Contents

Tables	Page
Chapter 1 - General Summary 2011	7
1.1 Estimated population in thousands in each year 1851-2011	11
1.2 Estimated population (thousands) by gender and age-group, 2007-2011	12
1.3 Population by sex of each County and City according to the Census of Population, 2011	13
1.4 Births, deaths and natural increase and their rates per 1,000 population 1864-2011	14
1.5 Births and deaths by gender 1864-2011	14
1.6 Births and deaths by month and quarter of occurrence 2002-2011	15
1.7 Births, by date of occurrence, in each month during 2011	16
1.8 Deaths, by date of occurrence, in each month during 2011	18
Chapter 2 - Births 2011	21
2.1 Total period of fertility rate (TPFR) and age specific fertility rates (ASFR) 1965-2011	28
2.2 Age specific and total period fertility rates by area of residence of mother in 2011	29
2.3 Births by area of residence, sex of infant and age at maternity in 2011	30
2.4 Births by area of residence showing the numbers in each quarter in 2011	32
2.5 Births in 2011, classified by sex and age of mother at maternity and showing the number of births outside marriage/civil partnership	33
2.6 Total births in 2011 classified by area of residence and age of mother at maternity	34
2.7 Births outside marriage/civil partnership in 2011 classified by area of residence and age of mother at maternity	35
2.8 Total births in 2011, classified by age of mother at maternity and number of previous liveborn children	36
2.9 Births outside marriage/civil partnership in 2011, classified by age of mother at maternity and number of previous liveborn children	37
2.10 Births within marriage/civil partnership in 2011, classified by age of mother at maternity and year of marriage/civil partnership	38
2.11 First births within marriage/civil partnership in 2011, classified by age of mother at maternity and year of marriage/civil partnership	39
2.12 Births in 2011, classified by period of gestation and age of mother at maternity	40
2.13 Births in 2011, classified by age of mother at maternity and birthweight	40
2.14 Births in 2011, classified by period of gestation and birthweight	40
2.15 Births in 2011, classified by sex of infant and birthweight	41
2.16 Births in 2011, classified by sex of infant and period of gestation	41

Tables

2.17	Births in 2011 showing place of occurrence and area of normal residence	42
2.18	Births in 2011 by day of occurrence and mothers' usual residence	43
2.19	Births per 1,000 women in each age-group, Ireland, England and Wales, 2011	44
2.20	Number of multiple births and the number of twins per 1,000 maternities 1986-2011	44
2.21	Births by area of residence of mother during 2011 showing births outside marriage/civil partnership separately	45
2.22	Average age at maternity by area of residence of mother during 2011 showing births inside and outside marriage/civil partnership separately	46
2.23	Births inside and outside marriage/civil partnership and rates per 1,000 population, 1864-2011	47
2.24a	Total births in 2011 classified by nationality of mother and marital status	48
2.24b	Total births in 2011 classified by sex of infant and nationality of parents	48

Chapter 3 - Deaths 2011

49

3.1	Average annual number of deaths for the period 1864-2010 and the number of deaths in the years 2000-2011 classified by sex and age-group	58
3.2	Average annual death rates for the period 1864-2010 and death rates for the years 2000-2011 per 1,000 corresponding population classified by sex and age-group	60
3.3	Crude and standardised death rates by area of residence of deceased in 2011	62
3.4	Deaths in 2011 classified by marital status and sex in certain age-groups	63
3.5	Deaths by area of residence in 2011 classified by place of occurrence	64
3.6	Deaths in 2011 classified by area of residence and age-group	65
3.7	Deaths in 2011 in Ireland and Northern Ireland classified by underlying cause of death and with rates per 100,000 population	66
3.8	Deaths in 2011 classified by underlying cause of death and sex	67
3.9	Deaths in 2011 classified by underlying cause of death, sex and age-group	68
3.10	Percentage of deaths in 2011 classified by underlying cause of death, sex and age-group	69
3.11	Deaths in 2011 classified by underlying cause of death, area of residence and sex	70
3.12	Standardised death rates per 1,000 population by area of residence of deceased in 2011 for certain underlying causes of death	75
3.13	Deaths from neoplasms (C00-D48) in 2011 classified by underlying cause of death and sex	76
3.14	Deaths from malignant neoplasms (C00-C97) in 2011 classified by underlying cause of death, sex and age-group	77
3.15	Deaths from malignant neoplasms (C00-C97) in 2011 classified by area of residence and underlying cause of death	78
3.16	Deaths from diseases of the circulatory system (I00-I99) in 2010 classified by underlying cause of death and sex	79
3.17	Deaths from diseases of the circulatory system (I00-I99) in 2010 classified by underlying cause of death, sex and age-group	80
3.18	Deaths from diseases of the circulatory system (I00-I99) in 2011 classified by area of residence and underlying cause of death	81
3.19	Deaths from diseases of the respiratory system (J00-J99) in 2011 classified by underlying cause of death and sex	82

