ABSTRACTS :—

Marriages registered in Ireland in each of the Registration Provinces, Registration Counties, and Superintendent Registrars' Districts, in 1882, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks,	26-37
Ages of 11,286 Persons married in 1882, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	38-39

	Page
Marriages, Births, and Deaths registered in each of the Registration Provinces, Registration Counties, and Superintendent Registrars' Districts, in 1882; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births,	40-66
Births registered in the Provinces, Counties, and Superintendent Registrars' Districts, (distinguishing Males and Females) in each of the Four Quarters of 1882,	68-77
Deaths registered in each of the Four Quarters of 1882 (distinguishing Males and Females), in Provinces, Counties, and Superintendent Registrars' Districts,	78-87
Deaths of Males and Females at different Ages registered in 1882, in Provinces, Counties, and Superintendent Registrars' Districts,	88-97
Causes of Death of Males and Females in Ireland, at different periods of life in 1882,	98-112
Causes of Death of Males and Females in Ireland, and in each of the Registration Provinces, in 1882,	113-117
Deaths from several Zymotic and other Causes in 1882, in the Provinces, Counties, and Superintendent Registrars' Districts, showing the circumstances as to residence at time of death,	118-129
Index to Superintendent Registrars' Districts, and Registrars' Districts,	130-133

REPORT

TO

HIS EXCELLENCY, JOHN POYNTZ, EARL SPENCER, K.G.

&c., &c., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit my report on Marriages, Births, and Deaths for the year 1882. This report is in continuation of those annually presented by this department since the year 1864. The new features introduced into the report for the year 1881 are continued in this. A full description of the modifications of the registration laws during late years, and of the alterations recently introduced into the classification of deaths from fatal diseases will be found in the report for 1881, and these modifications and alterations need not be again particularly referred to.

In the Table (on pages 118–129) of the total mortality from all causes and deaths from several causes by Provinces, Counties, and Superintendent Registrars' Districts, important additions have been made to the number of causes of deaths for which statistics are given, and columns have been introduced, showing the number of deaths in the several classes of Public Institutions.

The alteration in the size of the Report from octavo, as in previous years, to folio, has been made in accordance with instructions from the Lords Commissioners of Her Majesty's Treasury, acting on the advice of the Official Statistical Commission now sitting. The increased size of the page resulting from this alteration adds much to the clearness of the tables, and gives increased facilities for conveniently placing the headings of the columns, &c.

The usual Quarterly Returns, prepared from data periodically furnished by the Registrars, were published during the year, and afford information upon some of the more important points dealt with in this report. These returns, although they give details only with regard to some special points and are not absolutely accurate, nevertheless, include particulars of the most important items for the Urban Sanitary Districts in Ireland containing a total population of upwards of one million, and are of great value, as they provide correct data by which both urban and rural sanitary authorities can estimate the state of the public health in their districts.

In addition to these, the returns for the sixteen principal town districts in Ireland, containing a population of about 850,000, commenced in 1880, have been regularly issued from week to week, and quarterly and annual summaries of these weekly reports have also been published. Thus the reports upon the vital statistics of Ireland are now as complete and frequent as those issued in any country in the world. The Weekly Returns are of especial value to the urban sanitary authorities of the larger town districts, to whom they form an index of the health of the areas under their charge.

GENERAL SUMMARY.

The Marriages registered in Ireland during the year 1882 number 22,029; the Births 122,648; and the Deaths 88,500. Both absolutely and in proportion to the estimated population, the marriages, births, and deaths are under the annual average for the preceding ten years.

[TABLE.]

TABLE I.—Showing for each of the years 1872–82, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1872–81.

YEARS.	* Estimated Population in the middle of each year.	Numbers Registered.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.			
		Marriages.	Births.	Deaths.		Marriages.	Births.	Deaths.	Emigrants
1872,	5,372,890	26,943	149,278	97,294	78,102	5.02	27.8	18.1	14.5
1873,	5,327,938	25,730	144,377	97,537	90,149	4.82	27.1	18.3	16.9
1874,	5,298,979	24,481	141,288	91,961	73,184	4.61	26.6	17.3	13.8
1875,	5,273,629	24,037	138,320	98,114	51,462	4.53	26.1	18.5	9.7
1876,	5,277,544	26,388	140,469	92,324	37,587	4.96	26.4	17.3	7.1
1877,	5,286,380	24,722	139,659	93,543	38,503	4.63	26.2	17.5	7.2
1878,	5,282,246	25,284	134,117	99,629	41,124	4.73	25.1	18.6	7.7
1879,	5,265,625	23,254	135,328	105,089	47,065	4.34	25.2	19.6	8.8
1880,	5,202,648	20,363	128,086	102,906	95,517	3.92	24.7	19.8	17.6
1881,	5,144,983	21,826	125,847	90,035	78,417	4.24	24.5	17.5	15.2
Yearly Average, 1872–81,	5,273,786	24,303	137,677	96,843	63,111	4.58	26.0	18.3	11.9
1882,	5,097,853	22,029	122,648	88,500	89,136	4.32	24.1	17.4	17.5

