PUBLICATION PROGRAMME

The publication programme of the final results of the 1971 Census will comprise the following volumes:—

- *Volume I — Population of District Electoral Divisions, towns and larger units of area
- *Volume II — Ages and conjugal conditions classified by areas.
- *Volume III — Industries.
- *Volume IV — Occupations.
- *Volume V — Occupations and industries classified by ages and conjugal conditions.
- *Volume VI — Housing.
- *Volume VII — Household composition.
- *Volume VIII — Irish Language.
- *Volume IX — Religion.
- *Volume X — Fertility of Marriage.
- *Volume XI — Usual residence, migration and birthplace.
- Volume XII — Education and scientific and technological qualifications.
- Volume XIII — Transport and journey to work.

This publication programme represents a change in order between Volumes XII and XIII, as compared with that previously published.

A series of 41 special Census Bulletins has already been published. Each of the first 37 of these publications gives preliminary results for a particular County, County Borough or Province, involving classifications by age, conjugal condition, occupational group, branch of economic activity, employment status, size and type of dwelling, nature of occupancy, water supply and sanitary facilities, the four further bulletins produced (38 to 41) contain similar though more detailed information for the State as a whole together with classifications involving religion, socio-economic groups, knowledge of Irish, elderly persons living alone, type and size of households, age of housing units, the number of motor cars available to household members, fertility of marriage, birthplace, migration, scientific and technological qualifications, level of education and means of transport and distance travelled to work or school.

Tabulations containing similar information to that shown in the County Bulletins have been prepared for each District Electoral Division and Ward and for each town of 1,000 population and over. These tabulations are in the form of computer print-outs and will be supplied to interested persons at a charge sufficient to cover the cost of photo-copying.

CENSUS OF POPULATION, 1971

EXPLANATORY NOTES

This Volume of the Report of the Census of Population, 1971, contains detailed classifications by age at which full-time education ceased and by highest type of educational establishment attended full-time in respect of the population aged 14 years and over. Classifications are also provided in respect of persons with scientific or technological qualifications.

The Census was taken on the night of 18th April, 1971, in accordance with the Statistics (Census of Population) Order, 1971 (S.I. No. 93 of 1971) made by the Taoiseach in pursuance of powers conferred on him by Sub-section (1) of Section 16 of the Statistics Act, 1926 and the Statistics Acts, 1926 and 1946 (Transfer of Ministerial Functions) Order, 1949 (S.I. No. 142 of 1949).

INFORMATION COLLECTED

The following particulars were collected in respect of each individual:- (i) Name, (ii) sex, (iii) relationship to head of household, (iv) usual residence, (v) usual residence one year prior to Census date, (vi) place of birth, (vii) date of birth, (viii) conjugal condition, (ix) date of marriage and number of children (for married women only), (x) religion, (xi) knowledge of Irish (for persons 3 years of age and over), (xii) method of transport and distance travelled to work or school and for persons aged 14 years or over:- (xiii) principal occupation, (xiv) employment status, (xv) name of employer and nature of employer's business, (xvi) age at which full-time education ended and number of years' attendance at school or college, etc. (for persons who had ceased their full-time education), (xvii) scientific or technological qualifications held and fields of science concerned. In addition the following information was collected in respect of each private household:- (i) total area and rateable valuation of agricultural holdings held by members of the household, (ii) nature of occupancy of dwelling (rented, owner-occupied, etc.), (iii) rent of dwelling, (iv) year house was built, (v) rooms occupied, (vi) type of water supply, (vii) availability of bath or shower, (viii) type of sanitary facility, (ix) electricity supply and (x) motor vehicles used by household.

COVERAGE OF THE CENSUS

The Census figures relate to the *de facto* population, that is to say the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 18th April, 1971, together with all persons who arrived in that area on the morning of Monday, 19th April, 1971, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census night as well as residents while Irish persons temporarily absent from the State are excluded. The date of the Census was, however, chosen to coincide with a period when passenger movements were at a minimum and consequently the figures closely approximate to those for the usually resident population. Members of the Defence Forces who, on Census date, were serving abroad with the United Nations were, of course, excluded from the enumeration.

