

**Index values of Disposable Income per person, 2000 - 2001**

## County Incomes and Regional GDP 2001

### Household Income

**Indices of Disposable Income per person (Base: State=100)**

Region	2000	2001
<b>Border, Midland and Western</b>	<b>89.9</b>	<b>90.4</b>
Border	89.1	90.9
Midland	86.6	86.3
West	92.7	92.2
<b>Southern and Eastern</b>	<b>103.6</b>	<b>103.4</b>
Dublin	116.8	116.7
Mid East	98.6	99.4
Mid West	98.8	97.8
South East	89.0	87.7
South West	94.2	94.5
<b>State</b>	<b>100.0</b>	<b>100.0</b>

### Average Income highest in Dublin Region

In 2001 the disposable income per person in the *Southern and Eastern* region was 3.4% above the State average while the corresponding figure in the *Border Midland and Western* NUTS 2 region was 9.6% below the State average. The gap of 13 points between the two regions represents a slight decrease on the gap of 13.7 points in 2000 and 14.5 points in 1999.

The Dublin region had the highest disposable income per person of the eight regional authority areas, being 16.7% above the State average in 2001.

The disposable income per person of the Midland region was 13.7% below the State average in 2001 and was the lowest of the eight Regional Authority Areas.

At county level, counties other than Dublin with high levels of disposable income per person were Kildare (105.0% of the State average), Limerick (102.5%), Galway (98.7%), Sligo (98.4%), Louth (98.3%), Cork (97.3%) and Wicklow (97.2%). At the lower end of the scale there were 13 counties with disposable incomes per person below 90% of the State average.

These results have not been realigned to take account of the employment structures shown in the recently published 2002 Census of Population reports. This data will be incorporated in the next release and will result in revisions for 2001 and earlier years.

Data are provided at regional and county level. However, the county data should be regarded more as indicative information and not accurate absolute estimates.

### Differences from cash income

These estimates allocate to regions and counties the various components of income for the household sector as compiled in the National Accounts.

Household Income includes

- Wages and salaries (including employers' contributions to social insurance and pension funds and imputed pension contributions by the state for its employees)
- Income from self employment
- Transfer payments from the State; these include the imputed value of some non-cash benefits, which accrue to households such as secondary and university education, free drugs and free fuel and transport for the elderly.

It also includes, in conformity with the definition of income in the National Accounts, the imputed value of own farm consumption and income in kind, as well as the imputed rent of owner occupied dwellings (i.e. the estimated rent that the occupier, as a tenant, would pay if the dwelling were rented). Household income on this national accounting basis is therefore not the same as the cash income that accrues to private households.

### Indices of GVA per person

(Base: State=100)

Region	2000	2001
<b>Border, Midland and Western</b>	<b>72.7</b>	<b>75.0</b>
Border	71.4	75.1
Midland	72.2	72.5
West	74.4	76.2
<b>Southern and Eastern</b>	<b>109.8</b>	<b>109.0</b>
Dublin plus Mid East	118.5	118.1
Mid West	93.5	84.5
South East	82.2	86.1
South West	115.8	115.2
<b>State</b>	<b>100.0</b>	<b>100.0</b>

### Regional GDP

#### GDP per person highest in Southern and Eastern Region

(Note: GDP and GVA are the same concept i.e. they measure the value of the goods and services (or part thereof) which are produced within a region or country. GDP is valued at market prices and hence includes the taxes charged and excludes the values of subsidies provided. GVA at basic prices on the other hand excludes product taxes and includes product subsidies – see table 19).

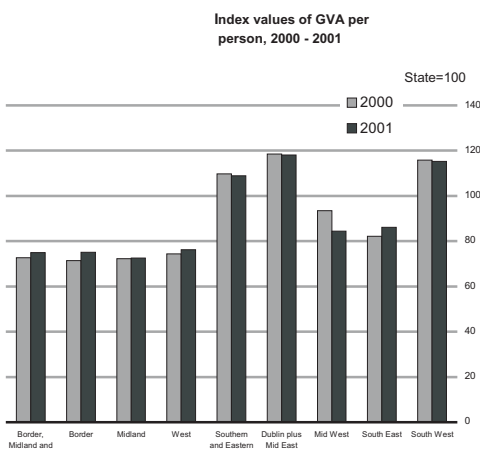

The average output level per person in the *Southern and Eastern* region, as measured by gross value added was 9% above the State average in 2001. However, the level of GVA per person in 2001 in the *Border Midland and Western* region increased by 45% from €13,835 in 1998 to €20,071 in 2001, whereas the GVA per person in the *Southern and Eastern* region increased by 42% from €20,499 to €29,164 in the same period.

