Profile 9 - What We Know

**Foreword** 

This report is the ninth of ten Profile reports examining in more detail the definitive results of Census 2011. It

examines education in Ireland and the Irish language.

The report forms part of a series of census publications providing interpretation and analysis of the 2011 census results. Profile reports 1 to 8 covered population distribution and movements, the age profile of Ireland, industry and occupations of workers, housing in Ireland, households and families, migration and diversity, religion, ethnicity and Irish Travellers, and most recently, health, disability and carers. The final report will look at commuting in Ireland. A complete list of reports and publication dates can be found on page 93 of this

report.

Web tables

All the data published in this and other reports are available on the CSO web site (at <a href="www.cso.ie/census">www.cso.ie/census</a>) where users will be able to build their own tables by selecting the data they are interested in and downloading them in an easy to use format for their own analysis.

Small area data

Small area data is an important output from the census and the complete set of tables for all the standard layers of geography, such as ED and Local Electoral Area, as well as tables for the new geographic unit, called Small Areas, are published in our interactive mapping application (SAPMAP) on the CSO website.

Interactive maps

In co-operation with the All Ireland Research Observatory (AIRO) summary census data is now available in thematic maps for Electoral Districts and all Small Areas. Combined with the release of the SAPS data in our new easy to use interactive mapping application, these new developments bring census data alive in a fresh and exciting way making it easier to access for all. Just follow the link from the website.

## Level of education

Figure 1 Highest level of education by 5 year age group, 2011

## Age and level of education

Among those who had completed their full-time education in April 2011 younger people were significantly better educated than their older counterparts, illustrating the ongoing gains in educational attainment in Ireland. Almost 43 per cent of people aged 20 to 39 possessed a third level qualification, compared with only 13 per cent of those aged 65 and over. As the graph above clearly shows among those aged 60 and over increasing numbers were educated to primary level only with almost half (46.3%) of those aged 65 and over in this category.

#### Sex differences

■Third level degree & higher

In general, females were better educated than males in April 2011. One third of females aged 15 and over had a third level qualification, compared with only 27 per cent of males. Just over 36 per cent of males were not educated to a higher level than lower secondary, whereas only 31 per cent of females had a similar level of education.

Figure 2 Highest level of education, males and females, 2011 15% **Females** 17% 23% 16% Males 4% 19% 5% 36% 36% ■ No formal/Primary Lower secondary ■Upper secondary ■Third level non degree

# Age education ceased

Figure 3 Age full-time education ceased by current age and sex

#### Sex differences

Census 2011 results show that among those aged 25 to 39, women tended to stay in education longer than their male counterparts. Only 18 per cent of females in this age group completed their full-time education aged 17 or under compared with 26 per cent of males.

The differences for those aged between 40 and 59 were similar. Just over 36 per cent of males and 27 per cent of females in this group had completed their education before they turned 17. Approximately 18 per cent of both males and females in this age group completed their education aged 22 or older.

## Older persons

Among persons aged 60 and over, sex differences were not pronounced. Almost 70 per cent of both males and females had ceased their education aged 17 or under, with slightly more males (13%) than females (10%) continuing in education until at least the age of 22.

#### Adult education

Almost 280,000 persons aged 22 and over indicated that they had not ceased their education, of which 178,710 were not full-time students.

Over 60,000 of these persons who had not ceased their education were in their thirties, over 30,000 in their forties, more than 16,000 in their fifties and almost 8,000 in their sixties. There were over 5,000 persons aged 70 and over who had not ceased their education.

The sex ratio was balanced, with just over half (50.8%) being female.

The majority (60%) were pursuing their ongoing education while at work, with a further 23 per cent indicating that they were unemployed. Economic status varied significantly by age however. Among those aged under 40, almost 90 per cent were at work or unemployed, whereas among the 8,023 persons aged 65 and over, almost 80 per cent were either retired or looking after the home.

Table page 42-47

## It's a fact!

The percentage of 60 year olds who had completed their full-time education before age 16

# Level of education 1991-2011

## It's a fact!

14% The percentage of persons aged 15 and over who had a third level qualification in 1991

The percentage of persons aged 15 and over who had a third level qualification in 2011

The percentage increase in the number of women with third level qualifications between 1991 and 2011

765,204 The number of persons educated to primary level or lower in 1991

456,896 The number of persons educated to primary level or lower in 2011

The percentage of males in their 60s who had a third level qualification in 2011

## Increasing levels of education

As can be seen from figure 4 below, the educational attainment of people aged 15 and over improved significantly over the twenty years from 1991 to 2011 with falling numbers educated to primary level only and increasing numbers in the higher levels.

The greatest gains have been in the numbers of those with a third level qualification rising from just 14 per cent in 1991 to 31 per cent by 2011.

Figure 4 Highest level of education attained, 1991-2011

## Women outpace men in third level attainment

The improvement in educational attainment was more pronounced for women than for men. In 1991, 86 per cent of males and 87 per cent of females were educated to upper secondary level only. In April 2011 this percentage had fallen to 73 per cent for men and 66 per cent for women.

#### **Graduates**

In 2011, 28 per cent of women were third level graduates compared with only 23 per cent of men. Of the total number of graduates (739,992) in April 2011, 413,257 (56%) were women while 326,735 (44%) were men.

Table page 48-50

# Age education ceased 1991-2011

## Completing education at a later age

With the increasing level of education among the population, the age at which people ceased their full-time education steadily rose between 1991 and 2011. Of those who had completed their education in 1991, almost three in ten, representing 600,000 people, had completed their education before they turned 15. By 2006 this figure had more than halved to 13 per cent and by April 2011 it had decreased further to 11 per cent, representing fewer than 250,000 people.

Simultaneously, the percentage staying in education into their 20s increased. Census 1991 recorded just over 5 per cent of persons had completed their education aged 22 or older. In April 2011, almost half a million people had completed their education after their 22<sup>nd</sup> birthday, representing close to 1 in 4 persons. The numbers continuing their education beyond age 24 increased by more than 200 per cent in the twenty years between 1991 and 2011, rising from 60,227 to 190,847.

Figure 6 Age at which full-time education ceased, 1991-2011 40

Table A Persons whose education had ceased by age education ceased and county, 2011

County	Number of persons	Average age education ceased	
Galway city	46,506	21.0	
Dún Laoghaire-Rathdown	136,577	20.9	
Fingal	169,614	19.8	
Dublin city	359,219	19.6	
Cork county	261,541	19.4	
Cork city	80,437	19.4	
Longford	25,341	18.4	
Cavan	47,476	18.4	
Offaly	49,834	18.3	
Wexford	97,353	18.2	
Donegal	105,743	18.1	
Monaghan	39,720	18.0	
State	3,003,490	19.1	

## Average age education ceased

Over 3 million persons aged 15 and over had completed their full time education in April 2011 with an overall average age of completion of 19.1 years. The results vary evidenced by the selected administrative counties presented in table

The county with the oldest average age at which education ceased was Galway city at 21 years. Just behind was Dún Laoghaire-Rathdown where the average age at which education ceased was 20.9. Also recording high average ages were Fingal, Dublin city and Cork county and

The county in which persons on average ceased their education at the youngest age was Monaghan at 18.0 years. represents an average age which was a full three years younger than Galway city. Education also ceased comparatively early in Donegal (18.1), Wexford (18.2) and Offaly (18.3).

