PUBLICATION PROGRAMME

The publication programme of the final results of the 1971 Census will comprise the following volumes —

- *Volume I — Population of District Electoral Divisions, towns and larger units of area
- *Volume II — Ages and conjugal conditions classified by areas
- *Volume III — Industries
- *Volume IV — Occupations.
- *Volume V — Occupations and industries classified by ages and conjugal conditions.
- *Volume VI — Housing.
- *Volume VII — Household composition.
- *Volume VIII — Irish Language.
- *Volume IX — Religion.
- *Volume X — Fertility of Marriage
- Volume XI — Usual residence, migration and birthplace.
- Volume XII — Education and scientific and technological qualifications.
- Volume XIII — Transport and journey to work.

This publication programme represents a change in order between Volumes XII and XIII, as compared with that previously published.

A series of 41 special Census Bulletins has already been published. Each of the first 37 of these publications gives preliminary results for a particular County, County Borough or Province, involving classifications by age, conjugal condition, occupational group, branch of economic activity, employment status, size and type of dwelling, nature of occupancy, water supply and sanitary facilities; the four further bulletins produced (38 to 41) contain similar though more detailed information for the State as a whole together with classifications involving religion, socio-economic groups, knowledge of Irish, elderly persons living alone, type and size of households, age of housing units, the number of motor cars available to household members, fertility of marriage, birthplace, migration, scientific and technological qualifications, level of education and means of transport and distance travelled to work or school.

Tabulations containing similar information to that shown in the County Bulletins have been prepared for each District Electoral Division and Ward and for each town of 1,000 population and over. These tabulations are in the form of computer print-outs and will be supplied to interested persons at a charge sufficient to cover the cost of photo-copying.

CENSUS OF POPULATION, 1971

EXPLANATORY NOTES

This Volume of the Report of the Census of Population, 1971, contains detailed classifications by usual residence at Census date and one year prior to Census date and by birthplace of the population of the State.

The Census was taken on the night of 18 April, 1971 in accordance with the Statistics (Census of Population) Order, 1971 (S.I. No. 93 of 1971) made by the Taoiseach in pursuance of powers conferred on him by Sub-section (1) of Section 16 of the Statistics Act, 1926 and the Statistics Acts, 1926 and 1946 (Transfer of Ministerial Functions) Order, 1949 (S.I. No. 142 of 1949).

INFORMATION COLLECTED

The following particulars were collected in respect of each individual:- (i) Name, (ii) sex, (iii) relationship to head of household, (iv) usual residence, (v) usual residence one year prior to Census date, (vi) place of birth, (vii) date of birth, (viii) conjugal condition, (ix) date of marriage and number of children (for married women only), (x) religion, (xi) knowledge of Irish (for persons 3 years of age and over), (xii) method of transport and distance travelled to work or school and for persons aged 14 or over:- (xiii) principal occupation, (xiv) employment status, (xv) name of employer and nature of employer's business, (xvi) age at which full-time education ended and number of years' attendance at school or college, etc. (for persons who had ceased their full-time education), (xvii) scientific or technological qualifications held and fields of science concerned. In addition the following information was collected in respect of each private household:- (i) total area and rateable valuation of agricultural holdings held by members of the household, (ii) nature of occupancy of dwelling (rented, owner-occupied, etc.), (iii) rent of dwelling, (iv) year house was built, (v) rooms occupied, (vi) type of water supply, (vii) availability of bath or shower, (viii) type of sanitary facility, (ix) electricity supply and (x) motor vehicles used by household.

COVERAGE OF THE CENSUS

Basically, the Census coverage relates to the enumerated or *de facto* population, that is to say the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday 18th April, 1971, together with all persons who arrived in that area on the morning of Monday, 19th April, 1971, not having been enumerated elsewhere. While this concept is used in presenting data in all other volumes published hitherto, it should be noted that in Tables 2-12 of Part I of this Volume the figures relate to the usually resident population in each area as analyses involving migration are obviously more meaningful when presented in this way. The figures in Part II of this Volume which contains tabulations according to Birthplace, relate to the enumerated or *de facto* population.

