Progress Achieved in 2020

- Publication of Productivity in Ireland 2018
- Review and revision of
 - KLEMS Estimates
 - QALI Estimates
- New analysis - Labour share, Intangibles etc.
- Active participation in European Productivity initiatives

Options for Future work

- Continue to develop annual publication
- Consider higher frequency productivity indicators report
- Micro work to look behind large corporations results

Choices

- Approach the micro-macro challenge
- Combine CSO and Commercial data sources
- Produce comparable indicators for SME enterprises
- Ensure a line of sight between micro results and previously published macro ones
