

Index values of Disposable Income
per person, 1998 - 1999

County Incomes and Regional GDP 1999

Household Income

Indices of Disposable Income per person
(Base: State=100)

Region	1998	1999
Border, Midland and Western	89.9	88.5
Border	89.6	89.0
Midland	86.4	83.1
West	92.3	91.1
Southern and Eastern	103.6	104.1
Dublin	116.0	118.1
Mid East	97.6	100.1
Mid West	99.8	98.7
South East	89.5	87.9
South West	95.6	94.2
State	100.0	100.0

Average Income highest in Dublin Region

In 1999 the disposable income per person in the *Southern and Eastern* region was 4.1% above the State average while the corresponding figure in the *Border Midland and Western* NUTS 2 region was 11.5% below the State average.

The Dublin region had the highest disposable income per person of the eight regional authority areas, being 18% above the State average in 1999. This was higher than in previous years; between 1995 and 1998, it was some 15% to 16% above the average.

The disposable income per person of the Midland region was 17% below the State average in 1999 and was the lowest of the eight Regional Authority Areas. In 1995, the average for this region was 11% below the level for the State and had fallen to 14% below in 1998.

At county level, counties other than Dublin with high levels of disposable income per person were Kildare (108.6% of the State average), Limerick (103.8%), Galway and Cork (both at 97.5%). At the lower end of the scale there were nine counties with disposable incomes per person at or below 85% of the State average.

This statistical release provides results for Household Incomes and Regional GDP simultaneously. In previous years these topics were the subject of two separate publications and issued some months apart.

Differences from cash income

These estimates allocate to regions and counties the various components of income for the household sector as compiled in the National Accounts.

Household Income includes

- Wages and salaries
- Income from self employment
- Transfer payments from the State; these include the imputed value of some non-cash benefits, which accrue to households such as secondary and university education, free drugs and free fuel and transport for the elderly.

It also includes, in conformity with the definition of income in the National Accounts, the imputed value of own farm consumption and income in kind, as well as the imputed rent of owner occupied dwellings (i.e. the estimated rent that the occupier, as a tenant, would pay if the dwelling were rented). Household income on this national accounting basis is therefore not the same as the cash income that accrues to private households.

Data are provided at regional and county level. However, the county data should be regarded more as indicative information and not accurate absolute estimates.

Regional GDP

(Note: GDP and GVA are the same concept i.e they measure the value of the goods and services (or part thereof) which are produced within a region or country. GDP is valued at market prices and hence includes the taxes charged and excludes the values of subsidies provided. GVA at basic prices on the other hand excludes product taxes and includes product subsidies – see table 17).

Slower increase in output per person in Border, Midland and Western Region

The average output level per person in the *Southern and Eastern* region, as measured by gross value added was almost 10% above the State average in 1999. The level of GVA per person in the Southern and Eastern region increased by 62% from €14,323 (£11,280) in 1995 to €23,230 (£18,295) in 1999 whereas the GVA per person in the Border Midland and Western region increased somewhat less i.e. by 55% (from €9,946 to €15,418) in the same period.

The gross value added per person in the *Border, Midland and Western* NUTS2 region was 72.8% of the State average in 1999. This represents a decline in the years leading up to 1999 from a high of 77% of the State average in 1996 (see Table 13). However, when measured against the EU average it has increased over the same period due to the strong growth in Irish GDP relative to that of other countries and stands at 81.6% in respect of 1999 (see Table 14).

At the NUTS3 regional level, the combined *Dublin* and *Mid East* regions produced the highest GVA per person in 1999 at 21.7% above the State average. The level of GVA per person in this region has exceeded the State average by at least 19% in each year since 1995. It is more meaningful to combine the *Dublin* and *Mid East* regions as they are affected by workers living in one region and commuting to work in the other.

The *South West* region had the second highest GVA per person in 1999 at 11% above the State average. Meanwhile the *Midland* and *West* regions continue to have the lowest GVA per person in 1999 at 69% and 72% of the State average respectively.

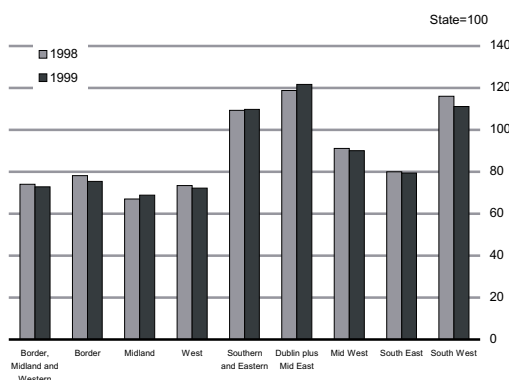

Gross Value Added is not a measure of household income. It is a measure of the value of goods and services produced in a region. (See Background Notes).

Indices of GVA per person

(Base: State=100)

Region	1998	1999
Border, Midland and Western	74.0	72.8

¹ Total GVA does not equal the sum of the three sectors shown due to the effect of the Statistical Discrepancy - see Background Notes

Background Notes

Introduction Household incomes were first published in 2000 (Household Incomes Regions and Counties 1991-1997 – Pn 8218) and the publication included a detailed description of the methodology used to estimate the regional values of the income components. Results in respect of 1998 which included revisions to the earlier years were published in May 2001 (Pn 9907).

