R E P O R T

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1865.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1865, was presented to Parliament in the Session of 1866. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate ; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 770 Registrars' Districts, which, with a few exceptions, are of equal extent, with the Dispensary Districts formed under the Medical Charities Act. Of the Registrars, 713 are Medical Officers of Dispensary Districts. In twenty-one instances a Medical Officer is Registrar for two Districts, the remaining (36) have been appointed by the Boards of Guardians.

GENERAL SUMMARY.

The *estimated* population in the middle of 1865 was 5,641,086; the persons whose marriages were registered, amounted to 61,604; the number of marriages being 30,802; children born alive whose births were registered, amounted to 144,970; and the number of deaths registered was 93,154. The emigrants from Ireland during the year 1865 amounted to 101,497. In the previous year—1864—there were registered 27,406 marriages, 136,414 births, and 93,144 deaths ; the number of emigrants was 114,169.

MARRIAGES.

30,802 marriages were registered during 1865 ; being in the proportion of 546 marriages to every 100 persons, or of 1 marriage to every 183 persons, of the *estimated* population. The ratio in England was 1 in 113, or 884 per cent., and in Scotland 1 in 133 or 753 per cent. of the estimated population.

1,027 men and 5,129 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 3·33 ; of females, 16·65 per cent. The proportions in England and Wales in 1865 were—males, 6·69, and females, 20·08 per cent. In Scotland the proportions were 7·16 males and 21·26 per cent. females.

Of widowers, 3,321, and of widows, 1,763 were re-married; the proportion being 10·78 per cent. of widowers, and 5·72 per cent. of widows, to the total marriages. The like proportions in England and Wales were 13·93 widowers, and 9·24 per cent. widows. In Scotland the proportions were, widowers, 11·50, and widows, 5·26 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 61,604 persons married in 1865, 28,359 (12,445 men and 15,914 women) signed the registers with marks ; being in the proportion of 46·0 per cent., or 1 in every 2·48 of the males, and 1 in every 1·94 of the females married.

The like rates in England and Wales for the same year were 1 in 4·45 males, and 1 in 3·21 females ; and in Scotland 1 in 8·75 males and 1 in 4·50 females.

The marriage registers contain a column in which the age of each of the parties married is inserted ; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1865 the exact ages of both parties were given in 13,910 instances. Of these 12,540 were bachelors, and 13,196 spinsters ; 1,370 were widowers, and 714 widows. The largest number of wives was married between 21 and 30—the number being 8,480, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—8,526—is also found to have been married between 21 and 30 years of age.

Three hundred and seventy bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 186 of the widows and 176 of the bachelors married between 25 and 35 years of age. Of 1,026 widowers who married spinsters, 483 of the latter were between 25 and 35 years of age ; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 344 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 45 and 55. Fifteen widowers and two widows were married when they were above 70 years old.

The proportion per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers ; also of minors,

widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years 1864 and 1865, of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

						10·78	5·72

The extent and position of each of these divisions are specified at page xxxiii.

Of the total number of marriages registered (30,802) 21,782 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 9,020 marriages were of the various Protestant persuasions. Of the latter marriages 5,064 were in churches and chapels of the Established Church, 2,709 in Presbyterian Meeting-houses, 165 in "Registered Buildings," 1,062 in the Registrars' offices, 15 according to the usages of the Society of Friends, and 5 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1865 there were contracted in the quarter ending the last day of March, 12,308; of June, 5,659; of September, 5,854; of December, 6,981.

The following table gives a statement showing in continuation of the return in my report for 1864, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1865, and the Mode in which the Marriages were solemnized.

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,454 Churches and Chapels of the Established Church, 574 registered Presbyterian Meeting-houses, and 192 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1865. During the year 1865 there was an increase of three in the number of such places in the Established Church; of one in the Presbyterian Church, and of four in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	Number of Places of Worship.
Wesleyan Methodists,	99
Reformed Presbyterians,	33
Independents,	21
Baptists,	12
Seceders,	9
United Presbyterians,	5
Moravians or United Brethren,	5
Methodists New Connexion,	5
Church Methodists,	1
Covenanters,	1
Evangelical Union,	1
Total,	192

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81) may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1865 there were issued by the Registrars, 736 Licences for Marriage in Registered Buildings, and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1865.	Number of Registered Meeting-houses on 31st December, 1865.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	114	533	2,604
2. Remonstrant Synod of Ulster,	7	22	57
3. Presbytery of Antrim,	4	10	29
4. United Presbytery or Synod of Munster,	4	4	2
5. Northern Presbytery of Antrim,	1	5	12
Total,	130	574	2,704

BIRTHS.

The births registered in Ireland during 1865, amounted to 144,970. Of these, 74,386 were males, and 70,584 females, being in the proportion of 105·4 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·0; and in Scotland 106·1.

The rate per cent. of births to the *estimated* population was 2·570. In England the rate was 3·564, and in Scotland 3·605.

There were 5,870 illegitimate births, of which 2,757 were those of males, and 2,613 females; the proportion to the total number of births being 3·7 in every 100. The rate in England was 6·2, and in Scotland 9·9 per cent. The highest rates, 6·4 and 5·2, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in 1864 and 1865.

TABLE IV.—*The Per-cent of Legitimate and Illegitimate Births registered in Ireland during the years 1864 and 1865, by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.		Proportion per cent. of Illegitimate Births.	
	1864	1865	1864	1865
North-Eastern,	93·8	93·6	6·2	6·4
North-Western,	96·4	96·8	3·6	3·2
Eastern,	96·6	96·9	3·4	3·1
North Midland,	97·3	97·5	2·7	2·5
South Midland,	95·7	96·4	4·3	3·6
Western,	98·1	98·3	1·9	1·7
South-Eastern,	94·9	94·8	5·1	5·2
South-Western,	97·6	97·5	2·4	2·5

38,320 births were registered during the quarter ended 31st March; 39,109 in that ended 30th June; 34,045 during that ended 30th September; and 33,496 in that ended 31st December.

DEATHS.

The deaths registered in 1865 amounted to 93,154, of which 46,246 were males, and 46,908 females, being in the proportion of 1·651 per cent. of the *estimated* population, or in the ratio of 1 registered death to every 61 persons. The proportion in England for the same year was 2·339 per cent., or 1 in 48; and in Scotland 2·260 per cent., or 1 in 44.

The following table shows the per-cent-age of mortality at different ages:—

TABLE V.—The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years 1864 and 1865, by Sexes.

Sexes.	AGES.											
	0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards.
Males, . . { 1864	28·65	4·23	2·32	7·57	6·19	5·78	7·76	11·51	12·80	10·11	2·97	.61
{ 1865	29·13	4·51	2·32	7·58	6·38	5·88	7·76	10·76	12·44	9·62	3·04	.58
Females, . . { 1864	25·20	4·28	2·37	6·90	6·55	6·03	7·80	11·81	13·74	11·23	3·36	.73
{ 1865	25·89	4·62	2·41	7·07	6·84	6·13	7·84	11·24	13·62	10·53	3·25	.76
Males and Females, { 1864	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	.67
{ 1865	27·50	4·57	2·37	7·32	6·51	6·00	7·80	11·00	13·03	10·08	3·15	.67

Of the persons whose deaths were registered during the year 27·50 in every 100 were children under 5 years old—of which 29·13 per cent. were males, and 25·89 per cent. females. 13·24 per cent. of the men, and 14·54 per cent. of the women, whose deaths were registered had passed their 75th year. 58 of the males and 76 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1865 the number of emigrants who left the ports of Ireland amounted to 101,497; of these 55,214 were males and 46,283 females. Of the whole number 20,524, or 20·2 per cent., were from Leinster; 37,426, or 36·9 per cent., from Munster; 22,301, or 22·0 per cent. from Ulster; and 12,477, or 12·3 per cent., from Connaught: 8,769 persons, or 8·6 per cent., did not state the county or province to which they belonged.

METEOROLOGY.

The following meteorological observations, taken at the Ordnance Survey office,* Phoenix Park, Dublin, during the year 1865, have been furnished by Captain Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year 1865, at 9.30, A.M., on the 15th of December, when it stood at 30·827,—the wind blowing from the S.W.; it was lowest on the 14th of January, at the same hour, with the wind from the W.N.W.,—when it was 28·540 inches.

The highest temperature in the air during the year was 83·9° on the 22nd of June, and the lowest 20·4° on the 20th of January. Rain or snow fell on 178 days, being nearly six months of wet days in the year; the greatest rain-fall in 24 hours was 1·355 inches on the 10th of August, with the wind from the S.W. The prevailing wind was from the W., from which point it blew for 99 days; from the S.W. it came for 75 days; from E., 60; S., 26; S.E., 25; N., 25; N.E., 23; and N.W., 18; and it was calm on 14 days at 9·30, A.M. The total pressure of the W. wind was

* Latitude, 53° 21' 44" 65 North. Longitude, 6° 21' 6" 35 West. Height above the sea, 158·8 feet.

147·58 lbs., being an average of 1·49 lbs. to the square foot. The strongest wind blew from the S.W. on the 30th December, when the pressure was 36 lbs. per square foot.

