### Trips to Ireland down 12% in November 2008

The number of overseas trips to Ireland fell by 12.3% to 499,100 in November 2008 compared to November 2007. All major visitor markets declined in this period. Visits from Great Britain fell by just over 14% to 261,200; Other Europe was down 8.3% to 170,100 while North America fell by just over 21% to 48,300. *See Tables 1 and 2.*

Overseas trips taken by Irish residents fell very slightly to 505,200. *See Tables 1 and 2.*

For 2008 so far, overseas trips taken by Irish residents were up 3.2% to 7,386,200 from 2007. However, this increase fell well short of the 11.9% achieved in 2007 over 2006. On the other hand, overseas trips to Ireland fell by 2.1% to 7,335,100. This was due principally to a fall of over 156,000 (4.2%) in the number of visits by residents of Great Britain. *See Tables 3 and 4.*

The CSO "Airport Pairings" database contains information of every direct flight in and out of the nine Irish airports on a monthly basis. Data is available from January 2006 to July 2008. For details please go to <http://tinyurl.com/2nypw8>.

## Background Notes

<b>Periodicity</b>	Monthly.
<b>Scope</b>	Overseas Travel.
<b>Coverage</b>	All Overseas Travel into and out of the Republic of Ireland.
<b>Data Collection</b>	The survey is conducted at Dublin, Cork, Shannon, Knock and Kerry airports and Rosslare, Ringaskiddy, Dún Laoghaire and Dublin ports. Information is collected via interview.
<b>Sample Design</b>	<p>A sample of flights and sailings is selected for surveying. This selection is done in such a way as to ensure proper representation of airport/port pairing, day and night and weekday and weekend flights/sailings.</p> <p>On these flights/sailings, a 1 in 5 systematic sample of passengers is selected and their country of residence is recorded.</p> <p>Sample results are grossed up to total passenger numbers travelling for each airport or port pairing, as provided by the airports and ferry companies.</p> <p>Where there was no coverage in a survey month for an airport/port pairing, results are imputed on the basis of 'nearest neighbour'.</p>
<b>Sample Size</b>	The sample size in the November 2008 Country of Residence Survey was just under 27,700 passengers.
<b>Reliability of Results</b>	<p>In 2004 the total number of persons sampled for the Country of Residence Survey (CRS) was almost 585,000. The total number of journeys was almost 23,985,000 giving an average sampling rate of 2.4%.</p> <p>Estimation of survey results from data relating to a sample of 20% of passengers for a sample of flights/sailings introduces a statistical variability which would not be present if <i>all</i> passengers from <i>every</i> flight/sailing had been interviewed. In some cases where ports/airports are unable to provide private/charter figures minor estimations will be made. This means that the survey results cannot be taken as accurate to the full degree shown in this report.</p> <p>The variability is expressed by means of a standard error. This standard error gives the relative size of the 'sampling error' (variability) present in an estimate compared with the estimate itself. In general, estimates can be said to have a relative precision of twice their standard error.</p> <p>The effect of sampling error is relatively greater for small estimates and may, in particular, make it more difficult to compare figures for different time periods. The following table gives estimates of the standard error for the major Area of Residence categories. The more detailed country figures in Table 5 are subject to higher standard errors, as a percentage of the estimate.</p>

	Irish Trips Overseas	Great Britain	Other Europe	North America	Other Areas
Total trips	5,417,800	3,680,600	1,600,200	976,700	317,100
Standard error	10,300	8,400	6,800	4,700	3,700
Standard error as % of estimate	0.2	0.2	0.4	0.5	1.2

In general, the more detailed the classification provided the greater the standard error of the estimates. In the derivation of the results, the assumption was made that non-respondents had similar characteristics and activity levels to those respondents in the same stratification cell. This assumption, which is a standard one in surveys such as this, may have resulted in some slight bias being introduced into the results. Moreover, although every effort was made to ensure that the information received during interview was correct in all respects it is inevitable that some minor non-sampling errors remained undetected.

### Seasonal Adjustment

Visitor numbers to Ireland are subject to a high degree of seasonality. These seasonal fluctuations do not affect annual comparisons but they do affect monthly or quarterly comparisons. Typically trips are at their highest during the summer months, although there are also clear peaks around Christmas and Easter. To facilitate interpretation of underlying trends visitor numbers are adjusted to remove these seasonal trends.

The seasonal adjustment method used is the X-11 Arima (Auto-Regressive Integrated Moving Average) variant of the US Bureau of the Census X-11 seasonal adjustment model. Each individual series is adjusted separately to capture the different seasonal patterns exhibited by each visiting group. Once a year, in January, seasonal factors are calculated and applied.

The X-11 Arima variant requires at least 5 years data. The present seasonally adjusted series are based on seasonal patterns from January 2000 to date. The duration is just sufficient for seasonal adjustment; the process will improve as the series is extended.

## Definitions

### Trips

Eurostat methodology defines a Visitor as 'any person travelling to a place other than that of his/her usual environment for less than twelve months and whose main purpose of trip is other than the exercise of an activity remunerated from within the place visited'. However, as the Country of Residence Survey does not establish the reason for an individual's trip or length of stay, those travelling for reason of remuneration or for more than one year to this country cannot be excluded. Therefore, for the purposes of this survey, 'Trips' includes those travelling for remuneration in Ireland. Commercial Drivers travelling on sea routes are excluded.

### Country of Residence

Country of Residence is defined as the country in which a person has resided during the past year.
