2005 November	92.0	+1.1	+3.5	103.3	+1.0	+4.3
2005 December	91.2	-0.9	+3.5	103.0	-0.3	+4.8
2006 January	91.0	-0.2	+2.7	103.3	+0.3	+3.5
2006 February	91.6	+0.7	+3.3	104.0	+0.7	+4.2
2006 March	91.2	-0.4	+3.6	103.6	-0.4	+4.0
2006 April	91.0	-0.2	+1.7			
2006 May	90.2	-0.9	+0.6			
2006 June	90.7	+0.6	-0.4			
2006 July	90.6	-0.1	-0.2			
2006 August	90.7	+0.1	+0.9			
2006 September	90.8	+0.1	+0.1			
2006 October	91.1	+0.3	+0.1			
2006 November	90.1	-1.1	-2.1			

<sup>1</sup> Derived from the price indices for output of manufacturing industry, output of agriculture and the import price (unit value) index. The 2006 figures are provisional due to the provisional nature of the import price (unit value) indices. Final 2006 GWPI indices should be available by mid 2007.

**Table 2 Industrial Producer Price Indices (excluding VAT)**

Base: Year 2000 as 100

	NACE code <sup>1</sup>	Index		Monthly % Change			Annual % Change
		Oct	Nov	Sept	Oct	Nov	Nov

(Base: Year 2000 as 100)**

## Background Notes

**Wholesale Price Index** The term Industrial Producer Price Index refers to a family of indices that measure the average change over time in the selling prices received by domestic producers of goods. The other four wholesale price index series incorporate imported and home produced goods sold by manufacturers and wholesale outlets.

**Coverage** The output price indices for sectors of Manufacturing Industries cover both home sales and export sales. The Indices for Total transportable goods industries; Food, drink and tobacco; Manufacturing industries excluding food; Manufacturing industries excluding food, drink and tobacco; Intermediate goods industries (except energy); Capital goods industries; Durable consumer goods industries; Non-durable consumer goods industries; Manufacturing industries (home sales); Manufacturing industries (export sales) and Total manufacturing industries are all calculated on a net sector basis i.e. the weights used to combine the sectoral indices (including those for sectors not distinguished in Table 2) exclude sales to other sectors of Manufacturing Industry.

Table 2B gives the percentage contribution of each published sector to the overall percentage change on Table 2. The percentage contributions on Table 2B will not add up to the Total Manufacturing industries percentage change on Table 2, as not all sectors which are added into the Total Manufacturing industries figure can be published separately, due to issues of confidentiality.

The Building Materials, Capital Goods and Energy Products indices (Tables 3, 4 and 5) cover home production and imports of these commodities. Table 3, the Wholesale Price Index for Building and Construction Materials, provides only a general indication of price trends in that sector. Actual transaction prices are collected for materials purchased by construction and civil engineering firms. The price indices reflect an 'average' over a mixture of products from many companies throughout the country. They also reflect prices for both long-term and short-term contracts and for high and low volume civil engineering works. It should be noted that long-term, high volume fixed contracts for major works might dilute in the short-term the impact of emerging price changes on the index. Furthermore, industry sources have confirmed that price increases notified by companies may not always be achieved in practice following negotiations. Much depends on the prevailing market conditions. Therefore changes over the short-term in the indices derived from these transaction prices will not always coincide with price changes notified by companies.

The General Wholesale Price Index (Table 1) is calculated by combining special price indices for:

Output of Manufacturing Industry - excluding sales to Agriculture Sector  
 Output of Agriculture - excluding sales to Manufacturing Industry  
 Imports plus duty (Unit Value) Index - excluding imports by Agriculture Sector and  
 Manufacturing Industry

which eliminates duplication as far as possible. The usefulness of this general index is limited; the sectoral indices are more relevant and meaningful. As the index is dependent on the Import Price (Unit Value) Index, it normally becomes available in final form a few months or so later than the other series.

**Prices** All indices in the series are based on prices at the 15th of the month (except for the Import Price (Unit Value) Index and the Agricultural Output Price Index). Quarterly and annual indices are simple averages of the corresponding monthly indices.

Prices used in the compilation of the indices are:

excluding delivery charges itemised on the invoice separately  
 after discounts or surcharges are applied  
 before addition of direct subsidies  
 exclusive of VAT (except for private vehicles used in Table 4)  
 inclusive of excise duty

Every effort is made by the Wholesale Prices Section to collect all prices for the relevant month. Where this is not possible late prices are included in the following month's calculations.

**Methodology** This Wholesale Price Index series is compiled to base 2000 as 100. A methodological description of this updated series is given in the April 2003 Wholesale Price Index Introduction of Updated Series.

**Calculating percentage changes in the index** The movement of the output price indices is expressed as percentage change, rather than a change in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percentage changes are not.

The example below illustrates the computation of a percentage change:

<b>Percentage change calculation</b>	
Current index	105.6
Less previous index	102.1
Equals in index points	3.5
Divided by the previous index	102.1
Equals	0.0343
Results multiplied by 100	0.0343 x 100
Equals percentage change	3.4
