Live Register Flow Analysis September 2000

Live Register Flows

	New Registrations	Outflow (derived)	Net Change
Men	11,158	16,383	-5,225
Women	10,238	19,107	-8,869
Total	21,396	35,490	-14,094

Outflows exceed new registrations by 14,094

During September 35,490 persons signed off the Live Register. This was offset by 21,396 new registrations giving a net decrease of 14,094 in the month. This compares with a monthly decrease of 12,487 in September 1999.

Other features include:

- ◆ Over a quarter of the net decrease in the month was in the Dublin area. *See Table 1.*
- ◆ The 35,490 departures from the Live Register comprised 16,383 males and 19,107 females. *See Table 1.*
- ◆ On average there were of 4,279 new claimants each week, with 7,098 persons per week leaving the register. *See Table 2.*
- ◆ The number of males on the Live Register fell by 1,045 per week during September, while the number of females fell by 1,774. *See Table 3.*

The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Benefit. Unemployment is measured by the Quarterly National Household Survey and the latest figure, for March-May 2000 is 74,900 persons unemployed.

For more information, contact Nicola Tickner at 021-453 5420, Noel Ryan at 021-453 5490 or Margot O'Reilly at 021-453 5491.

Background Notes

Source and scope of the Live Register	<p>The Live Register is compiled from returns made directly to the Central Statistics Office by each local office of the Department of Social, Community and Family Affairs. It comprises persons under 65 years of age in the following classes:</p> <ul style="list-style-type: none"> • All claimants for Unemployment Benefit (UB) excluding systematic short-time workers; • Applicants for Unemployment Assistance (UA) excluding smallholders and self-employed persons; • Other registrants including applicants for credited Social Welfare contributions but excluding those directly involved in an industrial dispute.
Live Register Flow Analysis	<p>Changes in the level of flows on and off the Live Register in any month reflect conditions in the labour market and aspects of the social insurance system such as transfers to or from Disability Benefit, exhaustion of Unemployment Benefit (UB) entitlement without qualifying for Unemployment Assistance (UA) etc.</p>
New Registrations	<p>The aggregate of <i>new registrations</i> for each Friday in a given month is used in conjunction with the <i>net change</i> over the same period to calculate the <i>outflow</i> from the register. A <i>new registration</i> is defined as anybody on the Live Register on a particular Friday who was not on it on the previous Friday.</p>
Unemployment Statistics	<p>The Live Register is not designed to measure unemployment. It includes part-time (those who work up to three days a week), seasonal and casual workers entitled to Unemployment Assistance or Unemployment Benefit. Unemployment is measured by the Quarterly National Household Survey (formerly the annual Labour Force Survey).</p>
History	<p>The flow analysis of the Live Register has been published monthly as a separate release since January 1989. Similar details were previously included in the Industrial Analysis of the Live Register, which was discontinued.</p>
Descriptive articles	<p>The compilation basis for the Live Register statistics from May 1992 onwards is described in the September 1992 issue of the <i>Statistical Bulletin</i>. The March 1980 issue contained a description of the basis used up to April 1992 while a more comprehensive treatment of Live Register statistics appeared in the "Report of the Inter-Departmental Study Group on Unemployment Statistics" (Stationery Office Dublin, Prl. 7925, April 1979). The results of a special study of the differences between the Labour Force Survey (LFS) Estimates of Unemployment and the Live Register are contained in the December 1996 issue of the <i>Statistical Bulletin</i>.</p>
