Introduction

This report has been prepared by the Central Statistics Office for the Minister for Health and Children in accordance with the provisions of Section 2 of the Vital Statistics and Births, Deaths and Marriages Registration Act, 1952 and Section 73 of the Civil Registration Act 2004.

Births

There were 18,844 births registered in quarter 2 of 2009, 9,588 males and 9,256 females, a decrease of 196 on the quarter 2 figure of 2008. The quarter 2 2009 total is 36.6% higher than in 2000 when 13,794 babies were registered. *See tables 1 and 3.*

The 18,844 births represent an annual birth rate of 16.9 per 1,000 of the population, 0.3 below quarter 2 of 2008. This rate is 2.3 per 1,000 population higher than in 2000. *See table 2 and fig. 1.*

Birth order

A total of 7,858 births (42.0%) were to first time mothers in quarter 2 of 2009. This compares to 5,427 (39.5%) first births registered in quarter 2 2000. Second time mothers had 6,011 births (32.1%). *See table 4 and fig. 2.*

Age of mothers

The average age of mothers for births registered in quarter 2 2009 was 31.3 years, an increase of 0.1 on quarter 2 2008, and 1 year more than in quarter 2 2000. The average age of mothers having their first child in quarter 2 2009 was 29.1 years. *See tables 1, 7 and fig. 3.*

Births outside marriage

There were 6,114 births registered as outside marriage in quarter 2 of 2009. This accounted for 32.4% of all births, the same as quarter 2 2008. The highest percentage of births outside marriage occurred in Limerick City at 53%, while the lowest percentage was in Leitrim at 19%. In quarter 2 2000, 4,260 births were registered outside marriage or 30.9% of all births. *See tables 1 and 6.*

Deaths

There were 7,020 deaths registered in quarter 2 2009, 3,647 males and 3,373 females. This represents an annual death rate of 6.3 per 1,000 population. The quarter 2 2009 total is almost 7.3% lower than in 2008 when 7,569 deaths were registered. *See tables 1, 9 and fig. 1.*

Age at death

There were 52 infant deaths registered in quarter 2 2009 giving an infant mortality rate of 2.8 deaths per 1,000 live births. Neonatal deaths are deaths of infants at ages under 4 weeks. There were 41 neonatal deaths registered in quarter 2 2009, a neonatal mortality rate of 2.2 deaths per 1,000 live births. *See tables 1, 2 and fig. 4.*

Fig. 4 Infant and neonatal mortality rates per 1,000 live births

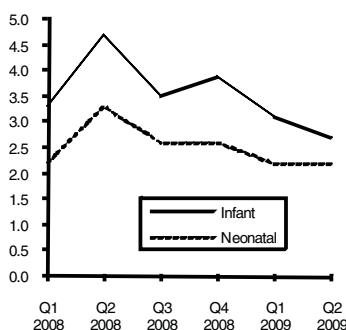

Fig. 5 Death rates for ages 65 & over per 1,000 relevant population

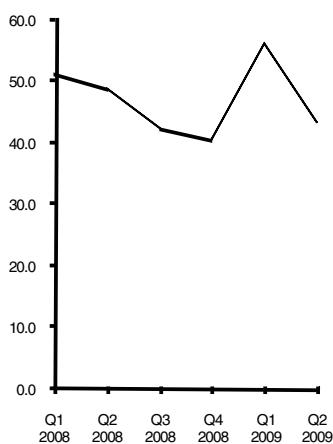

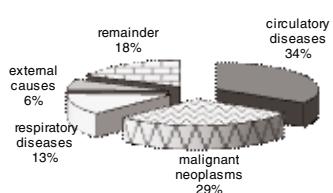

Fig. 6 Principal causes of death Q2 2009

There were 5,356 deaths of persons aged 65 and over registered in quarter 2 2009. This represents an annual death rate of 43.3 per 1,000 population aged 65 and over. See tables 1, 2 and fig. 5.

Cause of death

- **Diseases of the Circulatory System:**

Diseases of the Circulatory System accounted for 2,374 deaths, or an annual rate of 2.1 per 1,000 population. Of these, 1,261 were due to Ischaemic Heart Disease and 516 to Cerebrovascular Disease. See table 11, and fig. 6.

