Preface

Welcome to the fourth issue of the Transport Omnibus. In this publication we have included tables for two years (Transport 2009 – 2010). This report is also available in electronic format from the CSO website and can be downloaded free of charge at

<http://www.cso.ie/en/media/csoie/releasespublications/documents/transport/2010/transport0910.pdf>

The purpose of this thematic report is to provide a comprehensive presentation of the data currently available in the field of transport. It brings together a wide range of transport statistics and provides a useful reference source to those interested in the Transport sector.

The information contained in this report is sourced from statistics compiled by the CSO and other producers of statistical data. Appreciation is extended to all such organisations for their assistance in providing CSO with administrative data on transport statistics. In general the tables contained in this report relate to the years 2009 and 2010. However, detailed traffic volume estimates have also been provided for 2008, as these previously published data have been revised.

We hope that you find this publication useful and interesting and we would welcome any comments and feedback you may have. Any such should be sent to Transport Section, Central Statistics Office, Skehard Road, Cork or e-mailed to transport@cso.ie.

Key Facts	14
Chapter 1 Vehicle Licensing and Registrations	
Overview of Vehicle Licensing and Registrations	18
Table 1.1 Number of Mechanically Propelled Vehicles under Current Licence by Taxation Class on 31 December, 1985 - 2010	20
Table 1.2A Number of Mechanically Propelled Vehicles by Taxation Class and Licensing Authority on 31 December 2009	21
Table 1.2B Number of Mechanically Propelled Vehicles by Taxation Class and Licensing Authority on 31 December 2010	22
Table 1.3 All Vehicles Licensed for the First Time by Taxation Class, 2000 - 2010	23
Table 1.4A Number of New Vehicles Licensed for the First Time by Taxation Class and Type of Fuel, 2009	24
Table 1.4B Number of New Vehicles Licensed for the First Time by Taxation Class and Type of Fuel, 2010	24
Table 1.5A Number of New Vehicles Licensed for the First Time by Taxation Class and Body Type, 2009	25
Table 1.5B Number of New Vehicles Licensed for the First Time by Taxation Class and Body Type, 2010	26
Table 1.6 Number of New Private Cars Licensed for the First Time by Type of Fuel, 2005 – 2010	27
Table 1.7 Number of New Private Cars Licensed for the First Time by Engine Capacity (cc), 2000 – 2010	28
Table 1.8A Number of New Private Cars Licensed for the First Time by Type of Fuel and CO ₂ Emission Band, 2009	29
Table 1.8B Number of New Private Cars Licensed for the First Time by Type of Fuel and CO ₂ Emission Band, 2010	29
Table 1.9 Number of New Private Cars Licensed for the First Time by Most Popular Make, 2009 - 2010	30
Table 1.10 Number of Second-hand (Imported) Private Cars Licensed for the First Time by Most Popular Make, 2009 - 2010	30
Table 1.11A Number of New Motor Cycles Licensed for the First Time by Engine Capacity (cc) and Make, 2009	31
Table 1.11B Number of New Motor Cycles Licensed for the First Time by Engine Capacity (cc) and Make, 2010	31
Table 1.12A Number of Used (Imported) Motor Cycles Licensed for the First Time by Engine Capacity (cc) and Make, 2009	32
Table 1.12B Number of Used (Imported) Motor Cycles Licensed for the First Time by Engine Capacity (cc) and Make, 2010	32

Table 1.13A	Number of New Vehicles Licensed in each Licensing Authority 2009 by Head of Population (2006)	33
Table 1.13B	Number of New Vehicles Licensed in each Licensing Authority 2010 by Head of Population (2006)	34
Table 1.14	Number of New Vehicles Licensed in each Licensing Authority, 2000 - 2010	35
Table 1.15A	New Tractors Licensed for the First Time by Licensing Authority and Make, 2009	36
Table 1.15B	New Tractors Licensed for the First Time by Licensing Authority and Make, 2010	37
Table 1.16	Number of Change of Vehicle Ownership Forms Processed by Licensing Authority, 2009 - 2010	38
Table 1.17	Number of Change of Vehicle Ownership Forms Processed, 2002 - 2010	39
Table 1.18A	Value Profile of New Cars Registered, 2009	40
Table 1.18B	Value Profile of New Cars Registered, 2010	41
Table 1.19A	Value Profile of Used (Imported) Cars Registered, 2009	42
Table 1.19B	Value Profile of Used (Imported) Cars Registered, 2010	43
Table 1.20A	Age Profile of Used (Imported) Cars Registered, 2009	44
Table 1.20B	Age Profile of Used (Imported) Cars Registered, 2010	44
Table 1.21	Country of Last Registration of Used (Imported) Cars, 2009 - 2010	45
Chapter 2 Driver and Vehicle Testing		
	Overview of Driver and Vehicle Testing	48
Table 2.1A	Number of Current Driving Licences by Type in each Licensing Authority at 31/12/2009	49
Table 2.1B	Number of Current Driving Licences by Type in each Licensing Authority at 31/12/2010	50
Table 2.2A	Number of Current Driving Licences by Type and Gender in each Licensing Authority at 31/12/2009	51
Table 2.2B	Number of Current Driving Licences by Type and Gender in each Licensing Authority at 31/12/2010	52
Table 2.3A	Number of Current Full Driving Licences by Age in each Licensing Authority at 31/12/2009	53
Table 2.3B	Number of Current Full Driving Licences by Age in each Licensing Authority at 31/12/2010	54
Table 2.4A	Number of Current Learner Permit Licences by Age in each Licensing Authority at 31/12/2009	55
Table 2.4B	Number of Current Learner Permit Licences by Age in each Licensing Authority at 31/12/2010	56
Table 2.5A	Number of Current Driving Licences by Age and Gender at 31/12/2009	57
Table 2.5B	Number of Current Driving Licences by Age and Gender at 31/12/2010	57
Table 2.6	Driving Test Statistics, 2005 - 2010	58