CLASSIFICATION BY EDUCATION

The Question on education on the Census form was as follows:-

Full-time education received			
State age at which full-time education ended.	If the person attended the following types of school or college full-time, state the number of years in each case. If the person did not attend, write "None".		
	Secondary	Vocational, Technical or Commercial	University or Higher Technical

In the accompanying notes, it was stated that the relevant questions should be completed for each person aged 14 years or over no longer receiving full-time education. No entry was to be made in respect of part-time education. Other points made in these instructions were:-

- (i) Secondary school includes the secondary top of a primary school.
- (ii) Vocational, technical or commercial includes schools of commerce, secretarial colleges, schools of domestic science, agricultural schools.
- (iii) University or higher technical includes the constituent colleges of the National University of Ireland, Dublin University, Maynooth College, College of Surgeons, National College of Art, college of advanced technology, teacher training colleges, military training college, major religious seminaries, agricultural colleges, veterinary colleges.

While persons were asked to make an entry in respect of each type of educational establishment attended, they were classified only by the highest level. No provision was made in respect of attendance at primary level only so persons indicating no attendance in any of the three categories specified on the Census schedule and persons making no entry at all were grouped under the heading "primary, including not stated".

A total of 105,057 persons did not state the age at which their full-time education ceased. These persons have not been included in any tables in the Commentary or in detailed tables giving percentage distribution of age education ended.

CLASSIFICATION BY SCIENTIFIC AND TECHNOLOGICAL QUALIFICATIONS

Part II of this Volume contains details on the subject of scientific and technological qualifications. This was the first occasion on which a question on this topic was asked at an Irish Census. The question on the Census form was as follows:-

Scientific or Technological Qualifications

If the person has such qualifications, state at (a) the qualification held and at (b) the main subject(s) in which held.

The accompanying notes indicated that this question should be answered for persons who held one or more qualifications of the type listed below in a branch of science or technology, including agricultural and medical science but excluding the social sciences, economics, geography, domestic science and nursing.

Qualifications	Examples of entries at (a)
University degree or University diploma of equivalent standard.	B.Sc. B.E.; M.E.; B.A. (Mathematics); M.B.; B.Ch.; B.A.O
Associateship or Diploma awarded by an educational institution other than a University, following at least two years' full-time study (or equivalent part-time study) after the Leaving Certificate or its equivalent.	A.R.C.Sc.I; A.I.M.L.T.; Grad. I.E.E.; Grad. I. Mech. E.; Dip. Elect. E.
Graduate or Corporate Membership of a Professional Institution.	M.I.E.I.; A.R.I.C.; M.I.C.I.; M.I.Mech. E.; A. Inst. P., F.I.M.L.T.

The main branch of science or technology in which the qualification(s) was held was asked for at (b) e.g. Agriculture; Horticulture; Veterinary Science; Medicine, Dentistry; Pharmacy; Biochemistry; Mathematical Physics; Architecture; Mechanical Engineering.

Valuable assistance and advice concerning the qualifications to be recognised as being relevant, the subjects to be distinguished and other aspects of coding and tabulating the data was provided by the National Science Council. The qualifications were coded on a subject matter basis according to the categories listed in Appendix A. Further categories were originally distinguished at the coding stage but, because of the small number of persons involved, they have been merged with other similar categories.

CLASSIFICATION BY OCCUPATION

All persons aged 14 years and over, including those who are out of work and those who are temporarily confined to hospitals, are classified to their usual principal occupation.

Occupations are divided into two broad categories, gainful and non-gainful, a gainful occupation being one in which the person is actively engaged and from which the livelihood is usually obtained. Persons in certain occupations who do not receive a fixed wage or salary are, however, also classified as gainfully occupied, the principal group of persons in this category being those assisting relatives in farm work. Persons engaged in home duties, persons at school, students, persons not yet at work and retired persons comprise the majority of the not gainfully occupied group. The occupation in the case of a gainfully occupied person, is determined by the kind of work performed in earning a living irrespective of the place in which, and the purpose for which, it is performed. Classification of the population by occupation thus brings together the numbers of persons engaged in the same type of work regardless of the purpose for which such work is undertaken.

The most detailed occupation classification used in the 1971 Census of Population is that shown in Appendix B. This classification is used in Table 18A of the present Volume. In the case of Table 18B, however, which contains similar particulars for females, occupations containing very small numbers have been grouped together. The composition of the occupational groups used in Tables 15A and 15B is outlined in Appendix C.