The recorded natural increase of population, or excess of births over deaths was 34,148, the loss by emigration amounting to 89,136; there would thus appear to have been a decrease of 54,988 in the population during the year, but against a portion of this decrease there is a set-off in immigration of which no official record has been obtained. The estimated population in the middle of the year was 5,097,853.

MARRIAGES.

The number of Marriages registered during the year was 22,029, being 1 in every 231, or 4.32 per 1,000, of the estimated population.

This rate, although slightly in excess of that for the preceding year, is below the low rate yielded by the average annual number of marriages registered during the ten years 1872–81, which was much under the marriage-rates in other countries, the statistics of which are available. The low marriage-rate in Ireland, as compared with other countries, must be largely attributed to the extensive emigration which takes place among persons of marriageable ages. No doubt there is some defect in the registration of Roman Catholic marriages, owing to causes referred to in the following paragraph, but a comparison of the birth-rate from year to year confirms the opinion that the marriage-rate is low. This subject has been more fully dealt with in the Reports for the year 1879 and previous years.

In dealing with the question of Marriages, I regret to state that the arrangements for the recording of marriages among the Roman Catholic portion of the community are still of a cumbrous and unsatisfactory character. While the Roman Catholic clergy give valuable aid in carrying out, and the Registrars do their best to administer, the Act in their localities, yet so much depends upon the manner in which the "husband" discharges his duty as conveyer of the certificate of marriage to the Registrar, and, in fact, his action as informant of his own marriage, that in spite of the desire of the clergy and the care of the Registrar, many marriages are imperfectly registered, and, I fear, a considerable number even escape registration altogether through the ignorance or carelessness of the parties married. It is much to be regretted that public records of Roman Catholic marriages in Ireland are liable to these defects, while the marriages of the members of all other denominations are carefully and accurately recorded. In order to remedy these defects a considerable revision of the existing statute (26 & 27 Vic., cap. 90) would be necessary.

Of the 22,029 Marriages registered during the year 1882, 15,181 were between Roman Catholics, 3,688 were celebrated according to the rites and ceremonies of the late Established Church; 2,312 were in Presbyterian Meeting-houses; 349 in "Registered Buildings" belonging to various religious denominations; only 493 by civil contract in the Registrars' offices; 3 were according to the usages of the Society of Friends; and 3 according to the Jewish rite.

* See page 23.

TABLE II.—Marriages registered in Ireland in 1882 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:—

Average 1872-81, . . .	3,943	2,452	331	530	11	2	7,274	17,029	24,303	5.87	4.20	4.58
1882, . . .	3,688	2,312	349	493	3	3	6,848	15,181	22,029	5.73	3.89	4.32

Of the 3,688 Marriages according to the rites of the late Established Church, 55 were by special licence, 3,095 by licence, 407 after the publication of banns, 14 on Registrar's certificate, and in 117 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1882 there were issued by the Registrars 669 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1882.	Number of Registered Meeting-houses on 31st December, 1882.	Number of Licences issued
1. General Assembly of the Presbyterian Church in Ireland,	129	558	2,250
2. Remonstrant Synod of Ulster,	8	19	45
3. Presbytery of Antrim,	4	8	15
4. United Presbytery or Synod of Munster,	3	2	—
5. Northern Presbytery of Antrim,	2	5	11
Total,	146	592	2,321

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1882, there were 1,506 churches and chapels of the late Established Church, 592 registered Presbyterian Meeting-houses, and 314 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show an increase of 1 as regards the late Established Church, a decrease of 1 Presbyterian Meeting-house, and an increase of 1 "Registered Building."

The following statement shows the several religious bodies having "Registered Buildings" in 1882:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Methodists,	187	Covenanters,	1
Reformed Presbyterians,	37	United Original Seceders,	1
Independents,	24	"Protestant Dissenters,"	1
Baptists,	18	"Christians,"	1
Seceders,	11	Non-Subscribing Christians,	1
United Presbyterians,	11	"The Catholic Apostolic Church,"	1
Methodists, New Connexion,	6	Christian Brethren,	1
Moravians, or United Brethren,	6	Independent Protestants,	1
Evangelical Union,	2	Jews,	1
Non-Subscribing Unitarians,	2		
Unitarians,	1	Total,	314

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. In 1882 the numbers recorded were—in the first quarter 7,714; in the second, 4,908; in the third, 4,708; and in the last 4,699.