Key Facts

- ◆ In 2010 there were 1,872,715 private cars under current licence, down almost 30,000 from 2009.
- ◆ There were 84,907 new private cars licensed for the first time in 2010, of which less than one third were petrol.
- ◆ Four-fifths of the 84,907 new private cars licensed for the first time in 2010 were in emission bands A and B, the greenest emission bands.
- ◆ In 2010 there were 2,655,048 Irish driving licences held.
- ◆ There were 116,825 driving tests conducted in 2010. The average pass rate was 51%.
- ◆ In 2010 a total of 893,664 cars underwent the National Car Test (NCT). Over 94% of these passed after one or more tests.
- ◆ During 2010, a total of 285,439 penalty points were issued. Two-thirds of these were for speeding.
- ◆ Preliminary results show that there were 212 persons killed on Irish roads in 2010, compared with 238 in 2009.
- ◆ In 2009, the latest year for which detailed data is available, there were 9,742 persons injured on Irish roads.
- ◆ In 2010 there were 5,413 kilometres of national roads.
- ◆ Irish vehicles drove 43 billion kilometres in total in 2010. Three quarters of these kilometres were driven by private cars.
- ◆ Irish private cars drove 16,962 kilometres on average in 2010.
- ◆ In 2010, private cars owned by females drove 15,691 kilometres on average whilst private cars owned by males drove 17,406 kilometres on average.
- ◆ Private cars belonging to residents of County Roscommon were driven further on average than private cars of residents of any other county for the years 2008 to 2010.
- ◆ In 2010, Irish registered goods vehicles transported 125,865 thousand tonnes of freight.
- ◆ There were 4,783 licensed road hauliers in 2010.
- ◆ Nearly 24 million passengers flew to and from Irish airports in 2010. Over three-quarters of these were handled by Dublin airport alone.
- ◆ In both 2009 and 2010, more passengers flew on the Dublin - Heathrow route than on any other route.
- ◆ There were 126,153 tonnes of air freight flown to and from Irish airports in 2010.
- ◆ In 2010, some 199 million passengers were carried on scheduled bus services, 28 million passengers were carried on Luas and 38 million passengers were carried by Iarnród Éireann.
- ◆ Iarnród Éireann carried 568,000 tonnes of freight in 2010.
- ◆ In 2010, a total of 13,311 trading vessels arrived in Irish ports. They unloaded 31 million tonnes of goods and loaded 14 million tonnes of goods.
- ◆ In 2010, Dublin port was the busiest port, handling two-fifths of all goods received and nearly half of all goods forwarded.
- ◆ In 2010, a total of 3,079,000 passengers were carried to and from Irish ports on scheduled international ferry services.
- ◆ In 2010, the most important ferry route was the Dublin - Holyhead route, which handled just over half of all passengers on scheduled ferry services.

- ◆ In 2010 there were 25,309 small Public Service Vehicles (PSVs) licensed to operate. Almost half of these were based in Dublin.
- ◆ Between 2000 and 2010 the purchase price of petrol increased by 45% and the purchase price of diesel increased by 44%.
- ◆ In the same period, the purchase price of new and used cars decreased by 3.5%.

Chapter 1

Vehicle Licensing and Registrations

Vehicle Licensing and Registrations

Two separate sets of statistics are available on Irish vehicles. These are licensing and registration statistics.

Licensing statistics refer to the number of vehicles legally allowed to drive on Irish roads (i.e. vehicles for which motor tax has been paid). These are divided into two categories: vehicles under current licence, and vehicles licensed for the first time.

Statistics on vehicles under current licence are sourced from the National Vehicle and Driver File (NVDF). The NVDF is administered by the Department of Transport, Tourism and Sport. The Department publishes annually the number of vehicles under current licence (or Mechanically Propelled Vehicles under Current Licence, to give them their full title) in its *Irish Bulletin of Vehicle and Driver Statistics*.

Statistics on vehicles licensed for the first time are compiled monthly by the CSO. The CSO bases these statistics on data supplied by the Driver and Vehicle Computer Services Division of the Department of Transport, Tourism and Sport.

Associated with the licensing statistics are statistics on changes in vehicle ownership. These are compiled annually by the Department of Transport, Tourism and Sport as part of its routine administration of the NVDF.

Registration statistics refer to the number of vehicles registered for the first time (i.e. the number of licence plates issued). Registration statistics differ from licensing statistics in that not all vehicles registered need be licensed (for example tractors used exclusively on private land). Also, vehicles are not necessarily registered and licensed in the same month. Registration precedes licensing and this can lead to a time lag effect. Registration statistics are compiled monthly by the CSO based on data supplied by the Revenue Commissioners.