CLASSIFICATION BY INDUSTRY

The industry in which a person is engaged is determined (whatever may be his occupation) by reference to the business or branch of economic activity in which, or for the purpose of which, his occupation is followed. Thus, while the occupational classification is concerned only with work performed by the individual, regardless of its ultimate purpose or end product, the industrial classification is concerned only with the ultimate purpose or end product, regardless of the precise nature of the work performed. A single manufacturing concern or commercial undertaking may employ persons of many different occupations for the purpose of making a particular product or giving a particular service (for example, a brewery usually employs skilled craftsmen such as carpenters, electricians, etc.). Conversely, there are many cases in which particular occupations are largely confined to a single industry. For example, the majority of persons having agricultural occupations are in the industry of Agriculture and most miners are in the Mining industry. It will be noted that the term "industry" as used for Census of Population purposes is not confined to Manufacturing industry, but is regarded as being synonymous with the term "branch of economic activity". The industrial groups used in Tables 19 to 21 are outlined in Appendix D.

CONTENT OF THE TABLES

Part I of this Volume is concerned with education. In general, persons who were receiving full-time education at the time of the 1971 Census are not covered by these tables. They are, however, shown separately in certain tables to complete the picture in respect of the total population aged 14 years and over. Tables 1 to 4 provide comparisons with the situation in 1966. In Tables 1A and 1B, males and females are classified by present age and age at which full-time education ceased in both 1966 and 1971, while Tables 2A and 2B provide a percentage distribution, for each age group, by age at which education ceased. Tables 3A, 3B, 4A and 4B are corresponding tables classified by highest level of educational establishment attended.

The remaining tables in Part I deal with the year 1971 only. Tables 5A and 5B contain a detailed classification, by present age and age at which full-time education ceased, for males and females, while Tables 6A and 6B show the percentage distribution, by age at which full-time education ceased, for each age group. Corresponding information according to highest type of educational establishment attended is provided in Tables 7A, 7B, 8A and 8B. Tables 9A and 9B contain detailed classifications by present age, highest type of educational establishment attended full-time and age at which education ceased.

Information for Provinces, Counties and County Boroughs is given in Tables 10 to 13. In Table 14, gainfully occupied and not gainfully occupied males and females are distinguished and each group is classified by both age at which full-time education ceased and highest type of educational establishment attended full-time.

In Table 15A, males are classified by occupational group, highest type of educational establishment attended full-time and age full-time education ceased. Table 15B provides similar information for females while Tables 16A, 16B, 17A and 17B show the percentage distribution, for each occupational group, of males and females by both of the measures of educational level used in this Volume.

Tables 18A and 18B contain similar information to that in Tables 15A and 15B but for individual occupation headings. Tables 19A and 19B deal with industrial groups, again providing a classification according to both age full-time education ceased and highest type of educational establishment attended. Tables 20A, 20B, 21A and 21B again provide percentage distributions, as in previous cases, for industrial groups. Tables 22A and 22B classify males and females by individual industries and age full-time education ceased whereas Tables 23A and 23B are concerned with individual industries and highest type of educational establishment attended.

The second part of this Volume deals with Scientific and Technological qualifications. Table 1 provides a summary of the overall position, showing the numbers with qualifications in each branch of science or technology, distinguishing males and females, gainfully occupied and not gainfully occupied. Tables 2A and 2B classify gainfully occupied males and females by qualification and age group while Tables 3A, 3B and 3C show persons, males and females according to industrial group and branch subject of qualification. Tables 4A, 4B and 4C provide details for each Province, County and County Borough of the numbers in the four main branches of science or technology.

COMMENTARY

EDUCATION

The total population aged 14 years of age and over in 1971 was 2,105,321 of whom 1,049,614 were males and 1,055,707 were females. Of these, some 186,138 persons, comprising 95,031 males and 91,107 females, were attending school, university, etc. on a full-time basis. The remaining 1,919,183 persons had ceased full-time education.

CHANGES, 1966 — 71

In Table A below, the 1966 and 1971 populations are compared, showing persons still at school, university, etc. and those whose full-time education had ceased.