The gross value added per person in the *Border, Midland and Western* NUTS2 region was 75.0% of the State average in 2001, a 2.3% increase on the 2000 level but a slight decline from the high of 76.9% of the State average in 1996 (see Table 15). However, when measured against the EU average it has increased over the same period due to the strong growth in Irish GDP relative to that of other countries and stands at 88.5% in respect of 2001 (see Table 16).

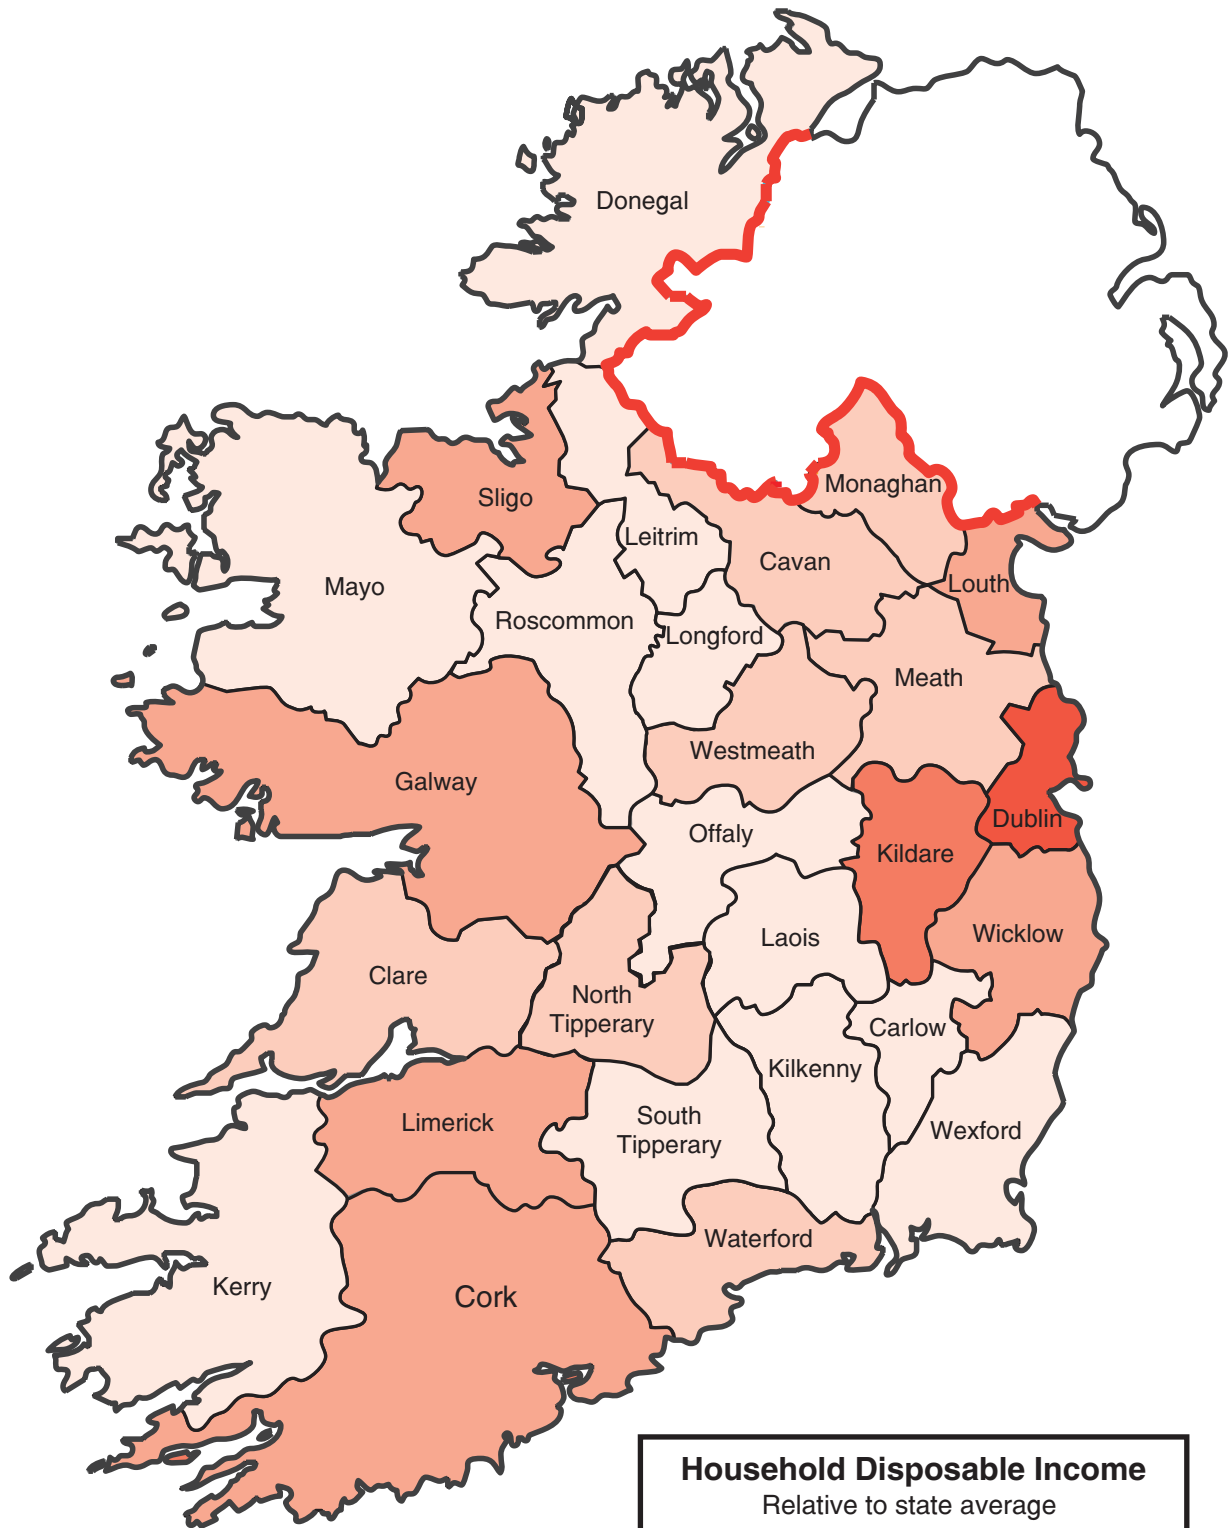

At the NUTS3 regional level, the combined *Dublin* and *Mid East* regions produced the highest GVA per person in 2001 at 18.1% above the State average. The level of GVA per person in this region has exceeded the State average by at least 18% in each year since 1995. It is more meaningful to combine the *Dublin* and *Mid East* regions as they are affected by workers living in one region and commuting to work in the other.

The *South West* region had the second highest GVA per person in 2001 at 15.2% above the State average. Meanwhile the *Midland* and *Border* regions have the lowest GVA per person in 2001 at 72.5% and 75.1% of the State average respectively.

**Gross Value Added is not a measure of household income.** It is a measure of the value of goods and services produced in a region. It therefore includes the profits derived from the production of goods and services and in particular the profits of multinational companies, much of which accrue to non-residents (See Background Notes).

# Household Disposable Income per Head 2001

Household Disposable Income Relative to state average		
<span style="color: red;">■</span>	109.8 to 116.7	(1) Dublin
<span style="color: darkred;">■</span>	102.9 to 109.8	(1) Kildare
<span style="color: red;">■</span>	96.0 to 102.9	6 Counties
