## Introduction

This report presents the results for the Annual Services Inquiry for the year 2006. The survey covers the retail, wholesale, real estate, renting, business services and other selected services sectors, i.e. sectors G, K, H, I and O of the NACE Rev.1.1<sup>1</sup>. The survey was conducted by the Central Statistics Office in compliance with Council Regulation (EC, EURATOM) No. 58/97, No. 410/98 and European Parliament and Council Regulation No. 2056/2002.

This report also presents results broken down by region (NUTS 2 level).

## New Developments

- Improved Tables on Purchases of Goods and Services
- Improved Table on Capital Acquisitions
- Improved tables on Personnel Costs

## Scope

The Annual Services Inquiry primarily covers balance sheet information: turnover, purchases, stocks, personnel costs etc. Questions on Internationalisation and E-Commerce were also asked in order to provide an overview of the services sector, while local unit questions were needed to produce the regional split.

## Coverage

The ASI is an Enterprise survey, where an enterprise is defined as the smallest legally independent unit. The survey covers all enterprises in the retail, wholesale, real estate, renting and business services and other selected services sectors (NACE Rev.1.1 sectors G, H, I, K and O). The ASI employs different sampling fractions that vary by region, NACE and size class. Enterprises that traded for at least 6 months of 2006 are included in the survey. The 2006 results also include summary data from sector J (Financial Intermediation), which was collected directly from the relevant regulatory authorities.

## Activity Classification

The results are classified by NACE Rev.1.1. The NACE code of each enterprise included in this survey was determined from the predominant activity of that enterprise, based on information provided to this or other CSO inquiries. *See Appendix 2.*

<sup>1</sup> NACE Rev.1.1: Statistical classification of economic activities in the European Community

## Number of Enterprises

There were an estimated 91,292 enterprises operating in the Irish Services Sectors during 2006. Wholesale and Retail accounted for 31,731 (35%), Hotels and Restaurants 10,635 (12%), Transport, Storage and Communications 6,839 (7%), Real Estate, Renting and Business Services 34,698 (38%), while Other Community, Social and Personal Service Activities made up the balance with 7,388 (8%).

| O             | Other Community, Social and personal service activities | 7,388         | 5,431  | 1,957          |
| <b>Total</b>  |   | <b>91,292</b> | <b>68,770</b>                                | <b>22,522</b>  |

The Eastern and Southern region had 68,770 enterprises (75%) while 22,522 enterprises (25%) were situated in the Border, Midlands and Western region. The dominance of the Eastern and Southern region manifested in all sectors, but was particularly evident in the Real Estate, Renting and Business Services, where it accounted for 82% of the enterprises.

## Wages & Salaries

The wages and salaries bill in this report applies to the full year, while numbers employed include full-time and part-time employees and relate to a specific week in September: the week ending 8<sup>th</sup> September. This means an average wage per sector cannot be meaningfully calculated from these data, however a crude comparison can be done in order to indicate disparities between the Eastern and Southern region and the Border, Midlands and Western region.

The total wages and salaries bill for the Sectors covered by the ASI was €20.1 billion with the Wholesale and Retail sector accounting for the biggest share of almost €7.3 billion (36%).

## Regional data

Of the 91,292 enterprises operating for the duration of 2006, 68,770 or 75% were situated in the Eastern and Southern region. The Border, Midlands and Western region only accounted for 15% or €27.8 billion of the total turnover (€183.2 billion) generated by all the services sectors included in this report.

## Foreign Affiliate Statistics

Additional information regarding the Nationality of Ownership of the enterprises was collected as part of the Annual Services Inquiry 2006. Enterprises were asked to specify the location of their ultimate beneficial owner, i.e. the top company in the corporate structure. The data presented in *Tables 28 to 31* show results from enterprises with 20 or more employees. The data is grouped into Irish-Owned and Foreign-Owned and where possible, the Foreign-Owned enterprises are grouped by country. A summary of the main results is available in *Table G*.