The marriages of bachelors and spinsters constitute 85·5 per cent. of the total; those of widowers and spinsters 8·8 per cent.; of bachelors and widows 3·3 per cent.; and of widowers and widows 2·4 per cent. Thus, 11 in every 100 of the men married were widowers, and 5·7 per cent. of the women were widows; and in 14 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

TABLE III.—The Number of Roman Catholic and of Other Marriages registered in each Quarter during the four years, 1879–82:—

QUARTER ENDING THE LAST DAY OF	Years and Number of Marriages Registered.							
	1879.		1880.		1881.		1882.	
	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.
March,	7,072	1,538	4,515	1,717	6,123	1,520	6,138	1,576
June,	3,135	1,628	3,239	1,480	3,021	1,569	3,184	1,724
September,	3,163	1,677	2,876	1,717	2,936	1,798	2,926	1,782
December,	3,158	1,883	2,864	1,955	2,901	1,958	2,933	1,766
Total,	16,528	6,726	13,494	6,869	14,981	6,845	15,181	6,848
General Total,	23,254		20,363		21,826		22,029	

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or of "full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1882 the ages of both parties were specified in only 5,643 instances, being little more than one-fourth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 22,029 men married during the year, 535, or 2·43 per cent., were minors; and of the women married, 2,460, or 11·17 per cent., were under age. These proportions differ but slightly from the averages for the preceding ten years.

The highest proportion of husbands (2·74 per cent.) and the highest per cent. of wives (12·27), married under age in 1882, was in the province of Ulster.

It may be added that the per cent. of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1882, 16,388, or 74·4 per cent., of the husbands, and 15,497, or 70·3 per cent., of the wives wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results eleven years since, the per-centage of persons married in 1872 who wrote their names being—men 65·4, and women 58·2.

As usual, the most favourable results appear in Leinster, and the least satisfactory in Connaught, the number of those married who wrote their names varying from 78 in every 100 men and 77 in every 100 women, in the former province, to 65 per cent. of the men and 64 per cent. of the women in the latter.

The number of marriages registered in each of the eleven years 1872-82; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows are given in the following Table for Ireland, and for each of the four registration provinces.

TABLE IV.—The Number of Marriages in Ireland and in each of the Four Registration Provinces during the years 1872-82, with the proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Provinces.	Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.		
		Of 100 Men Married.	Of 100 Women Married.	Of 100 Men Married.	Of 100 Women Married.	Widowers.	Widows.	
						Of 100 Men Married.	Of 100 Women Married.

In 3,718 instances, both of the parties married signed the register by "mark," and in 4,737 cases the register was thus signed by either the husband or the wife, so that in 8,455 instances, or 38·4 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 13,574 instances, or 61·6 per cent., both parties wrote their names.

In proportion to the estimated population at all ages, the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 5·1 per 1,000 persons; Ulster comes next, with 4·5 per 1,000; Munster third, with 3·8 per 1,000; and Connaught last, the rate being 3·1 per 1,000.

The highest rate in any county was 7·2 per 1,000, which was the marriage rate for Dublin; and the lowest 2·5 per 1,000, for Galway. Between these, the most favourable were 6·3 for Antrim, 5·0 in Carlow, 4·9 in Armagh, and 4·8 in Down; and the least so 3·1 in Clare, 3·1 in Leitrim, and 3·1 in Cavan.

BIRTHS.

The number of births registered during the year 1882 was 122,648—63,039 boys, and 59,609 girls, or 105·8 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 41·6, or 24·1 per thousand, which is considerably under the low average rate (26·0 per 1,000) for the ten years, 1872–81, and less than the rate in any of those years.

In the report for the year 1875, the causes of the comparatively low birth-rate in Ireland were considered, and the observations then made are almost equally applicable to the year now under review:—

"It has been seen that the marriages registered in Ireland, when compared with the total population fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination, this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the child-bearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcilable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 122,648 children whose births were registered in Ireland during the year 1882, 119,380, or 97·3 per cent. were legitimate, and 3,268, or 2·7 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·4

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 61,384 were males, and 57,996 females, being 105·8 of the former to every 100 of the latter, and of the illegitimate children 1,655 were males, and 1,613 females, or 102·6 boys to 100 girls.

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 4·3 ; in Leinster, 2·2 ; in Munster, 2·0 ; and in Connaught, 0·9.

TABLE V.—The Per-centage of Legitimate and of Illegitimate Births registered in Ireland during the years 1878–82, by Registration Provinces.