CLASSIFICATION BY USUAL RESIDENCE

The figures for usual residents in a particular area include persons enumerated in that area who stated that their usual residence was at the place where they were enumerated, together with other persons usually resident in that area who were enumerated elsewhere in the State. Persons whose usual residence was elsewhere in the State (i.e. visitors to the area), are not included in the area of enumeration but are included in the area of their usual residence. Usual residents of an area who were not in the State on Census night were not enumerated at all in the Census and, therefore, are not included in the figures. Visitors to the State are also excluded.

The question on Usual Residence on the Census form was as follows:-

Usual Residence

If the person usually lives at this address, write "Here" If not, state the usual address in full.

The accompanying notes stated that (a) school children, students, etc who were away from home during term time should regard their home address and not their term-time address as their usual residence, (b) persons temporarily in hospitals and other similar institutions should give their home address and (c) persons with no settled address should write "None".

Persons included in (c) above were, in fact, regarded as usually resident in the area in which they were enumerated.

An identical question was asked concerning "Usual Residence one year ago".

Thus the analyses given in this Report involving "usual residence one year ago" essentially relate to persons enumerated in the Census who changed their usual residence during the twelve month period prior to Census date

CLASSIFICATION BY BIRTHPLACE

The relevant column on the Census schedule was headed "Place of birth (County, if born in Ireland, Country if born elsewhere)" In the case of persons born in Ireland no attempt was made to distinguish those born in the county boroughs from those born in the adjoining counties. Such a distinction would, in any case, have been meaningless in view of the various extensions of county borough boundaries which, in many cases, may have meant that a persons' birthplace was outside a county borough boundary when he was born, but inside it at the date of the Census.

It should be noted that the figures for foreign-born persons shown in the section on birthplace (Part II) include visitors to the country as well as persons who are usually resident.

CLASSIFICATION BY OCCUPATION

All persons aged 14 years of age and over, including those who are out of work and those who are temporarily confined to hospitals, are classified to their usual principal occupation.

Occupations are divided into two broad categories, gainful and non-gainful, a gainful occupation being one in which the person is actively engaged and from which the livelihood is usually obtained. Persons in certain occupations who do not receive a fixed wage or salary are, however, also classified as gainfully occupied, the principal group of persons in this category being those assisting relatives in farm work. Persons engaged in home duties, persons at school, students, persons not yet at work and retired persons comprise the majority of the not gainfully occupied group. The occupation, in the case of gainfully occupied persons, is determined by the kind of work performed in earning a living irrespective of the place in which, and the purpose for which, it is performed. Classification of the population by occupation thus brings together the numbers of persons engaged in the same type of work regardless of the purpose for which such work is undertaken.

The most detailed occupation classification used in the 1971 Census of Population is that shown in Appendix A, which also shows the groups used in Table 8, Part 1 and Tables 9A and 9B, Part II. Appendix B shows the groups used in Table 9, Part 1.

CLASSIFICATION BY SOCIO-ECONOMIC GROUP

The entire population was classified according to "Socio-economic group". The socio-economic group of each gainfully occupied person was decided by his or her occupation or, in some cases, by a combination of occupation and employment status. Listed below are the eleven socio-economic groups plus a residual group which were used, the occupations assigned to each of the eleven groups being considered generally similar as regards the level of skill or educational attainment required. Persons not gainfully occupied were classified to the socio-economic group of the person on whom they were deemed to be dependent. Thus, if the head of a family was gainfully occupied, dependent members were assigned to his socio-economic group. If the head was not gainfully occupied, the non-gainfully occupied members were assigned to the socio-economic group of the principal earner in the family. If a household did not contain any gainfully occupied persons, the occupants were assigned to the residual group.

The actual socio-economic groups used in the Census were as follows:-

- 0 — Farmers, farmers' relatives and farm managers
- 1 — Other agricultural occupations and fishermen
- 2 — Higher professional
- 3 — Lower professional
- 4 — Employers and managers
- 5 — Salaried employees
- 6 — Intermediate non-manual workers
- 7 — Other non-manual workers
- 8 — Skilled manual workers
- 9 — Semi-skilled manual workers
- X — Unskilled manual workers
- R — Unknown

A detailed list showing the allocation of occupations to each socio-economic group is given in Appendix C.

