

## BEU 2022

You are completing this for CSO (Central Statistics Office)

The Business Energy Use Survey is an annual survey conducted by the Central Statistics Office (CSO) collecting information about energy use by businesses in Ireland. This inquiry is conducted under the Statistics (Business Energy Use Survey) Order 2018 (S.I. No 509 of 2018) made under the Statistics Act, 1993.

The data is required to estimate total energy consumption and cost in all sectors of the Irish economy in 2022, to calculate Ireland's Energy Balance and to comply with Ireland's mandatory reporting of Energy Statistics under EU Regulation.

The data should cover all branches operated by the enterprise in the Republic of Ireland, and only refer to energy used to operate the business in the calendar year January 2022 to December 2022 inclusive. All monetary values should exclude VAT.

The information you provide will be treated as strictly confidential in accordance with Section 33 of the Statistics Act 1993. It will be used for statistical purposes only.

Please Note:

We can only accept submissions using this eQ form. A version of the form available here: [Form for Guidance](#). The layout differs from the eQ form but the question contents and order should help you to collect your data for submission via the eQ form.

Please ensure you save or print a copy of your return as copies will not be available later.