TABLE A:- POPULATION AGED 14 YEARS AND OVER, SHOWING PERSONS STILL AT SCHOOL, UNIVERSITY, ETC., AND PERSONS WHO HAD CEASED FULL-TIME EDUCATION, 1966 AND 1971.

	Persons		Males		Females	
	1966	1971	1966	1971	1966	1971
	(Thousands)					
Persons who have ceased full-time education	1,896	1,919	944	955	952	965
Persons still at school, university etc. full-time	143	186	74	95	69	91
Total aged 14 years and over	2,039	2,105	1,018	1,050	1,021	1,056

While the population aged 14 years and over rose by 66,000 or 3.3 percent, between 1966 and 1971 the number of these persons in full-time education rose by 43,000 or 30.2 percent. The proportion of the male population aged 14 years and over who were still in full-time education in 1971 was 9.0 percent compared with 7.0 percent in 1966. The corresponding proportions for females were 8.6 percent in 1971 and 6.8 percent in 1966.

Table B provides a comparison between 1966 and 1971 of the proportion of persons at each of the ages 14 to 24 who were receiving full-time education.

TABLE B:- PERCENTAGE OF PERSONS AGED 14 TO 24 YEARS RECEIVING FULL-TIME EDUCATION, 1966 AND 1971.

Total 14-24	28.2	34.0	28.2	33.8	28.3	34.2

It is clear from this table that there has been a substantial increase, in the case of both males and females, in the proportion of persons receiving full-time education in each of the ages 14-20 years. However, in the 21-24 year age group, there was a decline in educational participation in the case of males which was evident for only one single year of age (24), for females. Overall, the proportion of males aged 14-24 years in full-time education increased from 28.2 percent to 33.8 percent while the proportion of females increased from 28.3 percent to 34.2 percent. Corresponding proportions for the 14-19 year age group were 39.5 percent and 50.7 percent in 1966 and 1971, respectively, for males and 42.8 percent and 53.9 percent for females.

AGE AT WHICH EDUCATION CEASED

The improvement in the educational level of the population between 1966 and 1971 in terms of the age at which education ceased is illustrated in Table C.

TABLE C:- DISTRIBUTION OF PERSONS, MALES AND FEMALES WHO CEASED FULL-TIME EDUCATION ACCORDING TO AGE AT WHICH FULL-TIME EDUCATION CEASED, 1966 AND 1971.

		Total whose full-time education has ceased (excl. age not stated)	Percentage who left school, university, etc. aged:-				
			Under 15	15	16	17	18 and over
Males	1966	100.-	60.0	10.9	12.2	5.3	5.7
	1971	100.-	55.1	11.3	13.3	6.7	7.0
Females	1966	100.-	49.5	11.9	15.1	9.1	9.2
	1971	100.-	47.0	11.6	14.9	10.4	10.0
Total	1966	100.-	54.8	11.4	13.7	7.2	7.5
	1971	100.-	51.0	11.4	14.1	8.5	8.4

The proportion of the 1971 population who had ceased their full-time education who were aged under 15 years of age when leaving education was 51.0 percent as compared with 54.8 percent in the corresponding 1966 population. This improvement was more pronounced in the case of males with the proportion in this case falling from 60.0 percent to 55.1 percent. Corresponding increases for each of the single years of age from 15 upwards reflect the improving situation. In the case of females, the proportions leaving full-time education at ages 15 and 16 also fell.

The proportion of the 1971 population who ceased education aged 19 years of age and over was greater for males than females, being 7.0 percent as compared with 6.2 percent. These figures also show some improvement on the situation in 1966 when the corresponding proportions were 5.9 percent and 5.2 percent, respectively.

LEVEL OF EDUCATION

The improvements outlined in Table C are also shown in similar fashion by reference to the highest level of educational establishment attended, in Table D.

TABLE D:- DISTRIBUTION OF PERSONS, MALES AND FEMALES WHO CEASED FULL-TIME EDUCATION ACCORDING TO HIGHEST LEVEL OF EDUCATIONAL ESTABLISHMENT ATTENDED, 1966 AND 1971.