<span style="color: lightcoral;">■</span>	89.1 to 96.0	7 Counties
<span style="color: peachpuff;">■</span>	82.2 to 89.1	12 Counties

<sup>1</sup> Total GVA does not equal the sum of the three sectors shown due to the effect of the Statistical Discrepancy - see Background Notes

## Background Notes

**Introduction** Household incomes were first published in 2000 (Household Incomes Regions and Counties 1991-1997 – Pn 8218) and the publication included a detailed description of the methodology used to estimate the regional values of the income components. Results in respect of 1998, 1999 and 2000 which included revisions to the earlier years were published in May 2001 (Pn 9907), January 2002 and March 2003 respectively.

Regional accounts were first published in 1996 (Regional Accounts 1991 – Pn 3232). They were in respect of 1991 and a full description of the methodology used was included. A further set of accounts in respect of 1993 was published in 1997 with some additional methodological details. Results have been published annually since.

The estimates of agricultural incomes are mainly provided by the Agricultural statistics division within the CSO. A release on Gross Value added (GVA) in Agriculture by NUTS 2 regions is now published separately, the latest release being that of 14 November 2003. The GVA in that release at basic prices is lower than the National Accounts estimates used here, largely due to a different treatment of subsidies in the two sets of accounts. The differences vary from €42m in 1995 to €340m in 2001.

These results have not been realigned to take account of the employment structures shown in the recently published 2002 Census of Population reports. This data will be incorporated in the next release and will result in revisions for 2001 and earlier years.