Vehicles under Current Licence

On 31 December 2008, vehicles under current licence were at an all time high of 2,497,568. By 31 December 2010, this figure had decreased to 2,416,387 (-3.3%).

In 2009, there were 1,902,429 private cars under current licence, representing 77.1% of the national fleet. There were 343,940 goods vehicles under current licence, 13.9% of the fleet. In 2010 the number of private cars under current licence decreased to 1,872,715, although their share within the fleet increased to 77.5%. Goods vehicles under current licence decreased to 327,096 and their share within their fleet decreased to 13.5%.

Vehicles Licensed for the First Time

The total number of vehicles licensed for the first time in 2009 was 149,389. This compares with 282,557 vehicles licensed for the first time in 2008, a decrease of 47.1%. In 2010, a total of 160,418 vehicles were licensed for the first time. This represented an increase of 7.4% on 2009. The licensing statistics also show that:

- ◆ In 2009, there were 73,125 new vehicles and 76,264 used (imported) vehicles licensed for the first time. In 2010 there were 103,076 new vehicles and 57,342 used (imported) vehicles licensed for the first time.
- ◆ There were 54,432 new private cars licensed for the first time in 2009 and 84,907 new private cars licensed for the first time in 2010.
- ◆ Of the 54,342 new private cars licensed for the first time in 2009, 22,802 (41.9%) were petrol and 30,645 (56.3%) were diesel. By comparison, of the 84,907 new private cars licensed for the first time in 2010, 27,124 (31.9%) were petrol and 53,998 (63.6%) were diesel.

- ◆ In 2009, Toyota (7,746), Ford (7,738), Volkswagen (6,127), Nissan (4,761) and Opel (3,978) were the top five most popular makes of private cars licensed for the first time. In 2010, Ford (10,650), Toyota (10,434), Volkswagen (9,987), Renault (9,632) and Opel (6,444) were the top five most popular makes respectively.
- ◆ There were 10,051 new goods vehicles licensed for the first time in 2009 and 10,510 new goods vehicles licensed for the first time in 2010.

Changes in Vehicle Ownership

In 2009, 736,821 change of vehicle ownership forms were processed by the Department of Transport, Tourism and Sport. In 2010, the corresponding figure was 789,109 forms. It should be noted that some vehicles may have changed ownership more than once in the reference year.

Vehicles Registered

There were 106,410 cars registered in 2009. Of these, 57,337 were new vehicles and 49,073 were used (imported) vehicles. In 2010, 129,327 cars were registered. Of these, 89,212 were new vehicles and 40,115 were used (imported) vehicles. The registration statistics also show that:

- ◆ Some 51.3% of all new car registrations in 2009 had a value in the range of €15,001 to €25,000, compared to almost 54.6% in 2010.
- ◆ Almost 95.0% of used (imported) cars registered in 2009 and 2010 originated from the United Kingdom.

Table 1.1 Number of Mechanically Propelled Vehicles under Current Licence by Taxation Class on 31 December, 1985 - 2010

Year									Number

Chapter 2

Driver and Vehicle Testing

Driver and Vehicle Testing

The tables in this chapter have been sourced from the Road Safety Authority. They comprise three separate groups of statistics: statistics on current driving licences; statistics on driving tests; and statistics on National Car Test (NCT) results.

Current Driving Licences

There were 2,648,407 current driving licences held at the end of 2009. Of these, 286,115 (10.8%) were learner permit licences. At the end of 2010 there were 2,655,048 driving licences held, of which 279,877 (10.5%) were learner permit licences. In addition:

- ◆ In 2009, of the 2,362,292 full licences held, 45.2% were held by females and 54.8% by males. Of the 286,115 learner permit licences, 50.7% were held by females and 49.3% by males.
- ◆ In 2010, of the 2,375,171 full licences held, 45.6% were held by females and 54.4% by males. Of the 279,877 learner permit licences, 51.5% were held by females and 48.5% by males.
- ◆ In 2009 and 2010, 72.9% and 72.8% respectively of full driving licences were held by individuals between 25 and 59 years of age. In the same years, 53.3% and 53.4% respectively of learner permit licences were held by individuals in this age bracket.

Driving Tests

There were 125,823 driving tests conducted in 2009 and 116,825 driving tests conducted in 2010. The pass rates for these years were 48.2% and 50.8% respectively. Further analysis shows:

- ◆ The average waiting time for a driving test in 2009 was 9 weeks compared with 9.5 weeks in 2010.
- ◆ In 2009, the pass rate for females was 45.7% and the pass rate for males was 50.3%. In 2010, the pass rate for females was 47.8% and the pass rate for males was 53.2%.
- ◆ Between 2009 and 2010, while the pass rate for applicants up to 21 years of age decreased from 50.3% to 44.2%, the pass rate for applicants 26 years and over increased from 45.6% to 53.1%.
- ◆ In 2009, the driving test centre with the shortest waiting time was Newcastle West (7 weeks) while the driving test centres with the longest waiting time were Dundalk and Buncrana (both 13 weeks).
- ◆ In 2010, Shannon had the shortest waiting time (7 weeks) while Gorey and Naas had the longest waiting time (both 12 weeks).

