxic conditions not elsewhere specified (including asphyxia and atelectasis) 33 per cent and birth injuries 10 per cent.

At ages over 4 weeks congenital anomalies, respiratory diseases, and enteritis and other diarrhoeal diseases were the main causes of death. Details of the 205 deaths included as other causes will be found in Table 19 where it will be noted that 33 of these were due to accidents.

#### LATE FOETAL DEATHS

The number of late foetal deaths notified in each year since the scheme was introduced is as follows:—

| Year              | Late Foetal Deaths |
|-------------------|--------------------|
| Average 1957-1966 | 1,215              |
| 1967              | 1,000              |
| 1968              | 934                |
| 1969              | 893                |
| 1970              | 904                |
| 1971              | 881                |
| 1972              | 901                |
| 1973              | 829                |

The causes of late foetal deaths notified in 1973 classified according to the Detailed International List are given in Table 29. The results are summarised in Table XXXVI.

TABLE XXXVI  
LATE FOETAL DEATHS AND RATES\* PER 1,000 TOTAL BIRTHS BY CAUSE, 1973.

| International List Numbers | Cause   | Number of Late foetal Deaths | Rate per 1,000 total Births |
|----------------------------|---|------------------------------|-----------------------------|
| 740                        | Anencephalus  | 120                          | 1.73                        |
| 741                        | Spina bifida  | 18                           | 0.26                        |
| 742                        | Congenital hydrocephalus  | 35                           | 0.50                        |
| 743                        | Other congenital anomalies of nervous system                            | 4                            | 0.06                        |
| 746                        | Congenital anomalies of heart   | 3                            | 0.04                        |
| 747                        | Other congenital anomalies of circulatory system                        | 1                            | 0.01                        |
| 750                        | Other congenital anomalies of upper alimentary tract                    | 1                            | 0.01                        |
| 758                        | Other and unspecified congenital anomalies                              | 4                            | 0.06                        |
| 759                        | Congenital syndromes affecting multiple systems                         | 11                           | 0.16                        |
| 761                        | Other maternal conditions unrelated to pregnancy                        | 9                            | 0.13                        |
| 762                        | Toxaemia of pregnancy   | 43                           | 0.62                        |
| 763                        | Maternal ante- and intrapartum infection                                | 2                            | 0.03                        |
| 764                        | Difficult labour with abnormality of bones, organs or tissues of pelvis | 1                            | 0.01                        |
| 766                        | Difficult labour with malposition of foetus                             | 7                            | 0.10                        |

\*For definition—see page xxxv.

More late foetal deaths resulted from placental and cord injuries than from any other group, being 27 per cent of the total deaths. Congenital anomalies of foetus was next at 22 per cent and haemolytic disease of the newborn at 5 per cent. Of the total deaths 18 per cent were classified as being due to ill-defined or unknown causes.

As can be seen from Table XXXVII 795 late foetal deaths in 1973 occurred in hospitals; this is equivalent to 96 per cent of the total number of late foetal deaths. From the same table it may be observed that over half of all late foetal deaths were of period of gestation 37 weeks and over.

TABLE XXXVII  
LATE FOETAL DEATHS NOTIFIED IN THE YEAR 1973 CLASSIFIED BY PERIOD OF GESTATION AND PLACE IN WHICH CONFINEMENT OCCURRED.

| Period of gestation | Place of confinement |                |             |       |
|---------------------|----------------------|----------------|-------------|-------|
|                     | Hospital             | Maternity Home | Domiciliary | Total |
| 28-36 weeks         | 376                  | 6              | 10          | 392   |
| 37 weeks and over   | 419                  | 14             | 4           | 437   |
| TOTAL               | 795                  | 20             | 14          | 829   |

The perinatal and late foetal mortality rates in Ireland and neighbouring countries from 1965 to 1973 compare as follows:—

TABLE XXXVIII  
PERINATAL AND LATE FOETAL MORTALITY RATES\* IN IRELAND† AND NEIGHBOURING COUNTRIES,  
1965-1973.

| Year | Late foetal mortality rate |                     |                         |          | Perinatal mortality rate |                     |                         |          |

## ACCIDENTS, POISONING AND VIOLENCE

The number of deaths from external causes (Numbers E800-E999) occurring in 1973 was 1,583 of which 1,044 were males and 539 females. The corresponding figures for 1972 were 1,680, 1,077 and 603 respectively. In the Eighth Revision there is also a classification for deaths from external causes which are not specified as accidental or suicidal and which accounted for 79 deaths in 1973 (Table XL). In the Seventh Revision, 49 of these deaths would have been in the category Accidental drowning and 25 in the category Accidental poisoning, so for comparison with former years, they have been grouped with these categories in Table XXXIX.