I beg here to repeat the observations made in my Report to your Excellency for 1864, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state the numbers of these events registered in 1865 do not show any satisfactory increase compared with the previous year:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and 1865] :—

COUNTRIES.	RATIO TO POPULATION.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	[1 in 39]	[1 in 61]	[1 in 183]
England,	1 " 28	1 " 42	1 " 116
Scotland,	1 " 28	1 " 42	1 " 137
Sweden,	1 " 30	1 " 50	1 " 145
Prussia (Old Provinces),	1 " 24	1 " 38	1 " 116
Hanover,	1 " 30	1 " 44	1 " 124
Wurtemburg,	1 " 28	1 " 31	1 " —
Hanse Towns: Bremen,	1 " 28	1 " 37	1 " 105
Holland,	1 " 30	1 " 42	1 " 127
France,	1 " 38	1 " 44	1 " 127
Spain,	1 " 26	1 " 32	1 " 127
Austria (exclusive of Hungary),	1 " 25	1 " 31	1 " 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864; and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

	1864.	1865.	1866.	1867.	1868.
Registered.					
Births,	136,414	144,970	146,237	144,318	146,108
Deaths,	98,144	98,154	98,598	98,911	86,808
Marriages,	27,406	30,802	30,151	29,796	27,753"

Following this Report are summaries of the Quarterly Reports issued in 1865, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death— to which I beg to refer.

I have the honour to be
Your Excellency's
Very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

GENERAL REGISTER OFFICE,

Dublin, 31st August, 1869.

SUMMARY OF THE QUARTERLY REPORTS, 1865.*First Quarter—January, February, March.*Quarterly
Reports.First
Quarter.

Marriages.—There were 12,308 marriages registered in Ireland during the quarter ending 31st March, 1865, being equal to an annual ratio of 1 marriage to every 115, or '873 per cent. of the estimated population ; of these marriages, 10,172 were between Roman Catholics (26 and 27 Vic., cap. 90), and 2,136 between Protestants (7 and 8 Vic., cap. 81).

The number of marriages registered in the corresponding quarter of 1864 was 9,602—7,385 Roman Catholic and 2,217 Protestant—the return for the first quarter of the year 1865 showing an increase of 2,787 in the former, and a decrease of 81 in the latter. The increase in the number of Roman Catholic marriages is probably owing to the fact that the Act 26 and 27 Vic., cap. 90, only came into operation on the 1st January, 1864, and that some marriages were not registered during the first quarter of that year.

Births.—The births registered during the quarter ending 31st of March amounted to 38,320, representing an annual ratio of 1 birth in every 36·8 of the estimated population. The number registered during the corresponding quarter of the year 1864 was 30,179, thus showing an increase of 8,141 between the two periods. A portion of this increase must be attributed to the fact of some of the births which occurred at the close of the first quarter of 1864 (the first year of Registration), not having been registered until the beginning of the second quarter (21 days being allowed to elapse after a birth before the person responsible for registering it becomes liable to a fine of twenty shillings).

Notwithstanding the increase in the number of births between the first quarter of 1864 and the corresponding quarter of 1865, still, from the ratio which the number of births registered in some of the Superintendent Registrars' districts bears to the population, it is evident that, in very many instances, the provisions of the Registration Act were not complied with.

Deaths.—The deaths registered during the first three months of 1865 amounted to 29,259, or an annual mortality of 1 in 48·2 of the estimated population. The number registered during the corresponding quarter of 1864 was 28,043.

Emigration.—The number of persons leaving the ports of Ireland, who stated to the Enumerators "that it was not their intention to return," amounted, during the first quarter of 1865, to 15,848—8,654 males and 7,194 females—being 11,777, or 43 per cent. less than the number who left during the corresponding period of 1864.

Decrease of the Population.—The births registered during the quarter, as already stated, amounted to 38,320 ; the deaths to 29,259, and the number of emigrants to 15,848 ; it would, therefore, appear that the population of Ireland decreased during the three months by 6,787, being the excess of the deaths over the births added to the number of emigrants.

PRICES OF PROVISIONS AND PAUPERISM.

The price, in Dublin, of the 4 lb. loaf during the thirteen weeks of the quarter was 5½d. It was 6d. during the corresponding period of 1864.

The average price of oatmeal, at the Dublin Corn Exchange, was 11s. 9d. per cwt. during the quarter, ranging from 11s. 2d. in the seventh week to 12s. 6d. in the last week ; the average price in the corresponding period of 1864 was 11s. per cwt., varying from 10s. 5d. in the last week of the quarter to 13s. in the fifth week.

The prices of potatoes at Dublin Market during the first quarter of 1865 averaged

from 3s. 1d. to 3s. 7d. per cwt.; in the first three months of 1864 the average was 2s. 6d. to 3s. 3d.

The average price of beef at the Dublin Cattle market during the first three months of 1865, ranged from 54s. 6d. to 68s. per cwt. During the first quarter of 1864 the average prices were from 51s. 6d. to 64s. 6d. per cwt.

The average weekly number of persons in Ireland receiving in-door relief during the first quarter of 1865 was 61,895. During the first quarter of 1864 the average number was somewhat greater (64,059). During both periods the smallest number receiving in-door relief was in the first week in January, and the greatest number during the latter end of February. The average number receiving out-door relief during the first three months of 1864 was 9,822. In the corresponding period of 1865 the average number increased to 11,296.

HEALTH OF THE PEOPLE.

The mortality, which is invariably greatest in the first quarter of the year, was in some localities excessively high during the months of January, February, and March of the year 1865.

The increased mortality in these localities may be referred to two causes: in the first place, to the inclemency of the weather, and, in the second, to the prevalence of fever, scarlatina, small-pox and other zymotic diseases.

As to the first cause, the inclemency of the weather: from the meteorological returns furnished by Captain Wilkinson, it may be observed that the mean temperature of the air for the quarter ending March 31, 1865, was 38·9° Fahrenheit; whereas during the corresponding quarter of the year 1864 it was 40·2°, or 1·3° higher.

The lower temperature necessarily swelled the list of deaths from bronchitis and other pulmonary affections, especially amongst the aged and those of tender years.

Bronchitis proved very fatal throughout the country, and the following notes from Registrars will illustrate the lethal character of this disease to the old and the very young.

The Registrar of the Pomeroy district, in the Union or Superintendent Registrar's district of Cookstown, states that "more than three-fourths of the mortality was caused by chest affections, the average of the ages being 80 years."

The Registrar of the district of Aughnacloy, Union of Clogher, observes, "The increase of the deaths is among the aged, caused, in my opinion, by the severity of the winter. One person died aged 110 years, another aged 100, 7 between 80 and 90, and nine between 70 and 80."

Of the 17 deaths which took place in No. 2, Boyle district, Boyle Union, 10 were of children under 5 years of age, and 4 were of persons 60 years and upwards. Many other instances might be cited, were it necessary, to show how destructive cold weather is to the very young and the very old. Phthisis, or pulmonary consumption, carried off a great many; and pneumonia, or inflammation of the lungs, was, in many districts, very fatal.

With reference to the second cause of increased mortality during the quarter, i.e., the prevalence of fever and other zymotic diseases—fever of a typhus type was the epidemic most general and most fatal throughout the country. Typhus was much more fatal in some districts than in others; invariably in the districts where sanitary precautions were not attended to the mortality from fever was greatest. Typhoid fever, typhia, or enteric fever, proved fatal in some parts of the country. The Registrar of the Cappoquin district, in the Union of Lismore, reported (April, 1865):—"Typhoid, typhia, or enteric fever, is spreading; it attacks chiefly children, and patients debilitated by other maladies; many old people also have died of it, but in them the symptoms are obscure, and the death usually referred to influenza, bronchitis, phthisis, &c. Some cases resembling relapsing fever, typhinia, or famine fever." In a few districts typhinia resulted in death.

Very many deaths were attributed to scarlatina. In almost all the returns furnished by Registrars some deaths were ascribed to this disease. In many parts of the country it proved very fatal. For instance, in the district of Oldcastle, in the Union of Oldcastle, the Registrar reported "scarlatina has prevailed in this district for the last six weeks; 4 deaths have resulted. In one house 3 children, the entire family, were cut off in four days."

In the district of Bangor, in the Superintendent Registrar's district of Belmullet, the Registrar states that "the deaths were high, the district having been visited by an epidemic of scarlet fever, known as scarlatina maligna, of a most virulent type, which caused 28 deaths (the total for the district was 52), but it is now happily on the decline;" and in the Registrar's district of Killeter, in the Union of Castlederg, "four persons, members of one family, were cut off within ten days."

Many deaths resulted from measles. Croup and whooping-cough were very fatal; the former most so in the north-eastern division, the latter in the south-western.

From small-pox many deaths ensued. Nearly all those who perished had been unprotected by vaccination.

Some few of the Registrars reported that the sanitary condition of their districts was attended to; but, in the majority of the notes, complaints were made as to the utter neglect of sewerage, cleansing, or any other measure which might tend to the healthfulness of the localities.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the quarter was 29.651 inches (that of the corresponding quarter of 1864 was 29.725 inches); the highest reading (30.423 inches) occurred on the 10th February, at 9.30 A.M., wind E.S.E.; the minimum reading (28.357 inches) was on the 14th January, at 9.30 A.M., wind W.N.W.

The mean temperature of the air during the quarter was 38.9° (in the corresponding period of 1864 it was 40.2°); the maximum registered by the thermometer was 60.9°; and the minimum was 20.4°. The temperature on the grass was below 32° on 24 nights of the month of January, on 13 nights in February, and on 19 nights in March.