# **Education level by county**

#### Third level

The percentage of persons with a third level qualification varied greatly by county with the highest at 40.1 per cent in Dún Laoghaire-Rathdown and the lowest, at 17.4 per cent, in Limerick city.

Galway city, with 31.3 per cent had the second highest rate overall, considerably higher than either Cork (22.1%) or Waterford city (19.7%). In Dublin city 28.2 per cent of persons had a third level qualification.

Outside of Dublin and the cities, Kildare had the highest percentage of persons with a third level education (26%) followed by Wicklow (26%) and Cork county (26%).

## Primary level

More than one in five persons (21%) in Donegal aged 15 and over had not been educated beyond primary level, the highest for any county on Census Night. The other Ulster counties of Monaghan and Cavan also had high rates (17.6% and 16.5%) as did Mayo, Wexford and Longford - all with more than 16 per cent.

Of the cities, Limerick had the highest percentage of persons educated no further than primary level at 15 per cent followed by Dublin city (14%) and Waterford (13%). Dún Laoghaire-Rathdown had the lowest with 6.5 per cent followed by Galway city (6.9%) and Fingal (7.3%).

Map 1 Percentage of persons aged 15 years and over with third level qualifications

The percentage of females aged 15 and over in Monaghan who had a third level qualification

126,134 The number of persons in Dublin city who had a third level qualification

## Marital status

#### **Education and marriage**

The likelihood of being married increases with education attainment as illustrated in the graph below.

Among those aged 35 to 44 stark differences can be seen. Just 58 per cent of those with lower secondary education were married compared with 65.3 per cent for those with an upper secondary level qualification and 69.3 per cent for those with a third level qualification.

Less pronounced differences can be seen for those in the older age groups. Among persons aged between 55 and 64, those with either lower secondary or third level qualifications had an equal likelihood of being married.

Figure 7 Percentage of persons married by age group and highest level of education

## Separation and divorce

A higher percentage of those educated to primary level only were separated or divorced, with the percentage falling with increased educational attainment as illustrated in the graph below. Among older people in rural areas the patterns were reversed however with a higher percentage of those with a third level education divorced or separated compared with the lower educated.

There was a clear urban-rural divide in separation rates, particularly among persons educated no higher than primary level. Among those aged 45-54 in urban areas 18 per cent were separated or divorced compared with 10 per cent of those similarly educated in rural areas.

## Education and economic status

Figure 9 Economic status by age education ceased

# Early school leavers

Over 389,000 persons completed their full-time education before the age of 16. Among these people, 213,895 or 55 per cent were aged 60 or over. A further 43,741 were aged under 40.

The labour force participation rate for the early school leavers was 42 per cent compared with 62 per cent for the population generally, reflecting the older age profile of this group. Unemployment among early school leavers was 31 per cent, compared with the overall unemployment rate of 19 per cent.

There were 25,509 persons aged between 20 and 34 who completed their full-time education aged 15 or younger. Among this group, labour force participation was relatively high at 77 per cent but the unemployment rate was almost three times the national figure at 54 per cent. This is illustrated in figure 10.

In the slightly older age group of 40 to 59 year olds early school leavers labour force participation was just under 70 per cent and unemployment was 29 per cent.

## Job prospects

Census 2011 data shows that persons who were at work finished their education at a later age than those who were unemployed.

There were 377,186 people aged 15 and over who had ceased their education and were unemployed. Just under half of these had completed their full-time education by age 18. Over 13 per cent had completed their education aged 15 or under.

In contrast, among the 1.7 million persons who were at work and had completed their education, only 35 per cent had completed their education before they turned 19. Almost 30 per cent did not complete their education until they were at least 21 years old.

Figure 10 Unemployment rates for 20-34 year olds by age education ceased

## It's a fact!

7,066 The number of persons under 40 who completed their education aged 12 or 13

The unemployment rate among these persons

# **Education and industry**

## Most third level qualified workers

Figure 11 presents the industrial groups (as listed in table 5 on pages 54-57) with the highest percentage of workers with a third level qualification.

Almost 80 per cent of 5,301 persons who had a job in professional management consultancy services had a third level qualification, as did more than three quarters of those in scientific research and development.

The sectors with the largest absolute number of persons with third level qualifications were education (113,317), human health activities (68,116), retail trade (38,463), social work activities (34,624) and financial services activities (31,645).

#### **Farmers**

The agriculture sector (crop and animal production) had the largest proportion of persons who were educated to primary or lower. Almost a quarter of the nearly 84,000 persons in this sector were not educated beyond primary level.

#### IT and communications

Almost two thirds of the over 68,000 persons working in IT and communications had a third level qualification. Only 5 per cent were educated to lower secondary level or below. Within the sector, three quarters of the workers in computer programming, consultancy and information service activities had a third level qualification as did almost 70 per cent of those working in programming and broadcasting, as shown in the table below.

Table page 54-57

Table B Level of education, IT and communications workers

Sector	Primary & lower secondary	Upper secondary	Third level
Computer programming, consultancy and information services	853	6,035	28,091
Programming and broadcasting	207	1,102	2,992
Publishing	489	1,791	3,996
Motion picture, video and television programme production	269	1,154	2,264
Telecommunications	1,617	5,641	7,269

# **Education and occupations**

## It's a fact!

17% The percentage of persons in caring and personal service occupations who had a third level degree or higher qualification

The percentage of persons in protective service occupations who had a third level degree or higher qualification

The number of teaching and educational professionals who did not have a third level qualification

## High flyers

The teaching and educational professionals occupation group contained the highest proportion of third level degree holders of all occupational groups with 88 per cent (86,592 persons) having at least an ordinary Bachelor degree or national Diploma.

Among business, media and public service professionals, 82 per cent (72,655 persons) held a higher degree, while 3 out of 4 in the health professions and those in the area of science, research, engineering and technology also had a third level degree or higher qualification.

Fewer than half (42%) of corporate managers and directors held a third level degree or higher qualification.

Table page 58

Table C Top 9 occupation groups by proportion of persons in the labour force with third level degree

Occupation	Persons in labour force	Persons with third level degree	Percentage with third level degree
Teaching and educational professionals	98,016	86,592	88
Business, media and public service professionals	88,091	72,655	82
Health professionals	88,906	67,767	76
Science, research, engineering and technology professionals	78,768	58,230	74

Corporate managers and directors	120,505	50,827	42

## Lower secondary

More than one in three of the 79,000 drivers and mobile machine operators who had completed their education were educated to lower secondary level only – the highest percentage of any occupational group.

Almost one in three of those whose profession was in the skilled construction and building trades or in elementary trades also indicated that their highest level of education was lower secondary.