TABLE XXXIX  
DEATHS FROM ACCIDENTS, POISONING AND VIOLENCE, 1964 TO 1973

| International List Numbers 8th Revision | Cause of death   | 1964  | 1965  | 1966  | 1967  | 1968  | 1969  | 1970  | 1971  | 1972  | 1973  |

| E880-E887                               | Accidental falls   | 309   | 329   | 336   | 304   | 352   | 394   | 376   | 358   | 465   | 400   |
| Rem. E800-E999                          | Other accidents and external causes                                | 161   | 156   | 151   | 168   | 235   | 206   | 208   | 196   | 211   | 195   |
| E950-E959                               | Suicide and self-inflicted injury                                  | 58    | 51    | 69    | 72    | 71    | 52    | 52    | 81    | 90    | 105   |
|   | TOTAL  | 1,072 | 1,088 | 1,169 | 1,197 | 1,338 | 1,360 | 1,414 | 1,481 | 1,680 | 1,583 |

As can be seen from Table XL there is an excess of male mortality from accidents at all ages between 1 and 75 years. In these age groups the excess of male deaths may be largely attributed to the category Road Vehicle Accidents. At ages over 75 years, the excess of female deaths may be attributed to accidental falls, as can be seen from Table XLI. The vast majority of these falls occurred in the home (Table XLI).

There were 490 deaths resulting from accidents in the home recorded in 1973, compared with 580 in 1972. As will be seen from Table XLI 349 deaths in 1973 were attributed to accidental falls in the home and these were mostly of elderly persons. Accidents caused by fire, hot liquids, etc., accounted for 50 deaths, of which 8 were of children under 5 years of age and 33 of persons aged 45 years and over. Fourteen deaths of children under one year old were due to obstruction and suffocation by food and 6 to accidental mechanical suffocation. There were 27 deaths from accidental poisoning, 19 of which were of persons aged 25 years and over.

## UNCERTIFIED DEATHS

The number of cases in 1973 in which the cause of death was not certified by a medical practitioner was 301 which represents 0.9 per cent of the total deaths. In TABLE 23 uncertified deaths in 1973 are shown classified by county and age group, while the percentage of deaths uncertified in each county is also shown. The proportion of deaths uncertified is very high in the west, being highest in the year 1973 in the counties Mayo (5.4 per cent) and Leitrim (2.8 per cent).

Table XLII compares the percentages of deaths uncertified in each province for a number of years, and it will be observed that a steady improvement in the position is taking place.

TABLE XLII

UNCERTIFIED DEATHS AS A PERCENTAGE OF THE TOTAL IN EACH PROVINCE IN THE YEARS 1941 TO 1960 AND 1964 TO 1973

| Province         | 1941-50     | 1951-60    | 1964       | 1965       | 1966       | 1967       | 1968       | 1969       | 1970       | 1971       | 1972       | 1973       |
|------------------|-------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|------------|

TABLE XLIII

PERCENTAGE OF DEATHS UNCERTIFIED BY AGE GROUPS, IN EACH PROVINCE IN 1973

| Province                            | All ages   | Under 1 year | 1-14 | 15-24 | 25-34 | 35-44      | 45-54      | 55-64      | 65-74      | 75 and over |
|-------------------------------------|------------|--------------|------|-------|-------|------------|------------|------------|------------|-------------|
| Leinster                            | 0.4        | -            | -    | -     | -     | 0.3        | 0.7        | 0.2        | 0.3        | 0.5         |
| Munster                             | 0.6        | -            | -    | -     | -     | -          | 0.2        | 0.1        | 0.3        | 1.1         |
| Connacht                            | 2.8        | -            | -    | -     | -     | -          | 0.4        | 0.6        | 1.0        | 4.5         |
| Ulster (part of)                    | 1.2        | -            | -    | -     | -     | -          | -          | 0.8        | 0.4        | 2.0         |
| <b>TOTAL</b>                        | <b>0.9</b> | -            | -    | -     | -     | <b>0.1</b> | <b>0.4</b> | <b>0.3</b> | <b>0.4</b> | <b>1.5</b>  |
| Actual number of deaths uncertified | 301        | -            | -    | -     | -     | 1          | 9          | 13         | 36         | 242         |

The proportion of deaths uncertified was highest in the age group 75 years and over; this age group accounted for more than four-fifths of the uncertified deaths. In most age groups the provinces of Connacht and Ulster (part of) compare unfavourably with Leinster and Munster in respect of the percentage of deaths uncertified.

## INQUEST AND POST-MORTEMS

The number of deaths registered on certificates issued by coroners as the result of inquest and post-mortem examinations during 1973 was 2,954 compared with 2,967 in 1972.

