Vehicles and Other Equipment	63.5	44.6	56.6
Total Capital Acquisitions	631.6	784.8	996.5

Capital Assets Acquisitions of £785m in Second Quarter

Capital acquisitions held by industry in the second quarter of 2000 were £784.8m, compared with £631.6m in the second quarter of 1999.

The major contributor to the total figure was acquisitions of machinery and equipment, which amounted to £543.1m in the second quarter of 2000, following on a second-quarter 1999 level of £416.5m. *See Table 2.*

Land and buildings acquisitions were £171.5m, up from £122.6m in the second quarter of 1999. Total capital sales were £57.7m, compared with £41.2m in the second quarter of 1999. *See tables 3 and 6.*

The breakdown of the components of acquisitions into the different industrial sectors shows:

- ◆ The highest level of acquisitions of machinery and equipment was recorded in the electricity and gas supply sector with a level of £156.1m in the second quarter of 2000, compared with £58.1m for the same quarter in the previous year. *See Table 2.*
- ◆ The highest level of acquisitions of land and buildings was in the chemical products sector, which accounted for £55.2m in the second quarter of 2000, an increase on the second-quarter 1999 level of £42.5m. *See Table 2.*

¹Converted at the EU official exchange rate conversion factor, fixed at 0.787564, effective from 1 January 1999

¹ Figures for 1998 relate to capital disposals

² Revised

Background Notes

Introduction This Release details quarterly acquisitions and sales of capital assets in the Mining, Manufacturing, and Energy sectors. The series are derived from a quarterly accounts inquiry to industrial enterprises with 20 or more persons engaged. This inquiry was initiated to meet national and EU requirements for quarterly economic variables, and is conducted under the Statistics (Business Accounts) Order, 1996, made under the Statistics Act 1993.

The survey results are grossed to represent acquisitions and sales of capital assets by all industrial enterprises with 3 or more persons engaged, and are shown at current values (seasonally unadjusted).

The capital acquisitions series are short-term indicators of trends, and are subject to revision when the annual Census of Industrial Production (CIP) results become available. Note, however, that the CIP variable “additions to capital assets” includes capitalised Research & Development (R&D), whereas the capital acquisitions series in this Release do not.

Scope The inquiry covers all enterprises with 20 or more persons engaged in the Mining, Manufacturing, and Energy sectors. The sample, approximately 1,900 enterprises, accounts for over 95% of capital acquisitions by enterprises with 3 or more persons engaged (as measured by the 1997 CIP).

The activity classification used in this Statistical Release is the NACE Rev. 1 classification.

Methodology Estimates are made for non-response. For each non-responding enterprise, capital acquisitions data are imputed from returns for that enterprise in previous quarters or in the 1997 CIP. Where no historical data are available, estimates are made as follows: the sample is classified into relatively homogeneous cells defined by NACE division and employment size, and the cell ratio acquisitions per person (calculated from the aggregated respondent values in the non-respondent’s cell) is applied to the employment for the non-respondent. The estimation procedure for capital sales is similar.

To derive estimates inclusive of those enterprises having 3 to 19 persons engaged, the sample results are grossed, by NACE division, using grossing ratios from the 1997 CIP.

Definitions Capital assets refers to physical assets, or computer software, with a useful life of more than one year intended to be used by the enterprise itself. The figures in this Release are therefore exclusive of capitalised R&D.

An enterprise is defined as the smallest combination of legal units that is an organisational unit producing goods or services, which benefits from a certain degree of autonomy in decision making, especially for the allocation of its current resources (e.g. company, partnership, individual proprietorship, etc.) An enterprise may be a sole legal unit.

Other The figures provided in this Release are short-term indicators only. They are based on quarterly information supplied by enterprises, many of whom do not maintain sub-annual accounting systems. The annual Census of Industrial Production, which utilises financial accounts data, should be considered as the definitive reference for annual capital assets information.

Related series, on quarterly estimates of Industrial Stocks, are published in a separate Statistical Release.
