

Index values of Disposable Income per person, 2005 to 2006

County Incomes and Regional GDP 2006

Household Income

Indices of Disposable Income per person (Base: State=100)

Region	2005	2006
Border, Midland and Western	91.6	91.7
Border	90.3	91.1
Midland	91.8	90.6
West	92.9	93.0
Southern and Eastern	103.1	103.0
Dublin	112.3	112.3
Mid East	102.3	102.6
Mid West	98.3	97.0
South East	92.1	93.2
South West	97.0	96.4
State	100.0	100.0

Average Income highest in Dublin Region in 2006

This release shows that for the two NUTS 2 regions in the state, the disposable income per person in 2006 of the *Southern and Eastern* region was 3% above the State average while the corresponding figure for the *Border Midland and Western* NUTS 2 region was 8.3% below the State average. The gap of 11.3 points between the two regions is similar to the gap that existed in 2005 (11.5 points) and in 2004 (11.2 points).

At the level of the eight Regional Authority areas the Dublin region had the highest disposable income per person, being 12.3% above the State average in 2006; the comparable figure in 2000 was 16.4%. The disposable income per person of the Midland region was 9.4% below the State average in 2006 and was the lowest of the eight Regional Authority areas.

At county level, the counties with an average disposable income per person in excess of the state average were Dublin, Limerick, Kildare and Meath. At the lower end of the scale there were eight counties with disposable incomes per person below 90% of the State average and a further eight counties between 90% and 95% of the State average.

The results are supplied at regional and county level. However, the county data should be regarded more as indicative levels rather than as accurate precise figures.

The results agree at State level with the publication "*National Income and Expenditure 2007*".

Differences from cash income

These estimates allocate to regions and counties the various components of income for the household sector as compiled in the National Accounts.

Household Income includes

- Wages and salaries (including employers' contributions to social insurance and pension funds and imputed pension contributions by the State for its employees)
- Income from self employment
- Transfer payments from the State; these include the imputed value of some non-cash benefits, which accrue to households such as secondary and university education, free medicines and free fuel and transport for the elderly.

It also includes, in conformity with the definition of income in the National Accounts, the imputed value of own farm consumption and income in kind, as well as the imputed rent of owner occupied dwellings (i.e. the estimated rent that the occupier, as a tenant, would pay if the dwelling were rented). Household income on this national accounting basis is therefore not the same as the cash income that accrues to private households.

Indices of GVA per person

(Base: State=100)

Region	2005	2006
Border, Midland and Western	70.6	72.2
Border	70.5	72.5
Midland	67.6	67.0
West	72.6	75.0
Southern and Eastern	110.7	110.2
Dublin plus Mid East	123.8	122.8
Mid West	89.6	87.0
South East	74.7	73.1
South West	114.8	117.3
State	100.0	100.0

Regional GDP

GDP per person higher in Southern and Eastern Region

(Note: GDP and GVA are the same concept i.e. they measure the value of the goods and services (or part thereof) which are produced within a region or country. GDP is valued at market prices and hence includes taxes charged and excludes the value of subsidies provided. GVA at basic prices on the other hand excludes product taxes and includes product subsidies – see table 14).

The average value added per person generated in the *Southern and Eastern* region was 10.2% above the State average in 2006. The level of GVA per person in the Southern and Eastern region increased by 48.1% in the period 2000 to 2006 while the GVA per person in the Border, Midlands and Western region increased by 52.3% during the same period.

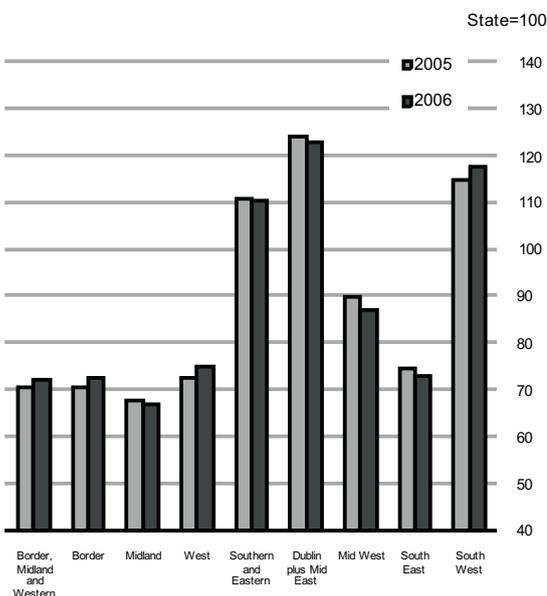

The gross value added per person in the *Border, Midland and Western* NUTS2 region was 72.2% of the State average in 2006, up from 70.6% in 2005 (see table 10). When measured against the EU average it has also increased significantly to 106.4% in 2006 from 101.8% in 2005 (see table 11).

