Profile 3 - At Work

Foreword

This report is the third of ten Profile reports examining in more detail the definitive results of Census 2011. It looks at the industries and occupations of the se at work, and examines unemployment with regard to immigration, education and other social and demographic factors.

Two Profile reports have already been published. Town and Country looked at population distribution and movements and Older and Younger examined the age profile of Ireland. Other topics will be covered in future Profile reports to be released throughout the remainder of 2012. A complete list of planned publications and dates can be found on page 88 of this report. These more in-depth Profile reports are accompanied by two summary publications of census results; the first, *This is Ireland – Highlights from Census 2011, Part 1* was published in March and dealt with demographic factors, while the second publication *This is Ireland – Highlights from Census 2011, Part 2* was published in June and dealt with socio-economic themes.

Web tables

All the data published in this and other reports are available on the CSO website (at www.cso.ie/census) where users will be able to build their own tables by selecting the data they are interested in and downloading them in an easy to use format for their own analysis.

Small area data

Small area data is an important output from the census and the complete set of tables for all the standard layers of geography, such as ED and Local Electoral Area, as well as tables for the new geographic unit, called Small Areas, will be published in our interactive mapping application on the CSO website on 31st July.

Interactive maps

In co-operation with the All Ireland Research Observatory (AIRO) summary census data is now available in thematic maps for Electoral Districts and all Small Areas. Combined with the release of the SAPS data in our new easy to use interactive mapping application, these new developments bring census data alive in a fresh and exciting way making it easier to access for all. Just follow the link from the website.

At work and unemployed

Economic status

As was reported in *This is Ireland Part 2*, an analysis of the census question on present principal status showed that the labour force in April 20 11 had g rown by 122,705 people since 2006 to 2,232,203. This represented a 5.8 per cent increase.

Among the labour force, the n umbers of those at work declined in the 5 years by over 6 per cent to 1,807,369 while the number of people looking for their first job rose by over 16 per cent to 34,166. The number of people who were unemployed increased significantly from 15 0,084 to 390,677. When combined with people looking for their first job the total number of people who were out of work stood at 424,843 in April 2011.

Labour force participation

Labour force participation measures the percentage of all people aged 15 or over who are available to work, that is either at work or unemployed. In 2006 the labour force participation rate was 62.5 per cent. In April 2011 the rate had declined marginally to 61.9 per cent.

Unemployment rate

The unemployment rate based on a principal economic status basis measures the percentage of peo ple in the labour force who were either looking for their first job or unemployed. In 2006 the unemployment rate was 8.5 per cent. In 2011 it had risen sharply to 19 per cent.

At work and unemployed

This release examines several facets of the labour force in April 2011. It analyses the industries and o ccupations of people at work as well as other aspects including nationality, ability to speak English, social class and field of study. There is a focus on those who were out of work, pa rticularly unemployment among young people and first time jobseekers.

Unemployed

Industry in detail

Construction and manufacturing

While results for broad industrial groups were provided in This is Ireland Part 2, a complete breakdown at detailed level is now provided in Table 1 on page 34.

The broad industrial sectors which suffered the largest decline in numbers at work between 2006 and 2011 generally related to construction manufacturing.

Table 2 below shows the top 10 indu stries at Na ce Rev 1 4-digit level by d ecline in n umbers at work between 2006 and 2 011. The largest de industry was building of constructions and engineering where numbers at work fell by ove 73,000 to 43,577.

In the manufacturing sector, the large st decline was seen in the manufa cture of fabricated metal products where numbers at work dropped by almost 11,000 to 12.177.

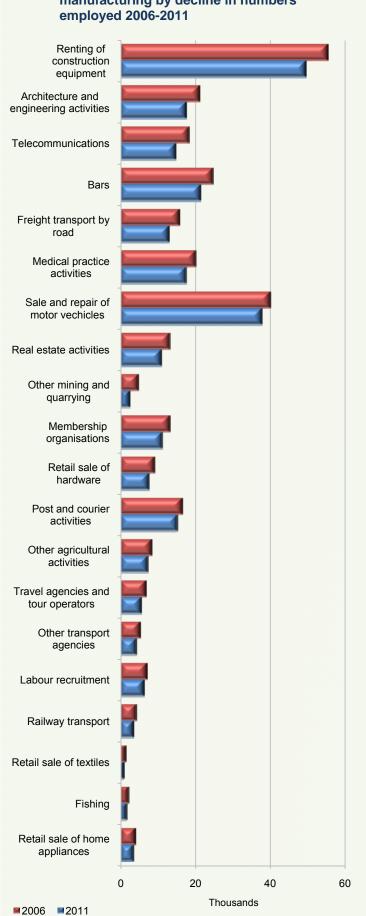

Other industries

Figure 2 shows the main declining industries outside of construction and man ufacturing. Several of these were adversely impacted by the construction decline, including real estate activities whe re the number of people at work fell by over 17 per cent to 10,850.

Table 2 Top 10 industries by decline in numbers employed 2006-2011

Industry	2006	2011	Change	% decline
Building of constructions and civil engineering	117,309	43,577	-73,732	62.9
Building completion	43,945	16,800	-27,145	61.8
Building installation	42,847	24,922	-17,925	41.8
Manufacture of fabricated metal products	23,064	12,177	-10,887	47.2
Manufacture of office machinery & computers	17,026	10,493	-6,533	38.4
Renting of construction equipment	55,569	49,510	-6,059	10.9
Manufacture of furniture	9,648	5,755	-3,893	40.4
Manufacture of other food products	13,861	10,101	-3,760	27.1
Architecture and engineering activities	21,106	17,435	-3,671	17.4
Telecommunications	18,339	14,711	-3,628	19.8

Industries on the rise

It's a fact!

44%

The percentage increase in employment in recycling between 2006 and 2011

21,039

The number of people employed in clothing retail in 2011

Medical devices

The manufacturing sector which registered the highest employment growth, increasing by 10 per cent from 22,160 to 24,305

5,189

The number of people working in radio and television activities

12%

The percentage growth in the numbers with jobs in sporting activities

Farming

Numbers at work grew by 10 per cent

Retail sectors grow

Retail sectors also featured among the industries which added the most jobs between 2006 and 2011. Employment in retail in non-specialised stores, largely convenience stores, grew to 57,488 over the 5 years, a rise of 29 per cent. The numbers working in retail sale of clothing grew by 5,738 to 21,039.

Health sectors on the rise

Growth was also recorded in several health sectors as can be seen in Fi gure 3. The strongest growing sector within healt h was veterinary activities, where the number of people at work rose by over on e third to 3,284.

Strong growth in primary education

Amid the economic uncertainty of the inter-censal years, there were industrial sectors which displayed strong employment growth. Table 3 below displays the in dustries where the large st increases in numbers at work were recorded.

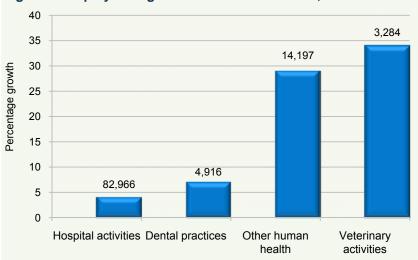

The industry which posted the largest growth in employment was primary education where the numbers of those at work rose by 18,682 to 64,177. The numbers working in secondary education rose more modestly by 5,649 to 43,213.

Elsewhere there was a 10 per cent rise in the number of people working in farming, bringing the number at work to 80,084. There were 80,645 people working in social work activities, an almost 10 per cent rise on 2 006. Employment within computer and related activities rose by 15 per cent to 41,978.