Tables

3.20	Deaths from diseases of the respiratory system (J00-J99) in 2011 classified by underlying cause of death, sex and age-group	83
3.21	Deaths from diseases of the respiratory system (J00-J99) in 2011 classified by area of residence and underlying cause of death	84
3.22	Deaths from external causes (V01-Y89) in 2011 classified by underlying cause of death and sex	85
3.23	Deaths from external causes (V01-Y89) in 2011 classified by underlying cause of death, sex and age-group	86
3.24	Deaths from external causes in 2011 classified by area of residence	87
3.25	Deaths from non transport accidents in 2011 classified by place of occurrence	88
3.26	Deaths from external causes in the home and residential institutions in 2011 classified by sex and age-group	88
3.27	Deaths in 2011 from external causes classified by the injury, poisoning or certain other consequences	89
3.28	Deaths in 2011 classified by the underlying cause of death and sex in the Eurostat 65 cause of death shortlist	90
3.29	Deaths where there was mention of mental and behavioural disorders classified by the underlying cause of death, sex and age-group, 2011	92
3.30	Suicides classified by county of residence of deceased, 2008-2011	93

Chapter 4 - Infant Mortality, Stillbirths and Maternal Mortality 2011

4.1	Live births, stillbirths and infant mortality, 1957 to 2011	102
4.2	Live birth, stillbirth and infant mortality rates, 1957 to 2011	103
4.3	Stillbirths and infant mortality 2011 per 1,000 live births	104
4.4	Infant mortality rates per 1,000 live births by detailed age, 1941 to 2011	105
4.5	Comparable stillbirth and perinatal mortality rates in Ireland and neighbouring countries 1984-2011	105
4.6	Infant mortality - deaths under 1 year in 2011, classified by sex, age and cause	106
4.7	Infant mortality - deaths under 1 year in 2011, classified by age under 4 weeks, age 4 weeks to one year, sex and cause, assigned to each province	108
4.8	Infant mortality - deaths under 1 year in 2011, classified by sex and cause, assigned to each Regional Authority	109
4.9	Infant mortality - deaths under 1 year in 2011, classified by age-group and cause, assigned to each Regional Authority	110
4.10a	Stillbirths in 2011, classified by sex and cause and with mention of affecting maternal factors	111
4.10b	Stillbirths in 2011, classified by maternal factors	111
4.11	Stillbirths in 2011, classified by age of mother, sex of child and period of gestation	112
4.12	Stillbirths in 2011, classified by age of mother and number of previous live and stillborn children	112
4.13	Stillbirths in 2011, classified by cause and period of gestation	113
4.14	Stillbirths in 2011, classified by cause and number of previous children	114
4.15	Stillbirths in 2011, classified by cause and age of mother at maternity	115
4.16	Stillbirths in 2011, classified by cause and birthweight	116

Note: The following pages are blank; 10, 20, 26, 56 and 94

Appendix	117
A Deaths which were registered on the authority of the Superintendent Registrars in 2011, classified by underlying cause of death, sex and age-group	118
B Deaths which were registered on the authority of the Superintendent Registrars in 2011, classified by underlying cause of death, sex and year of occurrence	119
C Deaths from accidents, poisoning and violence which were registered on the authority of the Superintendent Registrars in 2011, classified by sex and age-group	120
D Deaths from accidents, poisoning and violence which were registered on the authority of the Superintendent Registrars in 2011, classified by sex and year of occurrence	120
Glossary of Terms	121
NUTS III Regional Authority areas and EU-15 and EU-27 countries	121

Chapter 1

General Summary 2011

This report has been prepared by the Central Statistics Office for the Minister of Social Protection in accordance with the provisions of Section 2 of the Vital Statistics and Births, Deaths and Marriages Registration Act, 1952, with the provisions of Section 73 of the Civil Registration Act 2004 and the Government Order (SI No. 831 of 2007).

The main statistics contained in this report have already been published, classified by year of registration, in the CSO's Quarterly Vital Statistics reports. This annual report provides additional information on the births and deaths that occurred in 2011. The year of occurrence data have been compiled from registration data for 2011 and 2012.

This report also includes information on registered stillbirths. This replaced the series on late foetal deaths compiled up to 1994. Registration of stillbirths became available following the introduction of the Stillbirths Registration Act 1994. This act was subsequently superseded by the Civil Registration Act 2004 (part 3 refers).

Live Births: There were 74,033 children born in Ireland during 2011, down 1,141 or 1.5% from 2010. Excluding, 2008, 2009 and 2010 the number of births in 2011 is the highest since 1980.