# Field of study

#### Who works where?

In 2011 a new question was asked on the field of study of all post–secondary school qualifications. This facilitates a detailed analysis of the occupations pursued by persons with different qualifications across a range of subjects.

#### Social sciences, business and law

The social sciences, business and law category was by far the most popular field of study among all those with post-secondary school qualifications in 2011. Just under 300,000 persons in the labour force were qualified in this area. 248,997 people had a third level qualification in social sciences, business and law (accounting for 1 in 3 of all third level qualifications). A further 49,566 people had a second level qualification in this field.

Table D shows the top occupational categories of this group. The most popular occupations for those educated to second level only were those in the administrative field, with a further 10 per cent working in a secretarial-related job. The business and public service associate professional group accounted for 9 per cent and included such jobs as estate agents, insurance underwriters and human resources officers. A further 9 per cent had a sales occupation.

Table D Occupations of persons in the labour force with qualifications in social sciences, business and law

#### Social sciences, business and law Occupation Second level Third level Percentage 2 Business, media and public service professionals 19 Administrative occupations 32 17 Business and public service associate professionals 16 Corporate managers and directors 13 Sales occupations 4 10 2 Secretarial and related occupations Other occupations 29

#### Third level

Two thirds of those with a third level qualification in this area were working in one of four occupational groups. The largest of these was business, media and public service professionals accounting for 19 per cent and which includes, among others, solicitors, accountants, architects, journalists and clergy. The second largest category was administrative occupations (17%) followed by business and public service associate professionals (16%). Over 13 per cent had an occupation as a corporate manager or director.

The remaining 35 per cent (84,000 persons) were spread across all other occupational groups.

Table page 59

## It's a fact!

248,997 The number of persons in the labour force who had a third level qualification in social sciences, business and law

47.950 The number of persons who were business, media or public service professionals

# Field of study

## Education and teacher training

Of all fields of study coded in the census those with a third level qualification in education and teacher training were most likely to work in their chosen field with 77 per cent working in education at the time of the census.

In contrast occupations among those with second level education-related qualifications were far more varied with the largest group working in the caring and personal service category.

#### Health and welfare

Those with a qualification in the area of health and welfare were also likely to be working in their chosen field with over 60 per cent in a health-related occupation. A further 8 per cent were in the caring services category with the remainder across a range of occupations.

As with education those with only a second level qualification in this area were more likely to be working in the caring and personal services occupation group.

Table E Persons with qualifications	in the education an	nd in the health	and welfare occupation group

1	1	Health professionals	6	61
1	1	Health and social care associate professionals	6	6
7	3	Administrative occupations	5	2
35	13	Other occupations	31	21

#### **Arts**

Third level Arts graduates, of which there were 28,495 in the labour force in April 2011, had a broad range of occupations with culture and media-related occupations the most popular accounting for just over a quarter of the group; this included occupations such as artists, musicians, graphic designers and fitness coaches. A further 14 per cent had an occupation in the teaching and educational professional category.

Over 10,000 persons in the labour force indicated that they had a second level Arts qualification with textile and printing trades and sales occupations featuring strongly in their occupations.

#### **Humanities**

Humanities graduates had a wide range of jobs.

For those with a third level qualification, teaching and education was the most common occupational group accounting for one in five of the 37,079 persons.

Just under 14 per cent had an administrative occupation with 11 per cent indicating an occupation as a business, media or public service professional.

Table F Persons with qualifications in the arts and humanities occupation group

8	4	Elementary administration and service occupations	10	3
47	37	Other occupations	52	41

# Field of study

## Science, maths and computing

Administrative occupations such as bank clerks, office managers and administrative roles in the public sector, were the most popular among those with a second level qualification in the area of science, mathematics and computing. Just over 15 per cent worked in science research and technology occupations, with 9 per cent in sales occupations.

The largest job category (41%) among those educated to third level was science, research and technology occupations. Jobs within this category included scientists, engineers, software developers and web designers.

# Engineering, manufacturing and construction

More people held second level qualifications (102,181 persons) in the area of engineering, manufacturing and construction than held a third level qualification in this field (89,864 persons).

Amongst those with second level qualifications 1 in 3 were working in the skilled metal, electrical and electronic trades with a further 23 per cent in the skilled construction and building trades.

Those qualified to third level were most likely to be employed in the science, research and technology area, followed by business, media and public service occupations (17%).

Table G Persons with qualifications in the science and engineering related fields occupation group

Science, maths a	and computing		Engineering, ma constr	_

2	0	Skilled construction and building trades	23	4
9	2	Sales occupations	2	3
40	27	Other occupations	29	22

#### Personal services

The personal services field of study includes qualifications relating to accommodation, catering, travel, hairdressing and beauty therapy.

Of the 35,000 persons with a second level qualification in one of these fields, 22 per cent were working in the textiles, printing and other skilled trades group, which includes chefs and bar managers, while 20 per cent were in the leisure, travel and related occupations group.

## **Security services**

Security services qualifications include the Garda, Fire service, Prison Officers, and Army and Security Guard training.

More than half of those with a third level qualification were working in the protective services (Gardaí, Prison Officers and Soldiers) with a further 12 per cent in a business and public service associate profession.

Those with second level qualifications were more likely to be working in the elementary administration and service occupations such as security guards, and parking and civil enforcement occupations.

Table H Persons with qualifications in the personal services and security services occupation group

6	9	Administrative occupations	5	3
34	40	Other occupations	43	25

# Field of study by county

### Significant variations

There was considerable variation in the fields of education studied by persons in each county in April 2011.

Just under half of those in the labour force with a third level qualification in Dún Laoghaire-Rathdown (24,033 persons) attained their qualification in social sciences, business and law. In contrast, only one quarter of Donegal's labour force with a third level education had a similar qualification (4,890 persons).

Similarly, 13 per cent of the workforce in both North and South Tipperary and Waterford county who had a second level qualification studied in the agriculture and veterinary field. Only 1 per cent of those with the same level qualification in South Dublin and in Dublin and Limerick cities had studied in this field.

## Health and welfare

Across the State, 14 per cent of persons in the labour force with a third level qualification had studied in the health and welfare field. Almost one in five persons with a third level qualification in Kilkenny and Sligo had studied in this field - the highest among all counties, and followed by Laois, Offaly, South Tipperary, Donegal and Monaghan.

In contrast, only one in ten persons with a third level qualification in the labour force in Dún Laoghaire-Rathdown and in Limerick city had studied health and welfare, with relatively low numbers also recorded in Dublin city and in Wicklow.

Table page 66-67

## It's a fact!

The percentage of persons with a third level qualification in Limerick county who were qualified in engineering, manufacturing and construction, the highest in the country

## Ireland's Ph.Ds

Figure 13 Persons educated to Ph.D level classified by field of study

## Over 20,000 with doctorates

Almost 22,000 people aged 15 and over who had completed their education held a Doctorate (Ph.D) level qualification in April 2011. This represented a significant increase of over 52 per cent on 2006.