CLASSIFICATION BY INDUSTRY

The industry in which a person is engaged is determined (whatever may be his occupation) by reference to the business or branch of economic activity in which, or for the purpose of which, his occupation is followed. Thus, while the occupational classification is concerned only with work performed by the individual, regardless of its ultimate purpose or end product, the industrial classification is concerned only with the ultimate purpose or end product, regardless of the precise nature of the work performed. A single manufacturing concern or commercial undertaking may employ persons of many different occupations for the purpose of making a particular product or giving a particular service (for example, a brewery usually employs skilled craftsmen such as carpenters, electricians, etc.). Conversely, there are many cases in which particular occupations are largely confined to a single industry. For example, the majority of persons having agricultural occupations are in the industry of Agriculture and most miners are in the Mining industry. It will be noted that the term "industry" as used for Census of Population purposes is not confined to Manufacturing industry, but is regarded as being synonymous with the term "branch of economic activity". The industrial groups used in Table II, Part I are outlined in Appendix D.

CLASSIFICATION BY LEVEL OF EDUCATION

Persons aged 14 years and over were asked to state the age at which their full-time education ceased and the number of years spent at each of the following levels:- Secondary; Vocational, Technical or Commercial; University or Higher Technical. Persons indicating no attendance in any of these categories and persons making no entry at all were grouped under the heading "Primary, including not stated". The classification of an individual to one of the educational levels specified was determined by whether the person attended the relevant type of institution even though he or she may not have completed the requisite course(s).

CONTENT OF THE TABLES

Part I of this Volume contains tables dealing with persons' usual residence at Census date and one year prior to Census date, distinguishing those who changed usual residence in that year by the nature of that change, e.g. from another county, from outside the State, etc.

Tables 1A, 1B and 1C show the difference, from each county and the State, between the enumerated and usually resident population of persons, males and females. In Tables 2A, 2B and 2C, the usually resident population aged one year and over in each county is classified by usual residence one year previously, distinguishing those remaining at the same address, those moving within the same county, moving from another county and moving from outside the State. In the case of the last mentioned, persons whose birthplace was in Ireland are shown separately. Table 3 shows, for persons who moved from outside the State, the country from which they came, again distinguishing those whose birthplace was in Ireland (Republic).

Tables 4A, 4B and 4C are concerned with persons who changed county of residence, showing their present and former county of usual residence. In Table 5, persons usually resident in each town of 1,500 population and over are classified by former usual residence.

Tables 6A and 6B show, for the State and Dublin, respectively, the usually resident population by sex, age group and conjugal condition according to the categories of former usual residence used in Table 2A. A similar, but less detailed, classification by age group is shown for each county in Table 7. Table 8 involves a classification by occupational group and Table 9 gives similar information for each county, using broader occupational groups. Table 10 provides a classification by socio-economic group and former usual residence for each county.

A classification by broad industry group is given in Table 11 and by level of education in Table 12 for each county and the State, again distinguishing the same categories of former usual residence.

Part II of this Volume contains tables dealing with birthplaces. Tables 1A, 1B and 1C classify persons, males and females enumerated in each province according to country of birth, distinguishing those born in the county in which they were enumerated, while Tables 2A, 2B and 2C provide a similar classification for each county and county borough. Table 3 gives comparable data for each Census year since 1936 in which a question on birthplaces was asked.

Males and females in each county and county borough are classified in Table 4 according to county and country of birth while, in Table 5, males and females born in each county are classified according to the place in which they were enumerated. Persons enumerated in their county of birth, in Dublin County and elsewhere in Ireland are shown separately. Table 6 deals with the birthplaces of persons in each city or town of 1,500 population and over, while Tables 7 and 8 are concerned with birthplaces and age groups for the State and for each province, county and county borough. In Tables 9A and 9B, males and females are classified according to occupational group and birthplace.

