

**Employment All Industries
(seasonally adjusted)**

Industrial Employment March and June 2007 (Final)

	All Industries	
	Seasonally Unadjusted	Seasonally Adjusted
June 2006	241,800	241,500
March 2007	239,700	240,900
June 2007	241,700	241,200
Quarterly change	+2,000	+300
Annual change	-100	-300

Industrial employment down by 100 in year to June 2007

Industrial employment was 241,700 in June 2007, a decrease of 100 from June 2006 (*see Table 2*).

Between March 2007 and June 2007 there was a seasonally adjusted increase of 300 in industrial employment.

This is the final release for the Industrial Employment series. The Quarterly Industrial Inquiry has been replaced by the new Earnings, Hours and Employment Costs Survey (EHECS). This survey collects data on employment, wages & salaries, hours and other labour costs. Results for the industrial and financial sectors were published in the new Earnings and Labour Costs release on 17 August 2007. The results are available on the CSO website www.cso.ie. The EHECS will, in time, expand to include all sectors of the economy.

¹Total Number of Employees differs from Total Persons Engaged (in Tables 1 and 2). Outside Piece Workers as well as Proprietors and Unpaid Family Members are not included as Employees in Table 3 but are included as Persons Engaged in Tables 1 and 2.

Background Notes

Scope and Coverage This inquiry covers industrial local units in the State with 3 or more persons engaged. Persons engaged in non-industrial activities conducted by parent undertakings at the same location or any own account workers engaged by them on a contract or fee basis are not included (see definitions below). These estimates are not directly comparable with the industrial employment estimates obtained from household surveys (such as the quarterly National Household Survey or periodic Census of Population) which include own account workers, cover very small establishments and are classified by sector on the basis of respondents' descriptions of the main activity conducted at their place of work.

Methodology **Employment:** Information for every industrial local unit known to be operating in the relevant reference week is used in compiling these estimates. The information is comprised of:

- A full breakdown of employment from completed quarterly inquiry questionnaires;
- Imputed employment estimates for non-respondent establishments based on trends in employment for respondents to the quarterly inquiry of a similar size and activity.

Changes from Previous Series:

Some methodological changes from the previous series to the new series have resulted in differences in estimates for retrospective periods. The methodological changes are:-

Sectoral Classification

The sectoral classification used in this series is NACE Rev 1 which is already being used for the Industrial Earnings & Hours Worked series, the Census of Industrial Production and the Monthly Production Index.

Employment Adjustment

In the previous series, adjustments were carried out at the level of the reporting unit in order to align employment estimates with those reported in the Census of Industrial Production. For the new series, this practice has been discontinued.

Definitions **Persons engaged:** All persons engaged in the industrial establishment as defined above are in this category. It includes:

- full-time and part-time employees;
- proprietors and family members not paid a definite wage or salary;
- persons on holidays or temporarily out sick.

Industrial workers: This employment category includes operatives, maintenance workers, storekeepers, packers, cleaners, basic supervisory staff and apprentices.

Managerial Workers: Administrative, managerial and technical workers are included in this category.

Clerical Workers: This employment category includes clerical and other office staff and sales representatives.