National Car Test (NCT) Results

There were 864,501 NCT tests conducted in 2009 and 893,664 NCT tests conducted in 2010. The initial pass rates for these years were 51.5% and 51.7% respectively. Also:

- ◆ Overall pass rates of 94.0% and 94.2% were achieved in 2009 and 2010 respectively.
- ◆ In 2009, Donegal was the test centre with the highest pass rate (59.3%) whereas Clifden was the test centre with the lowest pass rate (42.0%).
- ◆ In 2010, Cahirciveen had the highest pass rate (66.9%) whereas Clifden still had the lowest pass rate (43.5%).

Chapter 3

Penalty Points

Penalty Points

A penalty point system for driving offences was introduced in Ireland in 2002. Over 40 separate offences are currently covered, each incurring between 1 and 5 penalty points. Penalty points are endorsed by An Garda Síochána and recorded by the Department of Transport, Tourism and Sport.

During 2009, 324,685 penalty points were issued. Speeding accounted for 238,177 of these (73.4%). During 2010, the number of penalty points issued decreased to 285,439 (a reduction of 12.1% on the previous year). Of these, 188,788 (66.1%) were for speeding. Also of note:

- ◆ After speeding, driving while holding a mobile phone attracted the most penalty points in both 2009 and 2010 (29,273 and 42,949 points respectively).
- ◆ In both 2009 and 2010, in cases where gender was recorded, females incurred 29.9% of the penalty points whereas males incurred 70.1%.
- ◆ In 2009, the top five counties for penalty points issued to females were Dublin (20,340), Cork (7,563), Kildare (6,078), Meath (3,869) and Galway (3,573). For males, the top five counties were Dublin (52,423), Cork (19,354), Kildare (12,689), Meath (8,530) and Limerick (8,152).
- ◆ In 2010, for females, the top five counties for penalty points issued were Dublin (19,143), Cork (6,319), Kildare (4,918), Wexford (4,413) and Wicklow (3,990). For males, the top five counties were Dublin (53,072), Cork (17,513), Kildare (10,362), Wexford (8,590) and Meath (7,880).

Table 3.1 Number of Penalty Points issued by Offence Type, 2009 - 2010

Offence Type			Number		
	Penalty Points on Payment	Penalty Points on Conviction	2009	2010	% Change 2009-2010
Breach of duties on occurrence of an accident	m*	5	237	207	-13%
Breach of motorway outside lane driving rule	1	3	195	177	-9%
Careless Driving	m*	5	784	594	-24%

Chapter 4

Road Safety and Road Lengths

Road Safety and Road Lengths

Statistics on Road Safety have been sourced primarily from the Road Safety Authority. Detailed tables from the Road Safety Authority for 2008 and 2009 are presented. At the time of publication, final figures on road collisions for 2010 were not available. Instead, preliminary figures from the Department of Transport, Tourism and Sport are presented.

Statistics on national road length have been sourced from the National Roads Authority. These cover the years 2007 to 2010.

Road Safety 2010 - Preliminary Results

Preliminary results for 2010 indicate that there were 212 road fatalities. This represents a decrease of 10.9% on 2009 and continues the downward trend in fatalities observed since 2005. These preliminary results also indicate:

- ◆ In 2010, the month with the most fatalities was October (36), whilst the month with the least fatalities was December (10).

Road Safety 2008 and 2009 - Fatalities

In 2008, there were a total of 279 fatalities on Irish roads. Of these, 160 fatalities (57.3%) were car users. A further 49 (17.6%) were pedestrians. In 2009, there were a total of 238 fatalities on Irish roads (a decrease of 14.7% on 2008). Of these, 146 (61.3%) were car users and 40 (16.8%) were pedestrians. The statistics also show:

- ◆ There were 29 motor cyclist fatalities in 2008 and 25 motor cyclist fatalities in 2009.
- ◆ There were 13 pedal cyclist fatalities in 2008 and 7 pedal cyclist fatalities in 2009.
- ◆ In 2008, Counties Cork and Galway had the highest number of road fatalities (24 each) but in 2009, County Dublin had the highest number of road fatalities (31).
- ◆ In 2008, 27.4% of fatalities were female and 72.6% were male (where gender was recorded). Whereas in 2009, 23.5% of fatalities were female and 76.4% were male.
- ◆ In both 2008 and 2009, there were more male fatalities in the 25-34 age group than any other age group. There were more female fatalities in the 65 and over age group than any other age group.
- ◆ In both 2008 and 2009, more fatalities occurred on a Sunday than on any other day of the week.
- ◆ Total fatalities on Irish roads have been decreasing every year since 2005, when 396 fatalities occurred.

Road Safety 2008 and 2009 - Injuries

In 2008, there were a total of 9,758 injuries recorded on Irish roads. In 2009, there were a total of 9,742 injuries recorded (a decrease of 0.2% on 2008). Also:

- ◆ In both 2008 and 2009, car users made up the majority of those injured (71.2% and 73.0% of total injuries respectively).
- ◆ In both 2008 and 2009, more injuries were reported for County Dublin than any other county (20.4% and 20.8% of all injuries respectively).