		Total whose full-time education has ceased	Percentage who attended:-			
			Secondary	Vocational	Secondary and Vocational	University or Higher Technical, etc.
Males	1966	100.-	13.8	8.1	3.5	4.6
	1971	100.-	15.4	10.1	3.5	5.2

Total	1966	100.-	16.5	8.1	4.7	3.9
	1971	100.-	18.0	9.3	4.8	4.3

It can be seen from this table that the proportion of persons who attended second or third level education increased for both males and females between 1966 and 1971. The proportion of males who attended primary level only (including those not stating the level attended) fell from 70.0 percent to 65.8 percent while the corresponding fall for females was from 63.6 percent to 61.6 percent. The proportion of those who had ceased their full-time education who had attended university or other third level institution increased from 3.9 percent to 4.3 percent over the five-year interval.

The changes between 1966 and 1971 indicated in Tables C and D are not substantial as it must be remembered that the great majority of persons who were recorded as having ceased full-time education in the 1966 Census were also present in 1971. The changes are brought about mainly by the inclusion in 1971 of persons who left the educational system since 1966 and by the exclusion (through deaths) of persons in the older age groups. It can be seen, by observing the extreme ends of the age classification in Table E, how substantially different these groups are in relation to the level of education attained.

PRESENT AGE

The gradual improvement over time in the education level of the population is illustrated in Table E by reference to the proportion of persons in each age group who left school, university, etc. at each year of age.

TABLE E:- PERCENTAGE OF THE POPULATION AGED 20 YEARS AND OVER WHO LEFT SCHOOL, UNIVERSITY, ETC. AT VARIOUS AGES.

In this table, persons still receiving full-time education are included in the calculations as the table deals only with persons aged 20 years and over and, therefore, such persons will all fall into the category of ceasing full-time education aged 19 years and over. For males, the improvement in educational levels is illustrated in the fall in the proportion leaving education at under 15 years of age from 76.9 percent in the case of males aged 75 years and over to 35.2 percent for males in the 20-24 year age group. The proportions leaving education at this age are smaller, in all age groups, for females but the same steady improvement with age is obvious - the corresponding proportions being 67.6 percent and 29.7 percent, respectively. The change in the minimum school-leaving age from 14 to 15 will obviously result, in time, in the proportion leaving school in this age group declining dramatically.

The improvement is shown, in contrasting fashion, by the increases, for successively younger age groups, in the proportions leaving full-time education aged 19 years and over. Thus 16.0 percent of males aged 20 to 24 years fell into this category in comparison to 3.8 percent of males aged 75 years and over. In the case of females, the same patterns are evident, but in general the proportion leaving full-time education aged 19 years and over is less than for males.

REGIONS

Regional differences in educational level are examined in Table F, which shows the distribution of persons in each of the Planning Regions according to the highest level of educational establishment attended. The composition of the Planning Regions is outlined in Appendix E. Some of the differences between regions are due, of course, to the differing age and socio-economic structures within those regions; a large industrial and commercial centre like Dublin will, for example, attract to it a sizeable number of persons who attained higher educational level elsewhere. The improvement in the educational level in line with age was illustrated in the preceding section so that a region with a younger age structure would, by virtue of that fact alone, present a better picture in terms of educational level than would a region with an older age structure.

It is clear from this table that the East Region contained the highest proportion of both males and females who had attended university or other third level institution. The respective proportions for males and females were 7.7 percent and 4.1 percent with the next highest being, in the case of males, the South-West (4.8 percent), and, for females, the West (3.5 percent).

In comparison, the regions with the highest proportions of persons who had attended Primary level only (incl. not stated) were Donegal, 82.2 percent of males and 78.0 percent of females, followed by the West and the North-West. In all regions, except the East, the proportion of males who had attended Primary level only was higher than the corresponding proportion of females. In the East Region, however, the proportion of females, 56.6 percent, was slightly higher than that of males, 55.5 percent. For the State as a whole, the comparable figures were 65.8 percent of males and 61.6 percent of females

GAINFULLY OCCUPIED PERSONS

Changes in the educational level of gainfully occupied and not gainfully occupied males and females between 1966 and 1971 are examined in Table G.