Table 3 Top industries by growth in numbers at work, 2006-2011

Industry	At work 2006	At work 2011	Change	% growth
Primary education	45,495	64,177	18,682	41.1
Retail sale in non-specialised stores	44,662	57,488	12,826	28.7
Other public administration	78,125	88,076	9,951	12.7
Farming	72,731	80,084	7,353	10.1
Social work activities	73,366	80,645	7,279	9.9
Adult and other education	19,547	26,253	6,706	34.3
Retail sale of clothing	15,301	21,039	5,738	37.5
Secondary education	37,354	43,213	5,649	15.0
Computer and related activities	36,656	41,978	5,322	14.5
Higher education	24,870	30,085	5,215	21.0

Figure 3 Employment growth in health industries, 2006-2011

Industry sectors by county

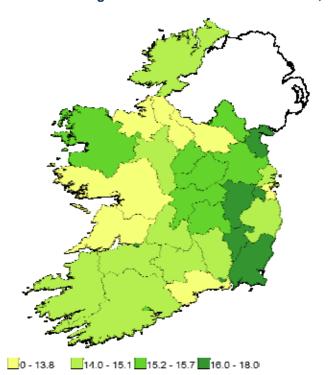

Strong regional disparities

The census results allow an analysis of industrial sectors by county and clearly display the importance of certain industries to different counties.

One in ten workers in Kerry and in Galway city were in the accommodation and food services sector, above the national average of 6 per cent while 13 per cent of Dún Laoghaire-Rathdown's workers we re employed in financial and insurance activities, compared with 5 per cent nationally.

The administrative counties most reliant on employment in agriculture, forestry and fishing were Cavan, Monaghan and South Ti pperary with 1 in 8 wo rkers in the sector. Dublin, Kildare, Louth and Wicklow had the I owest participation in agriculture, forestry and fishing.

Map 1 Percentage of workforce in each county working in the wholesale and retail sector, 2011

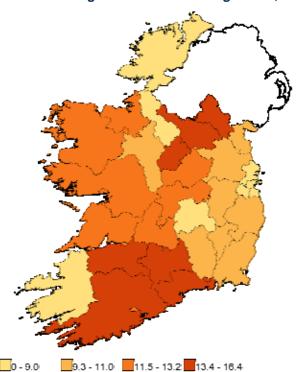

Industry mapped

Maps 1 and 2 present some regional employment disparities. The wholesale and retail trade sector accounted for 15 per cent of employment nationally, while in Louth, Carlow and Limerick city it accounted for 18 per cent of workers.

Manufacturing employed 10 per cent nationally but only 5 per cent of workers in Dublin city. In contrast, 16 per cent of tho se at work in Waterford city were in the sector. On balance the eastern seaboard counties had lower numbers in this sector with higher numbers in the south and west.

Map 2 Percentage of workforce in each county working in the manufacturing sector, 2011

It's a fact!

2,003 The number of people working in agriculture, forestry and fishing in Dublin, less than 1 per cent of those at work in the county

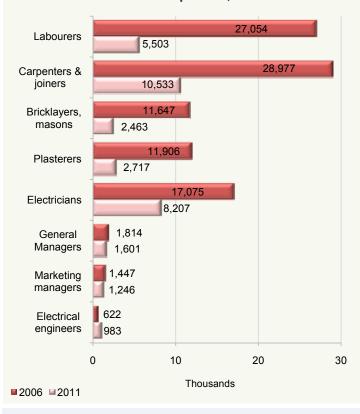

The percentage of people at work who were in the education sector in Donegal – the highest for any county

741 The number of people working in mining and quarrying in Meath – the largest number in any county

Construction and education

Figure 4 Persons at work in the Construction sector for selected occupations, 2006 and 2011

Education up

In contrast, there were 36,000 more people at work in the education sector in 2011 compared with 2 006, representing a rise of 28 pe r cent. As wit h the construction sector, there were varying rates of growth for different occupation groups within the sector.

In absolute terms the strongest growth in the sector was among primary and nursery school teachers where the number at work increased by 9,115 to just under 40,000. The next fastest gro wing occupation was childminders and nursery nurses in crèches (coded to education in Nace Rev 1) with an increase of 6,529 persons at work, up 232 per cent.

There were 5,526 additio nal educational assistants in 2011 compared with 2006, representing 75 per cent growth over the five years. The n umber of secreta ries and other assistants grew by 2,247 to 3,810.

Among the other big o ccupations in the sector, there were 2,178 more secondary teachers bringing the total to 31,829. The number of third level teach ing staff climbed by 1,898 to 12,729.

A number of support occupations in the sector declined. The number of caretakers working in Education fell by 260 to 2,379.

Construction down

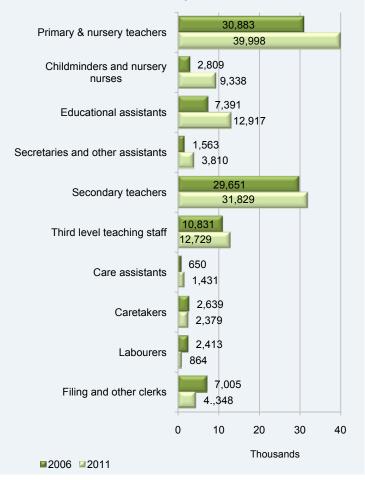

As previously reported, the num bers at work in the construction sector declined by 125,000 or 58 per cent between 2006 and 2011. The graph on the left presents the numbers at work by occupation within the sector for 2006 and 2011.

The decline in the numb er of pe ople at work wa s particularly pronounced in manual skilled and unskilled occupations. The number of carpenters and joiners at work fell by over 18,000 or 64 per cent, while there were over 9,100 fewer plasterers, a 77 per cent fall in employment. The bigg est fall in number s at work was among labourers, whose number collapsed by 80 per cent, representing over 21,000 workers.

Managers and engineers slower decline

Several non-manual occupation groups were n ot affected as severely. The number of large company general managers at work in construction fell by 12 per cent. There were 14 per cent fewer marketing managers at work in construction. The number of electrical and electronic engineers rose by 58 per cent to 983.

Figure 5 Persons at work in the Education sector for selected occupations, 2006 and 2011

Occupations in detail

Declines in construction related workers

While results for broad occupation groups were provided in *This is Ireland Part 2*, a complete breakdown at detailed level is no w provided in Table 2 on page 42.

Reflecting the trends already examined in industry, the occupations where the largest falls in employment were recorded were generally related to construction. The worst affected occupational group was building labourers where the numbers at work tumbled by over 70 per cent to 9,243. The number of builders and building contractors at work declined by over a half to 8,103.

Service industries in decline

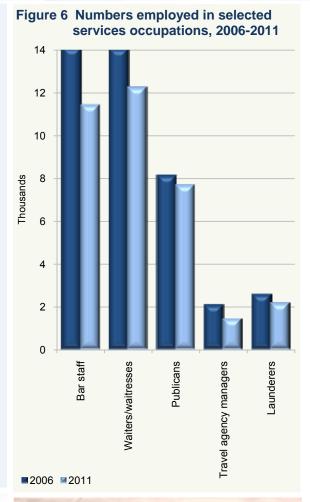

Outside of construction, many other occupations were adversely impacted by the changing economic conditions over the inter-censal years. Amo ng service occupations, the numb er of bar staff in employment fell from 14,103 to 11,452, a decline of 19 per cent. A slightly smaller decline was experienced among waiters and waitresses where numbers fell by 13 per cent to 12,269. Faring only slightly better were publicans whose number fell by 5 per cent from 8,141 to 7,710.

Glass makers fall

Employment levels am ong glass product and ceramic makers dropped by almost 6 0 per cent to 1,062. Over 4 0 per cent of persons who were unemployed in this occupation group lived in County Waterford.

