Building and Construction Inquiry 2022
(Including the Allied Trades)

BCI Survey Instructions

You are completing this for CSO (Central Statistics Office)
Building and Construction Inquiry 2022 - (Including the Allied Trades)

The purpose of this survey is to measure economic activity in the construction sector of the Irish economy and facilitate political decision making at National and European level.

The Building and Construction Inquiry is a statutory statistical survey conducted each year under the provisions of the Statistics (Structural Business Inquiry) Order 2022 (S.I. No 268 of 2022).

Under Sections 26 and 27 of the Statistics Act 1993 you are obliged by law to complete and return this form. Any person who fails or refuses to provide this information or who knowingly provides false information may be subject to prosecution under Part VI of the Act.

If your accounts will not be ready until later in the year please email our office and we will put reminders on hold until then.

Please read the following carefully prior to completion of the questionnaire:

A return must be completed in respect of each enterprise whose sole or principal activity during the year was in the construction sector or its allied trades. To check if the activity of your enterprise is relevant for this survey, please consult codes 4110 – 4399 at the URL below:

<https://www.cso.ie/en/methods/classifications/nacecoder/>

In the case of a group of companies, a separate electronic Questionnaire should be returned for each company within the group, parent or subsidiary, each in respect of its own direct activities. In certain circumstances with prior approval, a return that treats a group of companies as a single enterprise will be accepted. Transactions between companies within a group should be treated in the same way as transactions with third parties.

For further information for the Allied Trades, please refer to the following instructions:

NACE Instructions

It is extremely important to read the instructions in the Survey Booklets in conjunction with the form.

Research and Development (R&D) is creative work undertaken on a systematic basis in order to create new or improved products, processes, services or other applications.

R&D is distinguishable from other activities by the presence of an appreciable element of novelty and by the resolution of problems and uncertainties using scientific or technological means.

Activities such as routine software development, routine monitoring/analysis or pre-production preparation, where there is no appreciable novelty or problem resolution, are not considered to be R&D for the purposes of this survey.