There were more men (13,018) than women (8,952). Science, mathematics and computing was the most common areas of study accounting for 37 per cent of all Ph.Ds, followed by health and welfare, with almost 18 per cent holding a qualification in this area.

There were 826 Ph.D holders who were either unemployed or looking for their first job, giving an unemployment rate for the group of 4 per cent.

Of the 17,772 persons in the group at work, over 60 per cent worked in either the education or human health and social work industries.

## It's a fact!

8,140	The number of persons who had a Ph.D qualification in science, mathematics and computing
2,848	The number of persons who had a Ph.D qualification in arts and humanities

## Where they were

Perhaps reflecting the concentration of third level institutions and hospitals in the capital, over 20 per cent of Ph.D holders (4,636 persons) were enumerated in Dublin city.

held a Ph.D

Dún Laoghaire-Rathdown had only 5 per cent of all persons who had completed their education yet accounted for 13 per cent of all Ph.D holders.

Figure 14 Persons educated to Ph.D level by location

## Ireland's lower educated

Figure 15 Level of education by economic status and age

# Almost half a million among lower educated

In April 2011 there were over 450,000 persons in Ireland who had finished their education having completed no higher than primary school. Of these 42,387 indicated that they had no formal education. More than half (55%) of the persons in this group lived in urban areas.

Just under 20,000 of the lower educated were aged between 15 and 29. The slight majority of this younger group (52%) were males. However, among the 86,403 persons under 50, the proportion of males rose to almost 60 per cent.

#### **Economic status**

There were 61,663 persons aged between 20 and 44 who were educated to primary level or lower in 2011. Labour force participation among this group was 68 per cent compared with 86 per cent for those of the same age educated to upper secondary school level. A further 16 per cent indicated that they were unable to work due to permanent sickness or disability, while unemployment was 52 per cent.

#### Unable to work

Almost 10,000 lower educated persons aged between 20 and 44 were unable to work due to illness or disability. The vast majority (89%) of these people had at least one disability. Over 5,500 (57%) had an intellectual disability with a further 5,000 (51%) having a difficulty with learning, remembering or concentrating.

## It's a fact!

30,692

The number of persons aged between 15 and 59 who were educated to primary level or lower and who were unable to work due to sickness or disability

33%

The unemployment rate among persons in their fifties educated to primary level or lower

# 20 year old students

Postgrad / Doctorate	76.7	80.0	82.1	84.2	90.8	92.2	94.1

#### Parents' education

Table J presents the percentage of 20 year olds in family units who were students by the level of education of their parents.

Twenty year olds with both parents educated to third level had an 89 per cent chance of being a student with 4,012 out of a total 4,500 in this group still in full-time education. Among those with two parents with an honours bachelor degree or equivalent 92 per cent were full-time students.

In contrast, just over half of 20 year olds who had parents without third level qualifications were themselves full-time students. Among those for whom both parents were educated no higher than lower secondary only 44.6 per cent were students, while for those with two parents educated to upper secondary level only, 68 per cent were still in full-time education.

#### Fathers and mothers

Fathers' level of education appears to be a stronger determinant of whether or not a child will remain in education to the age of 20. In families where the mother was educated to upper secondary and the father had an honours degree 87.5 per cent of 20 year old children were students whereas in families where the mother had an honours degree and the father was educated to upper secondary only 79.9 per cent were students.

Z. All others gainfully occupied and unknown	26.9	
Total	60.5	

Figure 16 Students aged 20 years in family units classified by socio-economic group

#### Socio-economic group

Education participation varied considerably by socioeconomic group (SEG). Table K shows the percentage of 20 year olds in family units who were students, classified by SEG; (because no occupation data is collected for students, their SEG is donated from a family member, normally a parent).

## High educational participation...

There were 2,387 20 year olds in the higher professional category. Of these 94.7 per cent were students, the highest percentage of any socioeconomic group. The children of the employers and managers category (6,476 students) and the lower professionals (4,344) also represented high levels of education participation (91.2% and 90.2% respectively).

The children of farmers and own account workers has participation levels above 85 per cent.

## ...and lower participation

At 26.9 per cent the children of those in category Z, 'All others gainfully occupied and unknown' had the lowest participation in education. These were families where the parents were not in the labour force, or did not state their occupation. Agricultural workers also had a low rate of education participation among their 20 year old children (27.5%).

## **Employers and professionals**

The children of employers and managers and professional workers combined accounted for 45.9 per cent of all 20 year old students (see figure 16 on the left), while all persons in these two groups accounted for only 33.9 per cent of the overall population.

## It's a fact!

# Irish speakers

(1,759,026 persons) **Females Males** 54 Thousands Daily in education only Daily ■ Weekly Less often Never

Figure 17 Population (aged 3 and over) of Irish speakers by age and frequency of speaking Irish, 2011 (1.759.026 persons)

## Can you speak Irish?

The total number of persons (aged 3 and over) who could speak Irish in April 2011 was 1,774,437. This was an increase of 7.1 per cent on the 1,656,790 persons who could speak Irish in April 2006. There were more females (973,587) able to speak Irish than males (800,850).

## School-goers and Irish

Figure 17 above shows the age structure of those persons who could speak Irish by the frequency of speaking Irish. The graph clearly illustrates (in the light blue bars) the large numbers of school children who spoke Irish on a daily basis within the education system. Between the ages of 5 and 18 inclusive just under 450,000 children spoke Irish on a daily basis in school representing 87 per cent of all persons who spoke Irish within education in 2011.

## Daily speakers

There were 77,185 persons speaking Irish on a daily basis outside of the education system in April 2011 (represented in red in the graph above). Twenty three per cent of these were aged 5 to 18 (17,457 persons), a further 23,359 (30%) were in the age group 25-44. There were more women (42,157) than men (35,028).

## Weekly speakers

There were 110,642 persons who said that they spoke Irish on a weekly basis outside of education. Again, there were more females (61,176) than males (49,466) speaking Irish on a weekly basis and relatively larger numbers of females spoke Irish weekly in the 35-44 age group than in the other non-school going ages.

Table page 68

# Irish speakers by county

## Galway county

Fifty one per cent of the population of Galway county could speak Irish in 2011 - the highest of any county as illustrated in figure 18. Clare (48.1%), North Tipperary (47.1%) and Limerick county (47%) were the next highest administrative counties while Dublin City (32.1%), South Dublin (35.8%) and Louth (36.1%) had the lowest percentages.

## Irish speakers in rural areas and cities

Looking at the country in terms of area type, rural areas had the highest percentage of persons who could speak Irish with 46.3 per cent of Irish speakers, well above the State average of 40.6 per cent.

Amongst the cities Galway city and its suburbs had the highest rate of Irish speakers (44.2%) followed by Cork city and suburbs (44%). The lowest rate for a city was recorded for Dublin city and suburbs (35.2%).

Of the towns, the smaller towns of population less than 1,000 persons had the highest rate of Irish speakers at 41.6 per cent of their population.

