

Wholesale Price Index November 2008

Manufacturing Industries Output Price Index

Manufacturing Output Price Index

	Price Index (Year '00=100)	% monthly change	% annual change
Sep 2008	89.5	+0.9%	+0.7%
Oct 2008	90.6	+1.2%	+2.6%
Nov 2008	91.8	+1.3%	+5.2%

Annual Manufacturing Prices up 5.2% in November

Monthly factory gate prices increased by 1.3% in November 2008. This compares to a decrease of 1.1% recorded for November 2007. As a result, the annual percentage change showed an increase of 5.2% in November 2008, compared with an increase of 2.6% in October 2008. *See graph across and Table 1.*

In the month, the price index for export sales increased by 1.8% while the index for home sales decreased by 0.3%. In the year there was an increase in the price index for export sales of 5.3% and an increase of 4.7% in respect of the price index for home sales. *See Table 2 and graph on page 6.*

In the month the most significant changes were increases in Office machinery and computers (+4.2%), Basic chemicals (+3.3%), and Pharmaceuticals and other chemical products (incl. man-made fibres) (+2.8%), while there was a decrease in Meat and meat products (-3.1%). *See Table 2 and Table 2B.*

Contributing to the annual change were increases in Other food products including bread and confectionery (+12.7%), Pharmaceuticals and other chemical products (incl. man-made fibres) (+12.0%), and Basic chemicals (+8.2%), while there was a decrease in Dairy products (-10.0%). *See Table 2 and Table 2B.*

The yearly price index for Mining and quarrying decreased by 10.0% while there was a monthly decrease of 2.9%. *See Table 2.*

A further analysis of Wholesale price changes by sector of use shows that:

- Building and Construction All material prices increased by 3.5% in the year since November 2007. The most notable yearly changes were increases in Structural steel (+19.2%), and Reinforcing metal (+17.4%). Building and Construction All material prices decreased by 0.3% in November 2008. *See Table 3.*
- Year on year, the price of Capital Goods increased by 2.9%, while there was a monthly price increase of 0.3% *See Table 4.*
- The price of Energy products increased by 10.0% in the year since November 2007, while Petroleum fuels decreased by 7.5%. In November 2008, there was a monthly decrease in Energy products of 2.2%, while Petroleum fuels decreased by 8.3%. *See Table 5.*

Background Notes

Wholesale Price Index The term Industrial Producer Price Index refers to a family of indices that measure the average change over time in the selling prices received by domestic producers of goods. The other four wholesale price index series incorporate imported and home produced goods sold by manufacturers and wholesale outlets.

Coverage The output price indices for sectors of Manufacturing Industries cover both home sales and export sales. The Indices for Total transportable goods industries; Food, drink and tobacco; Manufacturing industries excluding food; Manufacturing industries excluding food, drink and tobacco; Intermediate goods industries (except energy); Capital goods industries; Durable consumer goods industries; Non-durable consumer goods industries; Manufacturing industries (home sales); Manufacturing industries (export sales) and Total manufacturing industries are all calculated on a net sector basis i.e. the weights used to combine the sectoral indices (including those for sectors not distinguished in Table 2) exclude sales to other sectors of Manufacturing Industry.

Table 2B gives the percentage contribution of each published sector to the overall percentage change on Table 2. The percentage contributions on Table 2B will not add up to the Total Manufacturing industries percentage change on Table 2, as not all sectors which are added into the Total Manufacturing industries figure can be published separately, due to issues of confidentiality.

The Building Materials, Capital Goods and Energy Products indices (Tables 3, 4 and 5) cover home production and imports of these commodities. Table 3, the Wholesale Price Index for Building and Construction Materials, provides only a general indication of price trends in that sector. Actual transaction prices are collected for materials purchased by construction and civil engineering firms. The price indices reflect an 'average' over a mixture of products from many companies throughout the country. They also reflect prices for both long-term and short-term contracts and for high and low volume civil engineering works. It should be noted that long-term, high volume fixed contracts for major works might dilute in the short-term the impact of emerging price changes on the index. Furthermore, industry sources have confirmed that price increases notified by companies may not always be achieved in practice following negotiations. Much depends on the prevailing market conditions. Therefore changes over the short-term in the indices derived from these transaction prices will not always coincide with price changes notified by companies.

The General Wholesale Price Index (Table 1) is calculated by combining special price indices for:

Output of Manufacturing Industry - excluding sales to Agriculture Sector
Output of Agriculture - excluding sales to Manufacturing Industry
Imports plus duty (Unit Value) Index - excluding imports by Agriculture Sector and
Manufacturing Industry

which eliminates duplication as far as possible. The usefulness of this general index is limited; the sectoral indices are more relevant and meaningful. As the index is dependent on the Import Price (Unit Value) Index, it normally becomes available in final form a few months or so later than the other series.

Prices All indices in the series are based on prices at the 15th of the month (except for the Import Price (Unit Value) Index and the Agricultural Output Price Index). Quarterly and annual indices are simple averages of the corresponding monthly indices.

Prices used in the compilation of the indices are:

excluding delivery charges itemised on the invoice separately
after discounts or surcharges are applied
before addition of direct subsidies
exclusive of VAT (except for private vehicles used in Table 4)
inclusive of excise duty

Every effort is made by the Wholesale Prices Section to collect all prices for the relevant month. Where this is not possible late prices are included in the following month's calculations.

Methodology This Wholesale Price Index series is compiled to base 2000 as 100. A methodological description of this updated series is given in the April 2003 Wholesale Price Index Introduction of Updated Series.

Calculating percentage changes in the index The movement of the output price indices is expressed as percentage change, rather than a change in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percentage changes are not.

The example below illustrates the computation of a percentage change:

Percentage change calculation	
Current index	105.6
Less previous index	102.1
Equals in index points	3.5
Divided by the previous index	102.1
Equals	0.0343
Results multiplied by 100	0.0343 x 100
Equals percentage change	3.4