# **TABLES**

TABLE 1—ESTIMATED POPULATION IN THOUSANDS IN EACH YEAR 1851 TO 1973

| Year | Persons | Males | Females | Year | Persons | Males | Females | Year | Persons | Males | Females |
|------|---------|-------|---------|------|---------|-------|---------|------|---------|-------|---------|
| 1851 | 5,079   | 2,486 | 2,593   | 1892 | 3,408   | 1,697 | 1,711   | 1933 | 2,962   | 1,512 | 1,450   |

TABLE 19 (contd.)—DEATHS IN 1973, CLASSIFIED BY CAUSE (INTERNATIONAL)

| Detailed International List Number | Cause of death   | M<br>F | Age at    |              |        |        |        |        |               |        |        |
|------------------------------------|--|--------|-----------|--------------|--------|--------|--------|--------|---------------|--------|--------|
|                                    |  |        | All ages  | Under 1 year | 1      | 2      | 3      | 4      | Total under 5 | 5-9    | 10-14  |
| E851                               | Accidental poisoning by hormones and synthetic substitutes                           | M<br>F | -<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E852                               | Accidental poisoning by systemic and haematologic agents                             | M<br>F | 1<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E853                               | Accidental poisoning by analgesics and antipyretics                                  | M<br>F | 3<br>3    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E854                               | Accidental poisoning by other sedatives and hypnotics                                | M<br>F | 3<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E855                               | Accidental poisoning by autonomic nervous system and psychotherapeutic drugs         | M<br>F | 2<br>3    | -<br>-       | 1<br>- | -<br>- | -<br>- | -<br>- | 1<br>-        | -<br>- | -<br>- |
| E856                               | Accidental poisoning by other central nervous system depressants and stimulants      | M<br>F | -<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E859                               | Accidental poisoning by other and unspecified drugs and medicaments                  | M<br>F | 1<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E860                               | Accidental poisoning by alcohol  | M<br>F | 5<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E861                               | Accidental poisoning by cleansing and polishing agents                               | M<br>F | 1<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E865                               | Accidental poisoning by pesticides, fertilizers or plant foods                       | M<br>F | 3<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E866                               | Accidental poisoning by heavy metals and their fumes                                 | M<br>F | 2<br>-    | -<br>-       | -<br>- | -<br>- | 2<br>- | -<br>- | 2<br>-        | -<br>- | -<br>- |
| E867                               | Accidental poisoning by corrosives and caustics, not elsewhere classified            | M<br>F | 1<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E870                               | Accidental poisoning by gas distributed by pipe-line                                 | M<br>F | 1<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E871                               | Accidental poisoning by liquefied petroleum gas distributed in mobile containers     | M<br>F | 3<br>1    | 1<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | 1<br>-        | -<br>- | -<br>- |
| E874                               | Accidental poisoning by carbon monoxide from incomplete combustion of domestic fuels | M<br>F | 1<br>3    | -<br>-       | 1<br>- | -<br>- | 1<br>- | -<br>- | 1<br>1        | -<br>- | -<br>- |
| E875                               | Accidental poisoning by other carbon monoxide  | M<br>F | -<br>1    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E880                               | Fall on or from stairs or steps  | M<br>F | 7<br>13   | 1<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | 1<br>- | -<br>- |
| E881                               | Fall on or from ladders or scaffolding   | M<br>F | 10<br>-   | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E882                               | Fall from or out of building or other structure                                      | M<br>F | 6<br>2    | -<br>-       | 1<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | 1<br>- | -<br>- |
| E883                               | Fall into or other opening in surface  | M<br>F | 6<br>-    | -<br>-       | 1<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | 1<br>- | -<br>- |
| E884                               | Other fall from one level to another   | M<br>F | 18<br>4   | 1<br>-       | -<br>- | 1<br>- | -<br>- | -<br>- | 2<br>-        | 1<br>1 | -<br>- |
| E885                               | Fall on same level from slipping, tripping or stumbling                              | M<br>F | 6<br>4    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | 1<br>- |
| E887                               | Other and unspecified fall   | M<br>F | 97<br>227 | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E890                               | Accident caused by conflagration in private dwelling                                 | M<br>F | 6<br>8    | -<br>1       | 1<br>- | -<br>1 | -<br>- | -<br>1 | 1<br>3        | 1<br>1 | -<br>- |
| E891                               | Accident caused by conflagration in other building or structure                      | M<br>F | 1<br>-    | -<br>-       | -<br>- | -<br>- | -<br>- | -<br>- | -<br>-        | -<br>- | -<br>- |
| E893                               | Accident caused by ignition of clothing  | M<br>F | 2<br>8    | -<br>-       | -<br>1 | -<br>- | -<br>- | -<br>- | 1<br>1        | 1<br>1 | -<br>- |

## DETAILED LIST, 8th REVISION, 1965) AND BY SEX AND AGE.