Figure 18 Percentage of Irish speakers in each county, 2011 **Galway County** North Tipperary

373,706	The number of persons who could speak Irish in Dublin city
	and its suburbs in 2011

# Daily Irish speakers

## Daily speakers

Of the 1.77 million persons (aged 3 and over) who indicated that they could speak Irish in the 2011 census, 77,185 said that they spoke Irish on a daily basis outside of the education system. This represented 1.8 per cent of the population aged 3 and over.

#### More females

There were 42,157 females speaking Irish on a daily basis in 2011 compared with 35,028 daily Irish male speakers, similar to 2006 when female daily speakers outnumbered male daily speakers. Figure 20 opposite shows the sex ratio by 5 year age group of daily Irish speakers for 2006 and 2011.

Up to age 52 females outnumbered males in each single year of age and, in particular, females in their thirties and early forties were more numerous than their male counterparts. There were just 634 male daily Irish speakers for every 1,000 female daily speakers in the 35-44 age group.

Figure 20 Daily Irish speakers, males per 1000 females, 2011

## It's a fact!

42,157

The number of females who spoke Irish daily (outside the education system)

35,028

The number of males who spoke Irish daily (outside the education system)

# One in four daily speakers were children

Figure 21 shows the age and sex structure of daily Irish speakers in 2011.

One quarter of all daily Irish speakers (or 25.4%) were in the school-going ages of 3 to 18 years. Of these, females numbered 10,343 and males numbered 9,239.

Over half (53.5%) of daily Irish speakers, or 41,209 persons, were aged between 25 and 64 and most of these were females (23,342).

The peak ages for daily Irish speakers were in the early school-going years of 5 to 10. Another peak was observed in the late 30's and early 40's. In particular, in these ages, females had their peak at age 39 and males at age 38.

There were slightly more males in the 50-70 age group. For example, there were 1,123 male daily Irish speakers for every 1,000 female daily Irish speakers in the 70-74 age group in 2011.

# Daily Irish speakers by location

## Daily Irish strong in rural areas

Of the 77,185 daily Irish speakers in Ireland in 2011, 33,424 persons or 43.3 per cent were enumerated in a pure rural area, with the remaining 43,761 enumerated in towns.

Table L shows those towns with the highest proportions of daily Irish speakers in April 2011. Six of the top ten towns were in Donegal. County Galway had three towns in this list, one of which, Cill Rónáin, is on the island of Inishmore, off the Galway coast.

Larger towns, of population 1,500 or more, worthy of note were An Daingean (16.4%) in Kerry, Bearna (8.4%) and Maigh Cuilinn (6.5%) in Galway county, where the proportion of daily Irish speakers was well above the State average of 1.8 per cent.

Of the towns with a population of 10,000 or more, Letterkenny had 3.1 per cent of its population aged 3 or over who spoke Irish daily, the highest of these towns.

Of the cities, Galway city and its suburbs had the highest proportion of its population (aged 3 or over) who spoke Irish on a daily basis (3.3%).

Table M Towns with the highest number of daily Irish speakers, 2011

Town	Number of persons aged 3+	Number of daily Irish speakers	% daily Irish speakers
			%
Dublin city and suburbs	1,061,832	14,229	1.3
Cork city and suburbs	190,674	2,843	1.5
Galway city and suburbs	73,675	2,419	3.3

An Spidéal	Galway	237	41
Loch an Iúir Béal Átha an	Donegal	322	40
Ghaorthaidh	Cork	231	38

## Dublin city and suburbs

Due to the sheer size of its population Dublin city and its suburbs had the largest number of daily Irish speakers with 14,229 persons representing 18.4 per cent of all daily speakers. Cork, Galway and Limerick combined had 6,336 daily speakers accounting for 8.2 per cent of the total.

#### Western seaboard towns

After the cities the largest absolute numbers of daily Irish speakers were in the small towns along the western coasts of Donegal, Galway and Kerry. An Bun Beag-Doirí Beaga in Donegal with 897 daily Irish speakers, Letterkenny with 596 and An Cheathrú Rua in Galway county with 483 daily speakers had the largest numbers of daily Irish speakers.

## It's a fact!

# Daily and weekly Irish speakers, 2011

Map 6 Households with daily or weekly Irish speakers, with Gaeltacht regions shown

# Daily Irish speakers

Figure 22 Age and economic status profile of daily Irish speakers, 2011 (77,185 persons)

## Labour force participation rates

The labour force participation rates for daily Irish speakers aged 15 and over was 62.9 per cent for males and 53.9 per cent for females. These were lower than the corresponding rates for the population as a whole (male rate 69.4%, female rate 54.6%) in 2011.

## Lower unemployment

The census based unemployment rates for daily Irish speakers, for males and females respectively, were 19.3 and 10.8 per cent compared with 22.3 and 15 per cent for the population as a whole in 2011.

## Socio-economic group

There were proportionately more daily Irish speakers assigned to both the socio-economic groups B - Higher professional (8.1%) and C - Lower professional (24.2%) than were assigned in the overall population aged 3 and over (6.3% and 12% respectively). The reason for this was the relatively high number of primary, secondary and third-level teachers, nurses and midwives who spoke Irish on a daily basis in 2011.

Table page 70

## Higher educational attainment

in 2011

Daily Irish speakers were more highly educated than the population generally, as illustrated in figure 23.

Of those daily Irish speakers who completed their education 43.8 per cent had a third level degree or higher. This compared to a rate of 25.8 per cent for the State overall (see figure 23).

Figure 23 Level of education of daily Irish speakers and all persons, 2011

## An Ghaeltacht

## 2011 RESULTS

#### The Gaeltacht areas

The gaeltacht areas are defined by The Gaeltacht Areas Orders, 1956–1982, and cover areas in the seven counties of Cork, Donegal, Galway, Kerry, Meath, Mayo and Waterford.

In 2011, there were a total of 96,628 persons aged 3 or over in the gaeltacht areas, representing an increase of 5.2 per cent over the 91,862 persons in 2006.

A total of 66,238 persons (aged 3 or over) or 68.5 per cent of persons in the gaeltacht areas said that they could speak Irish in 2011. This was an increase of 1,973 persons over 2006. However, the proportion who spoke Irish has dropped from 70 per cent in 2006.

## 1 in 4 daily Irish speakers

The number of daily speakers outside of the education system in the gaeltacht regions was 23,175 persons or 24 per cent of all persons aged 3 or over in these regions. A further 6,813 spoke Irish on a weekly basis. Some 4,682 persons indicated that they could speak Irish but didn't do so on a regular basis.

## Age profile

Figure 24 shows the population pyramid of persons (aged 3 or over) in the Gaeltacht regions by ability and frequency of speaking Irish. The large numbers of school children who spoke Irish daily within the education system can be seen (dark blue bars) in the ages 5 to 18. The daily speakers (light blue bars) were numerous across all ages, however, there were relatively high proportions of persons unable to speak Irish also.