- ◆ In 2008, 42.7% of injuries were to females and 57.3% to males (where gender was recorded). In 2009, 43.0% of injuries were to females and 57.0% to males (where gender was recorded).

National Road Length

In 2009, there were 5,444 kilometres of national roads. In 2010 there were 5,413 kilometres of national roads. Furthermore:

- ◆ In 2009, there were 663 kilometres of motorway (12.2% of the whole network). In 2010 the total length of motorway increased to 900 kilometres (16.6% of the network).
- ◆ In 2010, Cork County Local Authority had more length of national roads than any other local authority (496 kilometres). However, Kildare Local Authority had most length of motorway (108 kilometres).

Chapter 5

Road Traffic Volumes

Road Traffic Volumes

The tables contained in this chapter have been compiled using odometer readings sourced from the National Car Test (NCT) service and the Commercial Vehicle Roadworthiness Testing Service. These odometer readings have been matched to a National Vehicle Driver File provided by the Department of Transport, Tourism and Sport. This matching process allows an estimate to be made of the total vehicle kilometres driven annually by Irish registered vehicles. Supplementary traffic counter data obtained from the National Roads Authority allows estimates to be made of the vehicle kilometres driven monthly.

Summary traffic volume estimates are presented for 2000 to 2007. These estimates, based on both the traffic counter data and the latest odometer readings available, replace previously published estimates for these years. Detailed traffic volume estimates are also presented for 2008 that also replace previously published estimates. New traffic volume estimates are presented for 2009 and 2010. These new estimates are subject to revision in subsequent years, as further odometer data becomes available.

The traffic volume estimates consist of three key statistics. These are vehicle population, vehicle kilometres and average vehicle kilometres (either annual or monthly). The vehicle population is the number of vehicles under current licence for the reference period. It differs from the Department of Transport, Tourism and Sport's statistics on the number of vehicles under current licence (*see Chapter 1*). The Department's statistics represent the number of vehicles under licence at a single point in time, whereas the vehicle population represents the number of vehicles continuously under licence for the reference period (year or month). Vehicle kilometres are an estimate of the total kilometres driven by the vehicle population. Average vehicle kilometres are total vehicle kilometres divided by the vehicle population.

It is important to note that the traffic volume estimates cover vehicle kilometres driven by Irish registered vehicles in both national and international jurisdictions. Also, the traffic volume estimates exclude vehicle kilometres driven by foreign vehicles on Irish roads. Furthermore, where the county of the owner of the vehicle is given, it cannot be assumed that the vehicle kilometres are driven exclusively (or indeed at all) in that county. Where the gender of the owner is given, it cannot be assumed that the owner and the driver are necessarily the same.

Note also that when these traffic volume estimates were compiled, only very limited odometer data was available for motor cycles, tractors and machinery. Therefore, traffic volume estimates for these types of vehicles cannot be considered reliable.

Summary Traffic Volumes 2000 to 2010

From 2000 to 2010, the number of Irish registered vehicles under current licence increased from 1,666,744 to 2,437,698 (46.3%). In the same period, the estimated kilometres travelled by these vehicles increased from 30,798 million to 43,010 million (39.7%). The average annual kilometres driven per vehicle decreased from 18,478 to 17,644 (4.5%). The results also show:

- ◆ The number of Irish registered vehicles under current licence peaked in 2008 at 2,502,429.
- ◆ The total vehicle kilometres driven by Irish registered vehicles also peaked in 2008 at 44,857 million.
- ◆ The average annual kilometres driven for all vehicles peaked in 2004 at 19,173.
- ◆ Private cars accounted for more vehicle kilometres than all other vehicle types combined. In 2000, private cars drove 23,086 million kilometres (75.0% of all kilometres). In 2010, private cars drove 32,061 million kilometres (74.5% of all kilometres).
- ◆ After private cars, goods vehicles account for the most kilometres. In 2000, goods vehicles drove 4,687 million kilometres (15.2% of all kilometres). In 2010, goods vehicles drove 6,870 million kilometres (16.0% of all kilometres).

- ◆ For all years in the series, large public service vehicles (PSVs) were consistently driven more intensively than any other vehicle type. Large public service vehicles drove on average 37,919 kilometres in 2000 and 37,056 kilometres in 2010.
- ◆ For all years in the series, tractors and machinery were consistently driven less intensively than any other vehicle type. Tractors and machinery drove on average 16,301 kilometres in 2000 and 14,530 kilometres in 2010.