Table 4 Top 10 occupations by decline in employment 2006-2011

Occupation	At work 2006	At work 2011	Change	% decline
Building labourers	31,862	9,243	-22,619	71.0
Carpenters and joiners	36,050	15,923	-20,127	55.8
Filing clerks	74,990	55,706	-19,284	25.7
Bricklayers and masons	14,847	3,803	-11,044	74.4
Electricians	24,694	14,606	-10,088	40.9
Plasterers	12,922	3,404	-9,518	73.7
Assembers and lineworkers	12,979	4,483	-8,496	65.5
Builders and contractors	16,466	8,103	-8,363	50.8
Fork lift truck drivers	10,274	3,299	-6,975	67.9
Metal workers	22,294	15,668	-6,626	29.7

Growth occupations

It's a fact!

16,940

The number of people working as taxi drivers or chauffeurs in 2011, an increase of 1 per cent since 2006

27%

The percentage increase in the number of people working as professional athletes and sports officials bringing the number to 5,722

6,093

The number of people at work as authors, writers and journalists

806

The number of tailors, dressmakers and clothing cutters at work

9%

The percentage growth in the number of farmers at work

29%

The percentage rise in the number of computer analysts and programmers

Primary teachers lead the way

There was a 31 per cent increase in the number of primary and nursery teachers between 2006 and 2011, bringing the number at work to 4 0,989. Also registering strong employment growth were auctioneers, estimators and other sales representatives, where there were 20,870 people at work, a 76 per cent increase.

Several managerial occupations also grew strongly. There were over 7,000 additional marketing managers at work, an increase of almost one quarter. There was also an increase of almost 22 per cent in the number of general managers in large companies, bringing the number at work to 20,560.

Table 5 Top 10 occupations by growth in persons employed, 2006-2011

Occupation	At work 2006	At work 2011	Change	% growth
Primary and nursery teachers	31,290	40,989	9,699	31.0
Auctioneers, other sales reps	11,808	20,870	9,062	76.7
Sales assistants	87,233	94,255	7,022	8.0
Marketing managers	29,610	36,612	7,002	23.6
Local government clerical officers	10,116	16,564	6,448	63.7
Farm owners and managers	70,577	76,975	6,398	9.1
Care assistants	32,536	38,747	6,211	19.1
Computer programmers	18,011	23,246	5,235	29.1
Educational assistants	9,285	14,191	4,906	52.8
Accountants	26,747	31,640	4,893	18.3

'Learned professions'

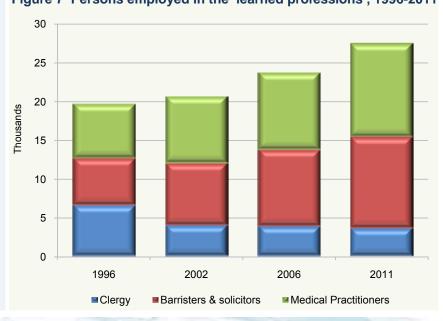

The number of people working in the 'learned professions' has changed markedly in the 4 censuses since 1996. In 1996 there were over 6,500 people working as members of the clergy (including priests and nuns). By 2 011 this had almost halved to 3,589.

In contrast, the number of people working as medical practitioners increased by over 5,000 from 7,033 in 1996 to 12,103 in the most recent census.

The strongest growth however came among barristers and solicitors. The number at work almost doubled between 1996 and 2011 from 6,096 to 12,103.

Tables pages 42 - 51

Figure 7 Persons employed in the 'learned professions', 1996-2011

Young and unemployed

High unemployment among young people

In the census, unemployment is measured on a Principal Economic Status basis and the results in *This is Ireland Part* 2 showed an overall un employment rate of 19 p er cent. Unemployment as recorded in the census is examined throughout this report.

There were over 82,000 people aged 15-24 out of work in April 2011 up from 47,122 in 2006, resulting in a n unemployment rate of 39 per cent. Among male s in this group the numbers rose from 26,448 to 50,440 over the five years giving an unem ployment rate of 45 per cent. For females, the numbers out of work incre ased from 20,674 to 31,713 giving an unemployment rate of 32 per cent.

By county

Limerick city and Donegal had the highest levels of youth unemployment with rates of 50 and 49 per cent respectively, in effect half of all young people in the labour force. The rate for Wexford was just behind at 47 per cent. The lowest rate was 27 per cent in Dún Laoghaire-Rathdown. Fingal, Cork county and Galway city were also at the lower end of the youth unemployment spectrum.

Education

Almost 70,000 of the young peo ple who we're out of work had finished their education. There was significant variation in unemployment levels depending on the level of education completed. For the 4,732 people who were e ducated to primary level only, the unemployment rate was 70 per cent. For those who had completed lower secondary level the rate was marginally lower at 65 per cent. Those with upper secondary education had a rate of 39 per cent, while the unemployment rate for the 7,534 people with third level qualifications was significantly lower at 18 per cent.

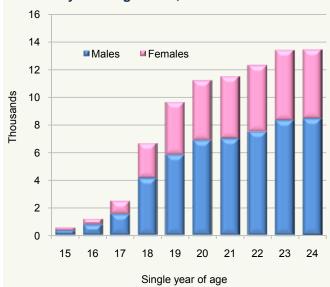

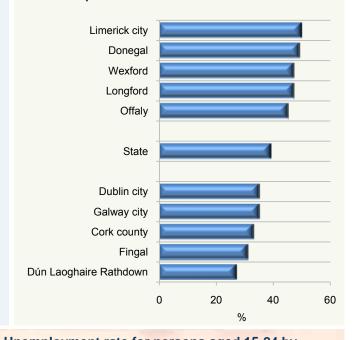

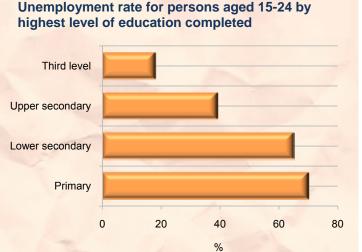

Figure 9 Unemployment rates for 15-24 year olds, top and bottom five counties

748 The number of first time jobseekers with a qualification in computing

Laois
The county with the biggest increase in first time jobseekers between 2006 and 2011

The number of first time jobseekers with a third level qualification in journalism

One in four new jobseekers were non-Irish

The number of first time jobseekers was up 16 per cent to 34,166 compared with April 2006. This was considerably greater than the 6 per cent increase in the labour force over the same period.

Just over a quarter of the usually resident first time jobseekers were non-Irish. Of these, Eastern European nationalities dominated. 1,409 or 4 per cent were Polish, with a further 721 from Lithuania and 647 from Romania. In addition there were 815 people from the UK.

From further afield, there were 609 firs t time jobseekers from Nige ria with 311 Brazilia ns and 297 people from India.

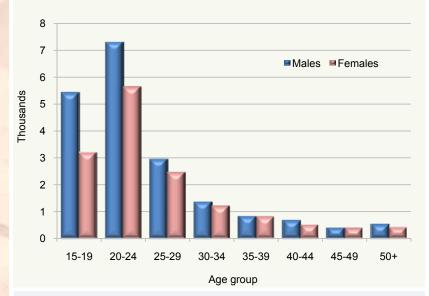

First time jobseekers

Almost 35,000 first time jobseekers

There were 34,166 people looking for their first regular job in April 2011. Fifty seven per cent of these were male and over 60 per cent were aged between 15 and 24. Of the 8,622 teenagers (15-19 years) in this group, 5,424 were males.

Table page 56

Figure 10 Number of first time jobseekers by age and sex

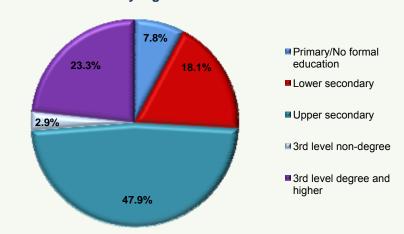

Level of education

Over 80 per cent of the first time jobse ekers had completed their full time education. People with higher levels of education were less likely to be first time jobseekers. Just over one in five of those looking for work and who had completed their educ ation had attained a degree or higher level qualification.