At the NUTS3 regional level, the *Dublin* region had the highest GVA per person in 2006 at 40.9% above the State average. The combined *Dublin plus Mid East* region in 2006 was 22.8% above the State average. The level of GVA per person in this region has exceeded the State average by at least 17% in each year since 2000. *Dublin* and *Mid East* regions are combined together as they are affected significantly by workers living in one region and commuting to work in the other.

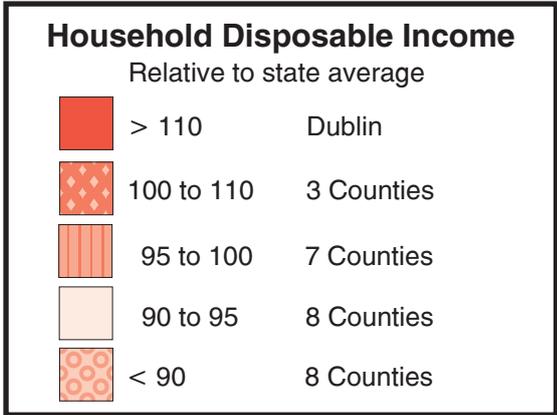

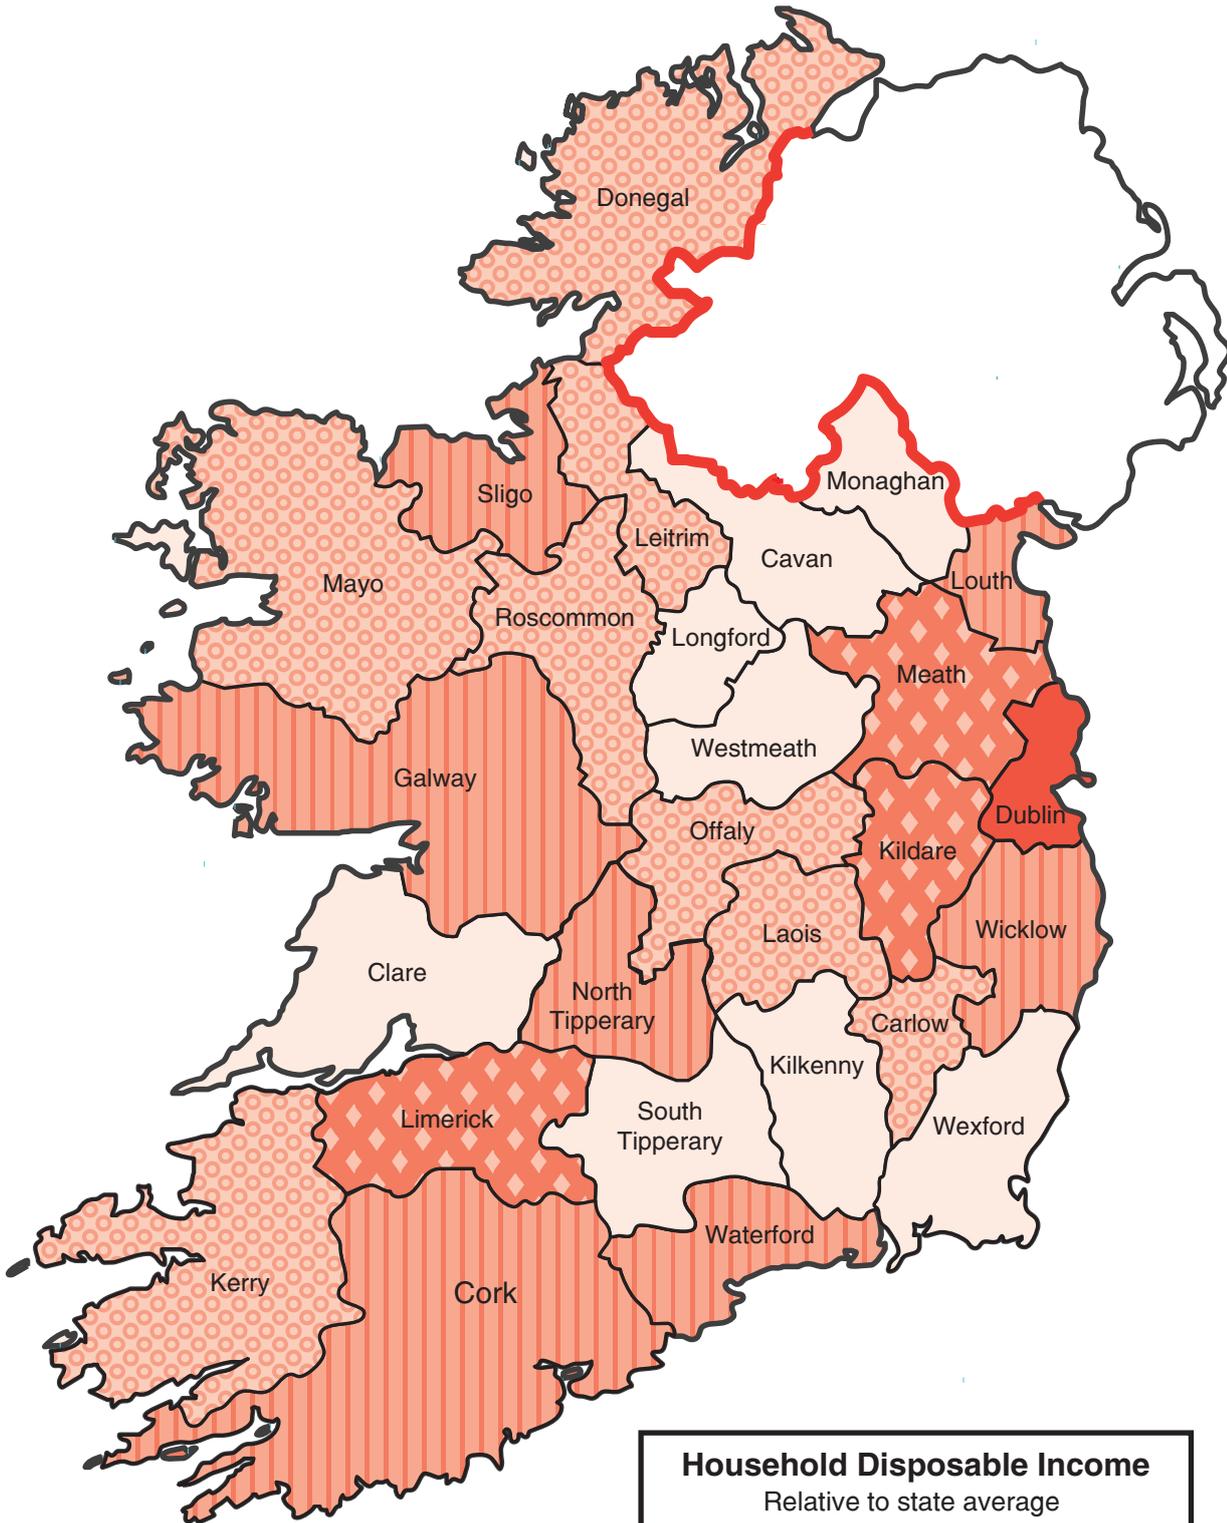

Meanwhile the *Midland* region has the lowest GVA per person in 2006 at 67.0% of the State average.

Gross Value Added is not a measure of household income. It is a measure of the value of goods and services produced in a region less the cost of the materials and services used in their production which were brought in from outside the region. It therefore includes, in particular, the profits of multinational companies, much of which accrue to non-residents. (See Background Notes). Variations from year to year at regional level are, therefore, affected by changes in the profits reported by these companies.

State	3,552	2.7	47,120	36.0	80,375	61.3	131,882	100.0

¹ Total GVA does not equal the sum of the three sectors shown due to the effect of the Statistical Discrepancy - see Background Notes.

Background Notes

Introduction Household incomes were first published in 2000 (Household Incomes Regions and Counties 1991-1997 – Pn 8218) and the publication included a detailed description of the methodology used to estimate the regional values of the income components. Since then, results have been issued on an annual basis.

Regional accounts were first published in 1996 (Regional Accounts 1991 – Pn 3232). They were in respect of 1991 and a full description of the methodology used was included. A further set of accounts in respect of 1993 was published in 1997 with some additional methodological details. Results have been published annually since.

Revisions Revisions to national accounts data published in National Income and Expenditure 2007 have been carried through into these tables, as is the usual practice.

