

Live Register Flows

Live Register Flow Analysis December 1999

	New Registrations	Outflow (derived)	Net Change
Men	11,809	9,484	+2,325
Women	10,752	8,324	+2,428
Total	22,561	17,808	+4,753

Seasonal increase in registrations

During December 1999, a total of 22,561 persons signed onto the Live Register and 17,808 left the Register. This compares with 26,030 new registrations and 17,452 persons leaving the Live Register in December 1998.

There were 176,539 persons on the Live Register on the last day of December 1999, an increase of 4,753 in the month. On average, the Live Register increased by 950 persons per week in December 1999, compared with a weekly increase of 2,145 in December 1998. *See Tables 1 and 2.*

Other features include:

- ◆ On average, 4,512 people joined the Live Register each week in December 1999 and 3,562 left the Register. *See Table 2.*
- ◆ The number of men signing on increased by 465 per week and the number of women by 486 in December 1999. *See Table 3.*

The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Benefit. Unemployment is measured by the Quarterly National Household Survey and the latest figure, for June–August 1999, is 101,100 persons unemployed.

Background Notes

Source and scope of the Live Register	<p>The Live Register is compiled from returns made directly to the Central Statistics Office by each local office of the Department of Social, Community and Family Affairs. It comprises persons under 65 years of age in the following classes:</p> <ul style="list-style-type: none"> • All claimants for Unemployment Benefit (UB) excluding systematic short-time workers; • Applicants for Unemployment Assistance (UA) excluding smallholders and self-employed persons; • Other registrants including applicants for credited Social Welfare contributions but excluding those directly involved in an industrial dispute.
Live Register Flow Analysis	<p>Changes in the level of flows on and off the Live Register in any month reflect conditions in the labour market and aspects of the social insurance system such as transfers to or from Disability Benefit, exhaustion of Unemployment Benefit (UB) entitlement without qualifying for Unemployment Assistance (UA) etc.</p>
New Registrations	<p>The aggregate of <i>new registrations</i> for each Friday in a given month is used in conjunction with the <i>net change</i> over the same period to calculate the <i>outflow</i> from the register. A <i>new registration</i> is defined as anybody on the Live Register on a particular Friday who was not on it on the previous Friday.</p>
Unemployment Statistics	<p>The Live Register is not designed to measure unemployment. It includes part-time (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Unemployment Benefit. Unemployment is measured by the Quarterly National Household Survey (formerly the annual Labour Force Survey).</p>
History	<p>The flow analysis of the Live Register has been published monthly as a separate release since January 1989. Similar details were previously included in the Industrial Analysis of the Live Register, which was discontinued.</p>
Descriptive articles	<p>The compilation basis for the Live Register statistics from May 1992 onwards is described in the September 1992 issue of the <i>Statistical Bulletin</i>. The March 1980 issue contained a description of the basis used up to April 1992 while a more comprehensive treatment of Live Register statistics appeared in the “Report of the Inter-Departmental Study Group on Unemployment Statistics” (Stationery Office Dublin, Prl. 7925, April 1979). The results of a special study of the differences between the Labour Force Survey (LFS) Estimates of Unemployment and the Live Register are contained in the December 1996 issue of the <i>Statistical Bulletin</i>.</p>