Detailed Traffic Volumes 2008 to 2010

Detailed estimates of traffic volumes are only available from 2008 to 2010. In 2008, as already mentioned, total vehicle kilometres were 44,857 million. In 2009, total vehicle kilometres were 44,277 million. In 2010, total vehicle kilometres were 43,010 million. The detailed tables also show:

- ◆ In 2008, 56.3% of all vehicle kilometres were driven by vehicles with petrol engines, 43.4% by vehicles with diesel engines and 0.3% by vehicles with other fuel types. In 2009, the corresponding percentages for petrol, diesel and other fuel types were 54.7%, 45.0% and 0.3% respectively. In 2010, the corresponding percentages were 52.6%, 47.0% and 0.5% respectively.
- ◆ For each of the years 2008, 2009 and 2010, vehicles with diesel engines drove significantly further, on average, than vehicles with petrol engines.
- ◆ For each of the years 2008, 2009 and 2010, private cars belonging to residents of County Roscommon were driven further on average than private cars of residents of any other county.
- ◆ For each of the years 2008, 2009 and 2010, private cars belonging to residents of County Dublin were driven less on average than private cars of residents of any other county.
- ◆ In 2008, more vehicle kilometres were driven in May than in any other month. However, in 2009 and 2010 more vehicle kilometres were driven in August than any other month.
- ◆ In 2008, 2009 and 2010, private cars in the 1601-1800cc engine capacity range had highest average annual vehicle kilometres for petrol fuel types. Whereas private cars in the 1401-1600cc engine capacity range had highest average annual vehicle kilometres for diesel fuel types.
- ◆ In 2008, private cars with female owners drove 15,705 kilometres on average. In 2009 they drove 15,924 kilometres on average. In 2010 they drove 15,961 kilometres on average. The corresponding averages for private cars with male owners were 17,291 kilometres, 17,445 kilometres and 17,406 kilometres respectively.
- ◆ In 2008, 2009 and 2010 private cars with female owners living in County Leitrim drove further on average than private cars with female owners living in all other counties.
- ◆ In 2008, private cars with male owners living in County Longford drove further on average than private cars with male owners living in all other counties. In 2009 and 2010 private cars with male owners living in County Roscommon drove further on average.
- ◆ Goods vehicles with an unladen weight of 12.5 tonnes and over were driven further on average than goods vehicles in other unladen weight classes. On average, Goods vehicles with an unladen weight of 12.5 tonnes and over were driven 51,232 kilometres in 2008, 51,523 kilometres in 2009 and 50,103 kilometres in 2010.

Chapter 6

Road Freight Transport

Road Freight Transport

The tables in this chapter are based primarily on the results of the CSO's "National Survey of Transport of Goods by Road". Information concerning the transport activity of Irish registered goods vehicles is collected from a random sample of vehicles each week of the year. The information is compiled and published on an annual basis. Full details for each year are available in the CSO's Road Freight Transport Survey publication. Supplementary information on licensed hauliers is sourced from the Department of Transport, Tourism and Sport.

The principle measures used to assess road transport activity are the quantity of work done (given in tonne-kilometres) and the weight of goods carried (given in tonnes). Statistics on the number of freight transport journeys and road freight vehicle kilometres are also used. It should be noted that the road freight vehicle kilometres are not directly comparable with goods vehicle kilometres presented in Chapter 5. The National Survey of Transport of Goods by Road is limited to goods vehicles of at least 2 tonnes unladen weight. Furthermore, it is limited to goods vehicles designed and used to carry freight (many vehicles taxed as goods vehicles have other commercial purposes).

In 2009, Irish registered goods vehicles reported 12,071 million tonne-kilometres of transport activity. They carried 148,328 tonnes of freight. In 2010, Irish registered goods vehicles transported 10,924 tonne-kilometres of freight. They delivered 125,865 tonnes of freight. The results also show:

- ◆ Road freight activity peaked in 2007, both in terms of tonnes carried and tonnes-kilometres. After 2007 road freight activity declined steeply.
- ◆ In 2009, Irish registered goods vehicles travelled 1,585 million kilometres, in the course of collecting and delivering freight. In 2010, they travelled 1,457 million kilometres.
- ◆ In 2009, there were 12,659 laden freight journeys undertaken. In 2010, there were 11,177 such journeys.
- ◆ In both 2009 and 2010, the main type of work done in terms of tonnes-kilometres was import/export work. Import/export work accounted for 28.5% of all tonnes-kilometres in 2009 and 25.0% in 2010.
- ◆ In both 2009 and 2010, the main type of work done in terms of tonnes carried was delivery of goods to road works or building sites. This work accounted for 37.1% of all tonnes carried in 2009 and 28.5% of all tonnes carried in 2010.
- ◆ In 2009, businesses that declared themselves 'transport' or 'distribution' businesses accounted for the greater part of all road freight activity. Together, these businesses accounted for 83.5% of all tonnes-kilometres and 72.3% of all tonnes carried.
- ◆ In both 2009 and 2010, Dublin was the most significant region for inter-regional transport. More freight was carried by road to and from Dublin than any other region. For intra-regional transport, the South-West region was most significant. More freight was transported internally within the South-West region than any other region.
- ◆ In both 2009 and 2010, the principal goods carried in terms of tonnes-kilometres were foodstuffs and in terms of tonnes carried were quarry products, metal ores and peat.
- ◆ In 2009 there were 5,296 licensed hauliers in the state but this decreased to 4,783 in 2010.