Of the 6,941 people who had a third level qualification and were looking for their first job, a lmost one in five had a qualification in business and administration. A further 9 per cent had an art s qualification. Almo st four hundred people with a third level qualification in architecture were looking for their first regular job.

Figure 9 First time jobseekers who have completed full-time education by highest level of education attained

Labour force by nationality

It's a fact!

The unemployment rate among Germans living in Ireland

15% The unemployment rate for Greek nationals in Ireland

12% The unemployment rate for Australians in Ireland

73% The labour force participation rate for Pakistani males

The labour force participation rate for Pakistani females

Labour force participation

Significant sex differences were apparent in labour force partici pation rates. Among EU nationals, 85 per cent of men were in the labour force compared with 71 per cent of women.

For non-EU European countries including Russia and Ukraine, 82 per cent of males and 63 per cent of females were available for work.

Over 70 per cent of Asian males were in the labour force compared with 62 per cent of females. Within this category, 73 per cent of Pakistani males were in the labour force compared with only 28 per cent of fem ales, the biggest sex discrepancy recorded.

Among all African nationalities, 69 per cent of males were in the labour force compared with 57 per cent of females.

Tables pages 57 - 59

Unemployment rates

This is Ireland Part 2 showed that the number of non-Irish people at work increased by almost 10 per cent to 268,180 between 2006 and 2011. Over the same period the number of non-Irish people who were out of work gre w from 33,58 7 to 77,460. The rate of unemployment among non-Irish people in 2011 was 22 per cent. This compared with an unemployment rate of 18.5 per cent among Irish people.

Looking at individual nationalities, Nigerians had the hig hest unemployment rate at 39 per cent (down from 45 per cent in 2006) while nationals from the Nordic countries had the lowest rates. Among Eastern Euro pean nationals, Lithuanians had an unemployment rate of 24 per cent while it was slightly lower for Polish nationals at 21 per cent.

Figure 11 Top and bottom five unemployment rates - non-Irish nationalities

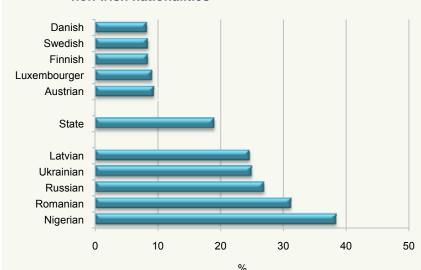

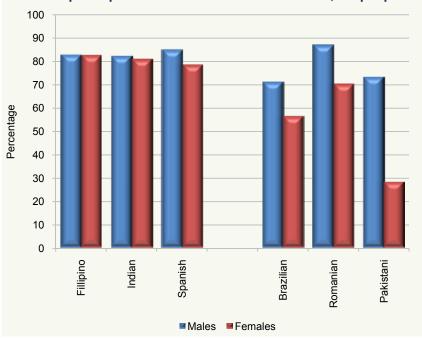

Figure 12 Smallest and largest sex discrepancies in labour force participation rates for nationalities over 5,000 people

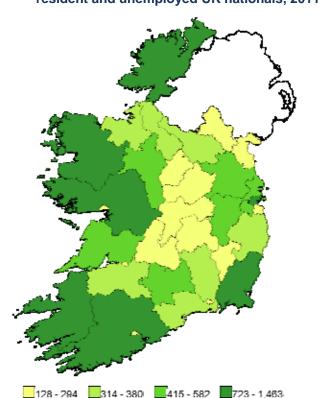

Nationality and unemployment

Non-Irish unemployment in Fingal

While one in five unem ployed people in April 2011 were non-Irish nationals, accounting for 77,460 persons overall, there were significant regional variations by county. Over on e third of tho se unemployed in Fingal were non-Irish with over 20 per cent from Europe and 7 per cent from Afri can countries.

In Leitrim 23 per cent of unemployed workers were non-Irish. While nationally only 4 per cent of all unemployed people were British, in Leitrim this stood at 11 per cent. In fellow Connacht counties Mayo and Roscommon, 8 per cent of unemployed people were British.

Map 4 Distribution by county of the 15,093 usually resident and unemployed UK nationals, 2011

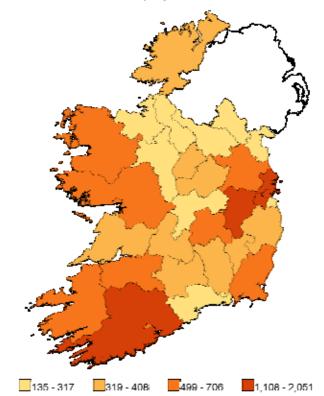

Low numbers of non-Irish in Donegal

The counties with the lo west percentage of no n-Irish nationals among those out of work were Donegal (12%), Wicklow (13%) and Waterford county (13%).

Only 18 per cent of unemployed people in Cork city were non-Irish, the lowest of any of the 5 major cities. In Galway city 30 per cent of those out of work were non-Irish. Eight per cent of people out of work in Galway city were Polish, the highest of any county in the state.

In Monaghan and Meath, 5 and 4 per cent respectively of those unemployed were Lithuanian. This was above the national average figure of 1 per cent.

Map 5 Distribution by county of the 18,853 usually resident and unemployed Polish nationals, 2011

It's a fact!

The percentage of unemployed people in Donegal who were Polish - half the national average

7,384 The number of Asians out of work

Recent immigrants

Unemployment higher among Irish one year immigrants

Over 53,000 people moved to Ireland in the year leading up to April 2011. Of these, 47,11 1 were aged 15 or over, with just over 37 per cent of this gr oup being Irish. Over a third of the Irish immigrant labour force was unemployed, compared with a lower rate of 26 per cent for non-Irish immigrants.

Over half of the 2,3 31 Brazilians who moved to Ireland in the year leading up to the census were students, considerably above the figure of 19 per cent for all nationalities. High numbers of students were also recorded among other nationalities including Chinese and Spanish.

Table 6 Usually resident one year immigrants, economic status by nationality

Nationality	Number of immigrants	At work	Unemployed (incl. looking for first job)	Students	Looking after home/family	Other (incl. retired)

Where they worked

Over 23,000 people who moved to Ireland in the year leading to the census were at work in April 20 11. Of this gro up, 2,806 p eople were working in the accomm odation and food service sector, 2,272 of whom were non-Irish. There was a similar picture in the next largest employing sector, wholesale and retail, where all most two thirds of those at work were non-Irish.

Almost 2,500 people took up jobs in the IT and communications sector of which 76 per cent were non-lrish.

In the health and social work sector, 56 per cent of workers among this group were Irish. Over 60 per cent of the 1,776 o ne year migrants who took up jobs in the education sector were Irish, a s were 57 per cent of those working in science-related sectors.

Just over 1,300 of the one year migrants had jobs in finan cial services, 58 per cent of whom where Irish.

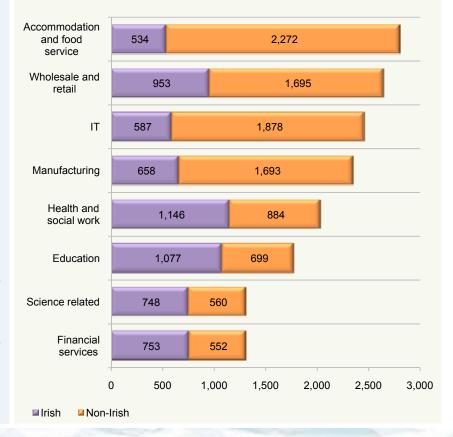

Table page 61

Languages and employment

Better English, better job prospects

Over 400,000 people aged 15 and over spo ke a language other than English or Irish at hom e in April 20 11. The unemployment rate among these people was 21 per cent, above the national average for u sual residents of 19.2 per cent. Among foreign language speakers, those who spoke English well or very well were much less lik ely to be unemployed than those with inferior ability; almost one third of the 67,531 people who did not speak English well or at all and were in the labour force were unemployed.