The rain-fall during the quarter measured 5.979 inches (in the corresponding quarter of 1864 it was 5.227 inches). The greatest rain-fall was in the month of February, when 2.788 inches were registered.

There was a prevalence of westerly winds, as it blew from that direction on 34 days, viz., on 11 days in January, 11 days in February, 12 days in March; and from S.W. on 15 days—9 days in January, 5 days in February, and 1 day in March, at 9.30 A.M.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical Purposes.

Marriages.—The number of marriages (2,802) registered in the South-Western Division during the quarter ending 31st March, represents an annual ratio of 1 marriage to every 74 of the estimated population. This very high rate is owing to the custom which prevails amongst the Roman-Catholic population, of having a large proportion of the marriages of the year celebrated immediately before the commencement of the Lenten Season. The annual ratio afforded by the number of marriages registered in this division during the last quarter of the year 1864 was only 1 in every 302 of the estimated population. In the Western Division the marriages

registered in the first quarter of 1865 equalled an annual ratio of 1 in every 84 of the population against a ratio of but 1 in 441 in the last quarter of 1864.

The Eastern division is that in which the marriages registered during the quarter ending 31st March afford the lowest annual ratio, namely, 1 in every 170 of the population. The number of marriages registered in this division during the quarter ending 31st December, 1864, equalled an annual ratio of 1 in every 174.

The following statement shows the order in which the eight divisions stand with regard to the number of MARRIAGES in proportion to the estimated population (Quarter ending 31st March, 1865) :—

Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 74	5. North-Western,	1 in 138
2. Western,	," 84	6. South Midland,	," 139
3. South-Eastern,	," 100	7. North-Eastern,	," 158
4. North Midland,	," 130	8. Eastern,	," 170

Births.—The birth-rate during the first quarter was highest in the "South-Western" division, the births registered (6,273) affording a ratio of 1 birth to every 33 of the estimated population ; the birth-rate was highest in this division during the first quarter of 1864 also.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS registered during the FIRST quarter of 1864 and 1865, is shown in the following statement :—

Quarter ending 31st March, 1864.		Quarter ending 31st March, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 37	South-Western,	1 in 33
2. South-Eastern,	," 42	North-Eastern,	," 34
3. South Midland,	," 47	South-Eastern,	," 37
4. North-Eastern,	," 47	Eastern,	," 37
5. Eastern,	," 48	Western,	," 38
6. North Midland,	," 52	North-Western,	," 40
7. Western,	," 55	North Midland,	," 41
8. North-Western,	," 56	South Midland,	," 42

The birth-rate was considerably higher in all the divisions during the first quarter of 1865 than it was in the corresponding quarter of the previous year. The greatest increase was in the "Western" division, which rose from 1 in 55 for the first quarter of 1864, to 1 in 38 for the corresponding quarter of 1865 ; in the "North-Eastern," which had 1 in 47 for 1864, and 1 in 34 for 1865 ; and in the "North-Western," in which the rate increased from 1 in 56 to 1 in 40.

Deaths.—The number of deaths (5,050) registered during the quarter, in the "Eastern" division, afforded the highest rate of mortality in proportion to the population, the ratio represented being 1 in 40. As heretofore the three divisions lying along the eastern coast had the highest rate of mortality.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY afforded by the number of Deaths registered during the FIRST quarter of 1864 and 1865 :—

Quarter ending 31st March, 1864.		Quarter ending 31st March, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Eastern,	1 in 42	Eastern,	1 in 40
2. Eastern,	," 43	South-Eastern,	," 42
3. North-Eastern,	," 45	North-Eastern,	," 44
4. South Midland,	," 51	South Midland,	," 51
5. South-Western,	," 53	South-Western,	," 51
6. North-Western,	," 55	North Midland,	," 54
7. North Midland,	," 57	North-Western,	," 55
8. Western,	," 69	Western,	," 61

The death-rate was the same in the South-Eastern, the South Midland, and the North-Western divisions, and was somewhat higher in all the others during the first quarter of 1865 than it was in the corresponding quarter of 1864.

The following table shows the number of marriages registered in each of the four Provinces during the quarter ending 31st March, 1865; and the number of births and deaths registered during the quarters ending 31st March, 1865, and 1864, with the ratio to the population.

Table showing by Provinces, the number of Marriages registered during the quarter ending 31st March, 1865, and the number of Births and Deaths registered during the quarters ending 31st March, 1865, and 1864, with the ratio to the Population.

REGISTRATION PROVINCES.	MARRIAGES.		BIRTHS.				DEATHS.			
	Quarter ending 31st March, 1865.		Quarter ending				Quarter ending			
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER, . . .	2,197	1 in 158	8,960	1 in 39	7,281	1 in 48	8,125	1 in 43	7,667	1 in 46
MUNSTER, . . .	4,564	81	10,566	35	9,467	40	7,486	50	7,332	51
ULSTER, . . .	3,025	155	13,048	36	9,269	51	9,825	48	9,631	49
CONNAUGHT, . . .	2,522	88	5,746	38	4,162	53	3,823	58	3,413	65

Marriages.—The marriages registered in the province of LEINSTER during the quarter ending 31st March, 1865, amounted to 2,197 a number equal to an annual ratio of 1 marriage to every 158 of the estimated population. In MUNSTER there were registered 4,564 marriages, or 1 in every 81; in ULSTER 3,025, or 1 in every 155; and in CONNAUGHT 2,522, or 1 in every 88 of the population.

Births.—The births registered during the first quarter of 1865 in LEINSTER, amounted to 8,960, or 1 in 39 of the population, against 1 in 48 during the corresponding quarter of 1864; in MUNSTER, to 10,566, or 1 in 35, against 1 in 40; in ULSTER, to 13,048, or 1 in 36, against 1 in 51; and in CONNAUGHT, to 5,746, or 1 in 38, against 1 in 53 for the corresponding quarter of 1864.

Deaths.—The number of deaths registered during the first quarter in LEINSTER, was 8,125, or 1 in 43 of the population, against 1 in 46 for the corresponding quarter of 1864; in MUNSTER it was 7,486, or 1 in 50 against 1 in 51; in ULSTER, it was 9,825, or 1 in 48, against 1 in 49; and in CONNAUGHT, 3,823, or 1 in 58, against 1 in 65 for the first quarter of 1864.

Second Quarter.—April, May, June.

Marriages.—The marriages registered in Ireland in the quarter ending the 30th June, 1865, amounted to 5,659, being equal to an annual ratio of 1 in every 249, or 401 per cent. of the estimated population; of these marriages, 3,564 were between Roman Catholics (under the 26 and 27 Vic., cap. 90), and 2,095 between Protestants (under the 7 and 8 Vic., cap. 81)—the former number affording an annual ratio of 1 in 307 of the Roman Catholic population, and the latter of 1 in 150 of the Protestant population. The number of marriages registered in the corresponding quarter of 1864 was 6,023—4,091 of Roman Catholics and 1,932 of Protestants—being 364 more than were registered during the second quarter of 1865.

Quarterly Reports.
—
Second Quarter.

Births.—The number of births registered during the quarter ending 30th June amounted to 39,109—19,988 boys and 19,121 girls—affording an annual ratio of 1 in 36·1 or 2·77 per cent. of the estimated population. The number of births registered in the corresponding quarter of 1864 was 38,715.

Deaths.—There were 24,250 deaths registered during the quarter—12,093 males and 12,157 females—being equal to an annual ratio of 1 in every 58·2 or 1·72 per cent. of the estimated population. The number of deaths registered during the corresponding quarter of 1864 was 24,155.

Emigration.—The number of persons leaving the ports of Ireland, who stated to the Enumerators “that it was not their intention to return,” amounted, during the first quarter of 1865, to 15,848; during the second quarter the number was 37,588—20,175 males and 17,413 females—of whom 13,335 left during the month of April, 14,263 in May, and 9,990 in June. The number of emigrants who left during the second quarter of 1864 was 48,802, or 11,214 more than in the second quarter of 1865.

Decrease of the Population.—The number of emigrants who left Ireland during the first quarter of the year 1865 was more by 6,787 than the excess of births over deaths. The number of births registered during the second quarter, as already stated, amounted to 39,109, and the deaths to 24,250, showing an excess of 14,859 births over deaths, which if deducted from the number of emigrants, would show a further reduction in the population of 22,729, or a diminution during the first six months of the year of 29,516 persons.

PRICES OF PROVISIONS, AND PAUPERISM.

Sixpence was the price of the 4lb. loaf in Dublin during each week of the second quarter of 1865 and 1864. The average price of oatmeal per cwt. during the second quarter of 1865 was 14s. 1d., the prices being very uniform throughout each week of the quarter; during the corresponding quarter of 1864, the average price was but 10s. 6d. The average prices per cwt. of potatoes, ranged from 3s. 2d. to 3s. 11d.; in the corresponding quarter of 1864 they were somewhat lower, viz., 2s. 11d. to 3s. 8d. Beef maintained a high price throughout the quarter, ranging from 55s. to 67s. 6d. per cwt., against 53s. to 65s. 6d. during the corresponding period of 1864.