Table 6.1 Road Freight Transport Statistics Summary, 1998 - 2010

Year	Tonne-Kilometres	Tonnes Carried	Vehicle Kilometres	Average Number of Vehicles	Laden Journeys

Chapter 7

Aviation Transport

Aviation Transport

The data in this chapter have been sourced directly from Irish airports. For statistical purposes, the airports are divided into two categories. There are the main airports, that handle at least 150,000 passengers per year and there are secondary airports, that handle at least 15,000 passengers per year and less than 150,000 passengers (airports handling less than 15,000 passengers per year are not obliged to report statistical data). In Ireland, in 2009 and 2010, there were six main airports (Cork, Dublin, Galway, Kerry, Knock and Shannon) and four secondary airports (Connemara, Donegal, Sligo and Waterford). The main airports report detailed statistical data to the CSO on a monthly basis. The secondary airports report summary data on an annual basis. Table 1 in this chapter presents results for both the main and secondary airports. The subsequent tables present results for the main airports only. All the tables have been compiled by the CSO.

The statistics presented in these tables are flight stage statistics, not origin/destination statistics. This distinction is an important one. Flight stage statistics represents the number of passengers or the tonnes of freight onboard the aircraft when they arrive or depart the airports. Whereas origin/destination statistics represents the number of passengers or tonnes of freight disembarking/embarking and unloading/loading respectively at the airports. The principal difference between the two concepts is transit passengers (and transit freight). Transit passengers that remain onboard the aircraft are counted twice in flight stage data (once arriving and once departing). However, they are not counted at all in origin/destination data. A second difference is that flight stage statistics are concerned with the last airport the aircraft flew from or the next airport it is flying to. However, origin/destination statistics are only concerned with the ultimate origin or final destination of the aircraft. This distinction accounts for differences between the statistics presented in this chapter and origin/destination statistics published by other bodies.

In 2009, a total of 27.2 million passengers passed through Irish airports (a decrease of 13.1% on 2008). In 2010, a total of 23.7 million passengers passed through the airports (a decrease of 13.0% on 2009). Further analysis of the 2009 and 2010 data shows that:

- ◆ In both 2009 and 2010 Dublin airport dominated air traffic, handling 75.4% and 77.8% respectively of all passengers.
- ◆ After Dublin, Cork airport was the second most important airport in both 2009 and 2010, handling 10.2% of all passengers in both years.
- ◆ In 2009, July was the busiest month for Dublin airport and August was the busiest month for Cork airport, in terms of passengers handled. In 2010, July was the busiest month for both airports.
- ◆ In 2009, 95.1% of all passengers arriving at or departing the six main Irish airports were on international flights. In 2010, 96.9% of all passengers arriving or departing were on international flights.
- ◆ In 2009, there were 233,528 flights to and from the six main Irish airports. In 2010, there were 209,316 flights to these airports (-10.4%).
- ◆ In 2009, 117,175 tonnes of freight were flown to and from the main Irish airports. In 2010, 126,153 tonnes of freight were flown to and from the airports.
- ◆ In both 2009 and 2010, the top three routes for Dublin airport, in terms of passenger numbers, were Heathrow, Gatwick and Stansted respectively.
- ◆ In 2009, 87.3% of passengers on international flights were travelling to or from Europe and 8.1% were travelling to and from North America. In 2010, 86.8% of passengers on international flights were travelling to or from Europe and 8.1% were travelling to and from North America.

- ◆ In both 2009 and 2010, the Boeing 737-800 aircraft carried more passengers to and from the main Irish airports than any other aircraft type. In 2009, Boeing 737-800 carried 40.1% of all passengers. In 2010, Boeing 737-800 carried 42.0% of all passengers.

Table 7.1 Total Passenger Numbers¹ handled by Airport, 2005 - 2010

Airport	2005	2006	2007	2008	2009	2010

Chapter 8

Public Transport (Bus, Luas and Rail)

Public Transport (Bus, Luas and Rail)

This chapter presents statistics on bus, Luas and rail transport. The data on buses are provided by Dublin Bus, Bus Éireann and the Department of Transport, Tourism and Sport. The data on the Luas are provided by the Railway Procurement Agency and cover separately the Red Line (from Tallaght to the Point, Dublin) and the Green Line (from Brides Glen to St Stephen's Green, Dublin). The data on rail transport are provided by Iarnród Éireann. Supplementary information on the DublinBikes scheme is provided by JCDecaux.

Buses

In 2009 there were 212.9 million passengers carried on scheduled bus services. These passengers travelled 159.0 million kilometres. In 2010 there were 198.6 million passengers carried on scheduled bus services, travelling a total of 152.8 million kilometres. The data also show that:

- ◆ Thursday was the busiest day of both 2009 and 2010 for Dublin Bus in terms of passengers carried.
- ◆ Dublin Bus had a fleet of 1,048 buses in 2009, this declined to 980 buses in 2010.
- ◆ Bus Éireann carried 84.6 million passengers in 2009 and 79.6 million passengers in 2010, a drop of 5 million passengers.
- ◆ The Bus Éireann fleet consisted of 695 buses in 2009 and 672 buses in 2010.

Luas

The Luas Red Line handled 13.6 million passengers in 2009 and 15.6 million passengers in 2010. The Luas Green Line handled 11.8 million passengers in 2009 and 12.0 million passengers in 2010. Furthermore:

- ◆ On average, Friday was the busiest day in terms of passenger numbers for both the Red and Green Lines for 2009 and 2010.
- ◆ December was the busiest month in terms of passenger numbers handled for both the Red and Green Lines in 2009 and 2010.