COMMENTARY

PART 1 — USUAL RESIDENCE AND MIGRATION

The total population enumerated at the 1971 Census of Population was 2,978,248. Of this total, 2,957,753 persons were usually resident in the State and 20,495 in other countries. As indicated on page v, usual residents of the State who were outside the country on Census night were not enumerated and thus their total number is not known*.

All the tables in the first part of this Volume, except Table 1, deal with various aspects of usual residents and migrants i.e. persons whose usual residence one year prior to Census date differed from their usual residence at that date. The total usually resident population aged one year and over (children under that age could not have had an address one year previously) was 2,893,172. Of these 2,744,824 (or 94.9 per cent) had not changed their address, 89,526 (or 3.1 per cent) had moved within the same county, 33,963 (or 1.2 per cent) had moved from one county to another and 24,859 (or 0.9 per cent) had come from outside the State. Of this latter number, 13,497 (or 54.3 per cent) had been born in Ireland. The 1971 Census was the first Irish Census at which questions on usual residence were asked and there are, therefore, no comparable figures for other years.

COUNTIES

The degree of movement varies between counties as shown in Table A where counties are ranked according to the proportion of their total usually resident population aged one and over who had changed residence in the previous year. Also shown in this table is average annual net emigration per 100 population over the period 1966—71 for each county. The former provides a measure of movement into and within the county while the latter indicates the level of net movement out of (or into) the County.

It can be seen that the county with the highest proportion of persons who had changed their usual residence was Dublin with 7.5 per cent. Other counties with proportions in excess of the national figure of 5.1 per cent were Wicklow, Kildare, Louth and Cork. Counties in which less than 3 per cent of the usual residents had changed residence in the previous year were Cavan, Sligo, Leitrim, Mayo and Roscommon.

*It is, however, of interest to note that in the United Kingdom 1971 Census (which was taken on 25 April) the number of visitors recorded in Great Britain, whose usual residence was in Ireland (Republic) was 6,145. The corresponding number of residents of Great Britain recorded as visitors in the Irish Census was 12,095.

The type of movement involved in counties with total movement in excess of 5 per cent is analysed in Table B which shows the percentage distribution of all persons who changed residence according to the three categories 'within the same county', 'from another county' and 'from outside the State'. Within the latter category persons with a birthplace in Ireland (Republic) are shown separately.

TABLE B:- PERCENTAGE DISTRIBUTION BY USUAL RESIDENCE ONE YEAR PREVIOUSLY OF ALL PERSONS WHO CHANGED USUAL RESIDENCE IN COUNTIES WHERE THE TOTAL PROPORTION OF PERSONS WHO CHANGED WAS MORE THAN 5 PER CENT.

County	Total	Usual residence one year previously			
		Same County	Other County	Outside State	
				Total	Of which Birthplace in Ireland (Republic)

Waterford*	100.-	54.3	31.2	14.5	8.2
STATE	100.-	60.3	22.9	16.8	9.1

*Including County Borough

In the State as a whole, 60.3 per cent of all persons who changed their usual residence remained within the same county but, in the case of Dublin and Cork, respectively, the comparable figures were 69.8 per cent and 70.4 per cent. In the case of Wicklow and Kildare, less than half of all changes were of this type. In these two counties, the proportions coming from another county were 38.6 and 39.9 per cent respectively, as against 22.9 per cent for the State. This, presumably, reflects movement from Dublin, in particular to new housing, in these two counties.

The proportion from outside the State of all persons who moved was 16.8 per cent, 9.1 per cent having their birthplace in Ireland (Republic) and the remaining 7.7 per cent outside the State. Among the counties shown in Table B, the county which recorded the highest proportion of its migrants coming from outside the State, 20.6 per cent, was Wicklow. The highest proportion of migrants coming from outside the State, with birthplace other than Ireland (Republic) was also in this County, at 11.5 per cent.

AGE GROUPS

In Tables C and D below, the pattern of migration is examined in terms of age group and conjugal condition for males and females respectively.

