

## Information Society Statistics - Households 2012

The Information and Communication Technology (ICT) household survey covers a range of topics related to the use of ICT by households and individuals. The ICT questionnaire focuses on the use of ICT for non-work related activities. This report presents findings from the ICT household survey in 2012 with corresponding data for earlier years.

### Summary of main findings

- It is estimated that 83% of households in 2012 have access to a computer at home. *See table 1a.*
- 81% of households have access to the internet at home. *See table 1b.*
- 77% of individuals used the internet in the last 3 months. 58% of individuals used the internet daily. *See tables 2a and 2b.*
- The most popular activities of individuals who accessed the internet in the last three months were *E-mail* (66%), *Finding information about goods or services* (63%), *Using services related to travel or travel related accommodation* (46%) and *Social networking* (45%). *See table 3.*
- Other travel arrangements* (30%), *Holiday accommodation* (28%) and *Tickets for events* (27%) were the most popular types of internet purchases in the last 12 months (from Q1 2012). *See table 4.*

The results are based on a household survey of ICT usage, conducted in the first quarter of 2012 as part of the Quarterly National Household Survey (QNHS). Additional results from the survey are available via *Statbank*, CSO's electronic dissemination service (<http://www.cso.ie/en/databases>). ICT usage tables are available under the heading "Information Society". *See Background Notes.*

**Table A Household access to computer/internet**

	% of households				
	2008	2009	2010	2011	2012
Households with access to a computer	70	73	76	81	83
Households with access to the internet	63	67	72	78	81

There has been an increase of 18 percentage points in the household level of access to the internet between 2008 and 2012, with an increase of 13 percentage points in the level of access households have to a computer (*see table A and table 1b*).

In 2012, 92% of individuals aged 16-29 used the internet "in the last three months". In contrast just 40% of individuals aged 60-74 used the internet during the same period (*see table 2a*).

Students (at 94%) were most likely to have used the internet "in the last three months" (*see table 2a*).

**Table B Internet purchases**

	% of individuals	
	2011	2012
<b>Types of purchases</b>		
Food and groceries	4	4
Household goods	8	10
Clothes/sports goods	17	20
Electronic equipment	13	12
Share purchases/financial services	5	7
Films/music	14	14
Books/magazines/newspapers/e-learning material	14	16
Other computer software and upgrades	6	8
Computer hardware	8	4
Telecommunication services	4	8
Holiday accommodation	28	28
Other travel arrangements	30	30
Tickets for events	27	27

**Note:** The ICT questionnaire allowed respondents to select multiple responses when necessary to answer the question fully

## **TABLES**

Note: Tables 3 and 4 allowed respondents to select multiple responses/reasons when necessary to answer the question fully. This means that percentages may not add to 100.

## CSO databank tables

**CSO Statbank:** Updated tables with further 2012 Information Society Statistics (ICT) are available on the CSO Statbank. To access the CSO website go to:

<http://www.cso.ie>

- Database
- Statbank (CSO Main Dissemination Service)
- Information Society
- ICT usage by households/ICT usage by individuals

**Direct links to Information society statistics (ICT) databank tables and a description of the table topic can be found below:**

ICT statistics on individuals	<a href="http://cso.ie/shorturl.aspx/131">http://cso.ie/shorturl.aspx/131</a>
When persons last used a computer or used the internet by individual characteristics, statistic, frequency of use and year.	ICA04, ICA05, ICA06, ICA07, ICA08, ICA09, ICA10
How often persons used a computer or used the internet in the last three months by individual characteristics, frequency of use and year.	ICA18, ICA19, ICA20, ICA21, ICA22, ICA23, ICA24
Retail internet activity of persons aged 18 years and over by individual characteristics, statistic and year.	ICA30, ICA31, ICA32, ICA33, ICA34, ICA35, ICA36
Types of purchases made by individuals over the internet by individual characteristics, statistic and year.	ICA50, ICA51, ICA52, ICA53, ICA54, ICA55, ICA56 ICA57
ICT statistics on households	<a href="http://cso.ie/shorturl.aspx/130">http://cso.ie/shorturl.aspx/130</a>
Households with computer connected to the internet by household characteristics, statistic and year.	ICA25, ICA26, ICA27
Why households do not have an internet connection by household characteristics, statistic and year.	ICA41, ICA42, ICA44, ICA45

## Background Notes

**Reference period**

A module on Information and Communication Technology (ICT) for households is included in the Quarterly National Household Survey (QNHS) in the three months from January to March each year (Quarter 1). Questions are asked about ICT activities for the reference period of twelve months or three months prior to the date of interview.

**Purpose of survey**

The annual ICT household survey included in the QNHS fulfils the EU requirement under Regulation (EC) No 808/2004 of the European Parliament and of the Council of 21 April 2004 concerning Community statistics on the information society (OJ L143, 30.04.2004, p. 49). The QNHS began in September 1997, replacing the annual April Labour Force Survey (LFS). The purpose of the QNHS is the production of quarterly labour force estimates and occasional reports on special social topics.

**Grossing effect**

The QNHS grossing procedure aligns the distribution of persons covered in the survey with independently determined population estimates at the level of sex, five-year age group and region.

**Statistical significance**

All estimates based on sample surveys are subject to error, some of which is measurable. Where an estimate is statistically significantly different from another estimate it means that we can be 95% confident that differences between those two estimates are not due to sampling error. Unless otherwise stated, changes and differences mentioned in the text have been found to be statistically significant at the 95% confidence level.

**Survey questionnaire**

The 2012 ICT household questionnaire is available at:

<http://www.cso.ie/en/qnhs/qnhsmethodology/ictsurveyquestionnaire-q12012/>

Detailed Methodology and Background notes available at:
