External Trade

September 2011 (Provisional details) October 2011 (Preliminary)

Υ.		Seasor	nally adjusted
			€ million
	Imports	Exports	Surplus
July 2011	3,821	7,067	3,247
August 2011	4,012	7,761	3,749
September 2011	3,838	8,010	4,172
October 2011	3,937	7,652	3,715

Seasonally adjusted trade surplus falls in October

Seasonally adjusted exports decreased by 4% to \notin 7,652m in October, while imports increased by 3% to \notin 3,937m, resulting in an 11% decrease in the trade surplus to \notin 3,715m (*see graph and table 2*).

On an unadjusted basis, the value of exports in October 2011 (\notin 7,524m) was unchanged from October 2010 while the value of imports (\notin 3,885m) was up 7% (*see table 1*). The trade surplus of \notin 3,639m in October 2011 was down 6% from its 2010 figure.

The figures for the **first nine months of 2011 compared with the same period of 2010** show *(see tables 3 & 4)*:

Exports increased by 4% to €69,425m:

- Exports of Medical and pharmaceutical products increased by 11% or \notin 1,936m, Organic chemicals by 10% or \notin 1,342m and Petroleum by 51% or \notin 325m.
- ◆ Exports of Computer equipment fell by 9% or €287m.
- Goods to the USA increased by 4% or €682m, to France by 14% or €470m and to Switzerland by 13% or €318m.
- In the first nine months of 2011, 23% of exports went to the USA, 15% to Belgium and 14% to Great Britain.

Imports increased by 6% to €36,185m:

- ◆ Imports of Petroleum increased by 24% or €771m, Medical and pharmaceutical products by 23% or €586m and Organic chemicals by 27% or €421m.
- Imports from Great Britain rose by 17% or €1,660m and from Germany by 14% or €347m.
- In the first nine months of 2011, 53% of Ireland's imports came from Great Britain, the USA and Germany.

For more information contact Norita Murphy at (01) 498 4295.

¹ From January 2011 Shannon Free Zone data collected at detailed transaction level (see Background notes) ² China includes Hong Kong and Macao

Background Notes

- Introduction The statistics are a combination of Customs-based non-EU trade statistics and estimates from the Intrastat Survey of Irish traders involved in trade with other EU member states.
 - **Revisions** Trade figures are subject to revision on the incorporation of late Intrastat and VAT returns, corrections made by traders to Intrastat returns already submitted and CSO consistency adjustments. In general when the preliminary results for a month are published, the results for months -1 (September 2011 in this publication), -4 (June 2011) and -8 (February 2011) are revised.

As part of an ongoing detailed examination of returns from enterprises to the various statistical inquiries, the value of international trade in goods exports and indices are revised on a quarterly basis. These adjustments are incorporated into the published National Accounts and Balance of Payments statistics.

New Prior to 2011, responsibility for the editing of low-value trade transactions (under €20,000) was primarily undertaken by VIMA (the VIMA Office is the branch of Revenue responsible for the collection of trade data). From January 2011, the CSO took over responsibility for examining these transactions and adjusting the quantity data for unusual unit values. The methodology being used by the CSO is broadly consistent with that previously used by VIMA. Hence while this change may result in small differences at detailed commodity level unit prices, the Trade volume indices should remain consistent with previous years.

Intrastat The Intrastat system has two components. Firstly, the Intrastat survey itself (conducted by the Revenue Commissioners), **System** in which the larger traders make detailed monthly returns giving information on the quantity and value of all exports to or imports from EU countries.

The total number of traders required to make a detailed import return is about 6,700 while about 1,900 must make a detailed export return. The response rate in terms of number of traders in September 2011 was 78%, covering an estimated 97% of the total value of intra-EU trade. For October 2011 the respective response rates were 75% and 90%.

The second component of the Intrastat system is the regular VAT return, on which all traders are required to record the total value of goods imported from and exported to other EU member states. This information provides the basis for determining total EU trade for those traders below the Intrastat survey thresholds. It is also used to maintain the register of EU traders.

- **Extrastat** The statistics of trade with non-EU countries are compiled mainly from the documents supplied by importers and **System** exporters to the Customs authorities. The document is the Single Administrative Document (SAD) used for Customs clearance purposes.
- Shannon Prior to 2011, data for traders operating in the Shannon Free Zone were collected by traders submitting summary monthly returns to the CSO. These CSO Shannon survey data were classified under Section 9 'Commodities and Transactions not classified elsewhere' (SITC code 931.01).

Shannon data for 2011 are being collected by VIMA as part of the Intrastat survey and customs documentation for Extrastat data. Therefore, Shannon data are now incorporated into the detailed CN and partner country transaction level. Hence Shannon data are no longer classified under SITC code 931.01 'Commodities and Transactions not classified elsewhere' and are also now attributed to the actual partner country as set out in Tables 3, 4 and 5.

Estimation The figures in this release include estimates for traders above the Intrastat thresholds who did not make detailed returns for the period and for traders below the thresholds who did not provide aggregate intra-EU trade figures on their VAT returns.

Estimates for Intrastat non-respondents are apportioned to individual commodities and countries whenever previous Intrastat returns are available. Estimates for traders below the Intrastat thresholds are assigned to partner country where possible, but not to commodity.

The estimate of imports incorporates an upward adjustment equivalent to about 1.75% of total imports, which is included in 'Unclassified estimates'. This special adjustment arises from the difficulty of comprehensively covering all EU imports through the Intrastat survey system.

The unclassified category also includes certain miscellaneous adjustments.

Price and The monthly price (unit value) index measures monthly price trends relative to the annual levels in the preceding year **Volume** using value weights relating to that year's trade (Laspeyres index).

Indices

The annual index is compiled using value weights for both the current and previous year (Fisher index) to allow for change in the structure of external trade.

The monthly index series should be regarded as interim measures suitable for month-to-month comparisons within a given year. As part of an ongoing detailed examination of returns from enterprises to the various statistical inquiries, the value of international trade in goods exports is revised on a quarterly basis, which may result in a revision to the indices.

When the annual price index is compiled, the monthly price indices are rescaled to make their average equal to the annual index.
