Background Notes – Consumer Price Index

- Definition** The Consumer Price Index is designed to measure the change in the average level of prices (inclusive of all indirect taxes) paid for consumer goods and services by all private and institutional households in the country and by foreign tourists holidaying in Ireland.
- Consumer Price Index (CPI)** Over 50,000 prices are collected for a representative basket consisting of 632 item headings in a fixed panel of retail and service outlets throughout the country during the week containing the second Tuesday of each month up to and including the third Tuesday of each month. The dates to which the June index relates are Monday 10th to Tuesday, 18th June 2013.
- Scope of the Index**
- (i) **Population Coverage:** All private and institutional households in the State and the expenditure of foreign tourists within Ireland. It does not include the expenditure of other non private households. Expenditure which occurs abroad by Irish residents is also excluded. In statistical terms coverage is referred to as the domestic concept.
 - (ii) **Geographic Coverage:** Covers the whole of the Republic of Ireland. Pricing takes place in 84 locations (cities and towns) throughout the country. These sampling points are located in Dublin city and county, the four regional cities of Cork, Limerick, Galway and Waterford, approx. 80% of towns with a population of 10,000 and over, approx. 70% of towns between 5,000 and 9,999 and a smaller proportion below this threshold. The results are weighted to represent the distribution of the population and its related consumer expenditure.
 - (iii) **Item Coverage:** All goods and services bought by the reference population for the purposes of consumption are included in the index. Expenditure on capital assets and investments, gambling and certain other activities are however excluded. There are 632 item headings and 12 division headings based on the COICOP classification. With each rebase the coverage of goods and services is reviewed to ensure that it continues to be representative of consumer tastes and purchasing practices.
- Price Collection** Personal visits are made to retail outlets by some 80 price collectors on a monthly basis. Approximately 50,000 price quotations are gathered in this way. In addition, 126 special inquiries covering items such as utility charges and services are conducted by post, telephone and e-mail in conjunction with internet price collection. Most prices are collected monthly, some quarterly and others annually. The CSO supplies general specifications to price collectors and price collectors are free initially to select a brand and in certain cases, size. This allows for a wide variety of different brands of the same item to be priced throughout the country. Once selected, the same item/brand is priced on a monthly basis in order to ensure matched price quotations. If an item disappears, substitution can occur but that price is excluded until matched prices are available for the same comparable item for two consecutive months. The CSO wishes to put on record its appreciation of the co-operation and assistance it receives from retail outlets and other business concerns.
- Classification** The classification used in the CPI is based on a version of the Classification of Individual Consumption by Purpose Adapted to the Needs of Harmonised Indices of Consumer Prices (2000) (COICOP). This replaced the former national classification which was used up to December 2001. The COICOP classification breaks consumer expenditure into twelve different divisions covering a comprehensive range of consumer goods and services.
- Annual Update of CPI Weights** For 2013, the CPI COICOP class (4-digit) level weights were updated with a reference period of December 2012. The weights were based primarily on the 2011 National Accounts Household Final Monetary Consumption Expenditure (HFMCE) data. The expenditure data were price updated at CPI COICOP class level to December 2012 using the price movement of the corresponding CPI COICOP class indices.
- The sample of items in the basket, retail outlets and service providers and locations remains unchanged from the December 2011 rebase.

Background Notes – Consumer Price Index (continued)

- CPI Item Weights** The CPI measures in index form the monthly changes in the cost of purchasing a fixed representative ‘basket’ of consumer goods and services (i.e. Laspeyres formula). Identical items are priced in the same outlet on each occasion so that changes in the cost of this constant basket reflect only pure price changes. The current basket of goods and services consists of 632 representative items which were selected as part of the December 2011 rebase and remain unchanged for 2013. The representative share of each item in the basket is proportional to the average amount purchased by all households in the State and foreign tourists in Ireland based primarily on the 2009/2010 Household Budget Survey (HBS) and estimates of expenditure by foreign tourists across a range of consumer goods and services. When the new COICOP class (4-digit) level weights were introduced with the January 2013 index, the CPI item weights were also updated. The CPI item weights were calculated on a pro rata basis using proportions from the December 2011 rebase.
- Methodological Details** A full methodological description of the new series is available in the Consumer Price Index Introduction of Updated Series (Base: December 2011 = 100) which is published on the CSO website at: <http://cso.ie/shorturl.aspx/106>.
- Rebase** The index has been rebased with effect from December 2011, the eleventh series since the foundation of the State.
- The rebase of the current CPI resulted in a number of methodological changes:
- Updating the expenditure weights;
 - A revision of the sample of goods and services;
 - An update of the sample of areas priced;
 - Calculation of the mortgage interest component.
- Goods and Services** The CPI basket can be split into two constituent parts - goods and services according to the following definitions.
- Goods** Goods are defined as non service items usually purchased and transportable from a retail outlet - the basket excluding services.
- Services** Services include electricity, gas, telecommunications and other public utilities, alcoholic beverages consumed on licensed premises, meals out, accommodation services, public transport, medical fees, insurances, education fees, hairdressing & other personal services, childcare & social protection, entertainment & recreation services, mortgage interest & rents, package holidays and other miscellaneous services.
- Utilities and Local Charges** Includes electricity, gas, landline telecommunications and waste collection & disposal charges.

Background Notes – COICOP

Prior to the introduction of the December 2001 based series in January 2002 the CPI used a national classification while the EU Harmonised Indices of Consumer Prices (HICP) used COICOP. To ensure greater comparability CPI and the HICP have both used the COICOP since December 2001.

The COICOP classification is based on 12 main divisions.