The number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1865, averaged 54,852, being 3,115 less than the average number in the corresponding period of 1864. The number relieved on Saturday in the first week of the second quarter of 1865 was 60,100, which gradually decreased to 50,670, which was the number on Saturday, 1st July. The average number of persons in receipt of out-door relief was greater during the second quarter of 1865, than in the corresponding period of 1864; the respective numbers being 10,565 and 9,149. Of the persons receiving in-door relief during the second quarter of 1865, .9 per cent. were located in asylums for the blind and the deaf and dumb and in extern hospitals. In the quarter ending 2nd July, 1864, the percentage was .8.

HEALTH OF THE PEOPLE.

The health of the people was satisfactory throughout the quarter, owing to comparative freedom from epidemical diseases.

Small-pox appeared in a few districts. The beneficial effects of vaccination are well illustrated by the following notes. The Registrar of Crumlin district, in the Union of Antrim, remarks:—“There were a good many cases of small-pox in the district, but in no case was the disease fatal or even severe where the patient had been

previously vaccinated, and in every instance those parties who had been re-vaccinated lately escaped the disease altogether, although in several cases members of the same family were ill of small-pox at the time ;" eight of the 32 deaths registered in the Clonmany district, in the Union of Inishowen, were caused by this disease ; the Registrar reports that 7 of the persons had not been vaccinated, and that the remaining case was accompanied by acute bronchitis. Four deaths from this cause occurred in the Glendermot district of the Londonderry Union ; and 4 deaths occurred in the Cork north city district—the persons had not been vaccinated.

Diphtheria prevailed in some of the districts in the north-eastern and north-western divisions. Three deaths resulted from this cause in the Registrar's district of Antrim. There were 2 deaths from it in the district of Tanderagee, in the Union of Banbridge. It is reported to have been epidemic at Bushmills, in the Union of Coleraine ; 4 deaths from it were there registered. Four deaths from this disease occurred in Coal Island, Dungannon Union, and 4 in Glenavy, in the Union of Lisburn.

Deaths from Scarlatina occurred in most of the districts. It was particularly fatal throughout the western and south-western divisions.

Fever is reported to have been very prevalent at Carrick-on-Suir ; at Ballintral, in Ballyshannon ; and at Killeter, in Castlederg. It was also prevalent in the district of Fanad, in Millford : the Registrar states that it was imported from Glasgow by labourers.

The Registrar of the Dromore district, Union of Banbridge, states that of the 38 deaths registered during the quarter, 16 were caused by consumption—a disease which he attributes to want of pure air in the dwellings of the people ; he suggests the passing of a "Compulsory Ventilation Act."

It is gratifying to observe that some of the Registrars were able to report improvements in the sanitary condition of their districts ; amongst those districts may be mentioned Lisburn ; Moynalty, in the Union of Kells ; Glengarriff, in Bantry Union ; Ballincollig, in Cork Union ; portions of Cork City ; Maguiresbridge, in Lisnaskea ; Galway ; &c. On the other hand, a long list of places is to be found in the notes, concerning which the Registrars felt it their duty to complain ; amongst these may be noticed—Portglenone, in the Union of Ballymena, "the weavers' shops being often as damp as ill-drained cellars, and very frequently occupied as sleeping-rooms ;" the village of Legoniel, in the Registrar's district of Shankill, Union of Belfast ; Hillsborough, in Lisburn ; Newtownards ; Fintona, in Omagh, in which, the Registrar reports, "3 deaths from fever occurred in one house where the sanitary arrangements were defective ;" Ballymote, in Sligo, the Registrar stating that "the sanitary arrangements of both town and district are in total neglect for want of proper authorities to look after such arrangements ;" Carlingford, in Dundalk, the Registrar remarking on the non-observance of the "Nuisances Removal Act ;" Stillorgan, in Rathdown, in which the village of Newtownpark is stated to be defective in drainage and sewerage ; Carrick-on-Suir, with regard to which it is stated, "the sanitary condition of this town is (July, 1865) in a very bad state, it is in a low position, and very much in need of proper sewerage ; some of the houses are over-crowded and badly ventilated ;" Kilmeadan, in Waterford, in which a prevalence of typhus fever is attributed to the noxious vapours given off from the cesspools opposite the doors of the houses.

The Registrar of the Bangor district, in Belmullet Union, says, "11 deaths in the register are ascribed to scarlatina and its consequences ; it is still (July, 1865) lurking about this district, owing, I believe, to the filthy state in which the people here keep their houses ;" and the Registrar of Milltown Malbay, in Ennistimon, states that between 50 and 60 cases of "Pythogenic fever" visited his district, and that he "failed in no instance to trace the cause to defective sanitary arrangements in the sewerage about the houses or the wells from which their water supply was drawn."

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the quarter was 29.916 inches (in the second quarter of 1864 it was 29.871 inches); the highest reading (30.378 inches) was on the 13th June, at 9.30 A.M., wind N.; and the lowest (29.223 inches) on the 29th May, at 9.30 P.M., wind S.S.W.

The mean temperature of the air during the quarter was 54.8° (in the corresponding quarter of 1864 it was 53.6°); the maximum registered by the thermometer was 83.9°; and the minimum was 31.2°. The temperature on the grass was below 32° on 4 nights only, during the quarter, viz.:—1st, 10th, 15th, and 24th April.

The rain-fall during the quarter ending 30th June, measured 5.816 inches, it was only 4.083 inches in the corresponding portion of 1864. The greatest rain-fall was in the month of May, when 3.578 inches were registered.

The wind blew on 15 days from N.E.; on as many as 22 days from E.; on 16 days from S.W.; and on 17 days from W., at 9.30 A.M.

THE WEATHER.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division was that in which the largest number of marriages in proportion to the estimated population was registered during the quarter ending 30th June; the number registered amounted to 1,597, equal to an annual ratio of 1 in 171; the number registered in the Eastern Division during the quarter was 1,160, affording a ratio of 1 in 174 of its population. The number of marriages registered in the Western Division amounted to 444 affording a ratio of only 1 in 451 of the inhabitants, whereas the number registered during the quarter ending 31st March, yielded a ratio of 1 in 84.

The following statement shows the order in which the Eight Divisions stand with regard to the number of MARRIAGES in proportion to the population (Quarter ending 30th June, 1865):—

Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 171	5. North-Western,	1 in 307
2. Eastern,	, 174	6. South Midland,	, 334
3. South-Eastern,	, 253	7. North Midland,	, 335
4. South-Western,	, 286	8. Western,	, 451

Births.—The birth-rate during the second quarter was highest in the North-Eastern division and lowest in the Western division, the annual ratios represented in those divisions being, respectively, 1 in 31 and 1 in 43 of the population. The number of births registered in each division varies but little from the number registered in the corresponding quarter of 1864, when the annual ratios ranged from 1 in 32 in the South-Western division to 1 in 43 in the North-Western.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS registered during the SECOND quarter of 1864 and 1865, is shown in the following statement:—

Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 32	North-Eastern,	1 in 31
2. North-Eastern,	, 33	South-Western,	, 32
3. Eastern,	, 35	Eastern,	, 36
4. South-Eastern,	, 36	South-Eastern,	, 36
5. North Midland,	, 40	North Midland,	, 40
6. South Midland,	, 40	North-Western,	, 40
7. Western,	, 41	South Midland,	, 42
8. North-Western,	, 43	Western,	, 43

Deaths.—The annual rate of mortality represented by the number of deaths registered in each division during the second quarter of 1865, varies from 1 in every 49 of the population in the Eastern division to 1 in every 75 in the Western. In the corresponding quarter of 1864, the death-rate ranged from 1 in 51 to 1 in 77, the highest mortality having been in the South-Eastern division, and the lowest, as in the second quarter of 1865, in the Western. As in each previous quarter since the commencement of Registration, the three divisions lying along the eastern coast had the highest rates of mortality.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY afforded by the number of Deaths registered during the SECOND quarter of 1864 and 1865:—

Quarter ending 30th June, 1864.

Divisions.	Ratio.
1. South-Eastern,	1 in 51
2. North-Eastern,	" 51
3. Eastern,	" 53
4. South-Western,	" 59
5. South Midland,	" 60
6. North-Western,	" 60
7. North Midland,	" 73
8. Western,	" 77

Quarter ending 30th June, 1865.

Divisions.	Ratio.
Eastern,	1 in 49
North-Eastern,	" 50
South-Eastern,	" 52
South-Western,	" 61
South Midland,	" 62
North-Western,	" 64
North Midland,	" 70
Western,	" 75

Comparing the mortality in each division during the second quarter of 1865 with that during the corresponding quarter of 1864, it is seen that the more important differences appear in the Eastern division, where the death-rate rose from 1 in 53 to 1 in 49, and in the North-Western division, in which it fell from 1 in 60 to 1 in 64.

PROVINCES.

The number of marriages registered in each of the four provinces during the quarter ending 30th of June, 1865, and the numbers of births and deaths registered in each province during the quarters ending 30th June, 1865, and 30th June, 1864, together with the annual ratio to the population, are shown in the following table:—

Table showing by Provinces, the number of Marriages registered during the quarter ending 30th June, 1865, and of Births and Deaths REGISTERED during the quarters ending 30th June, 1865, and 1864, and the ratio to the Population.