Figure 24 Population (aged 3 or over) in the Gaeltacht areas by frequency of speaking Irish, 2011 (96,628 persons)

Table N Top occupations at work that spoke Irish daily in the Gaeltacht regions, 2011

Occupation	Persons
Farmers	639
Primary and nursery teachers	594
Secondary teachers	335
Other administrative occupations, nec	304
Sales and retail assistants, cashiers and checkout operators	283
Care workers and home carers	234
Nurses and midwives	228

## It's a fact!

The number of persons who spoke Irish on a daily basis in the Galway county Gaeltacht areas in 2011 (representing 43.5% of all daily Irish speakers in all Gaeltacht areas in 2011)

7,047 The number of persons who spoke Irish on a daily basis in the Donegal Gaeltacht areas in 2011 (representing 30.4% of all daily Irish speakers in all Gaeltacht areas in 2011)

# **APPENDICES**

## Appendix 1

## **Background Notes**

A Census of Population was taken on the night of Sunday, 10 April 2011 in accordance with the Statistics (Census of Population) Order 2010 (S.I. No. 207 of 2010)<sup>1</sup>. This report is the ninth in a series of profile reports and looks at education in Ireland and the Irish language.

## **Coverage of the Census**

The census figures relate to the *de facto* population i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 10 April 2011, together with all persons who arrived in that area on the morning of Monday, 11 April 2011, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census Night as well as those in residence, while usual residents temporarily absent from the area are excluded.

The date of the census was chosen to coincide with a period when passenger movements were at a minimum and, consequently, the figures closely approximate to those for the normally resident population. Members of the Defence Forces who, on Census Night, were serving abroad with the United Nations were excluded from the enumeration.

#### **Conduct of the Census**

A temporary field force consisting of 6 Census Liaison Officers, 44 Regional Supervisors, 438 Field Supervisors and some 4,854 part-time Enumerators carried out the census enumeration. During the four weeks before Census Day the enumerators entered details in respect of 2 million private residences and communal establishments in their enumerator record books. They simultaneously delivered blank census questionnaires to 1.65 million of these dwellings that were expected to be occupied on Census Night. Approximately 290,000 residences were vacant at the time of the census, while in the remaining cases the household was either enumerated elsewhere or temporarily absent from the State. The collection of completed questionnaires took place between Monday 11 April and Friday 13 May, 2011.

The Central Statistics Office (CSO) wishes to record its appreciation of the public-spirited cooperation received from households and the work carried out by the census field force.

<sup>&</sup>lt;sup>1</sup> The Statistics (Census of Population) Order 2010 was made by the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act 1993 (No. 21 of 1993).

## **Appendix 2**

## **Definitions**

### Education

As in Census 2006, persons aged 15 years and over were asked 3 questions on education in Census 2011. The first question asked if a person had ceased their full time education. If they had answered 'yes', they were then asked the age at which it ceased. The second question asked what was the highest level of education (full or part time) completed to date. The levels ranged from no formal education to a tertiary post doctorate degree. The final question asked what the main field of study of the highest qualification (excluding Secondary school qualifications) completed to date was.

## Industry

In Census 2011 industry is coded using NACE – the General Industrial Classification of Economic Activities within the European Communities. The current version, NACE Rev. 2, is a 4-digit activity classification that was adopted in 2006 and is a revision of the version originally published by Eurostat in 1970. The previous version, NACE Rev.1, was in use in the censuses of 2002 and 2006. To aid in the comparison of data from both censuses, industry has been dual-coded in 2011, i.e. coded to both NACE Rev.1 and NACE Rev.2

NACE Rev 2 is a hierarchical classification, with 88 Divisions at 2-digit level, 272 Groups at 3-digit level and 615 Classes at 4-digit level. The NACE Rev 1 classification is also hierarchical, with 62 Divisions at 2-digit level, 224 Groups at 3-digit level and 514 Classes at 4-digit level. The NACE Rev.2 classification is shown in Appendix 3.

The industry in which a person is engaged is determined (regardless of their occupation) by the main economic activity carried out in the local unit in which he or she works. If, however, the local unit provides an ancillary service to another unit in the business (e.g. administration, storage, etc.) then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual.

A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term "sector of economic activity". The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons, the nature of their own business or profession.

## Occupation

The Occupation classifications used in the census are based on the UK Standard Occupational Classification<sup>2</sup> (SOC), with modifications to reflect Irish labour market conditions. The latest version of SOC is SOC2010. Previously the census used a classification based on the SOC90 classification, which was first used in Census 1996. The Soc classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). Census 2011 has been dual-coded to both the Soc90 and Soc2010 classifications to allow for comparisons with previous years. The hierarchical structure provided within these classifications is suited to accurate automatic coding.

<sup>&</sup>lt;sup>2</sup> Standard Occupational Classification, Second edition, HMSO, London, 1995.

The code to which a person's occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.,

The Soc2010-based classification is shown in Appendix 4.

## Socio-economic group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition, a residual group entitled. "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation (coded using Soc90) and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status.

Persons looking after the home/family or at school/college, who are members of a family unit, were classified to the socio-economic group of another person in the family unit using a priority table based on the relationships within the family. Thus, if the reference person<sup>3</sup> of a family was at work, unemployed or retired, other persons were assigned to his/her socio-economic group. If the reference person was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.), they were assigned to the socio-economic group of the other parent, spouse or cohabiting partner in the family unit. If there was no such spouse or partner or if the spouse, in turn, was neither at work, unemployed or retired, they were assigned to the socio-economic group of a working son/daughter. If there were no persons in the family unit with a socio-economic group then they were assigned to the **unknown** socio-economic group. Other persons looking after the home/family or at school/college who were not members of a family unit, such as relatives of the reference person (e.g. widowed grandparents, etc.) were assigned a socio-economic group using the above method. Unrelated persons or persons living alone who are looking after the home/family or at school/college were assigned to the **unknown** group.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

<sup>&</sup>lt;sup>3</sup> The reference person in each private household is the first person identified as a parent, spouse or cohabiting partner in the first family in the household. Where no person in the household satisfies these criteria, the first usually resident person is used as the reference person.

#### Social class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation (coded using Soc90):

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible.

#### Private household

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat or bedsitter (see question H1 on the second page of the census form).

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on Census Night (see question H1 on the second page of the census form).

#### Size of household

The number of persons in a household consists of the total number of persons usually resident there on the night of Sunday, 10 April 2011, including those absent from the household for less than three months. Visitors present in the household on census night are excluded.

## Household reference person

The reference person in each private household is the first person in the household identified as a parent, spouse, cohabiting partner or head of a non-family household containing related persons. Where no person in the household satisfied these criteria, the first usually resident person was used as the reference person.

For the purposes of expressing the household reference person in simple terms for the reader, the terms *head of household* or *householder* are sometimes used instead of the household reference person in this report.

## Family units

A family unit or nucleus is defined as:

- (1) a husband and wife or a cohabiting couple; or
- (2) a husband and wife or a cohabiting couple together with one or more usually resident nevermarried children (of any age); or
- (3) one parent together with one or more usually resident never-married children (of any age).