Labour force participation among those who spoke another language at home showed significant differences by gender. More than 80 per cent of males were either at work or unemployed compared with 68 per cent of wome n. The difference was particularly stark among those who did not speak English at all. For these people, male labour force participation was 83 per cent while the figure for females was only 55 per cent. Many of the wome n in this group were looking after the home.

Poor English ability and employment

Over 35,000 people who did not speak English well or at all were at work in April 2011. Almost 10 per cent, or 3,105 of the people in this category worked in restaurants. A further 8 per cent or 2,943 people worked in building and landscape maintenance. The next most common industry was me at processing, where 2,192 worked.

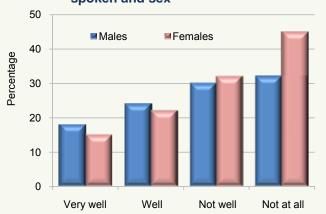

In terms of occupations, 12 per cent or 4,149 of the people in this group worked as cleaners, making it by far the larg est group. The next largest occupation by numbers at work was kitchen and catering assistants, where 2,036 or 6 per cent worked. A furthe r 2,031 worked as food, drink or tobacco operatives.

Table page 63

Field of study and unemployment

Third level qualifications

The average rate of unemployment for the State overall was 19 per cent while for those with a third level qualification the rate was considerably lower at 8 per cent.

The third level field of study which had the lowest level of unemployment was p rotection activities, which includes Garda and fire servi ce training. Only 109 people, representing 2 per cent of those with a third level qualification in this category were out of work. Similarly only 2 per cent or 1,072 people with a third level nursin g qualification were unemployed.

For those with third level qualifications, high unemployment rates were found among those who had studied fine arts (962 people or 1 8% unemployed), audio visual and media production (1,828 people or 17% unemployed) and hair and beauty services (776 people or 17% unemployed).

Second level qualifications

Unemployment among th ose with post-secondary school second level qualifications was 22 per cent overall, though this varied considerably by qualifications held.

Those with a second level qualification in building a nd civil engineering had the highest unemployment rate with 19,697 people out of work. Over 1,600 peo ple, a third of those with a second level qualification in materials (wood, paper, plastic and glass related studies), were out of work.

Only 6 per cent or 2,401 people with an agriculture qualification were out of work. Simila rly, only 424 or 6 per cent of those with a se cond level finance and banking qualification were unemployed.

Labour force participation and fertility

Participation and fertility

A question on the census form on the number of children born to women enables separate analysis of labour force participation rates for women who have had given birth and those who have never given birth. Significant variations can be seen as illustrated in the graph below.

Among those who had never give n birth, pa rticipation peaked at age 30-34 with a rate of 92.6 per cent compared with a participation rate of 73 per cent for those of the same age who had given birth. Rates fell steadily for those who had not given birth whereas for those who had given birth, rates declined to age 40-44 before climbing to 69.2 per cent participation at age 45-49. Thereafter participation declined for all women.

Figure 17 Female labour force participation by age and fertility

It's a fact!

10% Labour force participation among women aged 15-19 who had not given birth

42% Labour force participation among women aged 15-19 who had given birth

Labour force participation among women aged 50-54 who had given birth with a third level qualification

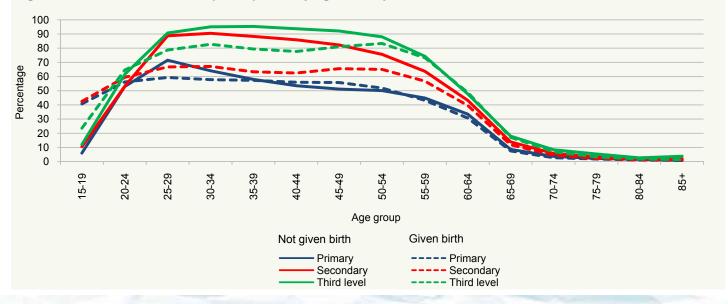

Education, fertility and participation

Labour force participation rates increase with level of education. Among women educated to primary level, just over one quarter were participating in the labour force either at work or unemployed. In contrast, over half of women educated to secondary level were in the labour force. Labour force participation was over 75 per cent for women with third level qualifications.

As can be seen in Figure 18, among women who had given birth and were educated to secondary or third level, labour force participation increased for those in their forties. Among women who had not given birth, participation declined for those in their forties and older age groups. For women educated to third level and who had given birth, labour force participation peaked for those aged 50-54 at 83.3 per cent.

Table page 65

Figure 18 Female labour force participation by age, fertility and level of education

Social class and unemployment

Lower social class, higher unemployment

There was significant variation in une mployment rates a cross social classes in April 20 11. Among professionals, only 6 per cent of those in the labour force were out of work. Unemployment among managerial and technical workers was also well below average at 8 per cent. In contrast, almost one third of unskilled workers were unemployed. Over one quarter of skilled manual workers were jobless. This represented 103,277 people or almost one in four of the total number out of work. It is likely that many of these people would previously have worked in jobs related to the construction sector.

Young people

As seen earlier in this report, unemployment among young people aged 15-24 was 39 per cent, considerably higher than the overall average of 19 per cent but again this varied considerably by social class. Among the professional social class, 16 per cent were unemployed in April 2011. For those in the managerial and technical class this was slightly higher at 20 per cent. In contrast, 36 per cent of younger skilled manual workers and 40 per cent of young unskille d workers were jobless. In the largest social class category, non-manual, there were 10,729 young p eople out of work, g iving an unemployment rate of 22 per cent.

Labour force participation

Labour force participation also varied by social class and was highest for non-manual workers at 72 per cent. Participation was lowest for non-skilled workers at 62 per cent. Among professional workers, 70 per cent were in the labour force.

Table page 66

Social class	At work	Unemployed	Unemployment rate %
Professional	5,412	1,022	15.9
Managerial and technical	22,803	5,584	19.7
Non-manual	38,665	10,729	21.7
Skilled manual	24,825	14,169	36.3
Semi-skilled	21,636	8,193	27.5
Unskilled	5,683	3,755	39.8

Socio-economic group

Farmers and professionals had lower unemployment

Farmers and professionals had the lowest unemployment rates among census socio-economic groups in 2011. Just under 4,000 farmers were unemployed, representing a mere one in twenty farmers in the labour force. Only 6 per cent of higher professionals and 7 per cent of those in the lower professional group were unemployed.

In contrast one in three workers in both the manual skilled and unskilled groups were out of work. The largest socio-economic group, with an unemployment rate of 13 per cent was non-manual. This group includes occupations such as clerical workers in financial institutions and government, sales assistants and secretaries.

Men and women

As with the general population, unemployment among women was lower than for men across almost all socio-economic groups. This was most pronounced for unskilled workers. While more than four in ten unskilled male workers were unemployed, only 18 per cent of female unskilled workers were jobless. Most unskilled females were cleaners and domestic workers and were less affected by unemployment than males who were more prominent in the construction industry.

Dún Laoghaire-Rathdown and Limerick city

Dún Laoghaire-Rathdown and Limerick

Dún Laoghaire-Rathdown had the lowe st unemployment rate of any administrative county in 2011, at 11.2 per cent. Limerick city had an u nemployment rate of 28.6 per cent, the highest in the country.

Industries

The industrial structure of the two areas was very different. There were 87,490 people in Dún Laoghaire-Rathdown who were at work. The largest industry by numbers at work was financial intermediation excluding insurance and pension funding, where 6,618 people worked, representing 8 per cent of those at work. A further 4,604 worked in computers and related activities, with 4,410 in hospital activities. Two thousand eight hundred and fourteen people worked in higher education while 2,112 had jobs in legal activities.

