### Multinational sectors outperform other sectors

GVA at constant 2010 factor cost for sectors where foreign-owned multinational enterprises are dominant grew by 6.7 per cent between 2010 and 2011. The remainder of the economy grew by 0.2 per cent over the same period, resulting in an overall growth rate of 1.7 per cent. By 2011 the foreign-owned MNE sectors accounted for just over a quarter of total current GVA.

Between the 2007 peak and the 2010 trough for GVA at factor cost the foreign-owned MNE dominated sectors grew by a cumulative 30.9 per cent compared with a cumulative decline of 12.6 per cent for the remaining sectors. The overall economy experienced a cumulative decline of 4.6 per cent over this period.

Viewed in a longer term perspective (i.e. from 1995 onwards) the share of total GVA at current factor cost accounted for by foreign-owned MNE dominated sectors peaked at 26.5 per cent in 2002 and following a decline to 17.5 per cent in 2006 has since grown to its 2011 share of 25.3 per cent. During this period, 2003 (-1.5%) was the only year in which the real growth rate of the foreign-owned MNE dominated sectors was negative. By way of contrast the years 2008, 2009 and 2010 were the only years in which the remaining sectors experienced negative real GVA growth.

The composition of the sectors dominated by foreign-owned multinational enterprises is given overleaf in terms of constituent Nace Rev 2 codes and their corresponding shares in 2011. While the constant price compilations at previous year's prices were carried out at detailed sectoral level the figures at this level of disaggregation are not being made available at this stage. The total GVA at factor cost is consistent with Tables 3 and 4 of NIE 2011 <http://cso.ie/shorturl.aspx/135> For information on chain linking see pages v, xviii, 43-44 and 55 of NIE 2011.

The data tables contained in this report as well as data for earlier years can be downloaded from the StatBank database service on the CSO Website: <http://cso.ie/shorturl.aspx/137>.
