Introduction

This report presents results for the 2004 Prodcom Inquiry conducted by the Central Statistics Office (CSO). This is an annual survey of the value and volume of products produced by industrial enterprises in Ireland and sold during the reference year. It is carried out in compliance with *EU Council Regulation on the Establishment of a Community Survey of Industrial Production* (No. 3924/91). The results are presented using a harmonised EU product classification called PRODCOM. The title comes from the French term “PRODUCTION COMMUNAUTAIRE” (Community Production).

This publication contains results in respect of the year 2004. All product sales are shown in Euro.

Appreciation is extended to all enterprises that co-operated in this annual inquiry

Principal Features

The total value of industrial products sold and fees earned from industrial services and work on commission in 2004 was EUR 99,852m. The largest sales relate to the *manufacture of chemicals, chemical products, man-made fibres; manufacture of rubber and plastic products* where the total value of non-confidential sales was EUR 28,239m.

The primary product groupings were;

- Manufacture of other organic basic chemicals (EUR 10.4 billion) (NACE 2414);
- Manufacture of computers and other processing information products (EUR 14.2 billion) (NACE 3002);
- Reproduction of computer media (EUR 10.5 billion) (NACE 2233);
- Manufacture of pharmaceutical preparations (EUR 13.2 billion) (NACE 2442);
- Manufacture of medical and surgical equipment and orthopaedic appliances (EUR 3.6 billion) (NACE 3310);
- Manufacture of electronic valves and tubes and other electronic components (EUR 2.9 billion) (NACE 3210);
- Operation of dairy and cheese making (EUR 2.2 billion) (NACE 1551);
- Manufacture of basic pharmaceutical products (EUR 1.7 billion) (NACE 2441);
- Production and preserving of meat (EUR 2.3 billion) (NACE 1511);

The following table shows the total value of industrial products produced and sold in each PRODCOM product group.

¹ A number of products within the PRODCOM product groups 23-25, and 40 are confidential. In order to publish total data in respect of 2003 and 2004 a category has been added consisting of the summed value of the confidential products from these groups. Furthermore product group 23 was reported for the first time in 2003.

² The figures for group 24-25 are not comparable between years since the proportion of them made confidential differs from year to year.

Comparison

Total product sales have increased by 3.1 % over 2003.

In the years between 1996 and 2004 the total value of products manufactured and sold increased by 128%; increasing from EUR 43,882m in 1996 to EUR 99,851m in 2004. This % change is distorted by the inclusion of data for product group 232 (refined petroleum products) which was collected for the first time in the year 2003, and product group 40 (electricity and gas) which was collected for the first time in the year 2000.

Scope and Coverage

The survey covers all industrial enterprises with three or more persons engaged which are wholly or primarily engaged in industrial production and industrial services in the Mining, Quarrying, Manufacturing, Electricity and Gas industries. The survey does not cover the following sectors and products:

- products of coal and lignite mining;
- peat extraction;
- processing of nuclear fuel;
- recycling.

Survey Organisation

Customised questionnaires are issued to enterprises on an annual basis, seeking information at a detailed level on the products sold in the previous year, irrespective of the year of manufacture. A residual category is included in each questionnaire for the recording of new products. The details returned are classified by reference to the PRODCOM classification. Individual questionnaires are annually updated to distinguish the particular products produced by each enterprise.

Product Groupings

In the PRODCOM classification products are grouped by the NACE Rev.1.1 four digit industrial sectors in which they are primarily produced (i.e. characteristic products). NACE Rev.1.1 is the EU system for classifying economic activities. The value and volume data shown for a product, therefore, includes not only the production by enterprises classified to the NACE sector where it is primarily produced but also its subsidiary production by enterprises classified to the other NACE Rev. 1 .1 sectors.

Classification of Products

The PRODCOM classification is organised into product divisions and classes corresponding to the sectoral divisions (2 digit) of NACE Rev.1.1. It uses an eight-digit product code of the form **XX.XX.XX.YY**.

The first four digits of the code correspond to the 4-digit classes of NACE Rev. 1.1. The first six digits are the Community Classification of Products by Activity (CPA) codes. The CPA provides a detailed listing of the characteristic products for each 4-digit NACE Rev. 1.1 economic activity. The last two digits provide a more detailed breakdown of the CPA classes into PRODCOM product headings.

There is a direct link between the PRODCOM classification and the EU foreign trade Combined Nomenclature (CN). Each PRODCOM 8-digit heading covers one or more CN 8-digit headings. The following example shows the link between all the different classifications:

PRODCOM	Description	Foreign Trade HS/CN code
15.12.11.13	Fresh or chilled whole chickens	0207.11

PRODCOM code 15.12.11.13 Fresh or chilled whole chickens is one of the characteristic *products* of the 4-digit economic *activity* NACE Rev.1.1 15.12 Production and preserving of poultry meat. Other characteristic *products* of the *activity* NACE Rev.1.1 15.12 include turkeys, ducks, geese and guinea fowl; offals and livers broken down further as to whether fresh and chilled or frozen and whether whole or in cuts and pieces.