Of the 18,419 people at work in Limerick city, 858 or 5 per cent had jobs in social work related activities. The next biggest industry was retail sales of food, bevera ges or tobacco, where 768 people worked. 722 people worked in other areas of the retail trade, with a further 664 working in public administration.

Occupations

The largest occupation in Dún Laoghaire-Rathdown was marketing and related managers, which accounted for 3,929 people or 4 per cent of those at work. The next three largest occupations, each accounting for over 3,000 people, were sales assistants, accountants and general managers of large co mpanies. The biggest occupational group in Limerick was sales assistants, accounting for 1,618 or 9 per cent of those at work. The next biggest occupations by numbers at work were cleaners and domestics (611 people), filing and othe r clerks (579) and managers and proprietors of shops (569).

Education gaps

Clear differences were apparent in the levels of education among the labour force in the two areas.

Almost 60 p er cent of people in Dún Laoghaire-Rathdown's labour force held third le vel qualifications. In contrast, only 29 per cent of Limerick city's workforce were similarly qualified. A further 29 per cent of Limerick city's labour force had an educational qualification no higher than lower second level. The comparable figure for Dún Laoghaire-Rathdown was 11 per cent

Social class

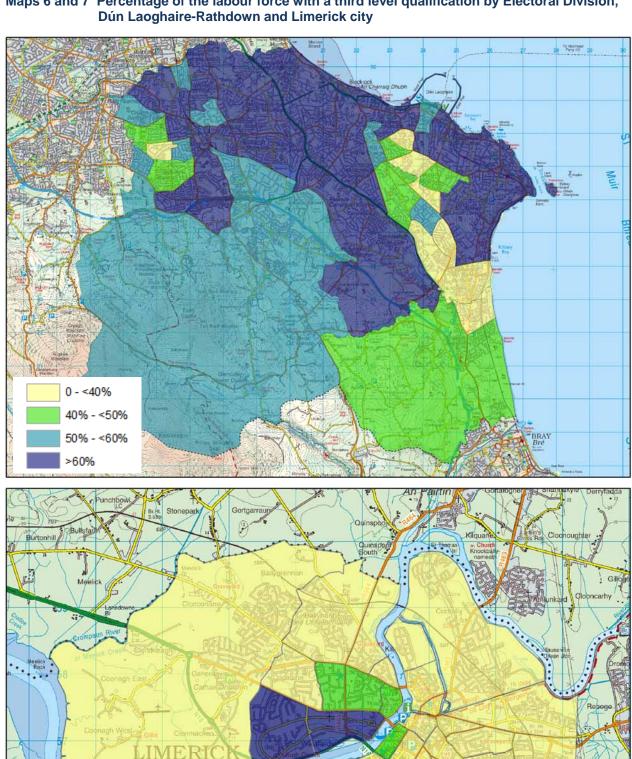

Over half of those over the age of 15 in Dún Laoghaire-Rathdown were in either social class 1 or 2, representing professional workers and managerial and technical workers. In Limerick city, just over a quarter of people were in these two groups. Over 40 per cent of adults in Li merick city were in soci al classes 3, 4 or 5, containing non-manual, skilled manual and semi-skilled workers.

APPENDICES

Appendix 1

Background Notes

A Census of Population was taken on the night of Sunday, 10 April 2011 in accordance with the Statistics (Census of Population) Order 2010 (S.I. No. 207 of 2010)¹. This report is the third in a series of profile reports and looks at employment, occupations and industries in Ireland.

Coverage of the Census

The census figures relate to the *de facto* population i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 10 April 2011, together with all persons who arrived in that area on the morning of Monday, 11 April 2011, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census Night as well as those in residence, while usual residents temporarily absent from the area are excluded.

The date of the census was chosen to coincide with a period when passenger movements were at a minimum and, consequently, the figures closely approximate to those for the normally resident population. Members of the Defence Forces who, on Census Night, were serving abroad with the United Nations were excluded from the enumeration.

Conduct of the Census

A temporary field force consisting of 6 Census Liaison Officers, 44 Regional Supervisors, 438 Field Supervisors and some 4,854 part-time Enumerators carried out the census enumeration. During the four weeks before Census Day the enumerators entered details in respect of 2 million private residences and communal establishments in their enumerator record books. They simultaneously delivered blank census questionnaires to 1.65 million of these dwellings that were expected to be occupied on Census Night. Approximately 290,000 residences were vacant at the time of the census, while in the remaining cases the household was either enumerated elsewhere or temporarily absent from the State. The collection of completed questionnaires took place between Monday 11 April and Friday 13 May, 2011.

The Central Statistics Office (CSO) wishes to record its appreciation of the public-spirited co-operation received from households and the work carried out by the census field force.

¹ The Statistics (Census of Population) Order 2010 was made by the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act 1993 (No. 21 of 1993).

Production of results

Each Enumerator first prepared and returned to the CSO a summary of the population of his/her enumeration area. These summaries formed the basis for the preliminary 2011 census results published in June 2011. The completed questionnaires for individual households were subsequently transported to the CSO for processing. The population summaries, dwelling listings and enumeration maps for individual enumeration areas were checked for consistency and used to determine the boundaries of census towns and suburbs/environs of towns with legal boundaries. The capture and processing of the responses to questions on the questionnaires proceeded concurrently.

The planned publication schedule is contained in Appendix 5. Two summary reports presented highlight results primarily for the State; the first one, *This is Ireland - Part 1*, looked at overall population change by county; it also examined age, marriage, households and families as well as including first results on nationality, foreign languages, the Irish language, religion and housing. The second summary report, *This is Ireland - Part 2*, looked at other social and economic factors such as employment, occupations, education and skills and travel and health-related topics. Apart from the two summary reports we have already published two Profile reports. These reports dealt with population distribution and movements and the age profile of Ireland respectively. Further profile reports will provide more detailed results on individual topics; the details are listed in the publication schedule.

Appendix 2

Definitions

Labour Force and Unemployment - differences between census and official figures

The results of the Quarterly National Household Survey (QNHS) provide the basis for the official series of quarterly labour force estimates. The labour force and its constituent figures shown in this report are directly based on the census. Users should be aware that information derived from identical questions in the census and QNHS for the same year may show appreciable differences. The main categories affected are the constituents of the question on principal economic status and the employment estimates classified by industry and occupation. The main reasons for the differences are:

- the QNHS uses the International Labour Office (ILO) classification, which has a much wider range of
 questions on the labour force and which may have a bearing on the responses received to individual
 questions. Under the ILO criteria, employment, unemployment and inactive population are defined as
 follows:
 - In Employment: Persons who worked in the week before the survey for one hour or more for payment or profit, including work on the family farm or business and all persons who had a job but were not at work because of illness, holidays etc. in the week
 - **Unemployed:** Persons who, in the week before the survey, were without work and available for work within the next two weeks, and had taken specific steps, in the preceding four weeks, to find work.
 - Inactive Population (not in labour force): All other persons
- the census form is completed by a responsible adult in each household throughout the State in respect of
 everyone present in the household on Census Night while the QNHS is by face to face interview
- the census relates to all persons present in the State (including visitors from abroad) at the time of the census while the QNHS covers persons usually resident in Ireland
- the census is a complete enumeration while the QNHS is a sample survey

The chief difference resulting from this is that the Census records an unemployment rate (based on Principal Economic Status) of 19.0 per cent, compared with the official rate (based on ILO criteria) of 14.3 per cent.