### Household Income

**Primary Income** Household *Primary Income* is defined for National Income purposes as follows:

Income of self employed

*plus*

Compensation of employees

*(i.e. Wages and Salaries, Benefits in kind, Employers' social insurance contribution)*

*plus*

Rent of dwellings

*(including imputed rent of owner-occupied dwellings)*

*plus*

Net interest and dividends

The last component is a net item, which implies that payments by households of interest are deducted in deriving primary income.

**Total Income** Total income is defined as:

Primary income

*plus*

Social benefits

*plus*

Other current transfers

**Disposable Income** Disposable income is defined as follows:

Total income

*minus*

Current taxes on income

*(i.e. Income taxes, other current taxes)*

*minus*

Social insurance contributions

*(i.e. Employers', employees', self employed, etc.)*

**National Income** The estimates for the State for the different components of household income have already been published in the National Income and Expenditure Report 2002 (NIE 2002). The *other current transfer payments* to and from households are included in this household income report on a net basis with *social benefits*.

Item	2001 Value €m	Source (NIE 2002)
<b>Primary Income</b>		
Income of self employed	10,903	Items 1 and 5, Table 1
Rent of dwellings (incl. imputed rent)	6,176	Item 7, Table 1
Remuneration of employees	47,077	Items 2,3,9 and 10, Table 1 Plus row 4, Table 12
Net interest and dividends	528	Row 9, Table 12 minus Item 7, Table 1
<b>Social benefits and net current transfers</b>		
Statistical discrepancy	11,113	Item 122, Table 9
	569	Item 12
<b>Total Income</b>	76,365	Item 125, Table 9
<b>Taxes on personal income and wealth</b>		
Income tax (incl. surtax)	9,319	Table 22
Motor vehicle duties (household part)	316	Table 22
Other taxes	12	Table 22
Training and employment levy	204	Table 22
Income Levy	0	Table 22
Social Insurance contribution	4,983	Item 168, Table 19
Total taxes on income	14,834	Item 127, Table 9

**Per Capita Incomes** The CSO publishes population estimates at regional level annually but not at county level. County populations for 1997 to 2001 have been estimated by applying the year to year changes at regional level shown in the 1997 Labour Force Survey and 1998, 1999, 2000 and 2001 (Q2) Quarterly National Household Survey figures to the revised State population estimates based on the 2002 Census of Population as published on 10 December 2003.

**Statistical Discrepancy** The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in Tables 5–11 to derive Total Household Income.

## GDP by Region

**Gross Value Added** Gross Value Added at *basic prices* is a measure of the value of the goods and services produced in a region (less the materials and services used which come from outside the region) priced at the value which the producers received minus any taxes payable and plus any subsidies receivable as a consequence of their production or sale. GVA differs from household income in three main respects. Firstly, GVA includes the total profits of companies. Company profits arising in the State, which accrue to non-residents, are considerable. Secondly, the workforce that produces the GVA in a region may not live there and may bring their incomes home to a neighbouring region. Thirdly, personal income includes items such as social welfare benefits and factor incomes from abroad, which are not included in GVA.

**Valuation** Value added is firstly calculated at *factor cost*, which includes all subsidies and excludes all taxes. Conversion to a valuation at *basic prices* is achieved by subtracting *overhead* subsidies and adding *overhead* taxes. Conversion to *market prices* is then obtained by adding *product* taxes and subtracting *product* subsidies (see Table 19). The results in this release are based on the ESA95 system of accounts which is now in use throughout the European Union. Results provided in earlier releases (up to *GDP by region 1997*) were based on the ESA79 system of accounts. GVA is one of the principal concepts used in deciding eligibility for structural funds.

<b>Statistical Discrepancy</b>	The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in Tables 20 and 23 to derive total GVA.																
<b>Revisions</b>	The results for the years 1995 to 2000 have been aligned with the most recent National Income and Expenditure aggregates.																
<b>Regions</b>	The regions for which the accounts have been compiled are the eight Regional Authority NUTS3 regions. The Mid East region (Kildare, Meath and Wicklow) and the Dublin region are affected by a substantial proportion of their workforce living in one region and commuting to work in another. It is more meaningful to combine these two regions. The definition of the regions is outlined below. Figures have also been shown for the two overall NUTS2 regions i.e. Border, Midland and Western region and Southern and Eastern region.																
<b>EU Average</b>	The indices of GVA per person in relation to the EU as 100, shown in Table 16, are based on the relevant position of Ireland as given in the most recent <i>EC Economic Data Pocket Book</i> published by Eurostat.
