

# 2

## Labour Market

- The number of persons in employment decreased from 1.939 million in 2009 to 1.859 million in 2010.
- The overall unemployment rate increased from 12.0% in 2009 to 13.6% in 2010.
- The number of persons unemployed in 2010 was 293,600 compared with 264,600 in 2009 and a low of 69,400 in 2001. The number of persons unemployed increased by 11% between 2009 and 2010.
- The average number of persons on the Live Register rose from 398,200 in 2009 to 441,700 in 2010, an increase of 10.9%.
- In 2010 there were 6,602 days lost due to industrial disputes, which compares with 329,593 in 2009.

## Introduction

The statistics presented in this chapter show developments in the Irish labour market and are based primarily on results from the Quarterly National Household Survey (QNHS) and its predecessor, the annual Labour Force Survey (LFS).

The latter part of the chapter contains mainly administrative data, compiled by the CSO, showing the trends in the number of persons on the Live Register as well as details of industrial disputes. The final table in the chapter gives information on redundancies.

## Labour market

The total number at work was just under 1.1 million in 1985. By 1995 this had increased to just under 1.3 million and then increased by over 830,000 between 1995 and 2008 to 2,112,800. Between 2008 and 2010 the total number at work fell by 253,700 to 1,859,100. Until 2008 the increased population of working age, primarily attributable to strong net inward migration in recent years, coupled with higher female participation rates contributed to high labour force growth. 2009 showed an annual decrease of 36,500 in the total number of persons in the labour force, the first such annual decrease since 1989. This decrease continued into 2010, when there was a further annual decrease of 50,400. The total number of persons in the labour force in 2010 was in excess of 2.1 million and accounted for 61.3% of all persons aged 15 years and over.

In 1985, the number of unemployed persons stood at 219,600, which represented almost 17% of the labour force. With some variations the unemployment rate remained at this level for most of the following decade. In the period between 1995 and 2008 the number of unemployed persons fell from 177,400 to 126,700 with the unemployment rate falling from 12.2% to 5.7%. However, the numbers unemployed rose to 264,600 in 2009, and continued to rise in 2010 to a total of 293,600. The unemployment rate in 2010 was 13.6%.

## Industrial disputes

During 2010 there were 14 industrial disputes in progress compared with 23 in 2009. This led to a total loss of 6,602 days due to industrial disputes in 2010. In 2009 there were 329,593 days lost due to industrial disputes of which public sector disputes accounted for a total of 248,679 days lost.

## Live Register

The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Jobseekers Benefit or Allowance. Unemployment is measured by the Quarterly National Household Survey (QNHS). See Labour market above.

The average number of persons on the Live Register increased from 398,200 in 2009 to 441,700 in 2010. The number of males on the Live Register increased by 9.6% from 2009 to 2010, while the number of females increased by 13.6% in the same period.

In April 2010 315,300 (72.9%) of those on the Live Register had a duration of continuous registration of less than one year. This compares with 81.6% for the same period in 2009. Just under one-fifth (19.2%) of those on the Live Register were under 25 years of age in April 2010 which compares with 21.0% for the same age group in April 2009.

## **Redundancies**

In 2005 the format in which redundancies were recorded changed. Actual redundancies are now compiled from 2005 whereas up to then notified redundancies were recorded. There were 58,731 actual redundancies in 2010. Extraction Industry (Chemical products) had the least redundancies at 196, while Other Services had the largest number of redundancies with 22,589 actual redundancies in that sector.

## Technical Notes

### Tables 2.1-2.8 - QNHS

The Quarterly National Household Survey (QNHS) began in quarter 4 of 1997 replacing the annual April Labour Force Survey (LFS). QNHS data refer to the April–June quarter (unless otherwise stated).

LFS data refers to April.

### ILO labour force classification

The primary classification used for the QNHS results is the ILO (International Labour Office) labour force classification. The ILO classification distinguishes the following main subgroups of the population aged 15 or over:

*In Employment:* Persons who worked in the week before the survey for one hour or more for payment or profit, including work on the family farm or business and all persons who had a job but were not at work because of illness, holidays etc in the week.

*Unemployed:* Persons who, in the week before the survey, were without work and available for work and had taken specific steps, in the preceding four weeks, to find work.

*Labour force:* The labour force comprises persons employed plus unemployed.

*Inactive Population:* All other persons.

### Participation, employment and unemployment rates

The participation rate is the number of persons in the labour force expressed as a percentage of the total population aged 15 or over. The employment rate is the number of employed persons aged 15 to 64 expressed as a percentage of the total population aged 15 to 64. The unemployment rate is the number of unemployed persons expressed as a percentage of the total labour force.

### Principal economic status

QNHS results are also available using the Principal Economic Status (PES) classification. The PES classification is based on a single question in which respondents are asked what is their usual situation with regard to employment and given nine response categories to choose from.

### NACE industrial classification

The QNHS sectoral employment figures are based on the EU NACE Rev. 2 classification.

### Broad occupational groupings

The classification system used is based on the UK Standard Occupational Classification (SOC) with some modifications to reflect the Irish labour market.

### Tables 2.1-2.8 - QNHS

Part-time underemployment

From 2009 the new method of calculation of part-time underemployment uses the following criteria to derive underemployment:

1. Working part-time
2. Willing to work additional hours
3. Available to work additional hours

The previous calculation was based on a respondent meeting the following criteria:

1. Working part-time (self-perception)
2. Working too few hours
3. Looking for either an additional or replacement job
4. Available to work in an additional or replacement job

The key difference between the two methods is the criteria of a respondent looking for work.

### **Discontinuities**

The QNHS involves a more detailed questionnaire than the former LFS and elicits more information about part-time employment.

The annual increase of 114,600 observed in the ILO numbers in employment between spring 1997 (LFS) and 1998 (QNHS) included almost 20,000 more students and about 5,000 more women working in the home who also had a job. The CSO is attributing 20,000 of the observed annual increase in ILO employment in the year to April-June 1998 to the improved coverage of part-time employment, giving an underlying change for the year of 95,000.

### **Table 2.9-2.10 – Industrial disputes**

The information on industrial disputes is compiled by the CSO on the basis of details supplied by the Monitoring Unit of the Department of Enterprise, Trade and Innovation, and on information collected directly from other sources. Disputes which were settled without involving a stoppage of work are not included, nor are those disputes which lasted less than one day, or which involved an aggregate loss of less than ten days.

Data in Tables 2.9 and 2.10 is based on NACE Rev. 2 classification.

The one-day National Public Sector dispute involved workers and days lost across Sectors O, P and Q. The economic sector and full-time/part-time breakdowns were estimated from CSO sectoral employment data. The overall number of workers involved in this dispute was 265,400 and it accounted for a total of 237,268 days lost.

### **Tables 2.11-2.13 – Live Register**

The Live Register is compiled from returns made directly to the CSO by each local office of the Department of Social Protection. It comprises persons under 65 years of age in the following classes:

All claimants for Jobseekers Benefit (JB) excluding systematic short-time workers.

Applicants for Jobseekers Allowance (JA) excluding smallholders/farm assists and other self-employed persons.

Other registrants including applicants for credited social welfare contributions but excluding those directly involved in an industrial dispute.

In Table 2.12 April 2010 data refers to last Friday in month whereas previously data referred to second last Friday in reference period. As such April 2010 totals will equal the published April Live Register total, while those for prior periods will show a small difference for those months.