REGISTRATION PROVINCES.	MARRIAGES.		BIRTHS.				DEATHS.			
	Quarter ending 30th June, 1865.		Quarter ending		Quarter ending		30th June, 1865.		30th June, 1864.	
			30th June, 1865.	30th June, 1864.	30th June, 1865.	30th June, 1864.				
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,662	1 in 209	9,138	1 in 38	9,462	1 in 37	6,660	1 in 52	6,434	1 in 54
MUNSTER,	1,225	304	10,931	34	10,999	34	6,143	61	6,308	59
ULSTER,	2,223	211	13,801	34	12,784	37	8,447	56	8,518	55
CONNAUGHT,	549	403	5,239	42	5,470	41	3,000	74	2,895	77

Marriages.—The number of marriages registered in the province of Leinster during the quarter ending 30th June, amounted to 1,662, a number equal to an annual ratio of 1 in 209 of the population; in Ulster the ratio was 1 in 211, the number registered being 2,223; in Munster the ratio was 1 in 304, the number of

Quarterly Reports.

Second Quarter.

marriages being 1,225 ; there were only 549 marriages registered in Connaught, the ratio afforded by that number being but 1 in 403, whereas in the quarter ending 31st March the ratio in the two last-named provinces was 1 in 81 and 1 in 88, respectively—which may perhaps in some degree be accounted for by the usage among the Roman Catholic population, of having their marriages celebrated immediately before Lent, that is, during the first quarter of the year.

Births.—From the above table it will be seen that the number of births registered in the province of Leinster during the quarter ending 30th June, 1865, was 9,138 ; the annual ratio afforded being 1 birth in every 38 of the population against a ratio of 1 in 37 in the corresponding quarter of 1864 ; in Munster there were registered 10,931 births, or 1 in 34 of the population against 1 in 34 in the corresponding quarter of 1864 ; in Ulster 13,801, or 1 in 34 against 1 in 37 ; and in Connaught 5,239, or 1 in 42 against 1 in 41.

The provinces rank in the same order in the two quarters, viz. :—Munster, Ulster, Leinster, Connaught—Munster having the highest birth-rate.

Deaths.—The number of deaths registered in the province of Leinster during the second quarter of 1865 was 6,660—a number equal to an annual ratio of 1 death in 52 of the population ; the ratio afforded by the deaths registered during the corresponding quarter of 1864 was 1 in 54. In Munster, there were registered 6,143 deaths, or 1 in 61 of the population against 1 in 59 for the quarter ending 30th June, 1864 ; in Ulster 8,447, or 1 in 56, against 1 in 55 ; and in Connaught 3,000, or 1 in 74 against 1 in 77, for the corresponding quarter of 1864.

The following was the order of the provinces with regard to mortality in proportion to population in the two quarters:—Leinster, Ulster, Munster, Connaught—Leinster having the highest mortality.

Third Quarter.

Third Quarter.—July, August, September.

Marriages.—The marriages registered in Ireland during the quarter ending September 30th amounted to 5,854, affording an annual ratio of 1 in 241, or 4·15 per cent. of the *estimated* population ; of these marriages, 3,613 were between Roman Catholics (under the 26 and 27 Vic., cap. 90) ; the Protestant marriages (under the 7 and 8 Vic., cap. 81) amounted to 2,241 ; the former number affords an annual ratio of 1 marriage to every 303 of the Roman Catholic population, and the latter 1 in every 140 of the Protestant population. The number of marriages registered in the corresponding period of 1864 was 5,512—3,397 of Roman Catholics and 2,115 of Protestants.

Births.—34,045 births were registered during the third quarter of 1865—17,522 males and 16,523 females—affording an annual ratio of 1 in every 41·4, or 2·41 per cent. of the *estimated* population ; the number registered in the corresponding quarter of 1864, was 33,877.

Deaths.—The number of deaths registered during the quarter ending the 30th September amounted to 18,632—9,406 males and 9,226 females—being equal to an annual ratio of 1 in every 75·7, or 1·32 per cent. of the *estimated* population. The number registered in the corresponding quarter of 1864 was 19,191.

Emigration.—The number of persons who left the ports of Ireland, stating to the Enumerators “that it was their intention *not to return*,” amounted, during the quarter ending the 30th September, 1865, to 27,661, being 5,523 more than the number during the corresponding period of 1864 ; the increase in July amounting to 667 ; in August, to 1,760 ; and in September, to 3,096. Of the 27,661 persons who emigrated during the quarter, 14,730 were males, and 12,931 females.

Estimated Decrease of the Population.—There would appear to have been a decrease of 12,248 in the population of Ireland, *estimated* according to the returns of births and deaths registered and of emigration received for the third quarter of 1865, the deaths (18,632) and the number of emigrants (27,661) amounting to 46,293, whereas the number of births registered was only 34,045. The estimated decrease of population in the first quarter of the year was 6,787; during the second quarter it was 22,729; and in the third quarter, as already stated, it was 12,248, making a total decrease for the nine months of 41,764 persons.

PRICES OF PROVISIONS AND PAUPERISM.

Provisions, in general, were higher in Dublin during the third quarter of 1865 than during the corresponding period of 1864. The price of Messrs. R. Manders and Co.'s 4lb. loaf, which was 6d. in the first week of the quarter in 1864, fell to 5½d. in the last, while, in the first week of the third quarter of 1865 it was 6d., and in the last week 6½d.; the rise in the price took place in the tenth week. The *average* price of oatmeal at the Dublin Corn Exchange, for the third quarter of 1864, was but 10s. 8d.; for the third quarter of 1865 it was 15s. 3d., ranging from 14s. 3d. to 17s., the latter being the average price in the week ending Saturday, 19th August.

The price of potatoes, at the Dublin potato market, for the third quarter of 1865 was 2s. 8d. to 4s. per cwt.; in the corresponding quarter of 1864 it was somewhat lower, being from 2s. 7d. to 3s. 10d.

Beef maintained a very high price during the quarter, the range of price per cwt., during the quarter at the Dublin cattle market, being 56s. 6d. to 67s. 6d.; the highest weekly quotation, 60s. to 72s., was for the week ending 2nd September. The *average* price of beef for the third quarter of 1864 was 51s. to 62s. 6d. per cwt.

The number of persons in Ireland receiving in-door relief weekly, during the third quarter of 1865, averaged 46,632, being 3,266 less than the average for the corresponding quarter of 1864; the number receiving in-door relief on Saturday, 8th July, was 50,085; the number for Saturday, the 30th September, was 45,384. In the first week of the corresponding quarter of 1864 the number was 54,079; and in the last week it was 48,535. The number of persons receiving out-door relief was greater in each week of the third quarter of 1865 than in the corresponding weeks of the third quarter of 1864; the weekly average number in the third quarter of 1865, was 9,093, against 7,717 for the corresponding period of 1864.

HEALTH OF THE PEOPLE.

The comparative freedom from epidemic disease, the fine dry weather, and, in general, the good wages and employment of the working classes, all combined to render the quarter ended September 30th unusually healthy.

The mortality during the quarter was less than in the corresponding period of 1864, and much below that of the quarter ended June 30th, 1865.

Fever, which for a considerable time had been prevalent in many parts of the country, was the cause of few deaths, and these chiefly occurred in localities where *sanitary precautions were wholly neglected*, and in which, owing to the continued dry weather, the supply of water was deficient.

The deaths from small-pox were comparatively few, and nearly all the persons who succumbed to the disease had *not been vaccinated*. In the Superintendent Registrar's district of Gortin (Plumb Bridge district), two persons who had not

Quarterly Reports
Third Quarter.

been vaccinated died from small-pox. The Registrar of Westport states that—“Small-pox made its appearance, but caused only one death, a child who *had not been vaccinated.*” The decrease in the mortality from small-pox may be justly attributed to the Compulsory Vaccination Act. Many of the Registrars refer with satisfaction to the efficient manner in which the provisions of the Act are carried out.

Scarlatina prevailed in some districts, and, as usual, was very fatal wherever the sewerage and other sanitary precautions were defective, for example, in the Union of Banbridge (Dromore district), out of 36 deaths, 10 were referred to scarlatina; the Registrar writes:—“The last-mentioned disease (scarlatina) prevailed in an unusually fatal form during the months of August and September, and was found in almost every case to be associated with the existence of abominable cesspools and collections of filth about the doors, and under the windows of the houses; the houses also being generally damp and ill-ventilated. One instance, in particular, which I was obliged to lay before the Board of Guardians, is worthy of note, as showing, with tolerable certainty, the relation these pestilential vats bear to the propagation of scarlet fever. In the midst of a cluster of houses situated on a badly-drained hillside, about two miles from Dromore, were four or five rare specimens of cesspools or gutters, the stench from which was truly unbearable. Scarlatina entered three of the families almost simultaneously, and when I visited the place, 7 cases were prostrated by the fever, and one child already dead. Compulsory measures were at once instituted for the speedy removal of the filth, and the filling up and covering over the pits, and immediately the progress of the endemic was arrested; those already ill gradually recovered, and no new case ensued subsequent to the removal of the nuisance.”

In the Bray district, Rathdown Superintendent Registrar’s district, 16 of the deaths were referred to scarlatina. The Registrar remarks:—“Supply of water, ventilation of houses and sewerage, *very defective in this district amongst the poor.*” In the Superintendent Registrar’s district of Ennis, (Ennis district No. 1), of 110 deaths registered, 50 were caused by scarlatina. The Registrar states that “*the disease has confined itself almost exclusively to the ill-ventilated and filthy parts of the town.*” Scarlatina also prevailed in the adjoining districts, viz., Ennistimon and Newmarket. The majority of the deaths in the Clarina district (Superintendent Registrar’s district of Limerick) were caused by scarlatina.