Household Income

Primary Income Household *Primary Income* is defined for National Income purposes as follows:

Compensation of employees
(*i.e. Wages and Salaries, Benefits in kind, Employers' social insurance contribution*)

plus

Income of self-employed

plus

Rent of dwellings
(*including imputed rent of owner-occupied dwellings*)

plus

Net interest and dividends

The last component is a net item, which implies that payments by households of interest are deducted in deriving primary income.

Total Income Total income is defined as:

Primary income

plus

Social benefits

plus

Other current transfers

Disposable Income Disposable income is defined as follows:

Total income

minus

Current taxes on income
(*i.e. Income taxes, other current taxes*)

minus

Social insurance contributions
(*i.e. Employers', employees', self-employed, etc.*)

National Income The estimates for the State for the different components of household income have already been published in the National Income and Expenditure Report 2007 (NIE 2007). The *other current transfer payments* to and from households are included in this household income report on a net basis with *social benefits*.

Item	2006 Value €M	Source (NIE 2007)
Primary Income		
Income of self-employed	13,104	Items 1 and 5, Table 1
Rent of private dwellings (incl. imputed rent)	4,920	Row 11, Table 12
Remuneration of employees	71,875	Items 2, 3, 9 and 10, Table 1 plus Row 4, Table 12
Net interest and dividends	1,167	Rows 9, 10, 12 and 13 in Table 12
Social benefits and net current transfers		
Statistical discrepancy	-1,274	Item 12, Table 1
Total Income	109,084	Item 125, Table 9
Taxes on personal income and wealth		
Income tax (incl. surtax)	12,391	Table 22
Motor vehicle duties (household part)	484	Table 22
Other taxes	5	Table 22
Training and employment levy	368	Table 22
Social Insurance contribution	8,162	Item 168, Table 19
Total taxes on income	21,409	Item 127, Table 9

Per Capita Incomes The CSO publishes population estimates at regional level annually but not at county level. County populations for 2000 to 2006 have been estimated in this report by applying the year to year changes at regional level, shown in the revised regional population figures which were compiled following the publication of the 2002 Census and the 2006 Census, to the counties within the regions. The population figures for 2002 and 2006 have been taken directly from the 2002 Census and the 2006 Census.

Statistical Discrepancy The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in tables 1 and 2 to derive Total Household Income.

GDP by Region

Gross Value Added Gross Value Added (GVA) at *basic prices* is a measure of the value of the goods and services produced in a region (less the materials and services used which come from outside the region) priced at the value which the producers received minus any taxes payable and plus any subsidies receivable as a consequence of their production or sale. GVA differs from household income in three main respects. Firstly, GVA includes the total profits of companies. Company profits arising in the State, which accrue to non-residents, are considerable. Secondly, the workforce that produces the GVA in a region may not live there and may bring their incomes home to a neighbouring region. Thirdly, personal income includes items such as social welfare benefits and factor incomes from abroad, which are not included in GVA.

Valuation Value added is firstly calculated at *factor cost*, which includes all subsidies and excludes all taxes. Conversion to a valuation at *basic prices* is achieved by subtracting *overhead* subsidies and adding *overhead* taxes. Conversion to *market prices* is then obtained by subtracting *product* subsidies and adding *product* taxes (see table 14). Most of the tables in this report on GVA are based on GVA at basic prices. However tables 15a to 18a are based on GVA at factor cost. The results in this release are based on the ESA95 system of accounts which is now in use throughout the European Union. Results provided in earlier releases (up to *GDP by region 1997*) were based on the ESA79 system of accounts. GVA is one of the principal concepts used in deciding eligibility for structural funds within the EU.

Statistical Discrepancy	The official level of GDP is taken to be the average of the independently compiled Income and Expenditure estimates. The resulting balancing item which is half of the difference between the two estimates is called the Statistical Discrepancy. This must be added to the income components in tables 15, 15a, 18 and 18a to derive total GVA.																
Regions	The regional classifications in this release are based on the NUTS (Nomenclature of Territorial Units) classification used by Eurostat. The regions for which the accounts have been compiled are the eight Regional Authority NUTS3 regions. The Mid East region (Kildare, Meath and Wicklow) and the Dublin region are affected by a substantial proportion of their workforce living in one region and commuting to work in another. It is therefore more meaningful to combine these two regions. The definition of the regions is outlined below. Figures have also been shown for the two overall NUTS2 regions i.e. "Border, Midland and Western" region and "Southern and Eastern" region.																
EU Average	The indices of GVA per person in relation to the EU27=100 for years 2000 to 2006, shown in table 11, are based on the relevant position of Ireland as given on the Eurostat website.