Registration Provinces.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1878.	1879.	1880.	1881.	1882.	1878.	1879.	1880.	1881.	1882.
IRELAND,	97·7	97·5	97·5	97·5	97·3	2·3	2·5	2·5	2·5	2·7
LEINSTER,	98·1	97·9	97·8	97·8	97·8	1·9	2·1	2·2	2·2	2·2
MUNSTER,	98·4	98·1	98·2	98·2	98·0	1·6	1·9	1·8	1·8	2·0
ULSTER,	96·1	96·0	96·0	95·9	95·7	3·9	4·0	4·0	4·1	4·3
CONNAUGHT,	99·3	99·3	99·0	99·2	99·1	0·7	0·7	1·0	0·8	0·9

The respective total birth-rates for the provinces in 1882 were—Leinster, 24·2 per 1,000 of the population ; Munster, 23·8 ; Ulster, 23·8, and Connaught, 22·8.

The four counties having the highest rates were Antrim, 28·9 per 1,000 inhabitants ; Dublin, 28·3 ; Kerry, 25·1 ; and Limerick, 24·1. Those with the lowest rates were—Monaghan, 20·0 ; Longford, 20·1 ; Queen's, 20·3 ; and Tyrone, 20·4 per 1,000 persons.

Of the total births, 53·3 per cent. were registered in the first six months of the year (181 days), and 46·7 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 32,684 ; in the second, 32,655 ; in the third, 29,362 ; and in the fourth, 27,947.

TABLE VI.—Showing, by Quarterly Periods, the number of Births registered in Ireland in each of the five years 1877–81, and the average number for that period ; also the number registered during each quarter of the year 1882 :—

DEATHS.

The deaths registered during the year amount to 88,500, being equal to 1 in 57·6 or 17·4 per 1,000 of the estimated population. The deaths of males number 43,633, and those of females 44,867, the former being equal to 17·5 in every 1,000 males living, and the latter representing 17·2 per 1,000 females.

The death-rate (17·4) is somewhat under the average rate (18·3) for the preceding ten years, and is below the rates for 1880 and 1881—that for 1880 being 19·8 per 1,000, and that for 1881, 17·5.

The recorded mortality from zymotic diseases is over that for the year 1881, but under the average for the ten years 1872–81.

The deaths from the eight principal zymotic diseases* registered during 1882 form 9·0 per cent. of the deaths from all causes, and are equal to 156 in every 100,000 persons living ; the average annual mortality from the same diseases in the preceding 10 years represents 11·6 per cent. of the average number of deaths from all causes, and is equal to 213 deaths in every 100,000 of the estimated mean population.

* Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Fever, Diarrhoea (and Dysentery), and Cholera.

As heretofore, very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this department, and emanating as they did, from gentlemen qualified to speak decisively on the subject, it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts. In this place it will be sufficient to say that the Registrars' observations, while disclosing many lamentable defects in sanitation, point to a gradually extending interest in sanitary questions which must ere long, be productive of lasting good.

With respect to the death-rates for the four provinces, the rate for Connaught is only 12·6; that for Munster is 16·5; for Ulster, 17·3, and for Leinster, 20·4.

Of the thirty-two counties, the four having the lowest registered mortality are—Roscommon, 12·3; Mayo, 12·3; Sligo, 12·6; and Leitrim, 12·9.

Those in which the rate was highest are—Dublin, 26·2; Antrim, 20·9; Westmeath, 20·9; and Carlow, 19·3.

The deaths registered in the first half of the year always outnumber those in the second. In 1882, 53·8 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 46·2 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 19·4 per 1,000 of the population; second, 17·9; third, 14·4; and fourth, 17·7.

TABLE VII.—Showing, by Quarterly Periods, the number of Deaths registered in Ireland in each of the five years, 1877–81, and the average number for that period; also the number registered during each quarter of the year 1882:—

CAUSES OF DEATH.*

In the Table on pp. 118–129 (before alluded to), the causes of death given are more numerous than heretofore, and columns have been introduced showing the circumstances as to residence at time of death, from which it will be seen that, of the 88,500 deaths registered during the year, 1,872 took place in Infirmaries and General Hospitals; 779 in Public Lunatic Asylums; 11,050 in Workhouses and Workhouse Hospitals; and 74,799 were of persons who died "At their Own Homes, &c."

I.—FEBRILE OR ZYMOTIC DISEASES.

The deaths from Febrile or Zymotic diseases registered during the year 1882, amounted to 9,015, or 176·8 in every 100,000 of the estimated population.

Of the 9,015 deaths from zymotic diseases 4,976, or 55·2 per cent., were amongst children under 10 years of age.