Diarrhoea was more than usually prevalent, and some cases of the ordinary autumnal cholera proved fatal; those cases which were attended with cramps, and were reported by the Registrars as closely resembling the Asiatic cholera, generally recovered. Diarrhoea caused 131 deaths in the Dublin Registration District during the quarter; of this number 55 were of infants under one year old, and 27 were of children between one and five years old.

The Registrar of Keady (Armagh) states that whooping-cough attacked many persons in advanced life. “In one case; an old lady, aged 80 years, is labouring under it in a severe form.”

Some very old persons died during the quarter;—for example—in the Fintona district 5 had attained the age of 80 years; a man aged 100 died in the Milltown district (Mullingar Union), the Registrar states that “he could read without glasses up to the day of his death.” Of those who died in the Moyne district (Thurles Union), 2 were upwards of 90, 5 over 80, and 3, 70 years and upwards. In the Clonmoyle district (Macroom Union) a widow had attained the age of 100, and a farmer 102 years. In the Loughrea district 4 of those who died were upwards of 80 years old; and in the Whitechurch district (Dungarvan Union) there died a centenarian.

Some of the Registrars referred with satisfaction to the improved sanitary condition of their districts; *but very many complained loudly of their filthy and utterly neglected state.*

As all matters connected with the maintenance of the health of the country are now so frequently brought under public notice, and as it is now universally admitted

that fever, cholera, and all other epidemics commit the greatest ravages where sanitary measures are neglected, it is justly to be expected that those who have the power, such as Municipal Corporations, &c., will see the necessity of appointing competent officers of health throughout the country.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the quarter was 29.820 inches; (in the corresponding period of 1864 it was 29.804 inches); the highest reading (30.487 inches) was on the 24th September, at 3.30 P.M., wind E.; and the lowest (29.187 inches) was on the 11th August, at 9.30 A.M., wind W.S.W.

The mean temperature of the air during the quarter ended 30th September was 60.8°, which is 3° higher than that of the corresponding part of 1864 (57.8°), and higher than that of the third quarter of any year since 1835, in which year it reached 61.2°. The maximum registered by the thermometer (81.6°) occurred on the 15th September, and the minimum (36.5°) on the 22nd of the same month.

The rain-fall during the quarter measured 6.318 inches: it was only 4.137 inches in the corresponding part of 1864. In the half-year ended 30th September the rain-fall amounted to 12.134 inches; in the corresponding period of 1864 it was only 8.220 inches. The greatest monthly rain-fall during the quarter was in August, when 4.209 inches were registered.

The wind blew on 26 days from S.W., on 27 days from W., and on 15 days from E., at 9.30 A.M. On three days in September the air was calm at that hour.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1865, afforded the highest annual ratio, viz.:—1 in 157 of the estimated population; in the North-Eastern Division the ratio was 1 in 164; in the North Midland Division the ratio was only 1 in 365; and in the Western Division 1 in 463.

The following statement shows the order in which the Eight Divisions stand, with regard to the number of MARRIAGES, in proportion to the estimated population (Quarter ending 30th September, 1865):—

Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 157	5. North-Western,	1 in 314
2. North-Eastern,	, 164	6. South Midland,	, 320
3. South-Eastern,	, 240	7. North Midland,	, 365
4. South-Western,	, 281	8. Western,	, 463

Births.—The North-Eastern Division afforded the highest birth-rate for the quarter, the ratio being 1 in 36; the ratio in this division for the corresponding quarter of 1864 was 1 in 39.

The ratio in the Eastern Division for the third quarter of 1864, was 1 in 38; in the corresponding quarter of 1865 it was 1 in 40. The North-Western Division increased its birth-rate from 1 in 48, for the quarter ending 30th September, 1864, to 1 in 46 for the corresponding quarter of 1865; and the Western Division from 1 in 42 to 1 in 40. The birth-rate in the South-Midland Division was the same for both quarters, viz., 1 in 47.

xxviii Second Annual Report of the Registrar-General of

Quarterly Reports.
—
Third Quarter.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS registered during the THIRD quarter of 1864 and 1865, is shown in the following statement:—

Quarter ending 30th September, 1864.					Quarter ending 30th September, 1865.				
Divisions.					Divisions.				
1. Eastern,	1 in 38				1 in 36
2. North-Eastern,	" 39				" 40
3. South-Western,	" 41				" 40
4. Western,	" 42				" 42
5. South-Eastern,	" 43				" 45
6. North Midland,	" 46				" 45
7. South Midland,	" 47				" 46
8. North-Western,	" 48				" 47

Deaths.—The annual rate of mortality shown by the number of deaths registered in the Eastern Division during the quarter, was 1 in 59, which was the highest ratio afforded by any of the Eight Divisions; the deaths registered in the Western Division represent an annual ratio of only 1 in 95 of the population for the third quarter, and represented only 1 in 98 for the corresponding quarter of 1864. The death-rate in the South Midland Division, was 1 in 72 for the third quarter of 1864, against 1 in 83 for the corresponding quarter of 1865; in the South-Western, 1 in 73 against 1 in 78; in the North-Western, 1 in 81 against 1 in 88; and in the South-Eastern, 1 in 66 against 1 in 71.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY afforded by the number of Deaths registered during the THIRD quarter of 1864 and 1865:—

Quarter ending 30th September, 1864.					Quarter ending 30th September, 1865.				
Divisions.					Divisions.				
1. Eastern,	1 in 63				1 in 59
2. South-Eastern,	" 66				" 67
3. North-Eastern,	" 67				" 71
4. South Midland,	" 72				" 78
5. South-Western,	" 73				" 83
6. North-Western,	" 81				" 88
7. North Midland,	" 91				" 91
8. Western,	" 98				" 95

PROVINCES.

The number of marriages registered in each of the four provinces during the quarter ending 30th September, 1865, and the numbers of births and deaths registered in each province during the quarters ending 30th September, 1865, and 30th September, 1864, together with the annual ratio to the estimated population, are shown in the following table:—

Table showing by Provinces, the number of Marriages registered during the quarter ending 30th September, 1865, and of Births and Deaths REGISTERED during the quarters ending 30th September, 1865, and 1864, and the Ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.		BIRTHS.				DEATHS.			
	Quarter ending 30th September, 1865.		Quarter ending				Quarter ending			
			30th Sept., 1865.	30th Sept., 1864.						
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,765	1 in 197	8,125	1 in 43	8,521	1 in 41	5,467	1 in 64	5,269	1 in 66
MUNSTER,	1,327	280	8,533	44	8,714	43	4,709	79	5,105	73
ULSTER,	2,248	209	11,783	40	11,113	42	6,187	76	6,486	73
CONNAUGHT,	514	430	5,604	39	5,529	40	2,269	97	2,331	95

Marriages.—The number of marriages registered in the Province of Leinster during the third quarter of 1865 amounted to 1,765, a number affording an annual ratio of 1 in 197 of the estimated population ; in Munster the number of marriages was 1,327 or 1 in 280 of the population ; in Ulster 2,248 or 1 in 209 ; and in Connaught 514, or only 1 in 430 of the population.

Births.—The births registered in the province of Leinster during the quarter ending 30th September, amounted to 8,125, a number affording an annual ratio of 1 in 43 of the population ; in the corresponding quarter of 1864 the ratio was 1 in 41 ; the number of births registered in Munster during the quarter was 8,533, equal to an annual ratio of 1 in 44 against a ratio of 1 in 43 in the third quarter of 1864 ; in Ulster the number was 11,783, or 1 in 40 against 1 in 42 ; and in Connaught, 5,604, or 1 in 39 against 1 in 40.

From the foregoing statement it will be observed that the province of Connaught had the highest birth-rate for the third quarter of both 1864 and 1865, and the province of Munster the lowest.

Deaths.—There were registered in the province of Leinster, during the quarter ending 30th September, 5,467 deaths—the annual ratio afforded being 1 in 64 against 1 in 66 for the corresponding quarter of 1864 ; in Munster the deaths registered were 4,709, or 1 in 79 against 1 in 73 for the third quarter of 1864 ; in Ulster they were 6,187, or 1 in 76 against 1 in 73 ; and in Connaught, 2,269, or 1 in 97 against 1 in 95 for the corresponding quarter of 1864.

Thus it will be seen that the number of deaths registered in each of the provinces, with the exception of Leinster, yielded a lower ratio in the third quarter of 1865 than in the corresponding quarter of 1864. In both quarters the death-rate was highest in Leinster, and lowest in Connaught.

*Fourth Quarter.—October, November, December.*Fourth
Quarter.

Marriages.—There were 6,981 marriages registered in Ireland during the fourth quarter of 1865, a number affording an annual ratio of 1 in every 202 or .495 per cent. of the estimated population. Of this number, 4,433 were between Roman Catholics, representing a ratio of only 1 marriage in every 247 of Roman Catholics, and 2,548 were between Protestants, affording a ratio of 1 in every 123 of the Protestant population. The number of marriages registered in the corresponding quarter of the year 1864 was 6,269.

