Introduction

This report presents the results for the Annual Services Inquiry for the year 2003. The survey covers the retail, wholesale, real estate, renting and business services and other selected services sectors i.e. covering the NACE Rev.1.1¹ sectors G, H, I, K, and O. The survey was conducted by the Central Statistics Office in compliance with Council Regulations (EC, EURATOM) No. 58/97, No. 410/98 and European Parliament and Council Regulation No. 2056/2002.

This report also presents results broken down by region (NUTS 2 level).

New Developments

- Detailed Tables of Changes in Fixed Capital Assets.
- Improved E-Commerce Tables.
- Improved Tables on Nationality of Ownership.
- New Table detailing Exports and Imports of Goods and Services.

Scope

The Annual Services Inquiry primarily covers balance sheet information: Turnover, purchases, stocks, personnel costs etc. Questions on Internationalisation and E-Commerce were also asked in order to provide an overview of the services sector, while local unit questions were needed to produce the regional split.

Coverage

The ASI is an Enterprise survey, where an enterprise is defined as the smallest legally independent unit. The survey covers all enterprises in the retail, wholesale, real estate, renting and business services and other selected services sectors (NACE Rev.1.1 sectors G, H, I, K and O). The ASI employs different sampling fractions that vary by region, NACE and size class. Enterprises that traded for at least 6 months of 2003 are included in the survey. The 2003 results also include summary data from sector J (Financial Intermediation) which was collected directly from the relevant regulatory authorities. This report also includes summary data from the Post and Telecommunications sector (NACE Rev.1.1 64).

Activity Classification

The 2003 results are classified by NACE Rev.1.1. The NACE code of each enterprise included in this survey was determined from the predominant activity of that enterprise, based on information provided to this or other CSO inquiries. *See Appendix 2.*

¹NACE Rev.1.1: Statistical classification of economic activities in the European Community

Number of Enterprises

There were an estimated 83,276 enterprises operating in the Irish Services Sectors during 2003. Wholesale and Retail accounted for 31,080 (37%), Hotels and Restaurants 12,301 (15%), Transport, Storage and Communications 6,747 (8%), Real estate, Renting and Business services 26,666 (32%), while Other Community, Social and Personal Service Activities made up the balance with 6,482 (8%).

Table A - Number of Enterprises

Nace Rev. 1.1	Services Sector	State	Eastern & Southern Region	Border Midlands & Western Region
G	Wholesale and Retail Distribution	31,080	22,465	8,615
H	Hotels and Restaurants	12,301	8,340	3,962
I	Transport, Storage and Communications	6,747	5,187	1,560
K	Real Estate Renting and Business Services	26,666	22,327	4,339
O	Other Community, Social and personal service activities	6,482	4,818	1,664
	Total	83,276	63,138	20,139

The Eastern and Southern region had 63,138 enterprises (76%) while 20,139 enterprises were situated in the Border, Midlands and Western region. The dominance of the Eastern and Southern region was manifest in all sectors but was particularly evident in the Real Estate, Renting and Business Services and in the Transport, Storage and Communications sectors, where the Eastern and Southern region accounted for 84% and 77% of the enterprises in those sectors respectively.

Wages & Salaries

The wages and salaries bill in this report applies to the full year, while numbers employed include full-time and part-time employees and relate to a specific week in September: the week ending 12th September. This means an average wage per sector cannot be meaningfully calculated from these data, however a crude comparison can be done in order to indicate disparities between the Eastern and Southern region and the Border, Midlands and Western region. When comparing these averages, then it should be remembered that these comparative averages do not give average wage or salary levels for any sector or region but only serve to provide a crude relativity between the two regions.

The total wages and salaries bill for the Services Sectors covered by the ASI was €14.6 billion with the Wholesale and Retail sector accounting for the biggest share of almost €5.3 billion (36%).

Regional data

Of the 83,276 enterprises operating for the duration of 2003, 63,138 or 76% were situated in the Eastern and Southern region. The Border, Midlands and Western region only accounted for 15% or €18.6 billion of the total

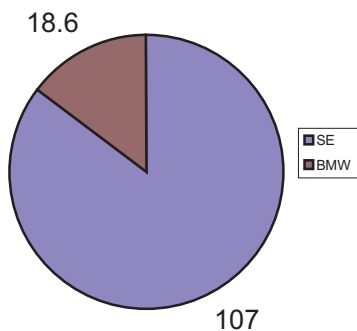

turnover (€125.6 billion) generated by all the services sectors included in this report.