* In the year 1881, some modifications were introduced into the classification of the causes of death, so as to bring it into accord with alterations in Nosology necessitated by the advance of Medical Science. These modifications are given in detail in the Eighteenth Report of the Registrar-General for Ireland, Page 6, et seq., 1881.

TABLE VIII.—Showing, by PROVINCES, the Number of Deaths from the principal Febrile or Zymotic Diseases registered in Ireland during the Ten Years 1872–81; the Average Annual Number for that period; with the Number registered in 1882, and the Rate represented thereby.

Small-pox.—There were 129 deaths from small-pox registered, being 57 over the number in 1881, but 260 less than in 1880. Of the deaths from this disease in 1882, 1 was in the province of Leinster, 19 were in Munster (16 of which were in Waterford union), 107 in Ulster (including 82 in the union of Belfast), and 2 in Connaught (Ballina union). The average annual number for the ten years 1872–81 was 696.

Measles.—Deaths from measles, which fell from 2,212 in 1878 to 860 in the following year, rose to 1,025 in 1880, then fell to 402 in 1881, and again rose to 1,518 in 1882, this number being equal to an annual mortality of 29·8 per 100,000 persons. The disease was most fatal in Leinster, where 1,046 of the 1,518 deaths occurred (including 653 in the city and county of Dublin); in Munster there were 101 deaths (65 of which were in the county and city of Cork); in Ulster, 301 (125 of which occurred in Belfast union); and in Connaught, 70, 25 of which occurred in Athlone union.

Scarlet Fever.—The deaths from this disease, which fell from 2,443 in 1880 to 1,344 in 1881, further declined to 1,230 in 1882; the average for the ten years 1872–81 was 2,221.

The deaths from scarlet fever in 1882 were distributed through the four provinces as follows:—Leinster, 348 (55 of which were in New Ross union and 45 in Athy union); Munster, 264 (93 of which occurred in Kerry County, including 37 in Cahersiveen union, 20 in Dingle union, 20 in Listowel union, &c.; and 53 in Limerick union); Ulster, 584 (241 of which occurred in Belfast union, 94 in Newry union, 58 in Ballymena union, and 42 in Strabane union); and Connaught, 34 (11 of which occurred in Athlone union).

Diphtheria.—This disease proved fatal in 385 instances, being 62 over the number of deaths in the previous year, and 35 over the average annual number for the ten years 1872–81. In proportion to population the highest mortality (9·7 per 100,000 persons), was in the province of Leinster.

Whooping-cough.—The deaths (832) from whooping-cough are 1,008 under the average for the ten years 1872–81, and 526 under the number registered in the year 1881; they afford an annual rate of 16·3 per 100,000 of the estimated population. In proportion to population the mortality was highest in Connaught and lowest in Leinster, the rates for these provinces being 25·7 and 12·3 per 100,000 persons respectively.

Fever.—The number of deaths from the several forms of continued fever amounted to 2,245 (1,126 males and 1,119 females), equal to a mortality of 44·0 per 100,000 of the population; the average annual number for the previous ten years was 2,936; the number in 1881 was 2,446. The respective rates for the provinces, in 1882, were Leinster, 42·3 per 100,000 inhabitants; Munster, 51·9; Ulster, 41·8; and Connaught, 34·4.

Of the registered deaths from fever, 744 were ascribed to typhus, 844 to typhoid or enteric, and 657 to simple continued fever, or vaguely as to “fever.” The age periods, 45 and under 55 years, and 65 to 75, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 56·59 per 100,000, and the latter 56·56. The lowest rate was 29·43 for the period “Under 5 years old.”

TABLE IX.—Showing for the year 1882 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the number of the living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 310, being 22 over the annual average for the preceding decade, and 54 over the number in the year 1881. The highest mortality in 1882, in proportion to the population, was in Leinster, and the lowest in Connaught.

Puerperal Fever.—The number of deaths from this disease registered in 1882 was 407, being equal to the average annual number for the ten years, 1872–81, and 53 more than in the year 1881.

Influenza.—Thirty-nine deaths were ascribed to this disease; the number in 1881 was 54, and the annual average for the ten years, 1872–81, was 92.

Diarrhœa and Dysentery.—In 1881 the deaths from diarrhœa and dysentery were much below the average, these diseases proving fatal in 1,526 instances, equal to a mortality of 29·5 per 100,000 of the estimated population; in 1882 the deaths numbered 1,564 (equal to 30·7 per 100,000 of the population), being 451 under the average annual number for the ten years, 1872–81.

The rates for the provinces in 1882 were as follow:—Leinster, 35·9 per 100,000 persons; Munster, 33·4; Ulster, 31·2; and Connaught only 14·2.