Births.—The number of births registered during the last quarter of the year 1865, amounted to 33,496—17,153 males and 16,343 females—affording an annual ratio of 1 in every 42.1, or 2.37 per cent. of the estimated population ; during the corresponding quarter of 1864, the number registered was 33,643.

Deaths.—The deaths registered during the fourth quarter amounted to 21,013—10,483 males and 10,530 females—affording an annual ratio of 1 death in every 67.1 or 1.49 per cent. of the population. The number registered during the last quarter of the year 1864 was 21,755.

Emigration.—The number of persons who left the ports of Ireland, according to the returns obtained by the Enumerators, amounted, during the quarter ended December 31st, to 20,400, showing an increase of 4,796 (3,917 males and 879 females) when compared with the number who emigrated during the corresponding quarter of 1864. Of the 20,400 persons who left the country during the quarter, 11,655 were males, and 8,745 females.

Quarterly Reports.
Fourth Quarter.

Estimated Decrease of the Population.—The number of births registered during the quarter, as before stated, having been 33,496 ; the deaths, 21,013 ; and the number of emigrants (according to the returns obtained), 20,400 ;—a decrease of 7,917 would, therefore, appear to have taken place in the population during that period.

PRICES OF PROVISIONS AND PAUPERISM.

During the fourth quarter of 1865 the average price of bread in Dublin was 7d. the 4lb. loaf, showing an advance of $1\frac{1}{2}$ d. per 4 lbs. as compared with the corresponding period of 1864. Oatmeal, the price of which averaged in the last quarter of 1864, 10s. 10d. per cwt., rose during the corresponding quarter of 1865 to 15s. 1d. per cwt. The average price of potatoes was also higher when compared with corresponding period of 1864 ; in the quarter ended December 31st, 1865, the average price of potatoes in the Dublin market was from 2s. 9d. to 3s. 8d. per cwt., and during the last quarter of 1864 the average price was 2s. 2d. to 3s. 4d. per cwt. Prime beef averaged lower (63s. 6d. per cwt.) than during the corresponding quarter of 1864, when the average price was 65s. 6d. per cwt. ; on the other hand inferior beef was 1s. per cwt. higher.

The number of persons in Ireland receiving in-door relief weekly, during the quarter ended December 31st, 1865, averaged 49,457, being a decrease of 4,310 when compared with the corresponding period of the year 1864. The average number of persons receiving out-door relief during each week of the last quarter of the year 1865 was 8,859, being 1,292 more than the average number who received out-door relief during the fourth quarter of the year 1864.

HEALTH OF THE PEOPLE.

The quarter ended December 31st, was notably healthy ; this may be ascribed to three causes—1st to the general subsidence of zymotic diseases ; 2ndly, to the mildness of the season ; and 3rdly, to the greater demand for labourers, and the consequent increased rate of wages.

Fever, though prevalent in some districts, was not so fatal as during the first nine months of the year ; and in other localities where it had prevailed to a large extent, it nearly altogether disappeared.

Scarlatina, though very fatal in those parts of the country where sanitary precautions are neglected, was mostly of a mild type. Thus in the Registrar's District of Delgany (Rathdown Union) 44 cases occurred, "but all terminated favourably."

To the very satisfactory results arising from the working of the Compulsory Vaccination Act, many of the Registrars bear willing testimony—nearly all the deaths ascribed to small-pox having occurred in individuals who had *not been previously vaccinated*. There were 18 cases of small-pox in the Ballymoney Dispensary District. "Two deaths occurred ; in each case the form was confluent, and the patient *not vaccinated*." The Registrar of Belfast District, No. 4, states, that out of 253 deaths "I have not had one case of small-pox, and I believe the Compulsory Vaccination Act is working well."

The Registrar of the Whitechurch District (Dungarvan Union) observes that "there were no cases of small-pox, during the quarter, which may be attributed to the Compulsory Vaccination Act, which is working most satisfactorily."

Measles proved less fatal during this than the preceding quarter, and fewer deaths were attributed to whooping-cough.

Very many of the Registrars again complained of their districts being utterly neglected in a sanitary point of view. They alluded to the high death-rate in those parts where sewerage and other hygienic measures were not resorted to.

On the other hand, the medical officers of those districts where sanitary improvements had taken place, with satisfaction recorded the beneficial results.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the quarter was 29.674 inches (in the corresponding period of 1864 it was 29.686 inches; the highest reading (30.644 inches) was on the 15th December, at 9.30 p.m., wind S.W.; and the lowest (28.394 inches) was on the 22nd November, at 9.30 a.m., wind N.W.).

The mean temperature of the air during the last quarter of 1865 was 46.5° (during the corresponding period of 1864 it was 44.4°); the maximum registered by the thermometer (71.8°) occurred on the 3rd October, and the minimum (27.3°) on the 21st of the same month.

The rain-fall during the quarter measured 10.112 inches; in the last quarter of 1864 it was 12.040 inches. The greatest monthly rain-fall during the quarter was in November, when 3.533 inches were registered. The rain-fall in October only measured 3.291 inches, against 6.167 inches in the corresponding month of 1864.

The wind blew on 21 days from W.; 18 days from S.W.; 9 days from S.; 9 days from S.E.; and 13 days from E., at 9.30 a.m. The air was calm on 7 days at that hour.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the highest marriage rate during the fourth quarter of 1865, the number registered affording an annual ratio of 1 in every 126 of the *estimated* population. In the Eastern Division the annual ratio represented by the number of marriages registered was 1 in every 152, while in the South-Western Division the ratio was only 1 in 278, and in the Western but 1 in every 363 of the estimated population.

The following statement shows the order of the Eight Divisions with regard to the number of MARRIAGES in proportion to the estimated population (Quarter ending 31st December, 1865):—

Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 126	5. North Midland,	1 in 254
2. Eastern,	„ 152	6. South Midland,	„ 256
3. North-Western,	„ 224	7. South-Western,	„ 278
4. South-Eastern,	„ 238	8. Western,	„ 363

Births.—The Births registered during the last quarter of 1865 in the North-Eastern Division amounted to 7,349, affording an annual ratio of 1 in 37 of the *estimated* population; in the corresponding quarter of 1864 the ratio was 1 in 38; in the South Midland Division the ratio afforded was only 1 in 52 against 1 in 50 for the corresponding period of 1864.

The order of the Eight Divisions as regards the Annual Rate represented by the number of BIRTHS registered during the FOURTH quarter of 1864 and 1865, is shown in the following statement:—

Quarter ending 31st December, 1864.		Quarter ending 31st December, 1865.

7. North Midland,	„ 47	South-Eastern,	„ 46
8. South Midland,	„ 50	South Midland,	„ 52

*Quarterly Reports.**Fourth Quarter.*

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter, the annual ratio afforded being 1 in 51 of the estimated population; in the corresponding quarter of 1864 the death-rate in this division was 1 in 54. In the North Midland Division the deaths registered during the fourth quarter of 1865 represent an annual ratio of but 1 in 83, against 1 in 80 for the fourth quarter of 1864; in the North-Western Division the ratio was only 1 in 84, against 1 in 78; and in the Western it was only 1 in 90, against 1 in 86 for the corresponding quarter of 1864.

The following statement shows the Eight Divisions arranged according to the annual RATE OF MORTALITY afforded by the number of Deaths registered during the FOURTH Quarter of 1864 and 1865.

Quarter ending 31st December, 1864.		Quarter ending 31st December, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.

Marriages.—The number of marriages registered in the province of Leinster during the fourth quarter of 1865 amounted to 1,960, a number representing an annual ratio of 1 in every 177 of the estimated population; in Munster the number was 1,281 or 1 in 290; in Ulster 3,076 or 1 in 153; and in Connaught 664 or only 1 in 333.

Births.—The births (7,437) registered in Leinster during the fourth quarter of 1865 afford an annual ratio of only 1 in 47 of the estimated population—in the

corresponding quarter of 1864 the ratio was 1 in 45. In Munster there were registered 8,710 births—a number equal to an annual ratio of 1 in 43 (a similar ratio to that afforded by the number registered in the fourth quarter of 1864); in Ulster the number was 11,729 or 1 in 40 against 1 in 40 for the corresponding quarter of 1864; and in Connaught 5,620 or 1 in 39, against 1 in 41.

Deaths.—There were 6,062 deaths registered in the province of Leinster during the fourth quarter of 1865, the annual ratio afforded being 1 in 57—in the fourth quarter of 1864 the ratio was 1 in 58. In Munster there were registered 5,491 deaths or 1 in 68 of the estimated population, against 1 in 65 for the corresponding quarter of 1864; in Ulster, 6,959 or 1 in 67, against 1 in 65; and in Connaught, 2,501, or only 1 in 88, against 1 in 83 for the fourth quarter of 1864.

TOPOGRAPHICAL DESCRIPTION of the EIGHT DIVISIONS into which IRELAND has been divided in the foregoing TABLES.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone; and may be described by a line drawn thence S. W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

*Quarterly
Reports.*
—
Fourth
Quarter.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the County of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the County of Waterford; nearly the whole of the County of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the County of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the County of Kerry, nearly the whole of the Counties of Cork and Limerick, and a small portion of the County of Clare, comprised in the Limerick Union.

Marriages, Births, and Deaths in Ireland—1865.

1822	6,892,708	3,384,674	3,508,084	1844	8,276,627	4,074,467	4,202,160				

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1865—The English birth and death rates, as above, were employed in the calculations for each year, deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Counties Proper.