Industry

In Census 2011 industry is coded using NACE – the General Industrial Classification of Economic Activities within the European Communities. The current version, NACE Rev. 2, is a 4-digit activity classification that was adopted in 2006 and is a revision of the version originally published by Eurostat in 1970. The previous version, NACE Rev.1, was in use in the censuses of 2002 and 2006. To aid in the comparison of data from both censuses, industry has been dual-coded in 2011, i.e. coded to both NACE Rev.1 and NACE Rev.2

NACE Rev 2 is a hierarchical classification, with 88 Divisions at 2-digit level, 272 Groups at 3-digit level and 615 Classes at 4-digit level. The NACE Rev 1 classification is also hierarchical, with 62 Divisions at 2-digit level, 224 Groups at 3-digit level and 514 Classes at 4-digit level. The NACE Rev.2 classification is shown in Appendix 3.

The industry in which a person is engaged is determined (regardless of their occupation) by the main economic activity carried out in the local unit in which he or she works. If, however, the local unit provides an ancillary service to another unit in the business (e.g. administration, storage, etc.) then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual.

A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term "sector of economic activity". The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons, the nature of their own business or profession.

Occupation

The Occupation classifications used in the census are based on the UK Standard Occupational Classification² (SOC), with modifications to reflect Irish labour market conditions. The latest version of SOC is SOC2010. Previously the census used a classification based on the SOC90 classification, which was first used in Census 1996. The Soc classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). Census 2011 has been dual-coded to both the Soc90 and Soc2010 classifications to allow for comparisons with previous years. The hierarchical structure provided within these classifications is suited to accurate automatic coding.

The code to which a person's occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.,

The Soc2010-based classification is shown in Appendix 4.

Socio-economic group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition, a residual group entitled. "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation (coded using Soc90) and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status.

Persons looking after the home/family or at school/college, who are members of a family unit, were classified to the socio-economic group of another person in the family unit using a priority table based on the relationships within the family. Thus, if the reference person³ of a family was at work, unemployed or retired, other persons were assigned to his/her socio-economic group. If the reference person was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.), they were assigned to the socio-economic group of the other parent, spouse or cohabiting partner in the family unit. If there was no such spouse or partner or if the spouse, in turn, was neither at work, unemployed or retired, they were assigned to the socio-economic group of a working son/daughter. If there were no persons in the family unit with a socio-economic group then they were assigned to the **unknown** socio-economic group. Other persons looking after the home/family or at school/college who were not members of a family unit, such as relatives of the reference person (e.g. widowed grandparents, etc.) were assigned a socio-economic group using the above method. Unrelated persons or persons living alone who are looking after the home/family or at school/college were assigned to the **unknown** group.

-

² Standard Occupational Classification, Second edition, HMSO, London, 1995.

³ The reference person in each private household is the first person identified as a parent, spouse or cohabiting partner in the first family in the household. Where no person in the household satisfies these criteria, the first usually resident person is used as the reference person.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

Social class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation (coded using Soc90):

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible.

Private household

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room. In order to be included in the household, a person must be a usual resident at the time of the census. Therefore, visitors to the household on Census Night are excluded, while usual residents temporarily absent (for less than 12 months) are included.

A *permanent private household* is a private household occupying a permanent dwelling such as a house, flat or bed-sit.

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling.

Aggregate Town and Aggregate Rural Areas

The population in the Aggregate Town Area is defined as those persons living in population clusters of 1,500 or more inhabitants. For this purpose a town with a legally defined boundary is classified on the basis of its total population including any suburbs or environs.

The population residing in all areas outside clusters of 1,500 or more inhabitants is classified as belonging to the Aggregate Rural Area. This is a statistical concept and is not related to the former Rural District administrative unit.

Appendix 3

Detailed list of industries (NACE Rev 2)

Code	Industry	Code	Industry
	Agriculture, Forestry and Fishing	2310	Manufacture of glass and glass products
0190	Farming (Farming of animals, mixed farming)		Manufacture of grass and grass products Manufacture of articles of concrete, plaster and
0191	Growing of crops, fruits, plants, flowers and vegetables	2360 2380	cement All other manufacture of other non-metallic mineral
0192	Other agricultural activities and agricultural		products Manufacture of basis mattels
	activities n.e.c	2400	Manufacture of basic metals Manufacture of fabricated metal products, except

Appendix 6

Census 2011 Questionnaire

The attached extract is taken from the household form used in the 2011 Census. The household form covers 6 persons and consists of 24 pages. The attached extract covers persons 1 and 2 only. The layouts for persons 3 to 6 are identical to that for person 2, apart from the relationship question (Q4).

Census 2011

The 2011 Census will take place on Sunday 10 April and will count all the people and households in the country on that night. It is the twenty-fourth census to be held since 1841. The census results will give a comprehensive picture of the social and living conditions of our people and will assist in planning for the future.

What you need to do

Please keep this form in a safe place and complete it on the night of Sunday 10 April, Census Night. You should consult the Explanatory Notes on the back page to assist you in completing the form. Remember to sign the declaration on page 23 and to have your completed form ready for collection by your Enumerator.

Legal obligation to participate

This is a Notice under Section 26 of the Statistics Act 1993. The Census is being taken under the Statistics Act 1993 and the Statistics (Census of Population) Order 2010. Under Sections 26 and 27 of the Statistics Act 1993 you are obliged by law to complete and return this form. Any person who fails or refuses to provide this information or who knowingly provides false information may be subject to a fine of up to €25,000.

Confidentiality is guaranteed

The confidentiality of your census return is legally guaranteed by the Statistics Act 1993. The Central Statistics Office will use the information you provide for statistical purposes only. This includes the production of statistical tables and analytical reports and the selection of samples for some of our surveys.

Your Census Enumerator

Your Census Enumerator will help you if you have any questions about the Census. Please co-operate fully with your Enumerator to help ensure the success of Census 2011.

Thank you for your co-operation.

Gerard O'Hanlon Director General

Who should complete the Census Form?

The householder or any adult member of the household present on the night of Sunday 10 April should complete this form. A separate Household Form should be completed for every household.

A household is:

- one person living alone, or
- a group of related or unrelated people living at the same address with common housekeeping arrangements, meaning they share at least one meal a day or share a living or sitting room.

Do you need additional forms?

If there is more than one household at this address, ask your Enumerator for another Household Form.

If there are more than 6 persons in your household on Sunday 10 April, ask your Enumerator for a blue Individual Form for each additional person.

How to complete your Census Form

- 1. Use a Black or Blue pen.
- 2. Mark boxes like this —.
- 3. If you make a mistake, do this **and** mark the correct box.

Where you are required to write in an answer please use BLOCK CAPITAL LETTERS and leave one space between each word. Continue on to a new line if a word will not fit, for example:

H O T E L R E C E P T I O N I S T

Have your form ready for collection

Your Enumerator will return between Monday 11 April and Monday 9 May to collect your completed form.

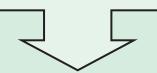

If your form has not been collected by 9 May, please return it fully completed to Central Statistics Office, PO Box 2011, Freepost 4726, Swords, Co. Dublin.

Féadfar leagan Béarla nó Gaeilge den fhoirm seo a chomhlánú.

START HERE

What type of accommodation does your household occupy?

Mark — one box only.

A whole house or bungalow that is:

- Detached
- Semi-detached 2
- Terraced (including end of 3 terrace)

A flat or apartment (including duplexes) that is self-contained:

- In a purpose-built block
- Part of a converted house or 5 commercial building

A bed-sit:

Bed-sit (with some shared 6 facilities e.g. toilet)

A mobile or temporary structure:

A caravan or other mobile or 7 temporary structure

H2 When was your house, flat or apartment first built?

Mark — the year in which first built even if the building was subsequently converted, extended or renovated.

Before 1919

4

8

- 1919 1945 inclusive 2
- 3 1946 - 1960 inclusive
- 1961 1970 inclusive
- 5 1971 - 1980 inclusive
- 1981 1990 inclusive 6
- 1991 2000 inclusive 7
- 2001 2005 inclusive
- 9 2006 or later

Does your household own or rent your accommodation?

Mark — one box only.