The PRODCOM code 15.12.11.13 covers the same *products* as HS/CN code 0207.11, which is the code in foreign trade statistics under which imports and exports of chickens appear. Thus for any *product* a direct link can be made for its production (PRODCOM code) and its imports and exports (HS/CN code) to derive domestic consumption (production plus imports minus exports). This in turn can be linked to the sector of economic activity.

As described above PRODCOM data may be combined with foreign trade data (imports and exports) to derive apparent domestic consumption. Apparent consumption is calculated by adding imports to domestic production and subtracting exports. This approximation may be of limited value in some instances due to the need to suppress details to preserve confidentiality, timing differences between PRODCOM and foreign trade data, or different valuation methods.

Variables

The data covers the value and volume of products manufactured and sold by enterprises, irrespective of the year of manufacture. Also included are the fees earned by the enterprises for industrial services provided and work done on commission.

Value relates to the net selling value, excluding VAT, invoiced to customers. It excludes duties and taxes payable on the goods such as excise duties, separately charged freight costs, discounts and goods resold without any further processing.

Estimation for Non Response

Details for non-respondents were estimated using turnover data from other CSO surveys, principally the Census of Industrial Production. Total turnover was disaggregated, where possible, by reference to the product mix details supplied by the non-respondents to an earlier PRODCOM inquiry. This code also includes the total value of confidential product headings. In the case of volume the response rate tends to be lower and this makes estimates more difficult. Estimates for missing volumes have been made in certain cases by using the average unit price from the respondent firms.

Confidentiality

The information which was provided by enterprises is treated as strictly confidential in accordance with national and EU law. Rules are applied to both the value and volume data of each individual product or service to identify confidential data. Direct or indirect disclosure of information relating to identifiable respondents is avoided by suppressing confidential data and amalgamating such data with other data. The purpose of this amalgamation is to protect confidential data while at the same time allowing the total value of products produced to be estimated. Individual products which are confidential are identified in the tables with the letter C.

Presentation of Results

The report is organised into chapters, each chapter covering the products classified to each NACE Rev. 1.1 division and class. In each table the value of confidential products is usually combined into the special .99.99 category. **However, where this total category is still confidential, it is suppressed and, in these circumstances, the total value of sales excludes the value of confidential data.** Each chapter also contains a total table giving the total value of each four-digit product grouping along with the total value of suppressed confidential totals.

An electronic copy of this publication is available on the CSO web-site www.cso.ie.

Consideration is currently being given to making the Prodcom data available in electronic format only from reference year 2005 onwards through the CSO website. This would take the form of a database which users could interrogate. Please feel free to provide feedback on this issue or any other issue relating to the presentation of these results by emailing industry_rap@cso.ie.

Appendices

Appendix 1

1. Definition

Net Selling Value

The value of sales for each product relates to the net selling value i.e. the net amount (excluding VAT) invoiced to customers.

This value includes amounts charged by enterprises to customers for transport of goods by their own vehicles and packaging costs.

Excluded from this definition are:

- duties and taxes payable on the goods e.g. excise duties;
- separately charged freight costs;
- any discounts granted to customers;
- goods resold with further processing i.e. goods merchantled or factored.

2. Products

Products include:

- all finished goods made from materials or intermediate goods purchased by you;
- semi-finished goods transferred for further processing to another establishment of the business (valued at their estimated value);
- goods which were substantially made in your factory but on which some intermediary work was done on commission by another firm;
- goods fully manufactured by you on commission from materials supplied by another firm;
- goods partly manufactured by you on commission;
- work done for a fee or charge on products supplied by another firm within the State and then returned for further processing prior to becoming a finished product;
- any other work done on commission.

3. Prodcom

PRODCOM is the title of the EC production statistics for Mining and Quarrying, Manufacturing, and Electricity, Gas and Water Supply, i.e. Sections C, D and E of the Statistical Classification of Economic Activities in the European Community (NACE Rev. 1.1). The title comes from the French “PRODUCTION COMMUNAUTAIRE” (Community production).

The basis of the survey is Council Regulation (EEC) No. 3924/91 on the establishment of a Community survey of industrial production (PRODCOM Regulation). In accordance with Article 2(2) of the above-mentioned Regulation, production is to be recorded according to the product headings of the PRODCOM list.

The list does not, however, cover all the fields:

- it does not include the products of coal and lignite mining, peat extraction, extraction of crude petroleum and natural gas, processing of nuclear fuel and water supply (Divisions 10, 11 and 41 of NACE Rev. 1.1), since they are already covered in a separate set of Community statistics;
- it does not include the products of division 37 of NACE Rev. 1.1 (Recycling). Specific studies are still being conducted into their statistical coverage.