*10 persons or less

In the case of males, the most mobile age groups were the 20-24 and 25-34 year groups. In these two groups, over 11 per cent of the usually resident population changed residence within the previous twelve months. The movement was much more pronounced in the case of married men, reflecting newly married men changing to their new homes. Thus, 35.6 per cent and 15.9 per cent of married men in the 20-24 and 25-34 year age groups, respectively, changed their address over the period concerned. It is of interest to note that in these two age groups, some 38 per cent and 8 per cent, respectively, of married men had been married within the previous twelve months (Census of Population, Volume X - Fertility of Marriage). In the case of the 15-19 year age group, 44 per cent of married men had moved in the previous year but some 92 per cent had been married within that period. In the older age groups there was little difference in the pattern of movement for single, married or widowed men.

The two age groups mentioned above were also the groups in which movement from outside the State was greatest, 2.1 per cent of males aged 25-34 years having resided outside the State one year previously. Of these, the majority, 1.5 per cent of the overall total, had been born in Ireland (Republic).

The overall pattern for females is very similar to that for males, except in the case of the 20-24 year age group. Females in this age group were much more mobile than males, with 18.1 per cent changing their usual residence over the year compared with 11.4 per cent of males. The percentage of married women in this age group who moved, 31.4 per cent, was somewhat less than that for men, 35.6 per cent, but 12.1 per cent of single women changed their usual residence as compared with 7.0 per cent of single men. The 31 per cent of married women in this age group who moved is quite close to the proportion of married women in the age group who were married within the previous twelve months, some 28 per cent. Movement from outside the State in this age group was also more pronounced in the case of females, 2.3 per cent having moved in the preceding year as compared with 1.5 per cent of males. Again here, the difference was caused by the greater proportion of single women who moved, 1.8 per cent as compared with 1.2 per cent of single men. In fact, the proportion of single women who changed their usual residence was greater, in all age groups, than the proportion of single men. This was true, in general, of movement both within the State and also from outside the State.

Table E shows the structure by age and conjugal condition of migrants from outside the State.

Total	12,280	6,955	5,195	130	12,579	6,917	5,278	384	24,859

Of the 24,859 persons involved, 12,280 were males and 12,579 females. The 25-34 year age group contained 6,516 or 26.2 per cent of all such migrants. The proportion of married persons in this age group was 68.9 per cent for males and 72.9 per cent for females as compared with 58.7 per cent and 74.1 per cent, respectively, in the usually resident population. A further 6,857 or 27.6 per cent, of these migrants were under 15 years of age. Many of these were presumably the children of the 10,473 married persons who came from outside the State, of whom 8,482, or 81.0 per cent, were aged under 45 years.

The total number of migrants aged 15 years and over was 18,002. Of these 58.2 per cent were married, 39.0 per cent were single and 2.9 per cent were widowed. This compares with 50.8 per cent, 40.9 per cent and 8.3 per cent, respectively, in the total usually resident population of the same age.

OCCUPATIONS

Table F shows the pattern of migration in different occupational groups.

Total not gainfully occupied	100.-	95.7	3.6	0.7	0.5
Total 14 years of age and over	100.-	94.5	4.6	0.9	0.6

The most mobile occupational groups were Professional and technical workers, where the proportion moving was 15.4 per cent. The corresponding proportion for the miscellaneous category "Others" (incl. Armed Forces) was 13.8 per cent, for Clerical and Service workers, was 11.2 per cent, and for Administrative, Executive and Managerial workers was 10.9 per cent. Agricultural workers were the least mobile group – only just over one per cent of such workers changed residence during the twelve month period prior to the Census; indeed the general picture was that unskilled or manual workers do not appear to change residence very much when compared with other groups.

The Professional and technical workers group also had the greatest proportion of migrants from outside the State at 2.9 per cent as compared with 1.0 per cent of all gainfully occupied persons. The only other group with 2 per cent or more was the Administrative, Executive and Managerial group. This latter group was the only group in which the majority of migrants who came from outside the State had been born outside the State.

EDUCATION

Another factor to be considered in connection with migration is education. In Table G persons whose full time education had ceased are classified according to the highest type of educational establishment attended full-time and the type of migration.