Simple Cholera.—Forty-one deaths were ascribed to this disease.

Five males and 6 females died from *Hydrophobia*.

II.—PARASITIC DISEASES.

There were 96 deaths caused by diseases of this class.

III.—DIETIC DISEASES.

The deaths in this class number 170; they comprise 152 from intemperance, 108 of which (92 males and 16 females) come under the head of chronic alcoholism, and 44 (43 males and 1 female) were caused by delirium tremens.

IV.—CONSTITUTIONAL DISEASES.

From diseases termed “constitutional” there resulted 16,010 deaths (7,468 males and 8,542 females), affording a rate of 1 in 5·5 of all the deaths, and equal to 315 in every 100,000 of the population.

Phthisis or Pulmonary Consumption proved fatal in 10,258 instances (4,610 males and 5,648 females) being equal to 201·2 in every 100,000 persons; the average annual number for the previous ten years was 10,313.

As heretofore, Leinster and Ulster yield the highest rates, and Connaught the lowest. The rates for the four provinces are as follow:—Leinster, 244 per 100,000 of the population; Ulster, 231; Munster, 160; and Connaught, 121.

Of the total deaths from phthisis, 7,386, or 72·0 per cent., were of persons between 15 and 45 years of age.

TABLE X.—Showing, by PROVINCES, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1872–81; the Average Annual Number for that period; with the number registered in 1882, and the Rate represented thereby.

Mesenteric Disease.—The deaths from mesenteric disease numbered 1,062—524 males and 538 females.

Gout.—Only 34 deaths from gout were registered (29 males and 5 females).

Cancer, Malignant Disease.—There were 1,832 deaths tabulated under this heading, of which 869 were those of males and 1,013 of females.

V.—DEVELOPMENTAL DISEASES.

The deaths in this class amount to 17,104, of which 16,718 (7,661 males and 9,057 females) were ascribed to “old age.” Of the remaining 386 deaths, 298 are tabulated under the head of “premature birth,” 8 were caused by cyanosis, 42 by spina bifida, &c.

VI.—LOCAL DISEASES.

The number of deaths from “local diseases” registered amounted to 35,652 (18,305 males and 17,347 females), or 1 in 2·5 of the deaths from all causes.

Diseases of the Nervous System.—From this group of diseases there resulted 8,310 deaths—4,412 males and 3,898 females. They include 3,247 from convulsions, (nearly all children), 1,553 from paralysis, 1,041 from apoplexy, 705 from inflammation of the brain, 312 from epilepsy, 385 from insanity (general paralysis of the insane), 5 (2 males and 3 females) from chorea or St. Vitus’s dance, 215 from softening of the brain, &c.

Diseases of the Circulating System.—Diseases of the circulating system caused 4,591 deaths—2,355 males and 2,236 females.

*Diseases of the Respiratory System.**—The deaths from these diseases, omitting those from croup, which disease was not included in this group prior to the year 1881, amounted to 14,169 (7,177 males and 6,992 females), being equal to 277·9 in every 100,000 of the population. The average number for the preceding ten years was 14,589, the annual numbers varying from 11,419 in 1874 to 18,441 in 1879. The respective rates for the Provinces, in 1882, are Leinster, 346·7 per 100,000 persons; Munster, 292·9; Ulster, 258·0; and Connaught, 164·2.

As many as 10,389 of the deaths from these causes (4,966 males and 5,423 females) resulted from bronchitis; 2,200 (1,374 males and 826 females) were from pneumonia or inflammation of the lungs; 402 from asthma and emphysema; 226 from pleurisy; 120 from laryngitis, &c.

TABLE XI.—Showing, by PROVINCES, the Number of Deaths from Diseases of the Respiratory System* registered in Ireland during the Ten Years 1872–81; the Average Annual Number for that period; with the number registered in 1882, and the Rate represented thereby.

Rate per 100,000 Inhabitants, 1882,	346·7	292·9	258·0	164·2	277·9	

Diseases of the Digestive System.—These diseases contributed 4,746 deaths (2,425 males and 2,321 females). They include 458 from enteritis or inflammation of the bowels; 347 from peritonitis or inflammation of the covering of the bowels; 376 from ileus or obstruction of the bowels; 203 from ulceration of the intestines; 164 from hernia; 15 (13 males and 2 females) from fistula; 171—121 males and 50 females— from cirrhosis of liver, &c.

Diseases of the Urinary System.—To the various affections of this order of diseases

* Exclusive of Phthisis, or Pulmonary Consumption, for which see “Constitutional Diseases,” and of Croup, which, previous to the year 1881, was not included in this group of diseases.