Table B - Main variables by Region

Region	Turnover	Wages & Salaries	Number of Persons engaged	Number of Employees
	(€ Billion)	(€ Billion)	(000's)	(000's)

Border, Midlands & Western	18.6	2.0	134.2	112.2
Total	125.6	14.6	713.1	627.8

There were 627,788 persons employed in the services sector during September 2003, of which 515,633 or 82% were working in the Eastern and Southern region. €14.6 billion was paid in wages and salaries during the course of the year, the bulk of which, €12.6 billion or 86% was paid to those working in the Eastern and Southern region.

E-Commerce

Some basic E-commerce questions were asked in the 2003 Annual Services Inquiry. Enterprises were asked to specify whether or not they had an e-mail address, a website and what percentage of their total turnover resulted from orders submitted using e-mail, EDI or the Internet.

Foreign Affiliate Statistics

Additional information regarding the Nationality of Ownership of the enterprises was collected as part of the Annual Services Inquiry 2003. Enterprises were asked to specify the location of their ultimate beneficial owner i.e. the top company in the corporate structure. The data presented in *Tables 22, 23, 24 and 25* show results from enterprises with 20 or more employees. The data is grouped into Irish-Owned and Foreign-Owned and where possible, the Foreign-Owned enterprises are grouped by country. A summary of the main results is available in *Table G*.

Data collection & Non-response

A total of 15,811 statutory Annual Services Inquiry 2003 forms were issued to the sampled enterprises from the Business Register in April 2004. Reminders were issued in May, June and July. The final reminder also notified the enterprise that a field officer would be calling to collect the form. Of the 15,811 enterprises sampled, 4,187 were deemed to be non-relevant. The majority of these non-relevant enterprises were those that had ceased

trading or relocated away from the contact address or were duplicates of existing enterprises. This left an effective sample of 11,624. The field force of 32 field officers was employed to visit 50% of the sampled enterprises. Completed forms were eventually received from 9,004 enterprises (77%). A breakdown of the response rate per sector is available in *Table H* below. More detailed coverage is available in *Appendix 1*.

Background Notes

Background Notes

Legislation The Annual Services Inquiry is a Statutory Inquiry. A Statutory Order [Statistics (Services Inquiries) Order, SI No. 464/1998, made under the Statistics Act, 1993 forms the legal basis for the inquiry. The substance of the Inquiry is determined under Council Regulation, [EC, EURATOM] No. 58/97 of 20 December 1996 concerning Structural Business Statistics, Council Regulation (EC, Erratom) No. 410/98 of 16 February 1998 and Regulation (EC) No. 2056/2002 of the European Parliament and of the Council of 5 November 2002.

Central Business Register The CSO's Central Business Register provides the sampling frame from which the Annual Services Inquiry sample is selected each year. The Central Business Register is also used as the basis for the sampling frame used to gross sample data to the population. The 1995 inquiry was the first survey based on the Business Register, as previous inquiries were sampled and grossed with reference to the 1988 Census of Services register. The Business Register is continuously updated, and thus provides a more satisfactory approach to grossing than used previously. However, this change of registers, in addition to changes in classifications, means that the results of the 1995 inquiry and subsequent inquiries are not fully comparable with results from previous years. Also because a more complex sampling/grossing methodology has been used from 1999 ASI onwards, the results are not directly comparable to previous years and result in a discontinuity in the series.

Sample Design The ASI is designed to provide grossed estimates of the principal trading aggregates for all enterprises in the relevant sectors. The 'enterprise' is the unit used for survey purposes i.e. one return is sought in respect of each enterprise covering all constituent branches, local units or subsidiaries. The sample is selected based on number of persons engaged in the enterprise i.e. number of proprietors plus number of full-time and part-time staff. A census of enterprises with 20 or more persons engaged is selected. In addition a stratified random sample is selected for the enterprises with less than 20 persons engaged, with decreasing sampling proportions taken in the lower persons engaged ranges. The employment size classes generated for sampling and grossing are as follows:

Persons Engaged	Size Class
1-4	1
5-9	2
10-19	3
20+	4

For enterprises with less than 20 persons engaged, the strata were organised by region, NACE Rev.1.1 and employment size class. The sampling fractions used differed by region, NACE Rev.1.1 and employment size class. The sampling fractions per sector in Table 1 below give a broad outline of the average sampling fractions used for the 2003 Annual Services Inquiry.

