

## Live Register Flow Analysis November 2000

	New Registrations	Outflow (derived)	Net Change
Men	10,500	11,229	-729
Women	9,185	10,683	-1,498
Total	19,685	21,912	-2,227

### Decrease in new registrations and outflows

During November 2000, 19,685 persons joined the Live Register, and 21,912 left the Register, giving a net decrease of 2,227 in the month. This compares with 20,289 new registrants and 26,448 persons leaving the Live Register in November 1999.

On average there were 4,921 new registrants each week in November, while 5,478 persons per week left the register. *See Table 2.*

Other features include:

- ◆ There was a net decrease in the Live Register in all regions with the exception of the Mid-West and the South-West. *See Table 1.*
- ◆ The average weekly decrease for women (-375) exceeded that for men (-182) during November. *See Table 3.*

**The Live Register is not designed to measure unemployment.** It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Benefit. Unemployment is measured by the Quarterly National Household Survey and the latest figure, for June-August 2000 is 77,700 persons unemployed.

## Background Notes

<b>Source and scope of the Live Register</b>	<p>The Live Register is compiled from returns made directly to the Central Statistics Office by each local office of the Department of Social, Community and Family Affairs. It comprises persons under 65 years of age in the following classes:</p> <ul style="list-style-type: none"> <li>• All claimants for Unemployment Benefit (UB) excluding systematic short-time workers;</li> <li>• Applicants for Unemployment Assistance (UA) excluding smallholders and self-employed persons;</li> <li>• Other registrants including applicants for credited Social Welfare contributions but excluding those directly involved in an industrial dispute.</li> </ul>
<b>Live Register Flow Analysis</b>	<p>Changes in the level of flows on and off the Live Register in any month reflect conditions in the labour market and aspects of the social insurance system such as transfers to or from Disability Benefit, exhaustion of Unemployment Benefit (UB) entitlement without qualifying for Unemployment Assistance (UA) etc.</p>
<b>New Registrations</b>	<p>The aggregate of <i>new registrations</i> for each Friday in a given month is used in conjunction with the <i>net change</i> over the same period to calculate the <i>outflow</i> from the register. A <i>new registration</i> is defined as anybody on the Live Register on a particular Friday who was not on it on the previous Friday.</p>
<b>Unemployment Statistics</b>	<p>The Live Register is not designed to measure unemployment. It includes part-time (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Unemployment Benefit. Unemployment is measured by the Quarterly National Household Survey (formerly the annual Labour Force Survey).</p>
<b>History</b>	<p>The flow analysis of the Live Register has been published monthly as a separate release since January 1989. Similar details were previously included in the Industrial Analysis of the Live Register, which was discontinued.</p>
<b>Descriptive articles</b>	<p>The compilation basis for the Live Register statistics from May 1992 onwards is described in the September 1992 issue of the <i>Statistical Bulletin</i>. The March 1980 issue contained a description of the basis used up to April 1992 while a more comprehensive treatment of Live Register statistics appeared in the "Report of the Inter-Departmental Study Group on Unemployment Statistics" (Stationery Office Dublin, Prl. 7925, April 1979). The results of a special study of the differences between the Labour Force Survey (LFS) Estimates of Unemployment and the Live Register are contained in the December 1996 issue of the <i>Statistical Bulletin</i>.</p>