TABLE G:- PERCENTAGE DISTRIBUTION OF GAINFULLY OCCUPIED AND NOT GAINFULLY OCCUPIED PERSONS WHO HAVE CEASED FULL-TIME EDUCATION ACCORDING TO HIGHEST LEVEL OF EDUCATIONAL ESTABLISHMENT ATTENDED, 1966 AND 1971.

	1966	100.-	19.3	8.1	5.9	3.1	63.6
	1971	100.-	20.5	8.5	6.0	3.5	61.6

In the case of males, the improvement in the educational level of the gainfully occupied population is illustrated by the fall from 67.9 percent to 62.8 percent in the proportion who attended Primary level only whereas the proportion at each of the other levels increased. In the case of the not gainfully occupied sector, however, the proportion who attended Primary level only rose from 85.2 percent to 86.4 percent. This sector, of course, contains a far higher proportion of the older age groups and, as was noted in Table E, there has been a steady improvement in the educational level of the population for successively younger age groups.

A similar improvement is shown in the case of females. In this case, a far higher proportion of the gainfully occupied group had attended second and third level than in the case of males and this proportion had increased between 1966 and 1971. The younger age structure of the female labour force as compared with the males is responsible for the better educational profile. This is also, in fact, true of the not gainfully occupied female sector which showed a very similar distribution to that in 1966. Included in this sector are married women engaged in home duties as well as retired women, etc.

SCIENTIFIC OR TECHNOLOGICAL QUALIFICATIONS

AGES

A total number of 21,886 persons, of whom 17,394 were males and 4,492 females, had qualifications in science or technology as defined for Census purposes (see page 155). Of these, the great majority, some 18,909, were gainfully occupied. The distribution by age group of males and females in each of the four main branches of science in which their qualifications were held is shown in Table H.

	Females	100.-	11.3	20.0	11.7	22.5	19.8	10.3	4.3

*Less than 100 persons

Of the 16,300 gainfully occupied males, some 21.6 percent were aged under 30 as compared with 31.3 percent of females. The Natural Sciences group had the highest proportion of males in the younger age groups whereas the lowest proportion of young persons were in the Medical and related Sciences, with 13.3 percent of males and 28.1 percent of females in this group being in the under 30 years age group. In each of the main branches of science, a greater proportion of gainfully occupied women were in the younger age groups.

The greatest proportion of older males, was correspondingly, in the Medical and related Sciences group - 27.4 percent were aged 55 years and over as compared with 15.8 percent of all gainfully occupied males with scientific qualifications. In the case of females, the highest proportion in this age group was 16.0 percent in the Natural Sciences group as compared with 14.6 percent overall.

REGIONS

In Table J, the distribution by Planning Region of gainfully occupied persons in each of the four main branches of science is outlined.

TABLE J:- PERCENTAGE DISTRIBUTION BY REGION OF GAINFULLY OCCUPIED PERSONS WITH SCIENTIFIC AND TECHNOLOGICAL QUALIFICATIONS BY MAIN BRANCH OF SCIENCE.

Planning Region	Branch of science in which qualification is held					Total gainfully occupied Population
	Agricultural sciences	Engineering and Technology	Medical and related sciences (incl. Pharmacy)	Natural sciences	Total	
Total	100 -	100.-	100.-	100.-	100.-	100.-
East	26.8	60.3	49.0	53.3	48.8	35.7
South West	20.3	12.5	14.2	15.5	15.1	15.6
South East	15.1	5.6	7.6	6.7	8.3	11.0
North East	5.2	3.0	4.5	3.2	4.0	5.8
Mid-West	12.4	7.1	6.7	6.3	7.9	9.6
Donegal	2.6	1.6	2.4	1.8	2.1	3.6
Midlands	7.0	3.5	4.8	3.5	4.6	7.8
West	7.8	5.2	8.6	8.2	7.3	8.7
North West	2.8	1.1	2.2	1.4	1.9	2.6

Thus, the East Region, though containing 35.7 percent of all gainfully occupied persons, accounted for 48.8 percent of such persons with scientific or technological qualifications. An even higher proportion of persons with qualifications in Engineering and Technology and in the Natural Sciences, 60.3 and 53.3 percent respectively, were in this region while, not unexpectedly, the proportion in Agricultural Sciences was low, at 26.8 percent. The distribution of persons in the Medical and related Sciences and in Natural Sciences was broadly similar to that of the total population.