TABLE G:- PERCENTAGE DISTRIBUTION BY USUAL RESIDENCE ONE YEAR PREVIOUSLY OF USUALLY RESIDENT PERSONS AGED 14 YEARS AND OVER CLASSIFIED BY HIGHEST TYPE OF EDUCATIONAL ESTABLISHMENT ATTENDED FULL-TIME.

Still at school, etc.	100.-	97.0	2.5	0.6	0.2
TOTAL 14 YEARS OF AGE AND OVER	100.-	94.5	4.6	0.9	0.6

The most mobile group were those who attended university or other third level institutions. Nearly 15 per cent of this group changed residence during the twelve months prior to Census date compared with the overall rate of 5.5 per cent. In contrast, only 3.5 per cent of persons who had attended at primary level only, or who did not give a reply to the education question, had moved during the same period. Persons in the University, Third level, etc. group who had changed usual residence from outside the State made up 3.2 per cent of all persons in this group, the next highest corresponding figure being 1.5 per cent in the case of the Secondary and Vocational group.

PART II – BIRTHPLACES

Of the total population of 2,978,248 in 1971, 2,399,332, or 80.6 per cent, were enumerated in the county in which they were born. A further 441,620, or 14.8 per cent, were born in another county in the State while 26,183, or 0.9 per cent, were born in Northern Ireland; 84,038, or 2.8 per cent were born in Great Britain and 27,075 or 0.9 per cent, were born elsewhere.

By contrast, in 1961, 82.4 per cent of the population were enumerated in their county of birth and the 1946 figure was 83.1 per cent. The percentage of persons with birthplace outside the whole of Ireland has risen consistently from 2.2 per cent in 1946 to 2.5 per cent in 1961 and 3.7 per cent in 1971. The numbers and percentage distribution of persons in each of these categories in 1946, 1961 and 1971 are given in Table H below.

TABLE H:- BIRTHPLACES AND PERCENTAGE DISTRIBUTION BY BIRTHPLACE OF ENUMERATED POPULATION.

Table J goes on to consider the situation in each county in 1961 and 1971. In the first two columns, the percentage of persons enumerated in each county who were born in another county is shown, while the third and fourth columns show the proportion of persons born in that county and remaining in the State but who were enumerated in another county. The counties are ranked in increasing order of the 1971 percentages shown in the fourth column; the final column of the table shows the population of each county in 1971. In general, the population is inversely related to the proportion of persons born in that county, who were enumerated in another county. These figures represent the overall long-term effect of migration as distinct from the experience of one particular year which is considered in Part I of this Commentary. In fact, in 21 out of the 26 counties, the proportion of the total population born in another county was greater in 1971 than in 1961, thus indicating a generally increased level of movement among the population in the ten years prior to 1971.

*County and County Borough

†Ranked in increasing order of Col. (b), 1971.

The county with the highest proportion of persons born in other counties is Wicklow, at 31.1 per cent, followed closely by Kildare with 30.7 per cent. Other counties with substantial numbers of persons who were born elsewhere in the State are Meath and Westmeath. By contrast, less than 10 per cent of the population came from elsewhere in the State in Counties Cork, Kerry, Mayo and Donegal. A large proportion of persons born in Counties Carlow, Laoighis, Longford, Westmeath and Leitrim are now resident elsewhere in the State. In each of these counties, over one-quarter of those born in the county and still in the country are now in another county. In general, counties with a high proportion of natives of other counties have also lost a high proportion of their own natives. The exception to this is Dublin where 18.5 per cent of the population were born elsewhere in Ireland (Republic) but where only 7.9 per cent of Dublin born persons in the State are now resident outside the county. Donegal has the lowest level of inward movement and the second lowest (after Dublin) level of outward movement. The proportions for each county in 1971 differ little from those which existed in 1961.

USUAL RESIDENCE AND MIGRATION

The statistics contained in Part I of this Volume relate to the usually resident population of the State on Census date. Persons whose usual residence was stated to be outside the State and persons normally resident in the State who were temporarily absent on Census date are excluded.
