

**Manufacturing Industries  
Output Price Index**

Jan 2006 Jan 2007 Jan 2008 Jan 2009 Jan 2010 Jan 2011

## Wholesale Price Index July 2011

### Manufacturing Output Price Index

	Price Index (Year '05=100)	% monthly change	% annual change
May 2011	98.4	+1.3%	-0.6%
June 2011	97.6	-0.8%	-1.0%
July 2011	97.6	-	-0.4%

### Annual Manufacturing Prices decrease by 0.4% in July

Monthly factory gate prices showed no change in July 2011. This compares to a decrease of 0.6% recorded for July 2010. As a result, the annual percentage change showed a decrease of 0.4% in July 2011, compared with a decrease of 1.0% in the year to June 2011. *See graph across and table 1.*

In the month, the price index for export sales decreased by 0.1% while the index for home sales increased by 0.1%. In the year there was a decrease of 1.6% in the price index for export sales (this can be influenced by currency fluctuations) and an increase of 4.9% in respect of the price index for home sales. *See table 2 and graph on page 7.*

In the month the most significant changes were increases in Basic Metals (+2.5%), Computer, electronic and optical products (+0.9%), and Rubber and plastic products (+0.4%) while there were decreases in Electrical equipment (-1.7%), Meat and meat products (-1.2%) and Basic pharmaceutical products and pharmaceutical preparations (-0.8%). *See table 2 and table 2A.*

Contributing to the annual change were increases in Dairy products (+10.5%), Meat and meat products (+8.2%) and Other Manufacturing including Medical and Dental Instruments and Supplies (+3.1%), while there were decreases in Computer, electronic and optical products (-5.4%), Basic pharmaceutical products and pharmaceutical preparations (-3.0%) and Other food products including bread and confectionary (-1.0%). *See table 2 and table 2A.*

The yearly price index for Mining and quarrying increased by 10.9% while there was a monthly increase of 0.3%. *See table 2.*

- ◆ Building and Construction All materials prices increased by 1.6% in the year since July 2010. The most notable yearly changes were increases in Copper pipes and fittings (+25.8%), Insulating materials (+11.0%) and Other timber excluding windows and doors (+8.3%) while there were decreases in PVC pipes and fittings (-10.9%), Precast concrete (-8.8%) and Stone (-4.1%). Building and Construction All material prices increased by 0.1% in the month. *See table 3.*
- ◆ Year on year, the price of Capital Goods decreased by 3.0%, while the monthly price index decreased by 0.1%. *See table 4.*
- ◆ The price of Energy products increased by 4.6% in the year since July 2010, while Petroleum fuels increased by 12.8%. In July 2011, the monthly price index for Energy products increased by 0.5%, while Petroleum fuels increased by 1.3%. *See table 5.*

	June 2011	July 2011	May 2011	June 2011	July 2011	July 2011
Petrol	145.4	147.7	-0.3	-1.4	1.6	11.8
Autodiesel	138.5	139.6	-2.8	1.5	0.8	11.9
Gas oil (other than autodiesel)	142.2	143.9	-3.8	1.9	1.2	13.6
Fuel oil	173.7	176.2	-3.7	2.1	1.4	13.1
Electricity	115.2	115.2	0.0	0.0	0.0	0.0
Petroleum fuels <sup>1</sup>	159.0	161.0	-3.4	1.8	1.3	12.8
Energy products	128.9	129.5	-1.3	0.7	0.5	4.6

<sup>1</sup> Energy products excluding electricity**Manufacturing Industries: Output Price Indices for  
Home and Export Sale  
(Base: Year 2005 as 100)**

## Background Notes

**Wholesale Price Index** The term Industrial Producer Price Index refers to a family of indices that measure the average change over time in the selling prices received by domestic producers of goods and services. The other three wholesale price index series incorporate imported and home produced goods sold by manufacturers and wholesale outlets.

**Coverage** The output price indices for sectors of Manufacturing Industries cover both home sales and export sales. The Indices for Total transportable goods industries; Food, drink and tobacco; Manufacturing industries excluding food; Manufacturing industries excluding food, drink and tobacco; Intermediate goods industries (except energy); Capital goods industries; Durable consumer goods industries; Non-durable consumer goods industries; Manufacturing industries (home sales); Manufacturing industries (export sales) and Total manufacturing industries are all calculated on a net sector basis, i.e. the weights used to combine the sectoral indices (including those for sectors not distinguished in Table 2) exclude sales to other sectors of Manufacturing Industry.

Table 2A gives the percentage contribution of each sector (including those not published on Table 2) to the overall percentage change on Table 2. The percentage contributions on Table 2A may not add up to the Total Manufacturing industries percentage change on Table 2 due to rounding and other adjustments for presentational purposes. In comparing these contributions against these percentage changes in indices presented on Table 2 caution should be exercised as the former is calculated on a net sector basis.

The Building Materials, Capital Goods and Energy Products indices (Tables 3, 4 and 5) cover home production and imports of these commodities. Table 3, the Wholesale Price Index for Building and Construction Materials, provides only a general indication of price trends in that sector. Actual transaction prices are collected for materials purchased by construction and civil engineering firms. The price indices reflect an 'average' over a mixture of products from many companies throughout the country. They also reflect prices for both long-term and short-term contracts and for high and low volume civil engineering works. It should be noted that long-term, high volume fixed contracts for major works might dilute in the short-term the impact of emerging price changes on the index. Furthermore, industry sources have confirmed that price increases notified by companies may not always be achieved in practice following negotiations. Much depends on the prevailing market conditions. Therefore changes over the short-term in the indices derived from these transaction prices will not always coincide with price changes notified by companies.

**Prices** All indices in the series are based on prices at the 15th of the month. Quarterly and annual indices are simple averages of the corresponding monthly indices.

Prices used in the compilation of the indices are:

- excluding delivery charges itemised on the invoice separately
- after discounts or surcharges are applied
- before addition of direct subsidies
- exclusive of VAT (except for private vehicles used in Table 4)
- inclusive of excise duty

Every effort is made by the Wholesale Prices Section to collect all prices for the relevant month. Where this is not possible late prices are included in the following month's calculations.

**Methodology** This Wholesale Price Index series is compiled to base 2005 as 100. A methodological description of this updated series is given in the Wholesale Price Index Introduction of Updated Series base 2005 as 100.

**Calculating percentage changes in the index** The movement of the output price indices is expressed as percentage change, rather than a change in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percentage changes are not.

The example below illustrates the computation of a percentage change:

<b>Percentage change calculation</b>	
Current index	105.6
Less previous index	102.1
Equals in index points	3.5
Divided by the previous index	102.1
Equals	0.0343
Results multiplied by 100	$0.0343 \times 100$
Equals percentage change	3.4

Alternatively, users may calculate a percentage change by dividing the current index by the previous index, multiplying by 100 and then subtracting 100.