## Family Business

Respondents to the Annual Services Inquiry were asked to indicate whether or not the enterprise was a family business. A detailed analysis of this information is provided in tables 33 to 38. Table H below shows that Family Businesses account for 52% of services sector enterprises, 32% of turnover, 43% of persons engaged and 30% of gross value added for the services sectors.

## Data collection & Non-response

A total of 20,069 statutory Annual Services Inquiry 2006 forms were issued to the sampled enterprises from the Business Register in April 2007. Reminders were issued in May, June and July. The final reminder also notified the enterprise that a field officer would be calling to collect the form. Of the 20,069 enterprises sampled, 3,393 were deemed to be non-relevant. The majority of these non-relevant enterprises were those that had ceased trading or were duplicates of existing enterprises. This left an effective sample of 16,676. The field force of 28 field officers was employed to visit 55% of the sampled enterprises. Completed forms were eventually received from 12,023 enterprises (72%). A breakdown of the response rate per sector is available in *Table I* below. More detailed coverage is available in *Appendix 1*.

## **Background Notes**

## Background Notes

**Legislation** The Annual Services Inquiry is a Statutory Inquiry. A Statutory Order [Statistics (Services Inquiries) Order, SI No. 77/2008, made under the Statistics Act, 1993 forms the legal basis for the inquiry. The substance of the Inquiry is determined under Council Regulation, [EC, EURATOM] No. 58/97 of 20 December 1996 concerning Structural Business Statistics, Council Regulation (EC, Erratom) No. 410/98 of 16 February 1998 and Regulation (EC) No. 2056/2002 of the European Parliament and of the Council of 5 November 2002.

**Central Business Register** The CSO's Central Business Register provides the sampling frame from which the Annual Services Inquiry sample is selected each year. The Central Business Register is also used as the basis for the sampling frame used to gross sample data to the population. The 1995 inquiry was the first survey based on the Business Register, as previous inquiries were sampled and grossed with reference to the 1988 Census of Services register. The Business Register is continuously updated, and thus provides a more satisfactory approach to grossing than used previously. However, this change of registers, in addition to changes in classifications, means that the results of the 1995 inquiry and subsequent inquiries are not fully comparable with results from previous years. Also because a more complex sampling/grossing methodology has been used from 1999 ASI onwards, the results are not directly comparable to previous years and result in a discontinuity in the series.

**Sample Design** The ASI is designed to provide grossed estimates of the principal trading aggregates for all enterprises in the relevant sectors. The 'enterprise' is the unit used for survey purposes i.e. one return is sought in respect of each enterprise covering all constituent branches, local units or subsidiaries. The sample is selected based on number of persons engaged in the enterprise i.e. number of proprietors plus number of full-time and part-time staff. A census of enterprises with 20 or more persons engaged is selected. In addition a stratified random sample is selected for the enterprises with less than 20 persons engaged, with decreasing sampling proportions taken in the lower persons engaged ranges. The employment size classes generated for sampling and grossing are as follows:

| Persons Engaged | Size Class |
|-----------------|------------|
| 1-4             | 1          |
| 5-9             | 2          |
| 10-19           | 3          |
| 20+             | 4          |

For enterprises with less than 20 persons engaged, the strata were organised by region, NACE Rev.1.1 and employment size class. The sampling fractions used differed by region, NACE Rev.1.1 and employment size class. The sampling fractions per sector in Table 1 below give a broad outline of the average sampling fractions used for the 2006 Annual Services Inquiry.