Family members have to be usual residents of the relevant household.

The determination of household and family composition is based on responses to the question on the census form dealing with relationships within the household.

## Aggregate town and aggregate rural areas

The term Aggregate Town Area refers to towns (including environs of legal towns) with a total population of 1,500 or more. The term Aggregate Rural Area refers to the population outside Aggregate Town areas and includes the population of towns with a population of less than 1,500 persons.

### The Gaeltacht areas

The gaeltacht areas are defined by The Gaeltacht Areas Orders, 1956–1982, and cover areas in the seven counties of Cork, Donegal, Galway, Kerry, Meath, Mayo and Waterford.

## Frequency of speaking Irish

The classification of frequency of speaking Irish in this report is different to that used in the 2006 publications. In 2006 the categories used corresponded to the 6 items below:

- 1. Daily within education only
- 2. Daily within and also outside education
- 3. Daily outside education only
- 4. Weekly outside education only
- 5. Less often outside education only
- 6 Never

Category 2 *Daily within and also outside education* was generally then expanded in a second table to show the frequency of speaking Irish outside education (i.e. daily, weekly, less often or never).

In the current report the Irish speakers in category 2 have been added to categories 3 to 6 according to frequency of speaking outside education to give the following classification:

- A. Daily within education only
- B. Daily outside education
- C. Weekly
- D. Less often
- E. Never

Categories B to E above may include people who also speak Irish within the education system, but this report focuses on their frequency of speaking the language outside education.

The web tables which accompany this release use the 2006 classification, so that comparisons between the 2 censuses can be made.

<sup>\*</sup>Small Area Population Statistics (SAPS) are available as interactive tables, free of charge on the CSO website

## Appendix 6

## **Census 2011 Questionnaire**

The attached extract is taken from the household form used in the 2011 Census. The household form covers 6 persons and consists of 24 pages. The attached extract covers persons 1 and 2 only. The layouts for persons 3 to 6 are identical to that for person 2, apart from the relationship question (Q4).

#### Census 2011

The 2011 Census will take place on Sunday 10 April and will count all the people and households in the country on that night. It is the twenty-fourth census to be held since 1841. The census results will give a comprehensive picture of the social and living conditions of our people and will assist in planning for the future.

### What you need to do

Please keep this form in a safe place and complete it on the night of Sunday 10 April, Census Night. You should consult the Explanatory Notes on the back page to assist you in completing the form. Remember to sign the declaration on page 23 and to have your completed form ready for collection by your Enumerator.

### Legal obligation to participate

This is a Notice under Section 26 of the Statistics Act 1993. The Census is being taken under the Statistics Act 1993 and the Statistics (Census of Population) Order 2010. Under Sections 26 and 27 of the Statistics Act 1993 you are obliged by law to complete and return this form. Any person who fails or refuses to provide this information or who knowingly provides false information may be subject to a fine of up to €25,000.

### Confidentiality is guaranteed

The confidentiality of your census return is legally guaranteed by the Statistics Act 1993. The Central Statistics Office will use the information you provide for statistical purposes only. This includes the production of statistical tables and analytical reports and the selection of samples for some of our surveys.

#### **Your Census Enumerator**

Your Census Enumerator will help you if you have any questions about the Census. Please co-operate fully with your Enumerator to help ensure the success of Census 2011.

Thank you for your co-operation.

Gerard O'Hanlon Director General

## Who should complete the Census Form?

The householder or any adult member of the household present on the night of Sunday 10 April should complete this form. A separate Household Form should be completed for every household.

### A household is:

- one person living alone, or
- a group of related or unrelated people living at the same address with common housekeeping arrangements, meaning they share at least one meal a day or share a living or sitting room.

### Do you need additional forms?

If there is more than one household at this address, ask your Enumerator for another Household Form.

If there are more than 6 persons in your household on Sunday 10 April, ask your Enumerator for a blue Individual Form for each additional person.

## **How to complete your Census Form**

- 1. Use a Black or Blue pen.
- 2. Mark boxes like this —.
- 3. If you make a mistake, do this **and** mark the correct box.

Where you are required to write in an answer please use BLOCK CAPITAL LETTERS and leave one space between each word. Continue on to a new line if a word will not fit, for example:

HOTEL RECE PTIONIST

## Have your form ready for collection

Your Enumerator will return between Monday 11 April and Monday 9 May to collect your completed form.

If your form has not been collected by 9 May, please return it fully completed to Central Statistics Office, PO Box 2011, Freepost 4726, Swords, Co. Dublin.

## Féadfar leagan Béarla nó Gaeilge den fhoirm seo a chomhlánú.

Household Form Page 1

# START HERE

# H1 What type of accommodation does your household occupy?

Mark — one box only.

## A whole house or bungalow that is:

- 1 Detached
- 2 Semi-detached
- Terraced (including end of terrace)

# A flat or apartment (including duplexes) that is self-contained:

- 4 In a purpose-built block
- Part of a converted house or commercial building

#### A bed-sit:

Bed-sit (with some shared facilities e.g. toilet)

### A mobile or temporary structure:

A caravan or other mobile or temporary structure

# H2 When was your house, flat or apartment first built?

Mark — the year in which first built even if the building was subsequently converted, extended or renovated.

- 1 Before 1919
- 2 1919 1945 inclusive
- 3 1946 1960 inclusive
- 4 1961 1970 inclusive
- 5 1971 1980 inclusive
- 6 1981 1990 inclusive
- 7 1991 2000 inclusive
- 8 2001 2005 inclusive
- 9 2006 or later

# H3 Does your household own or rent your accommodation?

Mark — one box only.

- Own with mortgage or loan
- 2 Own outright
- 3 Rent
- 4 Live here rent free

### If renting, who is your landlord?

- Private landlord
- 2 Local Authority
- 3 Voluntary/Co-operative housing body

# H4 If your accommodation is rented, how much rent does your household pay?

Enter amount to the nearest Euro.

€			•	0	0

Mark — one box only.

- 1 Per week
- 2 Per month
- 3 Per year

# H5 How many rooms do you have for use only by your household?

- Do NOT count bathrooms, toilets, kitchenettes, utility rooms, consulting rooms, offices, shops, halls or landings, or rooms that can only be used for storage such as cupboards.
- Do count all other rooms such as kitchens, living rooms, bedrooms, conservatories you can sit in, and studies.
- If two rooms have been converted into one, count them as one room.

Number of rooms

# H6 What is the main type of fuel used by the central heating in your accommodation?

Mark — one box only.

- No central heating
- 2 Oil
- 3 Natural Gas
- 4 Electricity
- 5 Coal (including anthracite)
- 6 Peat (including turf)
- 7 Liquid Petroleum Gas (LPG)
- 8 Wood (including wood pellets)
- 9 Other

# H7 What type of piped water supply does your accommodation have?

Mark — one box only.