Regional accounts were first published in 1996 (Regional Accounts 1991 – Pn 3232). They were in respect of 1991 and a full description of the methodology used was included. A further set of accounts in respect of 1993 was published in 1997 with some additional methodological details. Results have been published annually since.

Household Income

Primary Income Household *Primary Income* is defined for National Income purposes as follows:

Income of self employed

plus

Compensation of employees

(i.e. *Wages and Salaries, Benefits in kind, Employers' social insurance contribution*)

plus

Rent of dwellings

(including *imputed rent of owner-occupied dwellings*)

plus

Net interest and dividends

The last component is a net item, which implies that payments by households of interest are deducted in deriving primary income.

Total Income Total income is defined as:

Primary income

plus

Social benefits

plus

Other current transfers

Disposable Income Disposable income is defined as follows:

Total income

minus

Current taxes on income

(i.e. *Income taxes, other current taxes*)

minus

Social insurance contributions

(i.e. *Employers', employees', self employed, etc.*)

National Income

The estimates for the State for the different components of household income have already been published in the National Income and Expenditure Report 2000 (NIE 2000). The *other current transfer payments* to and from households are included in this household income report on a net basis with *social benefits*.

Item	1999 Value		Source (2000 NIE)
	£m	€m	
Primary Income			
Income of self employed	6,511	8,268	Items 1 & 6, Table 1
Rent of dwellings (incl. imputed wealth)	3,263	4,143	Item 8, Table 1

Income Levy	0	0	Table 22
Social Insurance contribution	2,909	3,694	Item 131, Table 19
Total taxes on income	9,502	12,065	Item 92, Table 9

Per Capita Incomes

The CSO publishes population estimates at regional level annually but not at county level. County populations for 1997 to 1999 have been estimated by applying the year to year changes at regional level shown in the 1997 Labour Force Survey and 1998 and 1999 (Q2) Quarterly National Household Survey to the 1996 Census of Population county populations within each region.

Statistical Discrepancy

The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in Tables 5–9 to derive Total Household Income.

GDP by Region**Gross Value Added**

Gross Value Added at basic prices is a measure of the value of the goods and services produced in a region (less the materials and services used which come from outside the region) priced at the value which the producers received minus any taxes payable and plus any subsidies receivable as a consequence of their production or sale. GVA differs from household income in three main respects. Firstly, GVA includes the total profits of companies. Company profits arising in the State, which accrue to non-residents, are considerable. Secondly, the workforce that produces the GVA in a region may not live there and may bring their incomes home to a neighbouring region. Thirdly, personal income includes items such as social welfare benefits and factor incomes from abroad, which are not included in GVA.

Valuation

Value added is firstly calculated at *factor cost*, which includes all subsidies and excludes all taxes. Conversion to a valuation at *basic prices* is achieved by subtracting *overhead* subsidies and adding *overhead* taxes. Conversion to *market prices* is then obtained by adding *product* taxes and subtracting *product* subsidies (see Table 17). The results in this release are based on the ESA95 system of accounts which is now in use throughout the European Union. Results provided in earlier releases (up to *GDP by region 1997*) were based on the ESA79 system of accounts. GVA is one of the principal concepts used in deciding eligibility for structural funds.

Statistical Discrepancy	The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in Tables 18 and 21 to derive total GVA.	
Revisions	The results for the years 1995 to 1998 have been aligned with the most recent National Income and Expenditure aggregates.	
Regions	The regions for which the accounts have been compiled are the eight Regional Authority NUTS3 regions. The Mid East region (Kildare, Meath and Wicklow) and the Dublin region are affected by a substantial proportion of their workforce living in one region and commuting to work in another. It is more meaningful to combine these two regions. The definition of the regions is outlined below. Figures have also been shown for the two overall NUTS2 regions i.e. Border, Midland and Western region and Southern and Eastern region.	
EU Average	The indices of GVA per person in relation to the EU as 100, shown in Table 14, are based on the relevant position of Ireland as given in the most recent <i>EC Economic Data Pocket Book</i> published by Eurostat.	
Composition of Regions	<i>Border, Midland and Western NUTS 2 Region</i>	
	Border	Cavan, Donegal, Leitrim, Louth, Monaghan and Sligo
	Midland	Laois, Longford, Offaly and Westmeath
	West	Galway County, Galway County Borough, Mayo and Roscommon
	<i>Southern and Eastern NUTS 2 Region</i>	
	Dublin	Dublin County Borough, Dun Laoghaire-Rathdown, Fingal and South Dublin
	Mid East	Kildare, Meath and Wicklow
	Mid West	Limerick County, Limerick County Borough, Clare and Tipperary N.R.
	South East	Waterford County, Waterford County Borough, Carlow, Kilkenny, Wexford and Tipperary S.R.
	South West	Cork County, Cork County Borough and Kerry