**Table 1 - Sampling fractions, 2006**

|--|---|--|--|-------|--------|---------|-------------------------|---------|--------|-------|--------------|
| <b>Grossing</b>                                  | There are two different grossing factors used, one for the number of enterprises and one for all accounting and employment variables. Total persons engaged from the Business Register is used as the grossing factor for all accounting and employment variables, while the total number of enterprises is used for number of enterprises grossing factor. As noted earlier, the Business Register forms the basis of the sampling frame used for grossing sample data to population estimates. The grossing variable data (no. of persons engaged and no. of enterprises) in the sampled portion of enterprises originally selected from the Business Register, are used to update those data on the Register. Decay and growth factors are then calculated for each size class and sector to adjust the non-sampled portion of the Register. The grossing factors for a particular stratum are then calculated by dividing the total persons engaged (number of enterprises) in that stratum according to the adjusted or updated Business Register by the number of persons engaged (number of enterprises) in the sampled enterprises. Because of the independent grossing methods used to provide estimates of the numbers of enterprises (which are taken directly from the Business Register) and the accounting data relating to them there cannot be total consistency within tables. For example, this can be seen by comparing the number of persons engaged in 1 person enterprises and the number of enterprises in this category. These differences are minor and inevitably arise from the independent estimation methods used. |  |  |       |        |         |                         |         |        |       |              |
| <b>Business Classification</b>                   | The business classification used for these inquiries is now based on the Statistical Classification of Economic Activities in the European Community (NACE Rev.1.1). The results published here are based on combinations of four digit NACE Rev.1.1 classes (see Appendix 2.).   |  |  |       |        |         |                         |         |        |       |              |
| <b>Confidentiality</b>                           | <p>The Annual Services Inquiry attempts as far as possible to publish the greatest level of detail but it should be noted that the ASI fully respects all confidentiality rules. Annual Services data is collected and published using 3-digit and 2-digit NACE Rev.1.1 classifications. However data is not published where the following situations occur:</p> <p><u>Primary Confidentiality.</u></p> <p>A category is classified primary confidential if any one of the following conditions applies:</p> <ol style="list-style-type: none"> <li>1 There are less than three units in the relevant NACE Rev.1.1 category.</li> <li>2 One unit in the relevant NACE Rev.1.1 category accounts for more than 80% of the total (dominance rule 1).</li> <li>3 Two units in the relevant NACE Rev.1.1 category account for more than 90% of the total (dominance rule 2).</li> </ol> <p><u>Secondary Confidentiality.</u></p> <p>A category is classified secondary confidential if publishing that category indirectly reveals information about a confidential category.</p> <p>Instead, the NACE Rev.1.1 code that is confidential is aggregated with another NACE Rev.1.1 code and results are published at this less detailed level.</p>  |  |  |       |        |         |                         |         |        |       |              |

### Reliability of Results

Estimation of survey results from data relating to only a sample of enterprises introduces a statistical variability that would not be present if data had been collected for all relevant enterprises. This means that the survey results cannot be taken as accurate to the full degree shown in this report.

The variability is expressed by means of the coefficient of variation. This coefficient gives the relative size of the “sampling error” (variability) present in an estimate compared with the estimate itself. In general, estimates can be said to have a relative precision of twice their coefficient of variation. The estimated coefficients of variation for the variables Turnover, Number of Persons Engaged and Gross Value Added broken down by NACE Rev.1.1 at 2 digit level are shown in Table 2 below. Table 3 shows the coefficients of variation for the same variables broken down by Number of Persons Engaged.

In general, the more detailed the classification provided the greater the coefficient of variation of the estimates. In the derivation of the results the assumption was made that non-respondents had similar characteristics and activity levels to those of respondents in the same stratification cell. This assumption, which is a standard one in surveys such as this, may have resulted in some slight bias being introduced into the results. Moreover, although every effort was made to ensure that the returns received were correct in all respects it is inevitable that some minor non-sampling errors remained undetected.

### Response Burden

Respondents were asked to estimate the number of minutes it took them to complete the Annual Services Inquiry form. The purpose of this question was to indicate the response burden placed on enterprises selected for the survey. The average response time for enterprises was 72 minutes. The total estimated burden on all sampled and responding enterprises was 645,579 minutes or 10,760 hours. Table 4 below gives statistics on the response burden broken down by NACE Rev.1.1 at section level. Table 5 gives similar statistics broken down by Number of Persons Engaged.

The terminology used in tables 4 and 5 is explained below.

**Mean:** The mean is the average number of minutes taken to complete the form. It is the sum of all response times divided by the number of response times given.