Table 1 - Sampling Fractions for 2003 Annual Services Inquiry

Nace Rev. 1.1	Services Sector	Size Class 1	Size Class 2	Size Class 3	Size Class 4
G	Wholesale and Retail Distribution	1/11	1/7	1/4	ALL
H	Hotels and Restaurants	1/12	1/10	1/5	ALL
I	Transport, Storage and Communications	1/14	1/11	1/6	ALL
K	Real Estate Renting and Business Services	1/13	1/8	1/5	ALL
O	Other Community, Social and personal service activities	1/11	1/7	1/5	ALL
	Total	1/8	1/7	2/9	ALL

Grossing There are two different grossing factors used, one for the number of enterprises and one for all accounting and employment variables. Total persons engaged from the Business Register is used as the grossing factor for all accounting and employment variables, while the total number of enterprises is used for number of enterprises grossing factor. As noted earlier, the Business Register forms the basis of the sampling frame used for grossing sample data to population

estimates. The grossing variable data (no. of persons engaged and no. of enterprises) in the sampled portion of enterprises originally selected from the Business Register, are used to update those data on the Register. Decay and growth factors are then calculated for each size class and sector to adjust the non-sampled portion of the Register. The grossing factors for a particular stratum are then calculated by dividing the total persons engaged (number of enterprises) in that stratum according to the adjusted or updated Business Register by the number of persons engaged (number of enterprises) in the sampled enterprises. Because of the independent grossing methods used to provide estimates of the numbers of enterprises (which are taken directly from the Business Register) and the accounting data relating to them there cannot be total consistency within tables. For example, this can be seen by comparing the number of persons engaged in 1 person enterprises and the number of enterprises in this category. These differences are minor and inevitably arise from the independent estimation methods used.

Business Classification

The business classification used for these inquiries is now based on the Statistical Classification of Economic Activities in the European Community (NACE Rev.1.1). The results published here are based on combinations of four digit NACE Rev.1 classes (see Appendix 2.);

Confidentiality

The Annual Services Inquiry attempts as far as possible to publish the greatest level of detail but it should be noted that the ASI fully respects all confidentiality rules. Annual Services data is collected and published using 3 – digit and 2 – digit NaceRev.1.1 classifications. However data is not published where the following situations occur:

Primary Confidentiality.

A category is classified primary confidential if any one of the following conditions applies:

- 1 There are less than three units in the relevant NaceRev.1.1 category.
- 2 One unit in the relevant NaceRev.1.1 category accounts for more than 80% of the total (dominance rule 1).
- 3 Two units in the relevant NaceRev.1.1 category account for more than 90% of the total (dominance rule 2).

Secondary Confidentiality.

A category is classified secondary confidential if publishing that category indirectly reveals information about a confidential category.

Instead, the NaceRev.1.1 code that is confidential is aggregated with another NaceRev.1.1 code and results are published at this less detailed level.

NUTS2 Regions

The regional classifications in this publication are based on the NUTS (Nomenclature of Territorial Units) classification used by Eurostat. There are two regions in Ireland at the NUTS2 level. These are:

Border, Midlands and Western NUTS2 Region. Eastern and Southern NUTS2 Region.

The counties corresponding to each of the two regions are included below:

Reliability of Results

Estimation of survey results from data relating to only a sample of enterprises introduces a statistical variability that would not be present if data had been collected for all relevant enterprises. This means that the survey results cannot be taken as accurate to the full degree shown in this report.

The variability is expressed by means of the coefficient of variation. This coefficient gives the relative size of the “sampling error” (variability) present in an estimate compared with the estimate itself. In general, estimates can be said to have a relative precision of twice their coefficient of variation. The estimated coefficients of variation for the variables Turnover, Number of Persons Engaged and Gross Value Added broken down by NACE Rev. 1.1 at 2 digit level are shown in Table 2 below. Table 3 shows the coefficients of variation for the same variables broken down by Number of Persons Engaged.

In general, the more detailed the classification provided the greater the coefficient of variation of the estimates. In the derivation of the results the assumption was made that non-respondents had similar characteristics and activity levels to those of respondents in the same stratification cell. This assumption, which is a standard one in surveys such as this, may have resulted in some slight bias being introduced into the results. Moreover, although every effort was made to ensure that the returns received were correct in all respects it is inevitable that some minor non-sampling errors remained undetected.