1,351 deaths (931 males and 420 females) were ascribed. Of these deaths, 433 (242 males and 191 females) were from Bright's disease, 106 from nephritis or inflammation of the kidneys; 22 from ischuria or suppression of urine; 27 from stone in the bladder; 49 from uræmia, &c.

The remaining deaths from Local Diseases comprise 38 from *Diseases of the Lymphatic System and of Ductless Glands*; 704 from *Diseases of the Reproductive System* (including 160 from diseases of the Organs of Generation, and 544 from the Accidents of Childbirth); 230 from *Diseases of the Locomotive System*; and 269 from *Diseases of the Integumentary System*.

VII.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 1,986 (1,397 males and 589 females), or 39·0 in every 100,000 of the population, being slightly under the average for the ten years 1872–81. Accidents or negligence caused 1,733 of these deaths (including 745 from fractures and contusions, 375 from burns or scalds, and 359 from drowning); there were 141 cases of homicide (murder and manslaughter), and 105 of suicide.

TABLE XII.—Showing, by PROVINCES, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths), registered during the Ten Years 1872–81; the Average Annual Number for that period, with the number registered in 1882, and the Rate represented thereby.

Rate per 100,000 Inhabitants, 1882,	43·0	41·0	35·6	32·9	39·0	

Inquests.—There were 2,229 inquests reported to the Registrars during the year 1882, being 1 inquest to every 40 deaths registered.

AGES.

Deaths of infants under 1 year old numbered 11,603, being equal to 9·5 per cent. of the number of births registered.

Amongst children under 5 years of age 19,978 deaths occurred—a mortality equal to 35·2 in every 1,000 of the living at that age. Of these, 10,648 were boys and 9,330 girls; the former number representing 37·0 in every 1,000 boys, and the latter 33·4 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 9·0 per cent. of the living at that age.

Amongst the deaths registered are 660 of persons stated to have been aged 95 years and upwards—310 males and 350 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1882 amounted to 89,136; of these 46,978 were males and 42,158 were females. Of the whole number, 16,057 were from Leinster; 28,848 from Munster; 26,081 from Ulster; and 18,150 from Connaught.

Of the total emigrants from Ireland in 1882, 15·4 per cent. were under 15 years of age; 74·8 per cent. were between 15 and 35 years old; and 9·8 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The average prices, in Dublin, of oatmeal, potatoes, and beef in 1882 were over those for the preceding year, but as regards potatoes the advance was very slight; the average price of Messrs. Manders and Co.'s 4-lb. loaf was $7\frac{1}{4}d.$, being $\frac{1}{4}d.$ under the average price for 1881. Oatmeal averaged $15s. 6d.$ per cwt., being $1s. 5d.$ over the mean price for 1881; the average prices of potatoes ranged from $2s. 9d.$ to $3s. 9d.$ per cwt., against $2s. 5d.$ to $3s. 8d.$ in 1881; and those of beef from $64s.$ to $76s. 6d.$ per cwt., against $57s. 6d.$ to $68s. 6d.$

TABLE XIII.—AVERAGE PRICES IN DUBLIN OF BREAD, OATMEAL, POTATOES, and BEEF, during the years 1872–82, and the AVERAGE NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1882.

* Compiled from Returns furnished by the Local Government Board.

Surveying the period covered by the several Tables in this Report, *i.e.*, 1882, and the ten years preceding, it is found that beef was lowest in the year 1879, when the average prices ranged from $57s.$ to $68s.$ per cwt.; bread in 1875, 1876, and 1879, in each of which the average price of Messrs. Manders' 4-lb. loaf was $7d.$; oatmeal in 1881, when the average price was $14s. 1d.$ per cwt.; and potatoes in 1881, when the average range of prices was from $2s. 5d.$ to $3s. 8d.$ per cwt. The highest average price of bread was $8d.$ in the years 1872–3–4–7; of oatmeal, $18s. 8d.$ in 1874; the highest range for potatoes, $4s. 6d.$ to $8s.$ per cwt. in 1873, and for beef, $64s.$ to $82s. 6d.$ per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1882 was 51,262, being 1,776 under the average for the preceding year; and that the average number of persons receiving out-door relief was 58,542, or 2,988 under the corresponding number for 1881.

THE WEATHER.

The following particulars have been extracted from Meteorological Observations taken during the years 1870–82, at 40, Fitzwilliam-square, West, Dublin, by J. W. Moore, Esq., M.D., Univ. Dub., F.K.Q.C.P., F.M.S., Observer at Dublin for the Meteorological Office, London.