- Connection to a Public Main
- Connection to a Group Water Scheme with a Local Authority source of supply
- Connection to a Group Water Scheme with a private source of supply (e.g. borehole, lake, etc.)
- Connection to other private source (e.g. well, lake, rainwater tank, etc.)
- 5 No piped water supply

# H8 What type of sewerage facility does your accommodation have?

Mark — one box only.

- Public sewerage scheme
- 2 Individual septic tank
- Individual treatment system other than a septic tank
- 4 Other sewerage facility
- 5 No sewerage facility

# H9 How many cars or vans are owned or are available for use by one or more members of your household?

Include any company car or van if available for private use.

Mark — one box only.

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 None

# H10 Does your household have a personal computer (PC)?

- 1 Yes
- 2 No

# H11 Does your household have access to the Internet?

Mark 'Yes' if you have access to the Internet in your home.

- 1 Yes, Broadband connection
- Yes, other connection

3 No

### ALL PERSONS MUST BE ENUMERATED WHERE THEY SPEND CENSUS NIGHT

Below are two lists. List 1 is for persons present at this address on the night of Sunday 10 April, Census Night. List 2 is for persons who usually live at this address but who are temporarily away on the night of Sunday 10 April. See the Explanatory Notes relating to Question 7 on the back page for guidance in interpreting a person's place of usual residence.

#### PRESENT PERSONS

- All persons alive at midnight on Sunday 10 April who spent the night at this address.
- Persons who stayed temporarily in the household (i.e. visitors).
- Persons who arrived the following morning not having been enumerated elsewhere.

## DO NOT INCLUDE in List 1

- Any person who usually lives at this address but who is temporarily absent on the night of Sunday 10 April. These persons should be listed as being absent in List 2 below.
- Students who were away from home on the night of Sunday 10 April. They should be listed as being absent in List 2 below.
- Babies born after midnight on Sunday 10 April.

## LIST 1 Persons PRESENT in the household on the night of Sunday 10 April

Household Form Page 23

temporarily absent from the household on the night of Sunday 10 April, please ask your Enumerator for guidance.

## **Explanatory Notes**

# Question H3 – Does your household own or rent your accommodation?

If you rent your accommodation (box 3), or live in it rent free (box 4), you should also answer the second part of the question 'who is your landlord?'. Select the appropriate box (1, 2 or 3) to indicate whether your landlord is a 'Private landlord', a 'Local Authority' or a 'Voluntary/Co-operative housing body', regardless of whether or not you pay all or part of the rent yourself, or if it is paid on your behalf by the HSE or any other body.

# Question H4 – If your accommodation is rented, how much rent does your household pay?

If the HSE or any other body pays part of the rent, only the amount paid by the household should be entered. Enter the amount to the nearest Euro and mark the box corresponding to the period covered e.g. if your household pays a weekly rent of €78.60 enter 79 and mark box 1. If all of your rent is paid on your behalf enter 0 and mark box 1.

## **Question 4 – Relationship**

The relationship question is designed to determine families within households. This includes where there are two or more families in the one household. For example, a household consisting of an adult daughter living with her two parents and her own child would be counted as a two family household.

The example given below shows how the question should be answered for the child in this situation, where the parents are Persons 1 and 2 on the form, the adult daughter is Person 3 and the child is Person 4.

Mark — one box only for each person.

Relationship of PERSON 4 to		P 1	erson 2	s 3
Husband or wife	1			
Partner (incl. same-sex partner)	2			
Son or daughter	3			-
Step-child	4			
Brother or sister	5			
Mother or father	6			
Grandparent	7			
Step-mother/-father	8			
Son-/daughter-in-law	9			
Grandchild	10			
Other related	11			
Unrelated (incl. foster child)	12			

## Question 7 – Where do you usually live?

This question refers to your place of usual residence at the time of the Census. If you have lived at this address for a continuous period of at least 12 months before Census Night, or have arrived at this address in the 12 month period before Census Night with the intention of staying here for at least one year you should mark box 1 (HERE). If your usual residence is not here but is elsewhere in Ireland (including Northern Ireland) you should mark box 2 and write in your full address. If your usual residence is elsewhere abroad you should mark box 3 and give the country of usual residence.

The general guideline is that a person's place of usual residence is where he/she spends most of his/her daily night rest. The following specific quidelines should be used:

- Those away from home during the week who return to the family home at weekends should consider the family home as their place of usual residence.
- Primary and secondary students who are boarding away from home, and third level students at college or university, should consider the family home as their place of usual residence.
- If a person has spent or intends to spend 12 months or more in an institution then the institution is that person's place of usual residence.
- If a person regularly lives in more than one residence during the year then the place where he/she spends the majority of the year should be chosen as his/her place of usual residence.

# Question 8 – Where did you usually live one year ago?

This question is for persons aged 1 year or over. The guidelines in relation to Question 7 also apply to this question. If your place of usual residence one year before the Census was the same as now you should mark box 1 (SAME as now).

# Question 9 – Have you lived outside the Republic of Ireland for a continuous period of one year or more?

This question is for persons aged 1 year or over. If your place of usual residence is in the Republic of Ireland and you were either:

- born in this country and lived outside it for a continuous period of one year or more, or
- born abroad and lived outside Ireland for a continuous period of one year or more,

then you should mark box 1 (Yes). You should also write in the year of last taking up residence in this country and the country of last previous residence.

# Question 15 — Do you speak a language other than English or Irish at home?

If you do not speak a language other than English or Irish at home you should mark box 2 (No) and proceed to Question 16. This means those who speak only English and/or Irish at home do not have to report on their ability to speak the English language.

# Question 16 – Do you have any of the following long-lasting conditions or difficulties?

For the purpose of this question a long lasting condition or difficulty is one which has lasted or is expected to last 6 months or longer, or that regularly re-occurs.

### Question 22 – Do you provide regular unpaid personal help for a friend or family member with a long-term illness, health problem or disability?

If you provide regular unpaid help as a carer, regardless of whether or not you are in receipt of Carer's Allowance/Benefit, you should mark box 1 (Yes) and write in the weekly number of hours of caring.

# Question 25 – What is the highest level of education/training (full-time or part-time) which you have completed to date?

The categories distinguished in this question follow the National Framework of Qualifications (NFQ). Further details can be found at www.nfq.ie

Further information on FETAC, HETAC, foreign qualifications and all other qualifications in general can be found at www.census.ie

# Question 26 – What is the main field of study of the highest qualification you have completed to date?

This question is to capture post-secondary school qualifications only. If you have a number of qualifications, the field of study relating to the highest qualification only should be listed.

# Question 27 – How would you describe your present principal status?

You should mark one box only to select the category which you feel best describes your present principal status. If you are on sick leave or maternity leave and intend to return to work at some stage you should mark box 1 (Working).

# Question 34 – Address of place of work, school or college

Persons who leave the household to attend work, school or college should supply the full name and address of this place.

For children who attend pre-school facilities (e.g. crèche, kindergarten) outside the home, the full name and address of this facility should be supplied by the person filling in the form.