- **Malignant Neoplasms:**

There were 2,024 deaths from malignant neoplasms. This is equivalent to an annual rate of 1.8 per 1,000 population. See table 11, and fig. 6.

- **Diseases of the Respiratory System:**

Deaths from pneumonia numbered 339; chronic lower respiratory disease accounted for 385 deaths and 180 deaths resulted from other respiratory diseases. See table 11, and fig. 6.

Natural increase

The natural increase in the population (births minus deaths) for quarter 2 2009 was 11,824. This represents a rate of 10.6 per 1,000 population, 0.2 above quarter 2 of 2008. See tables 1 and 2.

Marriages

The number of marriages registered during the quarter was 5,342, equivalent to an annual marriage rate of 4.8 per 1,000 population, 0.1 below the corresponding quarter of 2008. The quarter 2 2009 total is 14.4% higher than in quarter 2 2008 when 4,670 marriages were registered. See tables 1, 2 and fig. 1.

Population

The estimated population in April 2009 was 4,459,300.

Methodology

All figures in this report are classified by quarter of registration. Delay in the registration of some births, deaths and marriages result in them being included in a later period in these quarterly reports.

Changes in methodology

The extension of the Limerick City boundary, which came into operation on 1st March 2008, has been taken into account in the compilation of the statistics from the Second Quarter of 2008. As a result, data for Limerick City and County are not directly comparable with any quarter prior to the Second Quarter 2008.

This publication continues with the 3 major changes in the methods by which mortality statistics are compiled. These changes were introduced in the Vital Statistics First Quarter 2007 publication.

- 1) Underlying Cause of Death is classified according to International Classification of Diseases, Version 10 (ICD10) instead of to International Classification of Diseases, Version 9 (ICD9). In addition, this and future publications will incorporate certain official updates to ICD-10. In particular, mental and behavioural disorders due to psychoactive substance use (F10-F19), with mention of intestinal infectious diseases (A00-A09), accidental, intentional self and undetermined intent poisoning by and exposure to noxious substances (X40-X49, X60-X69, Y10-Y19) or assault by chemical or noxious substance (X85-X90), are now coded to the latter.

<http://www.who.int/classifications/icd/OfficialWHOUpdatesCombined1996-2008VOLUME2.pdf>

- 2) Deaths where there was not an inquest have been coded using the automated coding system developed by the U.S National Centre for Health Statistics (NCHS). Previously the Underlying Cause of Death was chosen manually for all deaths.
- 3) All deaths registered in the quarter have been included in the statistics, in some cases with a provisional cause of death. Prior to quarter 1 of 2007 the practice was not to include deaths in the quarterly statistics until the cause of death had been definitely established.

Because of these changes, caution should be taken in directly comparing these mortality statistics with those of previous quarters. Many countries have found that moving to ICD10 does affect certain specific categories of causes of death. In particular, a significant drop in the number of deaths attributed to pneumonia and bronchopneumonia has been observed in some countries after moving to ICD10. These deaths were instead assigned to other conditions included on the death certificate.

The effect of the third change above has been to increase the number of deaths in our statistics as compared with previous years. Statistics for deaths due to external causes are particularly affected by this change. The previous method meant that some deaths were included in a later quarter of the year from when they had been registered, because of the delay involved in establishing a definite cause of death.

Infant mortality rates: Deaths of infants under one year per 1,000 live births, classified by area of residence of mother.

Neonatal mortality rates: Deaths of infants under 28 days per 1,000 live births, classified by area of residence of mother.

Infant and neonatal mortality rates in some areas, based on small numbers are subject to considerable fluctuation and caution should be exercised in their interpretation.

Appendix

Glossary of terms

NUTS III Regional Authority areas

Border, Midland, West, Dublin, Mid-East, Mid-West, South-East, South-West

Border: Cavan, Donegal, Leitrim, Louth, Monaghan, Sligo.

Midland: Laois, Longford, Offaly, Westmeath.

West: Galway City, Galway County, Mayo, Roscommon.

Dublin: Dublin City, South Dublin, Fingal, Dun Laoghaire-Rathdown.

Mid-East: Kildare, Meath, Wicklow.

Mid-West: Clare, Limerick City, Limerick County, North Tipperary.

South-East: Carlow, Kilkenny, South Tipperary, Waterford City, Waterford County, Wexford.

South-West: Cork City, Cork County, Kerry.