Rail

In 2009, Iarnród Éireann carried 38.8 million passengers. This included 17.5 million passengers on DART. In 2010 Iarnród Éireann carried 38.2 million passengers, including 16.8 million passengers on DART. In addition Iarnród Éireann carried 631,000 tonnes of freight in 2009 and 568,000 tonnes of freight in 2010.

Dublinbikes

In 2010, the first year for which complete information is available, 1,221,119 journeys were made on Dublinbikes.

Table 8.1 Summary of Scheduled Bus Passenger Services, 2003 - 2010

Scheduled services	Thousands

Chapter 9

Maritime Transport

Maritime Transport

The tables in this chapter are based on the CSO's annual release "Statistics of Port Traffic". All the data have been sourced directly from the various port authorities. They cover the transport activities of all commercial sea-going vessels, of at least 100 gross tonnes, that load or unload goods in Irish ports.

In 2009, Irish ports handled 41.8 million tonnes of goods. Of these, 29.0 million tonnes were goods received and 12.8 million tonnes were goods forwarded. In 2010, Irish ports handled 45.1 million tonnes of goods, of which 30.7 million tonnes were received and 14.4 million tonnes were forwarded. The tables also show:

- ◆ In 2009 and 2010 foreign trade accounted for 95.3% and 96.1% respectively of all goods handled.
- ◆ In 2009 and 2010, in terms of tonnage of goods handled, trade with Great Britain and Northern Ireland accounted for 42.5% and 41.5% respectively of all maritime foreign trade.
- ◆ In 2009, 13,223 vessels arrived in Irish ports. In 2010, 13,311 vessels arrived.
- ◆ Dublin port is the busiest port. In 2009, it handled 43.7% of all goods received and 46.3% of all goods forwarded. By comparison, in 2010 Dublin port handled 41.5% of all goods received and 47.3% of all goods forwarded.
- ◆ In both 2009 and 2010, Dublin port was the biggest port for roll-on/roll-off activity and lift-on/lift-off activity. Cork was the biggest port for liquid bulk handled while Shannon-Foynes was the biggest port for dry bulk handled.
- ◆ In 2009, scheduled international ferry services disembarked 1,439,000 passengers in Irish ports and embarked 1,436,000 passengers. In 2010, there were 1,544,000 passengers disembarked and 1,535,000 passengers embarked.
- ◆ In both 2009 and 2010, Dublin handled the most scheduled passengers, accounting for 52.0% and 57.1% respectively of all passengers handled.
- ◆ In 2009, 162 cruise ships visited Irish ports carrying 159,466 passengers. In 2010, a total of 173 cruise ships visited carrying 206,609 passengers.
- ◆ In both 2009 and 2010, more cruise ship passengers visited in August than any other month.

Chapter 10

Small Public Service Vehicle Transport

Small Public Service Vehicle Transport

Small Public Service Vehicles (PSVs) consist of taxis, hackneys and limousines. The tables in this chapter are sourced from the Taxi Regulator.

In 2009 there were 26,937 small PSVs licensed to operate. These consisted of 21,135 taxis, 4,497 hackneys and 1,305 limousines. In 2010 there were 25,309 small PSVs consisting of 20,321 taxis, 3,772 hackneys and 1,216 limousines. An analysis of the data also shows that:

- ◆ In 2009, 48.0% of small PSVs were based in Dublin. In 2010, 48.4% of small PSVs were based in Dublin.
- ◆ For both 2009 and 2010, Toyota was the most popular make of car for taxis and hackneys.
- ◆ In 2009, 7.4% of all taxis were wheelchair accessible. In 2010, just 6.9% of all taxis were wheelchair accessible.
- ◆ Some 31.4% of small PSVs were under 5 years old in 2009 compared to 28.6% of small PSVs in 2010.

Table 10.1A Age Profile of Small Public Service Vehicle Fleet by Type, 2009

Age	Number				Total
	Hackney	Limousine	Taxi	Wheelchair Accessible Taxi	
< 1 year of age	49	8	168	7	232
1 to < 2 years of age	199	96	740	71	1,106
2 to < 3 years of age	333	163	1,348	152	1,996

Chapter 11

Prices

Prices

The tables and charts presented in this final chapter are sourced from the monthly and annual average Consumer Price Index (CPI) and the sub indices that relate to Transport.

The base period for the annual indices is Year 2000 (= 100).

Annual CPI

The annual average tables look at the change in the annual average indices for the period 2000 to 2010. They show that the *All items* CPI increased by 27.6% in this period. Detailed transport price indices show that:

- ◆ The purchase price of petrol increased by 44.8% and the purchase price of diesel increased by 44.0% over the period.
- ◆ The purchase price of new and second-hand motorcars decreased by 3.5%.
- ◆ The price of bus fares increased by 59.0%.
- ◆ The price of taxi fares increased by 58.9%.
- ◆ The price of rail fares increased by 54.5%.
- ◆ Sea transport increased by 19.1%.
- ◆ Air transport increased by 16.2%.
- ◆ The price of motor car insurance peaked in 2002 (+33.2%) but by 2010 had decreased by 6.4% from year 2000.

Monthly CPI

The monthly tables present indices from January 2009 to December 2010 with the base period being January 2000. These tables show the seasonal variation of some prices, most notably air travel, which shows prices are at their lowest every January and peaking every August.