The birth rate was 16.2 per 1,000 of the population compared with 16.5 in 2010 and 15.0 in 2001.

The total period fertility rate (TPFR), or the average number of children per woman, was 2.02 in 2011, 0.04 lower than 2010 and just below replacement level. A value of 2.1 is generally taken to be the level at which a generation would replace itself in the long run, ignoring migration. See Chapter 2.

Ireland continues to have the highest fertility rate of the 27 EU member states in 2010 at 2.02 children per woman.

In 2011, there were 26,764 babies born to women aged 30 to 34, the highest number of all 5 year age-groups representing over a third of all births (36.2%).

In 1993, there was an important shift in the age structure of fertility. Prior to 1993, the age-specific fertility rate was highest among women aged 25 to 29. (The age-specific fertility rate is the number of births per woman within a specific age group.) In 1993 the highest fertility rate shifted from that age group to women aged 30 to 34.

Just over 22.2% of births in 2011 were to mothers of non-Irish nationality.

The number of births outside marriage/civil partnership that occurred in 2011 was 25,091 or 33.9% of all births. See *Chapter 2*.

In 2011, Thursday 29th September saw the highest number of babies born in one single day (269). The lowest number of babies born in one day in the year was on the 8th May (113).

Deaths: There were 28,456 deaths in Ireland in 2011, of which 14,492 were males and 13,964 were females. This is equivalent to a rate of 6.22 deaths per 1,000 total population compared with 6.14 in 2010 and 7.85 in 2001. The crude death rate per 1,000 of population has shown a gradual downward trend since the beginning of the century with the most striking long-term falls occurring in the death rates at the younger ages.

Diseases of the circulatory system, neoplasms and diseases of the respiratory system were responsible for just under 76% of the 28,456 deaths in 2011.

Diseases of the circulatory system accounted for 32.5% of deaths, neoplasms 31.2% and diseases of the respiratory system 12.1% in 2011.

Ranked in order, the other seven leading causes of death were external causes of injury and poisoning, diseases of the nervous system, diseases of the digestive system, mental and behavioural disorders, diseases of the genitourinary system, endocrine, nutritional and metabolic diseases, and infectious and parasitic diseases.

The leading causes of death varied widely by age group in 2011. Among young adults aged 15 to 44, external causes of injury and poisoning ranked first.

Among individuals aged 45 to 74, neoplasms was the leading cause, while for those aged 75 and older, it was diseases of the circulatory system. See *Chapter 3*.

Infant Mortality: During 2011 the number of deaths of infants under one year of age was 262 compared with 271 in 2010. The corresponding rate decreased from 3.6 to 3.5 per 1,000 live births. See *Chapter 4*.

Stillbirths: The number of stillbirths occurring during 2011 was 211 compared with 273 in 2010. The respective corresponding rates for 2011 and 2010 were 2.8 and 3.6 per 1,000 live and stillborn children. See *Chapter 4*.

Population: The usual residence Population in April 2011 was 4,574,888: 2,270,506 males and 2,304,382 females.

Usual residence population concept: For the purpose of this release the population concept of usual residence has been used, i.e. all persons usually resident and present in the State on census night *plus* absent persons who are usually resident in Ireland but are temporarily away from home *and outside the State* on census night. All persons are classified according to their region of usual residence.

Issue of Authority for Registration: Births and deaths (where no inquest has been held) which have not been registered within one year of their occurrence can be registered only on the authority of the Superintendent Registrars. The tables in the main body of this report exclude such births and deaths. The Appendix to the report contains an analysis of late death registrations in 2011 and of some deaths where an inquest has been held. The number of such deaths registered in 2011 was 578.

More up to date information on Vital Statistics is published in the Quarterly Report on Births, Deaths and Marriages published about six months after the end of the quarter to which the data relate. In the Quarterly Report, births and deaths are classified according to quarter of registration.

Births are classified according to the area of residence of the mother and deaths according to the area of residence of the deceased. Births and deaths for each year since 1943 exclude late registrations; while deaths for each of the years 1940 to 1967 exclude non-residents. From 1968 however, the number of deaths includes non-residents.

For more detailed information and breakdowns in relation to the births and deaths please go to: <http://www.cso.ie/px/pxeirestat/statire/SelectTable/Omrade0.asp?Planguage=0> and follow the 'People and Society' theme.

Tables

Table 1.1 Estimated population in thousands in each year 1851 - 2011¹

Year	Persons	Males	Females	Year	Persons	Males	Females	Year	Persons	Males	Females
1851	5,079	2,486	2,593	1911	3,132	1,586	1,546	1971	2,978	1,496	1,482