- Own with mortgage or loan
- 2 Own outright
- Rent 3
- 4 Live here rent free

If renting, who is your landlord?

- Private landlord
- **Local Authority** 2
- Voluntary/Co-operative 3 housing body

If your accommodation is rented, how much rent does your household pay?

Enter amount to the nearest Euro.

Mark — one box only.

- Per week 1
- 2 Per month
- 3 Per year

H5 How many rooms do you have for use only by your household?

- Do NOT count bathrooms, toilets, kitchenettes, utility rooms, consulting rooms, offices, shops, halls or landings, or rooms that can only be used for storage such as cupboards.
- Do count all other rooms such as kitchens, living rooms, bedrooms, conservatories you can sit in, and studies.
- If two rooms have been converted into one, count them as one room.

Number of rooms

H6 What is the main type of fuel used by the central heating in your accommodation?

Mark one box only.

- No central heating 1
- Oil 2
- 3 Natural Gas
- Electricity 4
- 5 Coal (including anthracite)
- Peat (including turf) 6
- 7 Liquid Petroleum Gas (LPG)
- Wood (including wood pellets) 8
- 9 Other

H7 What type of piped water supply does your accommodation have?

Mark — one box only.

- Connection to a Public Main 1
- 2 Connection to a Group Water Scheme with a Local Authority source of supply
- Connection to a Group Water 3 Scheme with a private source of supply (e.g. borehole, lake, etc.)
- Connection to other private 4 source (e.g. well, lake, rainwater tank, etc.)
- No piped water supply 5

H8 What type of sewerage facility does your accommodation have?

Mark — one box only.

- Public sewerage scheme 1
- Individual septic tank 2
- Individual treatment system 3 other than a septic tank
- 4 Other sewerage facility
- 5 No sewerage facility

H9 How many cars or vans are owned or are available for use by one or more members of your household?

Include any company car or van if available for private use.

Mark — one box only.

- One 1
- Two 2
- 3 Three
- Four or more 4
- 5 None

H10 Does your household have a personal computer (PC)?

- 1 Yes
- No 2

H11 Does your household have access to the Internet?

Mark — 'Yes' if you have access to the Internet in your home.

- Yes, Broadband connection 1
- Yes, other connection 2
- 3 No

H12

ALL PERSONS MUST BE ENUMERATED WHERE THEY SPEND CENSUS NIGHT

Below are two lists. List 1 is for persons present at this address on the night of Sunday 10 April, Census Night. List 2 is for persons who usually live at this address but who are temporarily away on the night of Sunday 10 April. See the Explanatory Notes relating to Question 7 on the back page for guidance in interpreting a person's place of usual residence.

PRESENT PERSONS

- All persons alive at midnight on Sunday 10 April who spent the night at this address.
- Persons who stayed temporarily in the household (i.e. visitors).
- Persons who arrived the following morning not having been enumerated elsewhere.

DO NOT INCLUDE in List 1

- Any person who usually lives at this address but who is temporarily absent on the night of Sunday 10 April. These persons should be listed as being absent in List 2 below.
- Students who were away from home on the night of Sunday 10 April. They should be listed as being absent in List 2 below.
- Babies born after midnight on Sunday 10 April.

LIST 1 Persons PRESENT in the household on the night of Sunday 10 April

ask your Enumerator for guidance.

Explanatory Notes

Question H3 – Does your household own or rent your accommodation?

If you rent your accommodation (box 3), or live in it rent free (box 4), you should also answer the second part of the question 'who is your landlord?'. Select the appropriate box (1, 2 or 3) to indicate whether your landlord is a 'Private landlord', a 'Local Authority' or a 'Voluntary/Co-operative housing body', regardless of whether or not you pay all or part of the rent yourself, or if it is paid on your behalf by the HSE or any other body.

Question H4 – If your accommodation is rented, how much rent does your household pay?

If the HSE or any other body pays part of the rent, only the amount paid by the household should be entered. Enter the amount to the nearest Euro and mark the box corresponding to the period covered e.g. if your household pays a weekly rent of €78.60 enter 79 and mark box 1. If all of your rent is paid on your behalf enter 0 and mark box 1.

Question 4 - Relationship

The relationship question is designed to determine families within households. This includes where there are two or more families in the one household. For example, a household consisting of an adult daughter living with her two parents and her own child would be counted as a two family household.

The example given below shows how the question should be answered for the child in this situation, where the parents are Persons 1 and 2 on the form, the adult daughter is Person 3 and the child is Person 4.

Mark — one box only for each person.

Question 7 – Where do you usually live?

This question refers to your place of usual residence at the time of the Census. If you have lived at this address for a continuous period of at least 12 months before Census Night, or have arrived at this address in the 12 month period before Census Night with the intention of staying here for at least one year you should mark box 1 (HERE). If your usual residence is not here but is elsewhere in Ireland (including Northern Ireland) you should mark box 2 and write in your full address. If your usual residence is elsewhere abroad you should mark box 3 and give the country of usual residence.

The general guideline is that a person's place of usual residence is where he/she spends most of his/her daily night rest. The following specific guidelines should be used:

- Those away from home during the week who return to the family home at weekends should consider the family home as their place of usual residence.
- Primary and secondary students who are boarding away from home, and third level students at college or university, should consider the family home as their place of usual residence.
- If a person has spent or intends to spend 12 months or more in an institution then the institution is that person's place of usual residence.
- If a person regularly lives in more than one residence during the year then the place where he/she spends the majority of the year should be chosen as his/her place of usual residence.

Question 8 – Where did you usually live one year ago?

This question is for persons aged 1 year or over. The guidelines in relation to Question 7 also apply to this question. If your place of usual residence one year before the Census was the same as now you should mark box 1 (SAME as now).

Question 9 – Have you lived outside the Republic of Ireland for a continuous period of one year or more?

This question is for persons aged 1 year or over. If your place of usual residence is in the Republic of Ireland and you were either:

- born in this country and lived outside it for a continuous period of one year or more, or
- born abroad and lived outside Ireland for a continuous period of one year or more,

then you should mark box 1 (Yes). You should also write in the year of last taking up residence in this country and the country of last previous residence.

Question 15 — Do you speak a language other than English or Irish at home?

If you do not speak a language other than English or Irish at home you should mark box 2 (No) and proceed to Question 16. This means those who speak only English and/or Irish at home do not have to report on their ability to speak the English language.

Question 16 – Do you have any of the following long-lasting conditions or difficulties?

For the purpose of this question a long lasting condition or difficulty is one which has lasted or is expected to last 6 months or longer, or that regularly re-occurs.

Question 22 – Do you provide regular unpaid personal help for a friend or family member with a long-term illness, health problem or disability?

If you provide regular unpaid help as a carer, regardless of whether or not you are in receipt of Carer's Allowance/Benefit, you should mark box 1 (Yes) and write in the weekly number of hours of caring.

Question 25 – What is the highest level of education/training (full-time or part-time) which you have completed to date?

The categories distinguished in this question follow the National Framework of Qualifications (NFQ). Further details can be found at www.nfq.ie

Further information on FETAC, HETAC, foreign qualifications and all other qualifications in general can be found at www.census.ie

Question 26 – What is the main field of study of the highest qualification you have completed to date?

This question is to capture post-secondary school qualifications only. If you have a number of qualifications, the field of study relating to the highest qualification only should be listed.

Question 27 – How would you describe your present principal status?

You should mark one box only to select the category which you feel best describes your present principal status. If you are on sick leave or maternity leave and intend to return to work at some stage you should mark box 1 (Working).

Question 34 – Address of place of work, school or college

Persons who leave the household to attend work, school or college should supply the full name and address of this place.

For children who attend pre-school facilities (e.g. crèche, kindergarten) outside the home, the full name and address of this facility should be supplied by the person filling in the form.