**Median:** The median is the middle value for the response times. Half of the response times are greater than the median value and half of the response times are less than the median value.

**Mode:** The mode is the most frequent value given for the response time.

**Standard Deviation:** The standard deviation is a measure of the spread of the individual response times about the mean. A large standard deviation indicates that the response times are spread far from the mean and a small standard deviation indicates that they are clustered closely around the mean. The standard deviations in tables 4 and 5 are very large indicating a wide range of values provided for the response time.

#### **Family Business**

There is no register of Family Business in Ireland. Consequently, there is no ideal weighting frame for the production of Family Business statistics in Ireland. The estimate for the number of Family Businesses in the market services sectors (see Tables 33 - 38) have been weighted on the basis of the total number of enterprises in those sectors. The other principal and supplementary variables have been weighted on the basis of total employment for those sectors. Tables 33 - 38 should give a good approximation for the number of family businesses and their characteristics, however given the methodology employed to weight the individual returns, these tables should be treated as developmental tables and caution should be used when interpreting the results.

## 1. Description of Business

The business conducted should be described in as much detail as possible to enable it to be precisely classified. To facilitate this, estimates of the actual or percentage turnover accounted for by the principal products sold or services provided should be entered no matter how approximate.

**A family business** An enterprise where one family holds more than 50% of the voting shares  
and/or

a family supplies a significant proportion of the enterprises senior management and is effectively controlling the business  
and/or

an enterprise where there is evidence of more than one generation working in the business  
and/or

an enterprise that is influenced by a family or a family relationship and that perceives itself to be a family business.

## 2. Year covered by the details provided

The trading details provided should ideally relate to the calendar year 2006.

## 3. Turnover (excluding VAT)

Turnover comprises the totals invoiced by the enterprise during 2006, and this corresponds to market sales of goods or services supplied to third parties.

- Include**
- All duties and taxes on the goods or services invoiced by the enterprise with the exception of VAT:
  - Value of goods sold which were taken in part exchange (i.e. trade-ins) and separate delivery charges:
  - Commission element only of lottery ticket and bus ticket sales and other sales on a commission basis:
  - Sales by mail order, vending machines and travelling sales men:
  - Value of goods sold under hire-purchase and credit sales agreements (to be entered at cash cost to customers plus any credit charges accruing to your firm):
  - Value of goods withdrawn for proprietors own use:
  - Sales of goods manufactured by the enterprise:
  - This should be broken down as accurately as possible into the three categories: retail, wholesale and other (i.e. services and other receipts) turnover.

**Note:** Chemist shops should include gross receipts from General Medical Services (Payment) Board and Health Boards (e.g. LTI (Long Term Illness) schemes) before deduction of Withholding Tax.

**Exclude** - Operating subsidies received from public authorities or institutions of the European Union:

- VAT charged to customers (which is recorded separately):
- Value of tickets (e.g. lottery and bus tickets) sold on a commission basis except for the commission element which should be included:
- Trade and cash discounts, rebates etc. and deductions for returned goods and containers:
- Sub post office business:
- Sales of capital assets and non-trading receipts (e.g. insurance claims):
- VRT (Vehicle Registration Tax) charged to customers.

Turnover from Agriculture, Forestry, Fishing and Industrial (manufacturing) activities – please estimate the part of Total Turnover derived from: agriculture, hunting and forestry, fishing, mining and quarrying, manufacturing electricity, gas and water supply and construction. An estimate of the total turnover from all these activities will suffice. There is no need to provide separate values for each of these activities.

#### **4. Purchases of Goods and Services**

##### **(a) Goods for direct resale = Cost of Sales minus Opening Stock plus Closing Stock**

Purchases for resale are purchases of goods for resale to third parties without further processing. It also includes purchases of services by 'invoicing' service companies i.e. those whose turnover is composed not only of agency fees charged on a service transaction but also the actual amount involved in the service transaction e.g. transport purchases by travel agents. The value of goods and services which are sold to third parties on a commission basis are excluded since these goods are neither bought nor sold by the agent receiving the commission.