† See note (†) page 2.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

* Including six Registration Districts.

† Including three Registration Districts.

Abstract of Births and Deaths, 1865.

Causes of Death in Ireland, 1865.

IRELAND.—SUPPLEMENTARY TABLE of the

In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases, such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

Causes of Death in Ireland, 1865.

CAUSES OF DEATH at different Periods of Life, in the Year 1865.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 68 to 75.]

No. in the Table of Diseases under which the Cases are entered.	CAUSES OF DEATH.	ALL AGES.	AGES OF FEMALES.																		
			Under 1 year.	1	2	3	4	Total under 5 years.	5-	10-	15-	20-	25-	35-	45-	55-	65-	75-	85-	95 & upwards	Unspecified.

* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Counties Proper.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND,
from WILLIAM M. BURKE, F.C.P.I.

YEAR 1865.

SIR,

I have the honour of bringing under your notice an analysis of the causes assigned for the deaths registered in Ireland during the year 1865.

I. ZYMOtic DISEASES.

Of the deaths registered, 19,802 were referred to zymotic diseases, being 1 in every 4·7 of the total deaths, and showing that, in every 1,000 of the estimated population, 3·5 died from zymotic diseases.

The deaths from fever amounted to 5,283, or 1 in every 17·6 of the total deaths. Under the head of fever, the deaths from typhus, typhoid, or enteric, relapsing fever or typhinia; and infantile remittent fever are included. Of the persons whose deaths were caused by fever, 2,748 were males, and 2,535 were females.

Scarlet fever proved more fatal by 1,078 deaths than in the year preceding. The number of deaths registered from this disease amounted to 3,683, or 1 in every 25·3 of the total deaths registered. The divisions which suffered most from this scourge were the western and the south-western.

Diarrhoea proved fatal in 2,139 instances, against 1,962 in the year 1864, and showing a proportion of 1 to every 43·6 of the total deaths.

1,861 deaths, or 1 in every 50·1 of all the deaths, resulted from croup.

To whooping cough, 1,506 deaths—657 males and 849 females—were ascribed.

Measles caused 1,036 deaths, being 406 more than were registered in the year preceding.

Diphtheria caused 480 deaths. This disease proved most fatal in the north-eastern division.

The deaths from small-pox exhibit a remarkable decrease. In the year 1864 the deaths registered from small-pox amounted to 854, whereas during the year 1865 the deaths from this disease only reached 461, or 46 per cent. less than in the preceding year, when the Compulsory Vaccination Act came into operation.

Four males and 1 female died from hydrophobia.

Nine deaths resulted from glanders—all the victims were males.

II. CONSTITUTIONAL DISEASES.

The deaths tabulated under the head of constitutional diseases amounted to 18,046, being in the proportion of 1 in every 5·2 of all the deaths, and 3·2 in every 1,000 of the estimated population.

Phtisis, or pulmonary consumption, caused 10,176 deaths—4,928 males, and 5,248 females. The decennial period, in which the greatest number fell victims to phtisis, was from the 15th to the 25th year.

To dropsy, which is so frequently but a fragment or symptom of some organic disease, 2,004 deaths (883 males, 1,121 females) were referred.

1,601 deaths resulted from cancer: of these 692 were males, and 909 females.

Tabes mesenterica was the assigned cause of death in 1,592 instances.

Hydrocephalus caused 1,108 deaths.

Under the head of scrofula 1,252 deaths were tabulated.

III. LOCAL DISEASES.

The number of deaths attributed to local diseases amounted to 32,554, or 1 in every 2·9 of all the deaths, and showing a ratio of 5·8 deaths to 1,000 of the estimated population.

Diseases of the nervous system contributed 8,846 deaths—4,804 males, and 4,042 females; about one-half of these were ascribed to convulsions. The deaths from apoplexy numbered 1,018—595 males, and 423 females. 1,840 deaths were referred to paralysis; of these 897 were males, and 943 females. Cephalitis, or inflammation of the brain, &c., caused 567 deaths; of these 223 occurred in the north-eastern division. Under the head of brain disease unspecified 799 deaths were returned, against 1,182 in the year 1864.

Diseases of the circulatory organs caused 2,922 deaths; of these, 89 deaths (54 males, and 35 females) resulted from pericarditis or inflammation of the membrane investing the heart; 103 deaths were caused by aneurism—79 males, and 24 females. 2,730 deaths (1,423 males, and 1,307 females) were returned under the head of heart disease unspecified.

Diseases of the organs of respiration, exclusive of pulmonary consumption, caused 14,429 deaths—7,112 males, 7,317 females. Bronchitis proved fatal in 10,389 instances—4,879 males, 5,510 females. Inflammation of the lungs was the cause of 1,817 deaths—1,118 males, and 699 females. To asthma 890 deaths were attributed; 450 to pleurisy; and 171 to laryngitis. Under the head of lung disease unspecified 712 deaths were returned, against 904 so returned in the year 1864.

4,736 deaths (2,608 males, and 2,128 females) were attributed to diseases of the digestive organs. Inflammation of the bowels caused 598 deaths—360 males, and 238 females. Peritonitis was fatal in 270 instances—136 males, and 134 females; 239 deaths were ascribed to gastritis or inflammation of the stomach. From ileus, which includes deaths from obstruction of the bowels, constipation, &c., there died 432—288 males, and 144 females. To diseases of the stomach unspecified 1,104 deaths were attributed. Inflammation of the liver is the cause assigned for 258 deaths; jaundice for 239; and liver disease unspecified 863.

The deaths from diseases of the urinary organs amounted to 1,002—746 males, and 256 females. Of the deaths from diseases of the urinary organs, 38 were referred to inflammation of the kidneys; 201 to nephria or Bright's disease; 49 to stone in the bladder; 59 to inflammation of the bladder; 106 to diabetes; and 427 to kidney disease unspecified.

Diseases of the organs of generation resulted in 174 deaths—4 males, and 170 females.

To diseases of the organs of locomotion 203 deaths were attributed—118 males and 85 females.

Under the head of diseases of the integumentary system 242 deaths were returned, viz., 12 from phlegmon; 100 from ulcer; and 130 from skin disease unspecified.

IV. DEVELOPMENTAL DISEASES.

The number of deaths referred to diseases incidental to the development of the body amounted to 15,264, or 1 in every 6·1 of the total deaths, or 2·7 deaths in every 1,000 of the estimated population.

To premature birth 241 deaths were referred; 18 to cyanosis; of these latter 13 died under 1 year old, 2 between 1 and 2 years, 1 between 2 and 3 years, 1 between 3 and 4 years, and 1, a male, who died in the Roscrea Workhouse, had attained the unusual age of 27 years. Spina bifida caused 22 deaths; 22 were returned under the head of "other malformations;" and 349 deaths were ascribed to teething.

Twenty-three deaths were returned as caused by paramenia or disordered menstruation.

The number of women who died in childbirth amounted to 644; by adding the deaths from metria or puerperal fever, it will be found that the total deaths registered from child-bearing amounted to 928, so that, according to the number of births registered during the year, the death of 1 mother occurred to every 156 children born.

Old age is the cause assigned for the deaths of 9,702 persons—4,045 males, and 5,657 females.

To atrophy and debility 4,243 deaths—2,025 males, and 2,218 females—were attributed.

V. VIOLENT DEATHS.

The deaths from violence recorded during the year amounted to 2,183, or 4 deaths in every 10,000 of the estimated population, and 1 in every 42·7 of the total deaths.

Of the above deaths, 1,987 were the result of accident, viz., 682 from fractures and contusions; 38 from gunshot wounds; 48 from cuts or stabs; 509 from burns or scalds—248 males, and 261 females. Of the total deaths registered, 1 in every 183 was from the effects of fire; of the 248 males who perished from fire and its effects 180 were under five years old; and of the 261 females 158 were under 5 years old. Accidental poisoning caused 17 deaths. 482 persons—383 males, and 99 females were accidentally drowned. To suffocation 71 deaths were referred. A like number of deaths from suffocation occurred in the previous year. Of the 71 persons whose deaths were caused by suffocation, 37 were infants under 1 year old. In 140 instances the nature of the accident which caused death was not specified.

69 deaths—47 males, and 22 females—were tabulated under the head of homicide; of these 25 were infants.

The deaths from suicide amounted to 77—58 males, and 19 females, or 14 persons out of 1,000,000 of the estimated population, perished by their own hands.

The means adopted for self-destruction were—gunshot wounds, 5 men; cuts and stabs, 17 men and 4 women; drowning, 7 men and 4 women; hanging, 19 men and 11 women; and in the cases of 10 men the mode of self-destruction was not stated in the returns.

Two men were executed during the year.

Of the violent deaths 48 were not classed. The number of violent deaths unclassed in the year 1864 amounted to 134.

Of 452 sudden deaths returned, the cause was unascertained.

In 4,853 instances, or 1 in 19·2 of the total deaths, the cause of death was unspecified, or so ill-defined as not to admit of classification in the tables. This exhibits an improvement on the previous year, when 6,504, or 1 in 14·3 of the deaths were so returned.

I have the honour to be,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the Number of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, the numbers running consecutively from 1 to 163.*]

Dromore West,	103				

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 75 (see page 4), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120: 4) is the 4th Registrar's District of the Tuam Superintendent Registrar's District, No. 120.]