The mean Atmospheric Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's Formula, viz., $min. + \{max. - min. \times .41\} = \text{Mean Temperature}$. The per-centage Amount of Cloud has been deduced from observations made three times daily—at 9 A.M., 3 P.M., and 9 P.M.—for the years 1870–1874 inclusive, and from observations made twice daily—at 9 A.M. and 9 P.M.—for the years 1875–1882 inclusive. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least one-hundredth (.01) of an inch of rain falls within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1882 was 29.881 inches. The highest observed reading was 30.935 inches, at 10.30 P.M. on January 18th. The lowest observed reading was 28.718 inches, at 7.30 A.M., on March 1st. The extreme range of atmospherical pressure was, therefore, 2.217 inches.

The *Mean Temperature* of the year, deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's formula, was 48.9°. The highest reading was 71.4° on August 1st; the lowest reading was 13.3° on December 13th and 14th. The average mean temperature for the years 1870–81 calculated in the same way, was 48.6°. The mean temperature, deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M., was 49.4°.

Rain fell on 227 days, including snow or sleet on 12 days, and hail on 29 days. The average number of rainy days in the years 1870–81 was 197.7. The total rainfall measured 31.184 inches, compared with an average of 28.851 inches in the years 1870–81. Of this amount only 13.041 inches fell in the first six months of the year, on 111 days.

As regards the *Direction of the Wind*, 730 observations were made during the year, with this result—N., 36; N.E., 27; E., 55; S.E., 59; S., 80; S.W., 124; W., 225; N.W., 84; Calms, 40.

The year 1882 showed a mean temperature equal to the average; the rainfall and rainy days were considerably above the average both of the twelve years 1870–81 (28.851 inches on 197.7 days), and of the longer period of seventeen years, 1865–81 (28.194 inches on 193.5 days).

So fine and mild a January had not been experienced for many years. In Dublin there was a complete absence of frost, and the mean temperature was nearly 12° above that of January, 1881. On the 18th the barometer reached the phenomenal height of 30.935 inches. February was marked by singularly open weather, an absence of frost and snow, a high mean barometrical pressure (30.117 inches), and a preponderance of S. to W. winds. Very unsettled, stormy, open weather prevailed in March, the mean temperature being 3.1° in excess of the average. April was a cool, very changeable month, further characterized by a prevalence of polar winds (E. and N.W.), and a rainfall (3.526 inches) much in excess of the average. May was fine, with much bright sunshine, and a preponderance of easterly winds. The weather strangely resembled that of May 1881. June was a very changeable, showery, cold month, with strong westerly winds, a mean temperature 2° below the average, rainfall in excess, and as many as 25 rainy days. July was changeable, cool, and breezy—the wind almost constantly from points between S.S.W. and W.N.W., and thunder occurring frequently; the rainfall was again in excess, and the rainy days (25) far exceeded the average. August was not unfavourable, although chiefly cool and breezy; beautiful weather prevailed until the 13th, when a thunderstorm ushered in a cool, windy, cloudy, and often showery period. September was a cold, changeable month; N.W. winds were unusually prevalent, and occasional heavy falls of rain occurred. The weather was very unsettled throughout October, but the mean temperature was about the average in Dublin, which city also remarkably escaped the torrential rains of the month in western Europe generally. November was cold, wet, and windy, being specially characterized by frequent displays of aurora borealis—that of the 17th was unusually brilliant, and accompanied with a memorable magnetic storm. December was a cold month, temperature showing great extremes, the range in Dublin being from 13.3° to 56.5°, or 43.2°; a period of excessive cold began on the 5th and lasted until the 15th. Unusual warmth in the last week restored the balance of temperature to a great extent, so that the mean of the month (37.7°) fell less than 3° below the average. The mean temperature (46.1°) of the week ending the 30th was 18.9° above that (27.2°) of the week ending the 10th.

A general review of the year 1882 shows that the annual mean temperature was very slightly above the average (48.9° compared with 48.6°); the amount of cloud was as nearly as possible the average (60.7 per cent. compared with 60.8 per cent.); the rainfall was decidedly in excess (31.184 inches compared with 28.851 inches), and the rainy days were also much above the average, being 227 compared with 197.7.

TABLE showing the average Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the Twelve Years 1870–1881 inclusive; and the Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the year 1882.

[For detailed Table for 1882, see page 22.]

1828	7,464,131	3,652,899	3,811,232								

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-82—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, to allow for the discrepancy between the number thus arrived at for 1881 and the estimate based on the Census taken on the 3rd of April in that year.

ANNUAL ABSTRACTS
OF
MARRIAGES, BIRTHS, AND DEATHS
1882.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

NOTE.—The Registrars' Districts are subdivisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District. Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.