Enter the net delivery cost (excluding VAT) of goods purchased by the enterprise for direct resale (including materials used in the repair, maintenance or installation of customers' goods).

##### **(b) Stocks (excluding VAT)**

Stocks should be valued (exclusive of VAT) as for accounting purposes. The basis of valuation should be the same for the beginning and end of the year. Include both stocks of goods for resale and stocks of other goods held.

#### **7. Changes in Fixed Capital Assets**

Fixed capital assets include motor vehicles, equipment and plant machinery as well as new building work and the purchase or sale of existing buildings and land. Sale of tangible Capital Goods are valued at the price actually received. (They should be valued exclusive of VAT, except for motor cars).

#### **8. Employment Details**

##### **(a) Personnel Costs**

##### **(i) Total Wages and Salaries paid to Employees**

Include the gross amount (i.e. before deduction of income tax, employee contributions to social security, etc.) of all wages, salaries, overtime, allowances, commissions, bonuses, holiday pay, etc. paid by the enterprise to its employees.

##### **(b) Persons Engaged in the Enterprise**

All persons (i.e. managerial, clerical, sales, repairs, delivery etc.) who worked (full or part-time) in the enterprise during the week ended **8 September 2006** should be included in their respective boxes. Persons usually working 30 or more hours per week should be classified as full-time.

#### **9. Local Unit Information**

A breakdown of the number of total persons engaged (in week ended 8 September 2006, (Q.8(b))) is requested for each trading branch of the enterprise.

The business conducted should be described in as much detail as possible to enable it to be precisely classified. To facilitate this, estimates of the actual or percentage turnover accounted for by the principal products sold or services provided should be entered no matter how approximate.

an enterprise that is influenced by a family or a family relationship and that perceives itself to be a family business.

The trading details provided should ideally relate to the calendar year 2006.

Turnover from Agriculture, Forestry, Fishing and Industrial (manufacturing) activities – please estimate the part of Total Turnover derived from: agriculture, hunting and forestry, fishing, mining and quarrying, manufacturing electricity, gas and water supply and construction. An estimate of the total turnover from all these activities will suffice. There is no need to provide separate values for each of these activities.

Purchases for resale are purchases of goods for resale to third parties without further processing. It also includes purchases of services by 'invoicing' service companies i.e. those whose turnover is composed not only of agency fees

charged on a service transaction but also the actual amount involved in the service transaction e.g. transport purchases by travel agents. The value of goods and services which are sold to third parties on a commission basis are excluded since these goods are neither bought nor sold by the agent receiving the commission.

Enter the net delivery cost (excluding VAT) of goods purchased by the enterprise for direct resale (including materials used in the repair, maintenance or installation of customers' goods).

**(b) Stocks (excluding VAT)**

Stocks should be valued (exclusive of VAT) as for accounting purposes. The basis of valuation should be the same for the beginning and end of the year. Include both stocks of goods for resale and stocks of other goods held.

**7. Changes in Fixed Capital Assets**

Fixed capital assets include motor vehicles, equipment and plant machinery as well as new building work and the purchase or sale of existing buildings and land. Sale of tangible Capital Goods are valued at the price actually received. (They should be valued exclusive of VAT, except for motor cars).

**8. Employment Details**

**(a) Personnel Costs**

**(i) Total Wages and Salaries paid to Employees**

Include the gross amount (i.e. before deduction of income tax, employee contributions to social security, etc.) of all wages, salaries, overtime, allowances, commissions, bonuses, holiday pay, etc. paid by the enterprise to its employees.

**(b) Persons Engaged in the Enterprises**

All persons (i.e. managerial, clerical, sales, repairs, delivery etc.) who worked (full or part-time) in the enterprise during the week ended **8 September 2006** should be included in their respective boxes. Persons usually working 30 or more hours per week should be classified as full-time.

**9. Local Unit Information**

A breakdown of the number of total persons engaged (in week ended 8 September 2006, (Q.8(b)) is requested for each trading branch of the enterprise.
